Conference Title:
2010 Second International Workshop on Education Technology and Computer Science

ETCS 2010

Table of Contents
Volume - 2

Message from the Workshop Chairs - Volume 2 ...................................................... xix
Organizing Committee - Volume 2 ........................................................................... xx
Committee Members - Volume 2 .............................................................................. xxi
Reviewers - Volume 2 ............................................................................................. xxii

Second International Workshop on Education Technology and Computer Science

Using Comprehension Degree to Improve the Quality of Recommender System for Group Learning Support ........................................................................................................... 3
Xin Wan, Qimanguli Jamaliding, Xinyou Zhao, Fumihiko Anma, and Toshio Okamoto

Enhance Reusability with Application-level Software Components ........................................... 7
Jin Guojie, Yin Baolin, and Zhao Qiyang

Immune Genetic Algorithm and Its Application on Job Shop Scheduling .................................. 11
Qiao Wei, Li Qiaoyun, Ju Chuanbao, and Sun Jie

A Refined TF-IDF Algorithm Based on Channel Distribution Information for Web News Feature Extraction ...................................................................................................... 15
Mingmin Xu, Liang He, and Xin Lin

Classification of Plant Leaves by Near-infrared Spectroscopy Using ANN and Wavelet .................................................................................................................... 20
Tian-tai Guo, Bo Zhang, Lin Guo, Dong-sheng Li, Ying Wu, Jun-jie Wu, and Liang Zhao

Real-Time Face Pose Estimation in Video Sequence ................................................................ 24
Xiaoping Chen, Qianqian Yang, Honghong Liao, Weiping Sun, and Shengsheng Yu
Benchmark Object for Virtual Machines .................................................................28
    Xia Xie, Qingcha Chen, Wenzhi Cao, Pingpeng Yuan, and Hai Jin
A New Approach of Graph Isomorphism Detection Based on Decision Tree ..................32
    Ming Qiu, Haibin Hu, Qingshan Jiang, and Hailong Hu
A Simple and Fast Algorithm for Global K-means Clustering .....................................36
    Juanying Xie and Shuai Jiang
Wavelet Transform with a New Selection Strategy for Image Fusion ..........................41
    Yong Yang
Improved Particle Swarm Cooperative Optimization Algorithm Based on Chaos & Simplex Method .................................................................45
    Shengli Song, Shujun Liang, Li Kong, and Jingjing Cheng
Drowsiness Detection Based on Eyelid Movement .....................................................49
    Danghui Liu, Peng Sun, YanQing Xiao, and Yunxia Yin
An Optimization Method of Hidden Nodes for Neural Network .................................53
    Pengyi Gao, Chuanbo Chen, and Sheng Qin
Spectral Features and Regression Model of Mine Vegetation in the Press of Heavy Metal .................................................................57
    Hu Hong, Yang Feng-jie, Zhou Guang-zhu, and Li Yin-ming
Global Face Recognition Framework Based on Symmetrical 2DPLS by Two Sides Plus LDA .................................................................60
    Jiadong Song, Xiaojuan Li, Pengfei Xu, and Mingquan Zhou
A Stepwise Augment Algorithm for the Construction of Reduced Q-Matrix ..................65
    Wu Wenbing, Chen Wenxiang, Wu Wenbing, and Yang Shuqun
A Study on Steam Generator for Domestic Steam Cleaner with Cartridge Heater ..................69
    Yun-De Shen, Gui-Ying Shen, Zhen-Zhe Li, Ming Ren, and Seoung-Yun Seol
A Clustering Algorithm Based on Cell Combination for Wireless Sensor Networks ..................74
    Luo Chang-ri, Zhu Yun, Zhang Xin-hua, and Zhou Zi-bo
Unsupervised Behavior Evaluation Method in Trustworthy Network ..........................78
    Changping Liu, Mingyu Fan, and Guangwei Wang
A Nonrigid Image Registration Approach Based on Cooperative Game Among Pixels ..................82
    Yuwu Yan, Jinmang Liu, Xiaqiang Yao, and Yajun Sun
License Plate Character Segmentation and Recognition Based on RBF Neural Network ..................86
    Baoming Shan
An Efficient Method for Skew Correction of License Plate ..................................90
    Renlong Pan, Xiaojuan Ma, and Lin Wang
Automated Essay Scoring System for CET4 ..................................................94
    Yali Li and Yonghong Yan
An Opportunistic Routing Protocol Based on Random Linear Network Coding in Wireless Sensor Networks ................................................................................................................................. 98
  Xiaoping Li, Dongming Li, Luyang Liu, and Hongjian Dong

Face Pose Estimate Technology and Its Application in Video Invigilation ................................................................................................................................. 102
  Xiaoping Li, Jing Li, Luyang Liu, and Jianqiang Xu

Ultrasound CT Image Segmentation Based on Region Growing ................................................................................................................................. 106
  Wang Hao-quan and Xing Hao

An Improved Tripartite Authenticated Key Agreement Protocol from Pairings ........................................................................................................... 110
  Peng He, Qiuliang Xu, and Ruiguang Liu

Combination of ^1H NMR and Chemometrics for Discrimination of Rapeseed Oils ............................................................................................................. 114
  Xiaojing Chen, Xiangou Zhu, and Xinxiang Lei

Web Log Data Preprocessing Based on Collaborative Filtering ................................................................................................................................. 118
  Jiang Chang-bin and Chen Li

Novel Identity-Based Blind Signature for Electronic Voting System ................................................................................................................................. 122
  Leyou Zhang, Yupu Hu, Xu’an Tian, and Yang Yang

Time-dependent Optimal Heater Control Using NURBS and RSM ................................................................................................................................. 126
  Zhen-Zhe Li, Rui Jiang, Ming Ren, Yun-De Shen, and Seoung-Yun Seol

Research on Computation Methods of Fire Flowfield in Cylindrical Sealed Space ............................................................................................................. 130
  Wang Lei and Pu Jin-yun

Pixel-Based Fragile Image Watermarking Algorithm ................................................................................................................................. 134
  Yin Ke-xin, Zhu Jian-qi, Liu Bing, and Zhong Guan-qun

New Method of Database Design Based on DFDC ................................................................................................................................. 138
  Chen Bingchuan, Li Lei, and Wang Heyong

An Optimal Storage Assignment Policy for Automated Storage and Retrieval Systems ............................................................................................................. 142
  Ling Zhou, Guiliang Zhou, and Xiaojian Xie

The Design of Kademlia System Base on Network Topology Matching ........................................................................................................... 146
  Zhiyi Chen, Minghe Huang, and Qi Tan

Research on Similarity Mining for Flight Data ................................................................................................................................. 150
  Yang Hui, Wang Yufang, and Gao Yuan

A Cross-Layer Efficient Routing Protocol for Ad hoc Networks ................................................................................................................................. 154
  Wang Qing-wen, Shi Hao-shan, Jiang Yi, and Cheng Wei

Selecting Cover for Image Steganography by Correlation Coefficient ........................................................................................................... 159
  Yifeng Sun and Fenlin Liu

An Interactive Mathematics Education Platform Based on Topic-Based Deep Search ............................................................................................................. 163
  Li Yang, Mo Qian, and Wang Fang
Study on Region Moment of Planner Objects Combining with the Affine Invariant Feature ................................................................................................................................................................. 170
   Mengqiang Xiao and Xianmin Wei

Numerical Simulation of Oil Steel Pipe in Induction Heat Treatment Process ............................................................................................................................. 174
   Hao Liu and Jianhua Rao

Application of Schema Theory to Data Communications Teaching of E-Commerce Major ............................................................................................................................................. 178
   Jianhua Jiang, Shuxin Guo, Gaochao Xu, and Xiaohui Wei

Trust Model Based on Rewards and Punishment Mechanism ....................................................................................................................................................... 182
   Ma Xiaoxue, Wang Zixian, Bian Jing, and Liu Fei

The Non-uniform Property of Energy Consumption and its Solution to the Wireless Sensor Network ................................................................................................................. 186
   Yang Wenguo and Guo Tiande

A Refined MDI Approach Based on Frame Classification for IPTV Video Quality Evaluation ........................................................................................................................................................................ 193
   Shaofen Fan and Liang He

A Pairwise Key Management Scheme Based on Hash Function for Wireless Sensor Networks ................................................................................................................................................................................. 198
   Wenqi Yu

Face Recognition Based on SFLBP .................................................................................................................................................................................. 202
   ZhiSheng Gao and HongZhao Yuan

Run-Based Approach to Labeling Connected Components in Document Images ........................................................................................................................................................................... 206
   Xiao Tu and Yue Lu

Cliffor Manifold Learning Using Neighbor Graphs .................................................................................................................................................................................. 210
   Wenming Cao and Yanshan Li

Research on Process Performance of Computer Supported Cooperative Work ........................................................................................................................................................................... 214
   Dao Cheng Hong, Hong Ling, Cheng Hong Zhang, and Yang Mei Li

Automatic Classification of Modulations in the Flat Fading HF Channel Based on Watterson Model ........................................................................................................................................................................ 218
   Liu Ming, Li Jianqiang, and Jiang Hua

Research on Hybrid Clustering Based on Density and Ant Colony Algorithm ........................................................................................................................................................................ 222
   Lan Li, Wan-chun Wu, and Qiao-mei Rong

An Algorithm of Fast Mining Frequent Itemsets Based on Sequence Number ........................................................................................................................................................................ 226
   Gang Fang, Jia-Liang Xu, Wei-Min Luo, and Jiang Xiong

A Model of Chinese Word Sense Disambiguation Based on Combining Rule and Statistics Method ........................................................................................................................................................................ 230
   Yangsen Zhang and Haiyan Kang

Image Fusion Algorithm Based on m-PCNN .................................................................................................................................................................................. 235
   Liyong Bao, Dongfeng Zhao, and Dongming Zhou
Application of Digital Speckle Correlation Method Combined with Edge Tracking in Sheet Tensile Test ................................................................. 239
   Zhou Guofeng and Li Xiaoxing

Supporting Distributed Collaboration in IT Service Management ........................................... 243
   Wei Yan, Beijun Shen, and Delai Chen

Performance Evaluation of Post-Relational Database in Hospital Information Systems ............................................................ 247
   Yu Haiyan, Li Jingsong, Chen Huan, Zhang Xiaoguang, Tian Yu, and Yang Yiping

Scenario Elicitation from Natural Language Requirements ................................................... 252
   Xiaoli Liu

Research on Security of Trusted Network and Its Prospects ............................................... 256
   Fuxiong Wang, Ziqian Xiao, and Jingyou Chen

Computing R-contraction for Propositional Logic is Hard .................................................. 260
   He Li and Lusong Li

The Theoretical Research on Digital Educational Information Resources Service System ........................................................................... 264
   Cheng Jiejing, Xiong Dongping, Liu Xiaoxiao, Huang Jingjing, and Yang Lin

Application of Kalman Filter Method to the Date Processing of GPS Deformation Monitoring ........................................................................ 269
   Debao Yuan, Ximin Cui, Dongli Fan, Weiguang Feng, and Yiju Yu

A Framework for Implementing and Managing Platform as a Service in a Virtual Cloud Computing Lab ............................................................ 273
   Wenhong Tian, Sheng Su, and Guoming Lu

Statistic and Analysis for Host-Based Syslog ..................................................................... 277
   Gu Zhaojun and Wang Chao

The Application of Cultural Information Resources in Trademark Translation ...................... 281
   Xu Xiaojun and Wang Xiaoli

Research on the Web Services Selection Problem ............................................................. 284
   Feng Guo, Lihong Zhao, Yi Wang, and Meng Zhang

A New Three-satellite High-precision RDSS/RNSS Combination Positioning Method ................................................................. 288
   Chang-jiang Dou, Bin-qi Zhang, Shu-sen Tan, and Teng Long

An Intelligent Tutoring Architecture for Scenario-Based Flight Training ................................ 291
   Geng Xiaobing, Zhang Zhiwen, Jiang Yongshi, and Yang Yiping

The Framework of Active Cartography of Statistical Map .................................................... 295
   Su De-guo, Liu Ji-ping, Cui Xi-min, Qiu Ya-hui, and Wang Jia-feng

Decision-making of Risk Aversion for Power Enterprises by Hedging during the Building of Smart Grid ................................................................. 299
   Fan Yang and Cunbin Li

Research of Optimization Algorithm for Path-Based Regression Testing Suit ..................... 303
   Bing Jiang, Yongmin Mu, and Zhihua Zhang
Design Teacher Educational Technique Training Policies Based on Teacher’s Personality Characteristics in E-learning .................................................................307

Chen Gang

Design of a DRM System for Electronic Document Publication ..........................................................311

Yang Liu, Chi Zhang, and PengZhou Zhang

The Research of Families of Odd-periodic Perfect Complementary Sequence Pairs ............................................................315

Jin Hui-long, Liang Guo-dong, Xu Cheng-qian, and Zhang Jin-bo

The Study of the Optimization and Feasibility in Guess Methods for Basketball Lottery ..........................................................319

Yan Yang and Jianwu Fang

A Hybrid Approach Based on Immune Genetic Algorithm and Integer Linear Programming for the Container Loading Problem ..................................................323

Huizhi Yang and Jianguo Shi

A Four Stages Protocol Designed to Protect Copyright in Digital Museum ..........................................................327

Daxing Zhang and Zhongmei Liu

Using Neural Network to Evaluate Construction Land Use Suitability ..........................................................331

Li Qin Zhang, Jiangfeng Li, Chunfang Kong, Liping Qu, Jianghong Zhu, Zhongda Chen, and Yida Luo

GIS Based Land Use Decision in Urban Region Case from Hangzhou, China ..........................................................335

Li Qin Zhang, Jiangfeng Li, Liping Qu, Jianghong Zhu, Chunfang Kong, Zhongda Chen, and Yida Luo

Analysis and Design for Intrusion Detection System Based on Data Mining ..........................................................339

Duanyang Zhao, Qingxiang Xu, and Zhilin Feng

A New Method of Data Processing in the Intrusion Detection System with Neural Networks ..........................................................343

Bi Jing, Cheng Xioajing, and Zhang Kun

Research for Value and Responsibility System of Computer Network Benefit Community ..........................................................346

Xie Zhibin and Shun Baoshou

Research on Realization Mechanism of ISEE Based on Product Line ..........................................................350

Jianli Dong and NingGuo Shi

Soundness Verification and Analysis of Interorganizational Logical Workflow Nets ..........................................................354

Wei Liu, YuYue Du, HaiChun Sun, and Chun Yan

The Research of Firm Optimal Hedging Based on the Technology of Basis Replication ..........................................................358

Wang Baosen and Zhao Chengzhen

New Strange Attractor for a Delayed Nonautonomous Predator-prey Model Controlled by Impulse ..........................................................367

Zhanji Gui, Jie Zhang, and Yu-Cheng Zhang
