Acknowledgments

I would like to acknowledge the contribution of all who made GMAG’03 possible. Specially, the major credit goes to the contributors and the reviewers. I would like to thank the organizing committee and the program committee for their help with the conference theme. The efforts of Anita D’Pour (GraphicsLink), making this conference a reality, were undoubtedly a valuable help. My appreciation to Frances Titsworth and the rest of the IEEE Computer Society publication team for their high standard of editorial production of the proceedings.
