Contents

Foreword ......................................................... iii

The Changing Landscape of Requirements Engineering Practices over the Past Decade
Mohamad Kassab — Pennsylvania State University, USA ........................................... 1

Cognitive Effectiveness of Conceptual Modeling Languages: Examining Professional Modelers
Dirk van der Linden and Irit Hadar — Luxembourg Institute of Science and Technology, Luxembourg; University of Haifa, Israel ......................................................... 9

Inviting Everyone to Play: Gamifying Collaborative Requirements Engineering
Naomi Unkelos-Shpigel and Irit Hadar — University of Haifa, Israel .......................... 13

Towards a Theory on the Interaction between Requirements Engineering and Systems Architecting
Remo Ferrari, Ibtehal Noorwali, and Nazim H. Madhavji — Siemens, USA; University of Western Ontario, Canada .......................... 17

Addressing the Challenges of Requirements Ambiguity: A Review of Empirical Literature
Muneera Bano — University of Technology Sydney, Australia ........................................ 21

Which Security Catalogue Is Better for Novices?
Katsiaryna Labunets, Federica Paci, and Fabio Massacci — University of Trento, Italy ........ 25

Can We Know Upfront How to Prioritize Quality Requirements?
Nelly Condori-Fernández and Patricia Lago — VU University Amsterdam, Netherlands ...... 33

Cross-Organizational Challenges of Requirements Engineering in the AUTOSAR Ecosystem: An Exploratory Case Study
Mozhan Soltani and Eric Knauss — University of Gothenburg, Sweden; Chalmers University of Technology, Sweden ..................................................... 41

How Do Open Source Software (OSS) Developers Practice and Perceive Requirements Engineering? An Empirical Study
Jaison Kuriakose and Jeffrey Parsons — Memorial University, Canada ............................ 49
