Proceedings Overview for HICSS-34

**Collaboration Systems and Technology Track**
- Asynchronous Learning Networks (ALN)
- Collaborative Engineering of Processes and Systems
- Community Development and Technology
- Distributed GSS
- Group Support Systems
- Negotiation Support Systems
- Next Generation of Learning Platforms
- Technology Supported Learning
- User Experience: Collaboration Systems and Knowledge Management

**Complex Systems Track**
- Information Management
- Complex Systems Security and Reliability
- Self Organized Criticality
- Hybrid Dynamical Systems
- Markets and Economics

**Decision Technologies for Management Track**
- Agent-based Simulation and System Dynamics
- Data Mining, Knowledge Discovery, and Information Retrieval
- e-Services: Models and Methods for Design, Implementation and Delivery
- Intelligent Systems and Soft Computing
- Intelligent Systems in Traffic and Transportation
- Modeling Knowledge-Intensive Processes: Concepts, Methods, and Applications

**Digital Documents Track**
- Crossing Collaborational Divides: Digital Documents in Socio-Technical Networks
- Digital Documents Understanding and Communication
- Digital Technology and Educational Culture
- Knowledge Management, Organizational Memory, and Organizational Learning
- Persistent Conversation: A Dialog between Research and Design
- Digital Documents in the Office and Education

**Emerging Technologies Track**
- eGovernment
- Standardization in Information Technology
- Waiting for the Web
- Nontraditional Computer Support for Design and User Evaluation

**Information Technology in Health Care Track**
- Health Care Data Management
- Telemedicine
- Data Mining for Healthcare Quality, Efficiency, and Practice Support
- Health Care: Specialized Industry or Novel Environment for IS Theory-Testing
- Strategies for Healthcare Information Systems

**Internet and the Digital Economy Track**
- Business to Business E-Commerce
- Communities in the Digital Economy: Concepts, Models and Platforms
- E-Commerce Customer Relations Management
- E-Commerce in the Finance Industry
- E-Commerce Systems Development Methodologies
- Economics and E-Commerce
- Infrastructure for E-Business on the Internet
- Internet and Workflow Automation: Technical and Managerial Issues
- Managing Information on the Web
- Marketing in Electronic Commerce
- Virtual and Knowledge-based Organizations
- Web Engineering

**Organizational Systems and Technology Track**
- Community Informatics
- Creativity in Information Systems
- Data Warehousing
- ERP Issues and Answers
- Information Systems in Global Business
- Knowledge/Technology Transfer and Adoption
- Moving the Organization to Convergent Technologies: e-Business and Wireless
- Professional Ethics in Information Systems
- Project Management
- Research Methods and Approaches in Organizational Systems and Research
- Strategic and Competitive Information Systems
- Technology Management for Doing Business in the Knowledge based Economy
- Topics in Organizational Systems and Technology
- Trends in Outsourcing of Information Systems

**Software Technology Track**
- Mobile Ad-hoc Networking
- Quality of Service in Mobile Computing
- Mobile Commerce: A New Frontier for E-business
- Quality of Service in Web Services
- Collaborative Problem Solving Environments
- Integrated Modeling of Distributed Software Systems and Workflow Applications
- Enterprise Application Integration
- Software Architecture
- Software Engineering Tools
- Advances in Software Specification and Verification
- Domain-Specific Languages for Software Engineering
- Trading of Intangible Goods
- Novel Information Systems for Business to Business E-commerce
