# 2013 ACM / IEEE International Symposium on Empirical Software Engineering and Measurement

## ESEM 2013

### Table of Contents

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Welcome from the ESEM 2013 General Chairs</td>
<td>ix</td>
</tr>
<tr>
<td>ESEM 2013 Committee Members</td>
<td>x</td>
</tr>
<tr>
<td><strong>Keynotes</strong></td>
<td></td>
</tr>
<tr>
<td>High Impact Research: Blending Basic and Applied Methods</td>
<td>3</td>
</tr>
<tr>
<td><em>Ben Shneiderman</em></td>
<td></td>
</tr>
<tr>
<td>Towards Understanding Replication of Software Engineering Experiments</td>
<td>4</td>
</tr>
<tr>
<td><em>Natalia Juristo</em></td>
<td></td>
</tr>
<tr>
<td><strong>Full Papers</strong></td>
<td></td>
</tr>
<tr>
<td>An Empirical Study of API Usability</td>
<td>5</td>
</tr>
<tr>
<td><em>Marco Piccioni, Carlo A. Furia, and Bertrand Meyer</em></td>
<td></td>
</tr>
<tr>
<td>Real Challenges in Mobile App Development</td>
<td>15</td>
</tr>
<tr>
<td><em>Mona Erfani Joorabchi, Ali Mesbah, and Philippe Kruchten</em></td>
<td></td>
</tr>
<tr>
<td>Tracing Requirements and Source Code during Software Development: An Empirical Study</td>
<td>25</td>
</tr>
<tr>
<td><em>Alexander Delater and Barbara Paech</em></td>
<td></td>
</tr>
<tr>
<td>Automatic Checking of Conformance to Requirement Boilerplates via Text Chunking: An Industrial Case Study</td>
<td>35</td>
</tr>
<tr>
<td><em>Chetan Arora, Mehrdad Sabetzadeh, Lionel Briand, Frank Zimmer, and Raul Gnaga</em></td>
<td></td>
</tr>
<tr>
<td>Learning from Open-Source Projects: An Empirical Study on Defect Prediction</td>
<td>45</td>
</tr>
<tr>
<td><em>Zhimin He, Fayola Peters, Tim Menzies, and Ye Yang</em></td>
<td></td>
</tr>
<tr>
<td>An Empirical Study of Client-Side JavaScript Bugs</td>
<td>55</td>
</tr>
<tr>
<td><em>Frolin S. Ocariza Jr., Kartik Bajaj, Karthik Pattabiraman, and Ali Mesbah</em></td>
<td></td>
</tr>
<tr>
<td>When a Patch Goes Bad: Exploring the Properties of Vulnerability-Contributing Commits</td>
<td>65</td>
</tr>
<tr>
<td><em>Andrew Meneely, Harshavardhan Srinivasan, Ayemi Musa, Alberto Rodriguez Tejeda, Matthew Mokary, and Brian Spates</em></td>
<td></td>
</tr>

</table>
Have Agile Techniques been the Silver Bullet for Software Development at Microsoft? 

Brendan Murphy, Christian Bird, Thomas Zimmermann, Laurie Williams, 
Nachiappan Nagappan, and Andrew Begel

Ville T. Heikkinä, Maria Paasivaara, and Casper Lassenius

Obstacles to Efficient Daily Meetings in Agile Development Projects: A Case Study

Viktoria Gulliksen Stray, Yngve Lindsjørn, and Dag I.K. Sjøberg

A Replicated Experiment on the Effectiveness of Test-First Development

Davide Fucci and Burak Turhan

How Significant is the Effect of Fault Interactions on Coverage-Based Fault Localizations?

Xiaozhen Xue and Akbar Siami Namin

Expectations and Achievements: A Longitudinal Study on an Offshoring Strategy

Darja Šmite and Daniela S. Cruzes

Amiangshu Bosu and Jeffrey C. Carver

Lessons from Conducting a Distributed Quasi-experiment

David Budgen, Barbara Kitchenham, Stuart Charters, Shirley Gibbs, Amnart Pohthong, 
Jacky Keung, and Pearl Brereton

Using Meta-ethnography to Synthesize Research: A Worked Example of the Relations between Personality and Software Team Processes

Fábio Q.B. da Silva, Shirley S.J.O. Cruz, Tatiana B. Gouveia, and Luiz Fernando Capretz

An Experimental Comparison of Two Risk-Based Security Methods

Katsiaryna Labunets, Fabio Massacci, Federica Paci, and Le Minh Sang Tran

Using Ensembles for Web Effort Estimation

Damir Azhar, Patricia Riddle, Emilia Mendes, Nikolaos Mitas, and Lefteris Angelis

Benchmarking Usability and Performance of Multicore Languages

Sebastian Nanz, Scott West, Kaue Soares da Silveira, and Bertrand Meyer

DevNet: Exploring Developer Collaboration in Heterogeneous Networks of Bug Repositories

Song Wang, Wen Zhang, Ye Yang, and Qing Wang

Identifying Barriers to the Systematic Literature Review Process

Jeffrey C. Carver, Edgar Hassler, Elis Hernandes, and Nicholas A. Kraft

Identifying Experimental Incidents in Software Engineering Replications

Martin Solari

Experimental Comparison of Two Safety Analysis Methods and Its Replication

Jessica Jung, Kai Hoefig, Dominik Domis, Andreas Jedlitschka, and Martin Hiller

Replication Data Management: Needs and Solutions—An Initial Evaluation of Conceptual Approaches for Integrating Heterogeneous Replication Study Data

Stefan Biffl, Estefanía Serral, Dietmar Winkler, Nelly Condori-Fernández, Oscar Dieste, 
and Natalia Juristo
Short Papers

IR in Software Traceability: From a Bird’s Eye View ................................................................. 243
Markus Borg and Per Runeson

Impact of Triage: A Study of Mozilla and Gnome ................................................................. 247
Jialiang Xie, Minghui Zhou, and Audris Mockus

On the Use of Input/Output Queries for Code Search ......................................................... 251
Kathryn T. Stolee and Sebastian Elbaum

An Embedded Multiple-Case Study on OSS Design Quality Assessment across Domains ............................................... 255
Apostolos Ampatzoglou, Antonios Gkortzis, Sofia Charalampidou, and Paris Avgeriou

Evaluating Software Product Metrics with Synthetic Defect Data ........................................ 259
Jeffrey Stuckman, Kent Wills, and James Partilo

The Case for Knowledge Translation ..................................................................................... 263
David Budgen, Barbara Kitchenham, and Pearl Brereton

Understanding the Impact of Artefact-Based RE—Design of a Replication Study .......... 267
Birgit Penzenstadler, Daniel Méndez Fernández, and Jonas Eckhardt

An Empirical Validation of Coupling Metrics Using Automated Refactoring .................. 271
Varsha Veerappa and Rachel Harrison

Using Amazon’s Mechanical Turk for User Studies: Eight Things You Need to Know .......................................................... 275
Lucas Layman and Gunnar Sigurðsson

Would Sociable Software Engineers Observe Better? ......................................................... 279
Rafael M. de Mello and Guilherme H. Travassos

Incremental Estimation of Project Failure Risk with Naive Bayes Classifier .................. 283
Toshiki Mori, Shurei Tamura, and Shingo Kakui

Classification of Language Interactions .............................................................................. 287
Federico Tomassetti, Marco Torchiano, and Antonio Vetro

CCM: A Tool for Measuring Combinatorial Coverage of System State Space .................. 291
Itzel Dominguez Mendoza, D. Richard Kuhn, Raghu N. Kacker, and Yu Lei

Motivation to Perform Systematic Reviews and their Impact on Software Engineering Practice ............................................................................... 292
Ronnie E.S. Santos and Fábio Q.B. da Silva

Christopher Marshall and Pearl Brereton

Can Automated Text Classification Improve Content Analysis of Software Project Data? ......................................................................................................................... 300
John Noll, Dominik Seichter, and Sarah Beecham

Industrial Papers

Combinatorial Testing Tool Learnability in an Industrial Environment .................................... 304
Peter M. Kruse, Nelly Condori-Fernández, Tanja E.J. Vos, Alessandra Bagnato, and Etienne Brosse

Recommendations to the Adoption of New Software Practices: A Case Study of Team Intention and Behavior in Three Software Companies .................................................................................. 313
Carol Passos, Daniela S. Cruzes, Arthur Hayne, and Manoel Mendonça
