Foreword

The GREENS workshop provides a forum for practitioners and academics to share knowledge, ideas, practices and current results related to green and sustainable software engineering. The goal of GREENS 2013 is to discuss emerging research and the state of industrial practice, and to define a roadmap, both for academic research and for technology exchange with industry. Topics range from bringing sustainability and energy efficiency into all software lifecycle stages, to green measures and estimations, practices, notations, and tools to both greening the software engineering process, and greening the resulting ICT systems.

To ensure high quality papers and presentations, all submissions were reviewed by at least three program committee members whose identity was not revealed to any of the authors. The reviewers did not review papers for which they had a conflict of interest. In particular, none of the organizers participated in the review process, and in case of direct or indirect conflict of interest they have been excluded from the selection process. Out of the 13 full paper submissions, 9 full papers were accepted. Besides, two papers were invited for publication and presentation at the workshop.

The workshop dedicates most of its program to discussion. After a keynote and short presentations and discussions of each paper, facilitated working sessions will discuss the most interesting topics as identified by the attendees.

We want to thank the program committee and the additional reviewers for their availability and high quality reviews they provided. We also want to extend our gratitude to the organizers of ICSE 2013 for the facilities they gave us regarding the logistics of the workshop and the publication of the proceedings.

Up-to-date information on the workshop can be found at: http://greens.cs.vu.nl

Patricia Lago, Niklaus Meyer, Maurizio Morisio, Hausi A. Müller, Giuseppe Scanniello
(GREENS 2013 co-chairs)
Organizers:

- Patricia Lago (VU University Amsterdam, The Netherlands)
- Niklaus Meyer (Green IT SIG, Swiss Informatics Society, Switzerland)
- Maurizio Morisio (Politecnico di Torino, Italy)
- Hausi A. Müller (University of Victoria, Canada)
- Giuseppe Scanniello (Università della Basilicata, Italy)

PC Members:

- Ayse Bener, Ryerson University, Canada
- Marco Aiello, University of Groningen, Netherlands
- Luca Ardito, Politecnico di Torino, Italy
- Ioannis Athanasiadis, Democritus Univ. of Thrace, Greece
- Rami Bahsoon, School of Computer Science, University of Birmingham, UK
- Ivica Crnkovic, Malardalen University, Sweden
- Steve Easterbrook, University of Toronto, Canada
- Anthony Finkelstein, University College London, UK
- Matthias Galster, University of Groningen, Netherlands
- Qing Gu, VU University Amsterdam, Netherlands
- Wolfgang Lohmann, Informatics and Sustainability Research, Swiss Federal Laboratories for Materials Science and Technology, Switzerland
- Lin Liu, School of Software, Tsinghua University, China
- Alessandro Marchetto, Fondazione Bruno Kessler, Italy
- Henry Muccini, University of L'Aquila, Italy
- Stefan Naumann, Trier University of Applied Sciences, Environmental Campus, Germany
- Cesare Pautasso, University of Lugano, Switzerland
- Birgit Penzenstadler, TUM, Germany
- Barbara Pernici, Politecnico di Milano, Italy
- Giuseppe Procaccianti, Politecnico di Torino, Italy
- Filippo Ricca, University of Genova
- Antony Tang, Swinburne University of Tech., Australia
- Antonio Vetro', Politecnico di Torino, Italy
- Joost Visser, Software Improvement Group and Knowledge Network Green Software, Netherlands
- Andrea Zisman, City University London, UK

Additional reviewers:

- Miguel Alexandre Ferreira, Software Improvement Group, Netherlands
