# 2014 Workshop on Education for High Performance Computing

**EduHPC 2014**

## Table of Contents

**Message from the Workshop Chair**

**Workshop Organization**

---

## Technical Papers

- **Using the Pilot Library to Teach Message-Passing Programming**
  William B. Gardner and John D. Carter
  
- **HPC/PDC Immunization in the Introductory Computer Science Sequence**
  David Valentine

- **PDC Education in the BGU ECE Department**
  Guy Tel-Zur

- **Development of a Computational and Data-Enabled Science and Engineering Ph.D. Program**
  Paul T. Bauman, Varun Chandola, Abani Patra, and Matthew Jones

- **Trusted High-Performance Computing in the Classroom**
  Helmar Burkhart, Danilo Guerrera, and Antonio Maffia

- **Teaching High Performance Computing: Lessons from a Flipped Classroom, Project-Based Course on Finite Element Methods**
  Jill Zarestky and Wolfgang Bangerth

- **Teaching Parallelism without Programming: A Data Science Curriculum for Non-CS Students**
  Yolanda Gil

- **The Blue Waters Student Internship Program: Promoting Competence and Confidence for Next Generation Researchers in High-Performance Computing**
  Patricia Jacobs, Phillip List, Mobeen Ludin, Aaron Weeden, and Robert M. Panoff

- **Teaching Parallel Programming Using Java**
  Aamir Shafi, Aleem Akhtar, Ansar Javed, and Bryan Carpenter
