New Curriculum and Courses
Jay F. Nunamaker, Jr.
University of Arizona

The papers presented in this minitrack describe proposed and new academic programs in information systems. The first paper by Terlouw and Leenders describes an integrated environment for the use of information and communication technology at the University of Groningen in The Netherlands. The paper by Gorgone and Gray reports on the latest draft of the IS National Curriculum effort. The purpose of this mini-track is to share the vision and insights, and to discuss how curriculum and courses could be re-engineered to meet the demands of the 21st Century.
