

Conference Overview for HICSS - 33

Click on Track or Minitrack name to link.

Collaboration Systems and Technology Track

Collaborative Engineering of Processes and Systems
Collaboration Technology – Theory and Methodology
Community Supported Platforms
Distributed Group Support Systems
Group Support Systems
Group Support Systems User Experiences
Knowledge Management, Organizational Memory, and Organizational Learning (Cross-listed with Digital Documents Track)
Negotiation Support Systems: Frameworks, Implementations, and Evaluations
Technology Supported Learning
Roles and Issues of Computational Media in Learning Communities (Cross-listed with Digital Documents Track)

Decision Technologies for Management Track

Agent Based Simulation
Data Mining and Knowledge Discovery
Intelligent Systems and Soft Computing
Intelligent Systems in Traffic and Transportation
Management of Telecommunication Networks and Distributed Systems
Modeling Knowledge-Intensive Processes: Concepts, Methods, and Applications

Digital Documents Track

Digital Document Understanding and Visualization
Genre in Digital Documents
Knowledge Ecologies

Knowledge Management, Organizational Memory, and Organizational Learning (Cross-listed with Collaboration Systems and Technology Track)
Persistent Conversation
Roles and Issues of Computational Media in Learning Communities (Cross-listed with Collaboration Systems and Technology Track)
Searching Multilingual and Multimedia Digital Documents
Digital Documents in the Office and Education

Emerging Technologies Track

Advances in Software Specification and Verification
Errors, Risks, and Security in Information Technology
Restructuring the Electric Power Industry: Emerging Issues, Methods and Tools
Software Process Improvement

Information Technology in Health Care Track

Clinical Support Systems
Databases, Data Warehousing, and Data Mining in Health Care
Telemedicine
Virtual Reality and Tele-Immersion in Healthcare
Strategies for Healthcare Information Systems

Internet and the Digital Economy Track

Communities in Electronic Commerce: Concepts, Models and Formal Aspects
Economics and Electronic Commerce
Electronic Commerce and Supply Chain Management
Electronic Commerce Systems Development – Modeling Methods and Methodologies

Internet and Workflow Automation: Technological and Managerial Issues
Managing Information on the Web
Marketing in Electronic Commerce
System Support for Electronic Business on the Internet
Virtual and Knowledge-based Organizations
Web Engineering

Organizational Systems and Technology Track

Creativity in Information Systems
Data Warehousing
ERP System Issues and Answers
IS in Global Business
Information Technology and Market Structure
Information Technology in Developing Countries
Knowledge/Technology Transfer and Adoption
Evaluating and Measuring the Effectiveness of Information Systems
Methods and Approaches in Organizational Systems Research
Project Management
Strategic and Competitive Information Systems
Technology Management for Doing Business in the Knowledge based Economy
Trends in Outsourcing of Information Services

Software Technology Track

Compilers and Tools for Embedded Systems
Distributed Systems Testing
Evolution of Business to Business Electronic Commerce
Mobile Computing and Wireless Networks
Multi-Agent Systems, Internet and Applications
New Trends in Multimedia Systems
Software Component Engineering: Meta-Framework and Technologies
Software Engineering Tools
Trading of Intangible Goods
