The Eighth IEEE Workshop on Future Trends of Distributed Computing Systems
FTDCS 2001

Message from the Workshop Chair ........................................................................................................... viii
Message from PC Co-Chairs .................................................................................................................... ix
Conference Organization ........................................................................................................................... x

## Session 1: Collaborative and Cooperative Software Engineering I

*Chair: Amndt Bode, Technical University of Munich, Germany*

A Combined Component-Based Approach for the Design of Distributed Software Systems ............... 2
  *A. de Farias, L. Pires, M. van Sinderen, and D. Quartel*

Towards an Aspect-Oriented Framework in the Design of Collaborative Virtual Environments .................. 9
  *M. Pinto, L. Fuentes, J. Troya, and M. Fayad*

## Session 2: Distributed Multimedia Computing

*Chair: Maarten Boasson, University of Amsterdam, The Netherlands*

Traffic Dispersion Strategies for Multimedia Streaming ........................................................................... 18
  *R. Chow, C.-w. Lee, and J. Liu*

Towards Information Quality Based Distribution of Multimedia Streams in Mobile Environments ............ 25
  *S. Gupta, M. Reisslein, and A. Sen*

## Session 3: Ubiquitous Computing and Web-Based Computing

*Chair: Marco Avvenuti, University of Pisa, Italy*

Context-Sensitive Object Request Broker for Ubiquitous Computing Environments ............................... 34
  *S. Yau and F. Karim*

Quality Modelling for Web-Based Information Systems ........................................................................... 41
  *Y. Zhang, H. Zhu, S. Greenwood, and Q. Huo*

Automated Support for Quality Requirements in Web-Service-Based Systems ......................................... 48
  *A. Ruiz, R. Corchuelo, A. Durán, and M. Toro*

## Session 4: Intranet and Internet Technologies for Distributed Systems

*Chair: Kinji Mori, Tokyo Institute of Technology, Japan*

Toward an Open and Collaborative Internet ............................................................................................... 56
  *F. DePaoli*

Multifunctional Optical Switches for Multistage Interconnection Networks .............................................. 62
  *Z. Zhang and T.-y. Feng*
Prototyping PHLOX, A High Performance Transaction Processing System on a Workstation Cluster with Shared Disks ................................................. 67
  K. Ohn, R. Hwang, and H. Cho

Session 5: Distributed Agents and Applications of Distributed Systems
  Chair: Radu Popscu-Zeletin, GMD-FOKUS, Germany
DPCP (Discard Past Consider Present) — A Novel Approach to Adaptive Fault Detection in Distributed Systems ................................................................. 76
  I. Sotoma and E. Madeira
A Distributed Application-Oriented Development Framework Based on Resource Management ......................................................................................... 83
  H. Zhou and H. Yang
A Distributed System, Adaptive to Trust Assessment, Based on Peer-to-Peer E-Records Replication and Storage .............................................................. 89
  M. Mont and L. Tomasi

Session 6: Java-Based Network Computing and ATM Networks
  Chair; Cesare Stefanelli, University of Ferrara, Italy
Embedding Remote Object Mobility in Java RMI ................................................................................................................................. 98
  M. Avvenuti and A. Vecchio
Low Cost Routing in Mobile Ad-hoc Networks: Is It Achievable? .................................................................................................................. 105
  R. Baldoni and R. Beraldi
End-to-end Data Transport Using SSCOP in ATM Networks ................................................................................................................ 112
  W. Lin and Y. Chen

Session 7: Network Infrastructure for High-Performance Computing I
  Chair: Sartaj Sahni, University of Florida, USA
Architecture to Support Performance Monitoring in Object Based Distributed Systems ................................................. 120
  D. Ressmann, A. Platt, and S. Rumsby
An Active Middleware to Control QoS Level in Multimedia Services ........................................................................................................ 126
  P. Bellavista, A. Corradi, R. Montanari, and C. Stefanelli
Software Replication in Three-Tiers Architectures: Is It A Real Challenge? ......................................................................................... 133
  R. Baldoni and C. Marchetti

Session 8: Mobile Computing and Communications
  Chair: Francis Lau, University of Hong Kong, Hong Kong, China
Use of Context-Awareness in Mobile Peer-to-Peer Networks ............................................................................... 142
  R. Gold and C. Mascolo
  L. Capra, C. Masclo, S. Zachariadis, and W. Emmerich
An API for High-Level Software Engineering of Distributed and Mobil Applications .................................. 155
  J. Arcangeli, C. Maurel, and F. Migeon
Session 9: Security, Safety and Assurance of Distributed Systems
Chair: Carl Chang, University of Illinois, Chicago, USA
Inconsistency Tolerance across Enterprise Solutions ................................................................. 164
P. Henderson, B. Walters, and S. Crouch
Assurance Technologies for Autonomous Train on-Board Computer System .......................... 170
M. Matsumoto, S. Shimagaki, D. Watanabe, and K. Mori

Session 10: Collaborative and Cooperative Software Engineering II
Chair: T. H. Tse, University of Hong Kong, Hong Kong, China
Efficient Construction of Fixed-Stride Multibit Tries for IP Lookup ....................................... 178
S. Sahni and K. Kim
Formalization of Computer Supported Cooperative Work Applications ................................... 185
C. Chang, J. Zhang, and T. Jiang

Session 11: Network Infrastructure for High-Performance Computing II
Chair: Randy Chow, University of Florida, USA
Voice Over IP: Correct Hardware/Software Co-Design ............................................................ 194
H. Zedan and A. Cau
Fault Tolerance as an Aspect Using JReplica ............................................................................. 201
J. Herrero, F. Sánchez, and M. Toro

Session 12: Distributed Object Computing
Chair: Peter Henderson, Southampton University, UK
Role-Based Infrastructure for Agents .......................................................................................... 210
G Cabri
A Design Pattern for Reengineering Windows Software Applications into Reusable CORBA Objects ................................................................................................................................. 215
J.-M. Lin, Z.-W. Hong, H. Jiau, and W. Chu
QoS-Driven Resource Management in Real-Time Object Based Distributed Computing Systems ................................................................................................................................. 222
K. Kim and J. Liu

Plenary Panel Session: Future Trends of Distributed Computing Systems
Chair: Stephen S. Yau, Arizona State University, USA
Panelists
Maarten Boasson, University of Amsterdam, The Netherlands
Kane Kim, University of California, Irvine, USA
Radu Popscu-Zeletin, GMD FOKUS, Germany
Giuliano Di Vitantonio, Hewlett-Packard Labs, Italy
