Volume I

Software Technology

Preface ........................................................................................................................................... xii
Introduction ................................................................................................................................... xiv
Reviewers ...................................................................................................................................... xv

Object-Oriented Methods for Distributed Applications

Coordinators: Ian Gorton, Innes Jelly, Peter Croll, and Guido Wirtz

Engineering Distributed Object Systems: A Case of Déjà Vu? .................................................. 2

I. Jelly, P. Croll, I. Gorton, and G. Wirtz

Distributed System Design Using CORBA Components ............................................................ 4

D.I. Donaldson and J.N. Magee

SIMOD - An ODP-Extended Role-Modeling Methodology for Distributed Objects ................ 14

A.J. Berre, J.O. Aagedal, and A.R. Silva

From Architecture Down to Implementation of Safe Process Control
Applications – The Lift Case Study — ......................................................................................... 24

G. Duval and T. Cattel

A CORBA-Based Manufacturing Environment .......................................................................... 34

R.A. Whiteside, C.M. Pancerella, and P.A. Klevgard

A Three-Layer Model for Schema Management in Federated
Databases ..................................................................................................................................... 44

M. Roantree, J. Keane, and J. Murphy

POET (Parallel Object-Oriented Environment and Toolkit) and Frameworks
for Scientific Distributed Computing .......................................................................................... 54

R. Armstrong and A. Cheung

Dual, Mobile and Reactive Objects – Operating System Support for Load
Balancing Parallel VR Applications ............................................................................................. 64

Distributed Processing: Requirements for an Object-Oriented Approach ............................. 73

D.M. Marsh and L.M. Ott

Distributed Objects Platforms

Coordinators: Rachid Guerraoui and Steve Vinoski

A Flexible Object-Group-Oriented Framework to Support Large Scale
Collaborative Applications ........................................................................................................... 82

H.J. Domingos, J.L. Martins, and J.P. Simão
The Tangram DPE - A Distributed Processing Environment in a Heterogeneous Corba 2 World ................................................................. 92

M.K. Durmosch and K.D. Engel

Performance Evaluation of Communication Software Systems for Distributed Computing ......................................................... 100

R. Fatooli

OMG Object Transaction Service Based on an X/Open and ISO OSI TP Kernel .......................................................... 110

J. Liang, S. Sédillot, and B. Traverson

Consistency of Partitionable Object Groups in a CORBA Framework ........................................................ 120

P. Narasimhan, L.E. Moser, and P.M. Melliar-Smith

A Language-Based Approach to Construct Structured and Efficient Object-Based Distributed Systems .......................... 130

M. Pizka and C. Eckert

Experiences on Integration of Network Management and a Distributed Computing Platform ............................................. 140

S. Rahkila and S. Stenberg

Designing the Distributed Architecture DIPS for Cooperative Software Engineering .................................................. 150

D. Scherer, T. Murer, and A. Würtz

Protocol Comparison of Distributed Object Platforms .............................................................. 159

M. Zakaria and B. Traverson

Parallel and Distributed Algorithms ............................................................ 171

Coordinators: Michael A. Langston, Stephan Olariu, and James L. Schwing

Improved Efficient Parallel Algorithms to Recognize Interval Graphs and Interval Hypergraphs ........................................... 172

E. Dahlhaus

Graph Algorithms with Small Communication Costs .......................................................... 182

J. Zhou, P. Dymond, and X. Deng

Edge Disjoint Graph Spanners of Complete Graphs and Complete Digraphs ......................................................... 191

C. Laforest, A.L. Liestman, T.C. Shermer, and D. Sotteau

Efficient Oblivious Parallel Sorting on the MasPar MP-1 ............................................................. 200

K. Brockmann and R. Wanka

From Shared to Distributed Memory: Converting Non-Numeric Parallel Algorithms to Message Passing Interface (MPI) ........................................... 209

C.P. Breshears

MultiMessage Multicasting: Complexity and Approximations .......................................................... 211

T.F. Gonzalez

Call Scheduling in Trees, Rings and Meshes .............................................................. 221

T. Erlebach and K. Jansen

Multi-Threaded Systems: Issues, Solutions and Future .................................................................................................. 224

Coordinators: Krishna M. Kavi and A.R. Hurson

A Preliminary Performance Study of Architectural Support for Multithreading ........................................... 227

Reducing Overhead in Implementing Fine Grain Parallel Data-Structures of a Dataflow Language on Off-the-Shelf Distributed Memory
Parallel Computers .................................................. 234
  S. Kusakabe, T. Nagai, K. Inenaga, and M. Amamiya
Reducing Overheads in Distributed Shared Memory Systems .................. 244
  J. Morris, R.R. Gregg, D. Herbert, and J. McColl
ThreadMon: A Tool for Monitoring Multithreaded Program Performance ........ 253
  B.M. Kantrill and T.W. Doeppner, Jr.
A Workload Generation Environment for Trace-Driven Simulation of Shared-Bus Multiprocessors ........................................ 266
  R. Giorgi, C.A. Prete, G. Prina, and L. Ricciardi

Some Solutions for Critical Problems in the Theory and Practice of Distributed Shared Memory: Ideas and Implications ...................... 276
  V. Milutinovic, D. Milutinovic, V. Cirić, D. Starcevic,
  B. Radenkovic, and M. Ivkovic
Performance Evaluation of a C++ Library Based Multithreaded System .......... 282
  J.G. Holm, S. Parkes, and P. Banerjee
Thread Migration in the Presence of Pointers .................................. 292
  D. Cronk, M. Haines, and P. Mehrotra

Coordination Models and Languages
  Coordinator: Paolo Ciancarini

The Influence of Coordination on Program Structure .......................... 300
  F. Arbab
Collaborative Applications Experience with the Bauhaus Coordination Language ................................. 310
  N. Carriero, D. Gelernter, and S. Hupfer
  M.R.V. Chaudron and A.C.N. van Duin
Coordination Languages for Parallel Discrete Event Simulation .............. 330
  A. Fabbri and L. Donatiello
Using Scoping Rules as a Distributed Coordination Language .................. 340
  M. Fuchs
Behaviour Specification of Active Objects in Open Generative Communication Environments .................................................. 349
  T. Holvoet and T. Kielmann
On Relating Blackboards in the $\mu$Log Coordination Model .................... 359
  J.M. Jacquet and K. De Bosschere
Context Sensitivity and Synchronisation as a Taxonomics for Parallel Languages .................................................. 369
  H. McEvoy
BONITA: A Set of Tuple Space Primitives for Distributed Coordination ........ 379
  A.I.T. Rowstron and A.M. Wood
A Uniform Model for Coordinating Software Development Activities ........... 389
  K. Alho, C. Lassenius, and R. Sulonen
Coordinative Applications, Structured Coordination, and Meta Coordination 391
  R. Tolksdorf
Software Engineering for Distributed Systems ................................................................. 394

Coordinators: Patrick Nixon, Vinny Cahill, and Fethi Rabhi

Systematic Composition of Objects in Distributed Internet Applications:
Processes and Sessions ......................................................................................... 395

K.M. Chandy and A. Rijkin

Describing Open Distributed Systems: A Foundation ........................................... 405
A. Rakotonirainy, A. Berry, S. Crawley, and Z. Milosevich

Model-Integrated Programming ............................................................................. 415
H. Franke, J. Setipanovits, and G. Karsai

Re-execution of Distributed Programs to Detect Bugs Hidden by Racing Messages .... 423
R. Kilgore and C. Chase

A Lightweight Awareness Service for Industrial Environments ......................... 433
M. Mock, M. Gergeleit, and E. Nett

Integrating Trace Logic and Petri Nets Specifications ......................................... 443
N. Mazzocca, S. Russo, and V. Vittorini

Poet: Target-System-Independent Visualizations of Complex Distributed
Executions ................................................................................................................ 452
T. Kunz, D.J. Taylor, and J.P. Black

Interpretive Performance Prediction for High Performance Application
Development ........................................................................................................... 462
M. Parashar and S. Hariri

Automated Generation of Communications Software from Service
Specifications Described by State Transition Rules ............................................ 472
A. Takura

A Formal Approach for Architectural Modeling and Prototyping of
Distributed Real-Time Systems ............................................................................ 481
Y. Deng, S. Lu, and M. Evangelist

Software Engineering Methods for Designing Parallel and Distributed
Applications from Sequential Programs in Scientific Computing .................... 491
P. Luksch

Deriving Parallel Numerical Algorithms Using Data Distribution Algebras:
Wang's Algorithm .................................................................................................. 501
P. Pepper and M. Södholt

Distributed Persistent Architectures ....................................................................... 512

Coordinators: John Rosenberg, Alan Dearle, and Richard Connor

A Scalable Model of Distribution Promoting Autonomy of and Cooperation
between PJava Object Stores ................................................................................ 513
S. Spence and M.P. Atkinson

Recovery and Page Coherency for a Scalable Multicomputer Object Store .......... 523
S.M. Blackburn, R.B. Stanton, C.W. Johnson, and S.J.G. Scheuerl

Static and Dynamic Adaptation of Transactional Consistency .......................... 533
O. Theel and M. Raynal

Subtyping and Protection in Persistent Programming Languages ..................... 543
M. Hollings, J. Rosenberg, and M. Hitchens
Partitioning and Scheduling

*Coordinators: Ishfaq Ahmad and Sekhar Darbha*

Randomized Reinforcement Based Scheduling in Parallel Processor Systems .................................................. 556

A.Y. Zomaya, M. Clements, and S. Olariu

Graph Analysis and Transformation Techniques for Runtime Minimization in Multi-Threaded Architectures ................................................................. 566

M.A. Thornton and D.L. Andrews

Resource Management in the mpC Programming Environment ................................................................. 576

D. Arapov, A. Kalinov, and A. Lastovetsky

The Alignment Problem in a Linear Algebra Framework ........................................................................ 586

C.G. Diderich and M. Gengler

Parallel Raytracing: A Case Study on Partitioning and Scheduling on Workstation Clusters .................. 596

B. Freisleben, D. Hartmann, and T. Kielmann

Exploiting Delayed Synchronization Arrivals in Light-Weight Data Parallelism ........................................ 606

N. Sundaresan

Resource Reclaiming in Hard Real-Time Systems with Static and Dynamic Workloads ....................... 616

A.W. Krings and M.H. Azadmanesh

Separation Set Partitioning: Algorithm to Partition Nonstrict Programs into Sequential Threads .......... 626

C. Yang, H. Joo, and W. Yoo

A Neural Network Approach for Dynamic Load Balancing in Homogeneous Distributed Systems ........ 628

A.E. El-Abd and M.I. El-Bendary

Gang Scheduling for the IBM SP-2 Workstation Cluster ........................................................................... 630

H. Franke, P. Pattnaik, and L. Rudolph

A Lowerbound on the Schedule Time for Scheduling Tasks on Distributed Memory Systems ......... 632

S. Darbha

Distributed Virtual Reality Environments

*Coordinators: Günter Haring and Gabriele Kotsis*

The Dimensioning of a Distributed VR System ......................................................................................... 636

R.B. Araujo and C. Kirner

Incremental Encoding of Polygonal Models .............................................................................................. 638

D. Schmalstieg and G. Schaufler

Retaining Body Language in Subjective Virtual Environments Using Artifact-Centred Coordinate Systems ............................................................................... 646

K-M. Jää-Aro and D. Snowdon

Issues in the Design of a Scalable Shared Virtual Environment for the Internet ........................................ 653

R. Lea, Y. Honda, K. Matsuda, O. Hagsand, and M. Stenius

Requirements for Distributed Virtual Environments on the Internet .................................................... 663

W. Broll
Distributed Multimedia and Collaboration over the Web

Coordinators: Atul Prakash, Nalini Venkatasubramanian, and Klara Nahrstedt

Neighborhoods: A Framework for Enabling Web Based Synchronous Collaboration and Hierarchical Navigation .................................................. 666

J. Kothari, E. Grossman, and S. Mehrotra

Web-Based Software Engineering Process Management ............................................. 676

K. Hutchens, M. Oudshoorn, and K. Maciunas

Adapting a Decision Making Synchronous/Asynchronous Environment to a Distributed Hypermedia Concurrent Engineering System .............. 686

A.C. dos Santos, S.V. Ribeiro, A.C. Alves, and L.G. de Fagundes

Dynamic Multi-Path Communication for Video Traffic ........................................... 695

H. Chu and K. Nahrstedt

Computer Architecture Task Forces

Introduction ........................................................................................................ 706

Y.N. Patt

Combining General Purpose and Multimedia in One Package: Challenges and Opportunities ............................................................... 708

T.M. Conte and A. Wolfe

Configurable Computing: Concepts and Issues ....................................................... 710

W. Mangione-Smith

Whither Configurable Computing? ........................................................................ 713

C. Ebeling

End-to-End Solutions for Reconfigurable Systems: The Programming Gap and Challenges .............................................................. 714

K.V. Palem

Configurable Computing: How to Deliver the Promise! ....................................... 716

K. Bondalapati and V.K. Prasanna

Directions in General-Purpose Computing Architectures ....................................... 717

A. DeHon

ASICs, Processors, and Configurable Computing .................................................. 719

B.L. Hutchings

Performance Metrics for Configurable Computing ................................................ 720

H. Spaanenburg

Task Force on Network Storage Architecture: Abstracting the Storage Interface ................................................................. 722

G.A. Gibson

Task Force on Network Storage Architecture: Management of Future Storage ......................................................................... 724

J. Wilkes
Task Force on Network Storage Architecture: Network Attached
Storage is Inevitable ................................................................. 725

D. Anderson

Task Force on Network Storage Architecture: Internet-attached
Storage Devices ............................................................................. 726

R. Van Meter, S. Hotz, and G.G. Finn

Wireless Networking - Reaching the Extra Mile ........................................ 728

H. Alkhatib

Task Force on the Interaction of Architecture and Compilation
Technology for High-Performance Single-Processor Design .................... 730

P-C. Yew and D.J. Lilja

Architectural Trends for Shared-Memory Multiprocessors ............................ 732

P. Stenstrom

Task Force on Compiling for Processors with Instruction-Level Parallelism
M. Schlansker

Table of Contents — Volumes II, III, IV, V, and VI ...................................... 735

A Vision for a New Discipline

**Coordinators: Jay F. Nunamaker, Jr. and Ralph H. Sprague, Jr.**

A Vision for a New Discipline ................................................................. 2

*J.F. Nunamaker, Jr., J. Burgoon, K.R. Walsh and M.S. Glynn*

Charting a New Course: Developing and Implementing a Curriculum for a Masters of Information Science Degree .................................................. 12

*B. Cronin, R. Kling, and H. Rosenbaum*

Organization for Information Education: Contrasts in Curriculum Structure and Administrative Locus of Control ........................................... 23

*R.F. von Dran*

The U.C. Berkeley School of Information Management and Systems .................. 29

*R.R. Larson*

The Educated Person in the Next Millennium ............................................ 34

*M. Burgoon*

**Group Support Systems** ..................................................................... 44

**Coordinators: Alan R. Dennis and Joseph S. Valacich**

Experimental Studies of Group Decision Support Systems: An Assessment of Variables Studied and Methodology ........................................ 45

*J. Fjermestad and S.R. Hiltz*

Task and Technology Interaction (TTI): A Theory of Technological Support for Group Tasks ................................................................. 66

*A.R. Rana, M. Turoff, and S.R. Hiltz*

An Interaction Meta-Model for Groupware Theory and Research .................... 76

*R. Benbunan-Fich*

Information Exchange and Use in GSS and Verbal Group Decision Making: Effects of Minority Influence ......................................................... 84

*A.R. Dennis, K.M. Hilmer, N.J. Taylor, and A. Polito*

Quality as a Function of Quantity in Electronic Brainstorming ....................... 94

Why Does a GSS Fail to Enhance Group Consensus and Satisfaction? An Investigation from an Influence Process Perspective .................................................. 104
   W. Huang, K.K. Wei, C.Y. Tan, and K.S. Raman
A Facilitator's General Model for Managing Socio-Emotional Issues in Group Support Systems Meeting Environments ........................................... 114
   G.G. Kelly and R.P. Bostrom
Meeting Facilitation: Process versus Content Interventions .................................................. 124
   S.M. Miranda and R.P. Bostrom
Anonymity in Group Support Systems Research: New Conceptualization and Measure .................................................. 134
   A. Pinsonneault and N. Heppel

Groupware Development ........................................................................... 147
   Coordinator: Mike Morrison
   M. Morrison
Groupware Support Tools for Collaborative Software Engineering .................................................. 157
TCBWorks: A First Generation Web-Groupware System .................................................. 167
   A.R. Dennis, S.K. Poothri, and V. Natarajan

The Dynamics of Business Engineering ........................................................................... 178
   Coordinators: Gert-Jan de Vreede, Doug Vogel, Alexander Verbraeck, and Henk G. Sol
Multimodelling, A Group Approach to Modelling Interaction within Interorganizational Systems .................................................. 179
   R. van der Spek and H. Sol
An Integrated Modelling Approach for Process Support .................................................. 189
   J. Krogsste and S. Carlsen
A Cognitive Engineering Study on the Development of an Object-Oriented Process Modeling Formalism .................................................. 199
   H. Hahn, J. Hahn, and J. Kim
Generating Insight for Reengineering .................................................. 210
   K.R. Walsh and G-J. de Vreede
Animation for Validation of Business System Specification .................................................. 220
   V. Laliot
Evaluating Flexible Workflow Systems .................................................. 230
   S. Carlsen, J. Krogsste, A. Solberg, and O.I. Lindland
‘Learning by Trying’: Simulating Strategic Behavior in Group Decision Making .................................................. 240
   E. Hanappi-Egger and H. Hanappi

Organizational Memory ........................................................................... 250
   Coordinators: Joline Morrison and Lorne Olfman
Towards a Sociological Model of Organisational Memory .................................................. 252
   J.M. Corbett
Towards an Information Systems Framework for Dynamic Organisational Memory

F. Burstein, H. Linger, A. Zaslavsky, and N. Crofts

Organizational Memory: Reducing Source-Sink Distance

M. Weiser

Using Adaptive Hypermedia to Support Organizational Memory and Learning

D. Croasdell, D. Paradise, and J. Courtney

An Organizational Memory for Quality-Based Software Design and Inspection: A Collaborative Multiview Approach with Hyperlinking Capabilities

I. Tervonen, P. Kerola, and H. Oinas-Kukkonen

Organizational Memory Information Systems: Characteristics and Development Strategies

J. Morrison

Creating the Organization's Bootstrap: The Organizational Memory Function in a Military Organization

P-A. Persson

Towards a Meta-Model for Representing Organizational Memory

B. Ramesh

Justifying the Information Technology Investment for Organizational Memory

J.J. Johnson and J.E. Anderson

If an Organization Has a Memory Will It Need a Therapist?

J.R. Landry

Groupware: User Experiences

Coordinator: Jay F. Nunamaker, Jr.

Collaborating on the Internet and Intranets

D. Coleman

GroupSystems Electronic Meetings across the Enterprise - and across the World

A. Weatherall

User Driven Design of a Web-Based Group Support System

N.C. Romano, Jr., J.F. Nunamaker, Jr., and R.O. Briggs

Support for Collaborative Design: Animated Electronic Meetings

G-J. de Vreede

Group Tools and Methods to Support Data Model Development, Standardization, and Review

D.L. Dean, J.D. Lee, and J.F. Nunamaker, Jr.

Using Vertical Integration to Improve Assimilation of GSS: A Case Study

K.R. Walsh, P.D. Anglin, G.M. Beranek, and R.E. Wrenn

Supporting Inspections with an Electronic Meeting System

M. van Genuchten, W. Cornelissen, and C. van Dijk

Developing Trust in Virtual Teams

C.S. Iacono and S. Weisband

Brainstimin with a GSS: Exploring Over Time the Effects of Causal Thinking on Idea Generation and Synergy

R.E. Potter

GSS for Presentation-Style Meetings

R.M. Davidson and R.O. Briggs
Enhancing Business Process Redesign: Using Tools to Condense the Process ................................. 440
   G. Corbitt and L. Wright

A Case Study: Using Groupware to Build the Air Force Information Resource Management (IRM) Strategic Plan ................................................................. 447
   D.G. Shortt

Creating Something from Nothing: A Scientific Approach to Developing Group Support Technology Meeting Structure ......................................................... 457
   C.L. Cukierman

Using Technology for Stakeholder Consultation: The World Bank's Use of GroupSystems V in Developing Countries.......................................................... 464
   A.N. Jones and D.E. Miller

GSS Meeting Productivity and Participation Equity: A U.S. & Mexico Cross-Cultural Field Study .................................................. 469
   R.J. Mejias, D.R. Vogel, and M.M. Shepherd

Rebuilding Sarajevo Using Partnerships in Technology ............................................................ 479
   Z. Lagumdzija, M. Adkins, and D. Vogel

Using Electronic Meeting Systems for Subject and Course Evaluation .................................. 486
   M.P. Lynch and W.K. Wood

Group Decision Support for Analysing Logistics Development Projects .................................... 493
   J. Korpela and M. Tuominen

Negotiation Support Systems ................................................................................................. 504
   Coordinators: Tung Bui and Melvin F. Shakun

Implementing Negotiation Support System: Theory and Practice ........................................ 505
   W.W.C. Chung and J.J.F. Pak

Supporting Argumentation in Software Development ............................................................ 514
   T.X. Bui, P.C. Ma, and C. Stricker

ARBAS'96: A System for Argumentation Support and Organizational Memory ..................... 524
   F. Bodart, T. Bui, P. Melard, and J-F. Vanreusel

NSS for Intercultural Negotiations ...................................................................................... 533
   A. Ishikawa

Negotiation Support Systems for Intercultural Negotiation Based on Evolutionary Systems Design ...................................................... 535
   M.F. Shakun

Distributed Group Support Systems .................................................................................... 538
   Coordinators: Laku Chidambaram and Kelly Burke

MUDdling Through ............................................................................................................. 539
   S.M. Kaplan, G. Fitzpatrick, T. Mansfield, and W.J. Tolone

Awareness and Cooperative Work: The POLITeam Approach ............................................ 549
   M. Sohlenkamp, L. Fuchs, and A. Genau

Flexible Real-Time Meeting Support for Workflow Management Systems ....................... 559

An Exploratory Comparison of Four Modes of Communication for Determining Requirements: Results on Creativity, Quality and Satisfaction ........................................ 568
   R. Ocker, J. Fjermestad, S.R. Hiltz, and M. Turoff
Impact of Corporate IS Standards on Group Communication ............................................. 578
S. Sundaresan, R.M. Dewan, and A. Seidmann
Supporting Concurrent Engineering Using an Intranet Approach .................................. 589
A. Scherer

Technology-Supported Learning .................................................................................. 597

Coordinators: Robert O. Briggs and Bradley C. Wheeler

Layers of Learning: Facilitation in the Distributed Classroom .................................. 598
M. Aakhus, M. Adkins, and M. Glynn
Towards a Collaborative Hypermedia Educational Framework .............................. 610
A.R. Rana and M. Bieber

GSS to Support Classroom Discussion: Opportunities and Pitfalls .......................... 620
C.K. Tyran

Learning of Basic Concepts in Informatics Using Collaborative Hypertext:
An Experiment and Its Preliminary Results Based on SOLO Taxonomy .................. 630
P. Makkonen

The Electronic Classroom on Fire: Why it Happens, and How to Put Out
the Flames ....................................................................................................................... 639
B.A. Reining, R.O. Briggs, S.A. Brandt, and J.F. Nunamaker, Jr.

Simulation and Attitude Change: Evolving the Research Model ............................... 648
T.R. Schumacher

Understanding Organizational Implications of Change Processes:
A Multimedia Simulation Approach ............................................................................. 655
J.F. Manzoni and A.A. Anghern

Connecting Schools to the World via the Internet: Do the Walls Come
Tumbling Down or Just Get Lower? ................................................................................ 665
J.W. Schofield, J. Stocks, and A.L. Davidson

Technologies in Education and Training: Findings from the Field ......................... 673
O. Petrovic, D. Vogel, J. Scheff, and N. Kailer

Table of Contents — Volumes I, III, IV, V, and VI .................................................... 683

Author Index .................................................................................................................. 706
HICSS Table of Contents

Volume III

Information Systems —
Organizational Systems and Technology

Preface ............................................................................................................. x
Introduction ................................................................................................... xi
Reviewers ....................................................................................................... xiii

Measuring the Effectiveness of Emerging Technologies ........................... 2

Coordinator: Donald L. Amoroso

Does Feedback Improve the Accuracy of Recurrent Judgmental Forecasts? .......... 5

W. Remus, M. O'Connor, and K. Griggs

The Impact of Emerging Information Technologies on the Empowered Organization ................................................................. 7

S. Smithson and A. Psinoz

External Variables, Beliefs, Attitudes and Information Technology Usage Behavior ................................................................. 21

G.S. Hubona and S. Geitz

Will a Dominant Standard for Object-Oriented System Development Emerge? .......... 29

J. Van Hillegersberg and K. Kumar

Object Databases for SGML Document Management .................................. 39

M.R. Olson and B.S. Lee

Statistically Comparing User Satisfaction Instruments: An Application of the Bootstrap Using a Spreadsheet .............................................. 49

J.B. Woodroof

Measurement and Operationalization of Outcome Measures at a National Accounting Firm: Integrating Survey, Interview and Archival Data ............................................ 57

L.B. Splettstoesser

Delineating the Dimensions of User Participation: A Replication and Extension .......... 67

J. Hartwick and H. Barki

Technology Flexibility: Conceptualization, Validation, and Measurement ............... 76

Client/Server Processing Architectures and Task Fit: A Service Organization Perspective ................................................................................. 88

M. Anandarajan and B. Arinze
Information Technology and Market Structure .......................................................... 217

    Coordinators: Eric K. Clemons, Robert A. Schwartz, and Bruce W. Weber

Combining Quote-Driven and Order-Driven Trading Systems in Next-Generation Stock Markets: An Experimental Investigation ........................................... 218

    R.A. Schwartz and B.W. Weber

New Entrants and the Role of Information Technology A Case Study: The Tele-Flower Auction in the Netherlands ................................................................. 228

    E. van Heck, E. van Damme, J. Kleijnen, and P. Ribbers

Strategic and Competitive Information Systems .................................................................. 239

    Coordinators: Eric K. Clemons and Bruce W. Weber

Information Technology and Information Asymmetry: The Future of Private Individual Health Insurance ................................................................. 240

    E.K. Clemons, M.E. Thatcher, B. Blecherman, and D. Croson

IT-Enabled Incentive Schemes in Telephone Banking ..................................................... 249

IT-Enabled Transformation: Lessons from the Financial Services .................................. 257

    C.L. Marshall and R. Nolan

Strategic and Competitive Implications of Business Process Redesign: Analyzing the Impact of Information Systems and Organizational Design ................................ 267

    A. Seidmann and A. Sundararajan

On the Value of Information from Using Information Systems ........................................ 278

    C.F. Mason and A. Ragowsky

Creativity/Innovation in Information Systems Organizations ............................................. 289

    Coordinator: J. Daniel Couger

The Value of Creativity in Business Process Reengineering ........................................... 290

    D. Paper

Integrating the 4 Ps of Creativity in an IS Project: An Ethnographic Example from Hewlett-Packard ................................................................. 298

    J. Mandicco and L.F. Higgins

Results of a Trans-Discipline Research Structure for Study of Creativity/Innovation in I.S. ................................................................. 309

    J.D. Couger

Organizational Decision Support Systems ........................................................................ 319

    Coordinators: Sree Nilakanta and Anil K. Aggarwal

Organizational Experiences with Multicriteria Decision Support Systems: Problems and Issues ................................................................. 320

    J-C. Pomerol and P. Brézillon

DSS to Support Socio-Economic Development in Egypt .............................................. 328

    S. Kamel

ODSS in Strategic Financial and Production Planning ..................................................... 337

    H. Kivijärvi and M. Tuominen

Extending the Organizational Exchange Model (OEM) .................................................. 347

    J.R. Landry
Organizational Reconciliation: Implications for Organizational Decision Support Systems.................................................. 355
  G. Harindranath and J. Liebenau
Tools for Organizational Decision Support: The Design and Development of an Organizational Memory System.......................... 360
  L. Miller and S. Nilakanta

Information Systems in Global Business .................................................................................................................. 370
  *Coordinators: A. Geoffery Lockett, Christopher P. Holland, and William G. Chismar*

Managing Information Technology in the Transnational Organization: The Potential of Multifactor Productivity ......................... 372
  K. Reimers

Virtual Organizing as a Strategy for the “Big Six” to Stay Competitive in a Global Market.................................................. 381
  P. Sieber and J. Griese

On the Nature of Inter-Organisational Information Systems and the Issue of Adaptability.................................................. 391
  P. Kanellis and R.J. Paul

Problems of Management and Decision Making in Multinational Banking ................................................................. 398
  J. Kulfis and C. Scoble

The Strategic Impact of IT on the Retail Financial Services Industry ........................................................................... 406
  D.F. Channon

The Impact of Globalisation and Information Technology on the Strategy and Profitability of the Banking Industry .................. 418
  C.P. Holland, A.G. Lockett, and I.D. Blackman

The Growth of the Firm in China: An Information-Processing Perspective............................................................... 428

Information Systems —
Organizational Systems and Technology

Preface ................................................................. x
Introduction ......................................................... xi
Reviewers ............................................................. xiii

Measuring the Effectiveness of Emerging Technologies ........................................ 2
  Coordinator: Donald L. Amoroso

Does Feedback Improve the Accuracy of Recurrent Judgmental Forecasts? ............. 5
  W. Remus, M. O'Connor, and K. Griggs

The Impact of Emerging Information Technologies on the Empowered Organization ........................................ 7
  S. Smithson and A. Psinios

External Variables, Beliefs, Attitudes and Information Technology Usage Behavior ........................................ 21
  G.S. Hubona and S. Geitz

Will a Dominant Standard for Object-Oriented System Development Emerge? ........ 29
  J. Van Hillegersberg and K. Kumar

Object Databases for SGML Document Management ........................................ 39
  M.R. Olson and B.S. Lee

Statistically Comparing User Satisfaction Instruments: An Application of the Bootstrap Using a Spreadsheet ........................................ 49
  J.B. Woodroof

Measurement and Operationalization of Outcome Measures at a National Accounting Firm: Integrating Survey, Interview and Archival Data ........................................ 57
  I.B. Splettstoesser

Delineating the Dimensions of User Participation: A Replication and Extension ........ 67
  J. Hartwick and H. Barki

Technology Flexibility: Conceptualization, Validation, and Measurement .............. 76

Client/Server Processing Architectures and Task Fit: A Service Organization Perspective ........................................ 88
  M. Anandarajan and B. Arinze
Information Technology and Market Structure ........................................... 217

*Coordinators: Eric K. Clemons, Robert A. Schwartz, and Bruce W. Weber*

Combining Quote-Driven and Order-Driven Trading Systems in Next-Generation Stock Markets: An Experimental Investigation ........................................... 218

* R.A. Schwartz and B.W. Weber*

New Entrants and the Role of Information Technology A Case Study: The Tele-Flower Auction in the Netherlands ........................................... 228

* E. van Heck, E. van Damme, J. Kleijn, and P. Ribbers*

Strategic and Competitive Information Systems ........................................... 239

*Coordinators: Eric K. Clemons and Bruce W. Weber*

Information Technology and Information Asymmetry: The Future of Private Individual Health Insurance ........................................... 240

* E.K. Clemons, M.E. Thatcher, B. Blecherman, and D. Croson*

IT-Enabled Incentive Schemes in Telephone Banking ........................................... 249

* K. Sandbiller, A. Will, H.U. Buhl, and B.R. Nault*

IT-Enabled Transformation: Lessons from the Financial Services ........................................... 257

* C.L. Marshall and R. Nolan*

Strategic and Competitive Implications of Business Process Redesign: Analyzing the Impact of Information Systems and Organizational Design ........................................... 267

* A. Seidmann and A. Sundararajan*

On the Value of Information from Using Information Systems ........................................... 278

* C.F. Mason and A. Ragowsky*

Creativity/Innovation in Information Systems Organizations ........................................... 289

*Coordinator: J. Daniel Couger*

The Value of Creativity in Business Process Reengineering ........................................... 290

* D. Paper*

Integrating the 4 P's of Creativity in an IS Project: An Ethnographic Example from Hewlett-Packard ........................................... 298

* J. Mandico and L.F. Higgins*

Results of a Trans-Discipline Research Structure for Study of Creativity/Innovation in I.S. ........................................... 309

* J.D. Couger*

Organizational Decision Support Systems ........................................... 319

*Coordinators: Sree Nilakanta and Anil K. Aggarwal*

Organizational Experiences with Multicriteria Decision Support Systems: Problems and Issues ........................................... 320

* J.C. Pomerol and P. Brézillon*

DSS to Support Socio-Economic Development in Egypt ........................................... 328

* S. Kamel*

ODSS in Strategic Financial and Production Planning ........................................... 337

* H. Kiviärvi and M. Tuominen*

Extending the Organizational Exchange Model (OEM) ........................................... 347

* J.R. Landry*
Organizational Reconciliation: Implications for Organizational Decision Support Systems .................................................. 355
    G. Harindranath and J. Liebenau
Tools for Organizational Decision Support: The Design and Development of an Organizational Memory System .................. 360
    L. Miller and S. Nilakanta

Information Systems in Global Business ......................................................................................................................... 370
    Coordinators: A. Geoffery Lockett, Christopher P. Holland, and William G. Chismar
Managing Information Technology in the Transnational Organization: The Potential of Multifactor Productivity .................. 372
    K. Reimers
Virtual Organizing as a Strategy for the “Big Six” to Stay Competitive in a Global Market .................................................. 381
    P. Sieber and J. Griese
On the Nature of Inter-Organisational Information Systems and the Issue of Adaptability ............................................. 391
    P. Kanellis and R.J. Paul
Problems of Management and Decision Making in Multinational Banking ................................................................. 398
    J. Kufis and C. Scole
The Strategic Impact of IT on the Retail Financial Services Industry ............................................................................. 406
    D.F. Channon
The Impact of Globalisation and Information Technology on the Strategy and Profitability of the Banking Industry .............. 418
    C.P. Holland, A.G. Lockett, and I.D. Blackman
The Growth of the Firm in China: An Information-Processing Perspective ................................................................. 428
    M.W. Peng, Y. Luo, O. Shenkar, and E. Harwitz
Systems and Network Integration and Outsourcing - Is it a Global Imperative for Multinational Corporations? ..................... 436

Volume V

Advanced Technology Track

Preface ................................................................. x
Introduction .............................................................. xi
Referees ................................................................. xii

Engineering Complex Computer Systems ................................................................. 2

Coordinators: Alberto Broggi and Alexander D. Stoyenko

Advanced Techniques for Maintaining Reliability of Complex Computer Systems .......... 4
A.S. Lim

Building the 4 Processor SB-PRAM Prototype .......................................................... 14

Distributed Route Initialization Algorithms for the Monash Secure RISC Multiprocessor .................. 24
V.J. Fazio and R.D. Pose

Communication Support for Critical Distributed Multimedia Applications:
An Experimental Study ...................................................................................... 34
F. Panzieri and M. Roccetti

Guaranteeing Real-Time Traffic through an ATM Network ........................................... 44
H. Hansson, M. Sjödin, and K. Tindell

Multimedia Communications over Wireless LANs via the SWL Protocol ....................... 54
G. Okamoto and G. Xu

Conceptual Model for a Software Maintenance Environment ........................................ 64
M.A.M. Capretz

Towards Program Debugging and Dynamic Reverse Engineering Using Multi-Procedure Program Dynamic Decomposition ............................................................... 71
H. Ammari

Recovery of Functional Dependencies from Data-Intensive Business Programs ............... 81
H.B.K. Tan and T.W. Ling

An Efficient Genetic Algorithm for Reachability Problems ......................................... 89
K. Takahashi, I. Ono, H. Satoh, and S. Kobayashi

Analysis of Data Transmission Performance over a GSM Cellular Network .................. 99
F.A. Schreiber and M.L. Falleni

An Integrated Approach to Signaling, Transmission, and Traffic Monitoring for Dynamic Capacity Allocation in Mobile ATM Networks ........................................... 109
A. Burrell and P. Papantoni-Kazakos
