The Fourth International Conference of Educational Innovation through Technology (EITT 2015) is being held October 16–18, 2015, jointly with Central China Normal University, in Wuhan, China. EITT provides a forum for researchers who study technology and education to publish research findings and exchange experiences in the field. The conference is organized annually by the Society of International Chinese in Educational Technology (SICET).

The conference proceedings collect the 64 articles that were accepted out of 120 submissions. All submissions were peer-reviewed in a double-blind review process. The topics of the selected articles and the concurrent sessions include Emerging Technologies to Learning and Teaching, Innovative Approaches to Learning and Learning Environments, and the Information Society and Culture.

We acknowledge the invaluable support from many scholars who helped in various significant ways to make this conference a reality. Our sincere appreciation goes to all authors and speakers for their excellent contributions, to all session facilitators for their effort and enthusiasm, and to all the Program Committee members and referees for their time and effort in reviewing the submissions. We would also like to thank the Central China Normal University for hosting the conference this year. Special thanks go to the IEEE Conference Publishing Services (CPS) for helping us to publish and promote the EITT 2015 proceedings.

We heartily wish all EITT 2015 participants a fruitful time at the conference, and a pleasant stay in Wuhan.

**Jiangang Cheng**, Tsinghua University, Beijing  
**Harrison Hao Yang**, State University of New York, Oswego, and Central China Normal University, Wuhan  
**Chin-Chung Tsai**, Taiwan University of Science and Technology, Taipei
