2011 11th IEEE International Conference on Advanced Learning Technologies
ICALT 2011

Table of Contents

Preface ..........................................................................................................................................................................xx
ICALT 2011 Chairs/Committees ..............................................................................................................................xxi
Reviewers ...................................................................................................................................................................xxiv

Main Track

A 3D Motion Controlled Method for the Training of Mental Rotation .................................................................1
Chin-Yea Wang, Shin-Chen Yeh, Jing-Liang Wang, Shin-Chen Yang, and Albert Rizzo

A 3D Virtual Classroom Simulation for Supporting School Teachers Training Based
on Synectics - “Making the Strange Familiar” ...............................................................................................................4
Pavlos Kallonis and Demetrios G. Sampson

A Case Study of an Academic Achievement-oriented Student in Game-based Learning .............................................7
Morris S.Y. Jong, Fong-lok Lee, Jimmy H.M. Lee, and Junjie Shang

A Cloud-based Cyberlearning Environment for Introductory Computing Programming
Education ........................................................................................................................................................................12
Prabir Bhattacharya, Minzhe Guo, Lixin Tao, Bin Wu, Kai Qian, and E. Kent Palmer

A Collaborative Interactive Cyber-learning Platform for Anywhere Anytime Java Programming Learning .................................................................14
Prabir Bhattacharya, Minzhe Guo, Lixin Tao, Yujian Fu, and Kai Qian

A Computer Game Based Approach for Increasing Fluency in the Speech of
the Autistic Children .....................................................................................................................................................17
Anika Anwar, Md. Mustafizur Rahman, S.M. Ferdous, Samiul Alam Anik, and Syed Ishtiaque Ahmed

A Conceptual Design of Multi-Agent Based Personalized Quiz Game ...........................................................................19
Martin M. Weng, Ireti Fakinlede, Fuhua Lin, Timothy K. Shih, and Maiga Chang

A Contextualized Annotation Model for Mobile Learning .................................................................................................22
Pierre-Yves Gicquel and Dominique Lenne

A Digital Board Game Based Learning System for Authentic Learning ...........................................................................25
Kuan-Chang Chen, Chia-Jung Wu, and Gow-Dong Chen

</table>
Automated Assessment of Review Quality Using Latent Semantic Analysis ..................................................136
  Lakshmi Ramachandran and Edward F. Gehringer

Behavior Patterns: Bridging Conceptual Models and Agent-Based Simulations in Interactive Learning Environments ..........................................................................................................................139
  Swaroop S. Vattam, Ashok K. Goel, and Spencer Rugaber

Bridging the Gap between PLE and LMS ........................................................................................................142
  Francesco Di Cerbo, Gabriella Dodero, and Teresa Liew Bao Yng

Building a Cultural Community Classroom to Connect Instructors with Students ........................................147
  Fariel Mohan

Building Commons to Improve Teaching and Learning for Quality Assurance through Peer Review Project .................................................................................................................................150
  Yukari Kato

Business Simulation Games as Digital Tools for Supporting School Entrepreneurship Education ..................................................155
  Hercules Panoutsopoulos, Maria-Anna Lykourentzou, and Demetrios G. Sampson

Challenges in Locating Content and Services for Adaptive eLearning Courses ...........................................157
  Cormac Hampson, Owen Conlan, and Vincent Wade

Concept Map-based Framework for Learner-Centered Knowledge Management in ePortfolios ..............160
  Yuliya Bozhko and Eva Heinrich

ConceptMapWiki - A Collaborative Framework for Agglomerating Pedagogical Knowledge .....................163
  Lauri Lahti

Connectivism as a Framework for Creative Productivity in Instructional Technology ........................................166
  Gregory Clinton, Eunbae Lee, and Regene Logan

Constructivist and Constructionist Approaches to Constructing Algorithm Visualizations: A Proposal ..................................................171
  Ming-Han Lee and Guido Rößling

Correlation between Student Performance and Use of an mLearning Application for High School Mathematics .................................................................................................................................174
  Vani Kalloo and Permanand Mohan

Cost Metrics for Effective Learning Objects Reuse .........................................................................................179
  Demetrios G. Sampson and Panagiotis Zervas

Cross-Institutional Online Engineering Tutoring: Implementation of Tutoring at a Distance ....................184
  Sheila Warren and Stephanie Moore

Curriculum-Guided Crowd-Sourcing of Assessments for Primary Schools in a Developing Country ..........187
  Imran A. Zsalkernan, Anjana Raza, and Asad Karim
Design Electronic Botany Worksheet Generation Based on Bloom’s Taxonomy for Mobile Learning ................................................. 192
   Rita Kuo, Maiga Chang, Keith Ying, and Jia-Sheng Heh

Design of a Long-Distance-Controlled Robot System for Distance Education ................................................. 195
   Akiyuki Minamide, Kazuya Takemata, and Megan Hastie

Design of Lifelong Learning Content Using Space Education: Development of the Mobile 3D (Three Dimensional) Image Projection System ................................................. 197
   Kazuya Takemata, Akiyuki Minamide, Sumio Nakamura, and Nobuhiro Tanba

Designing a Virtual Tutee System to Enhance College Student Motivation .................................................. 199
   Seung Won Park and ChanMin Kim

Development of a Game-based Learning System Using Toy Robots .................................................. 202
   Li-Der Chou, Tzu-Chien Liu, David Chunhu Li, Yi-Shou Chen, Man Tat Ieong, Pei-Husn Lee, and Yi-Chun Lin

Domain-Specific Modeling Approach to Support Instructional Design Rationale ................................................. 205
   El Amine Ouraiba, Christophe Choquet, and Philippe Cottier

Dual Mapping for Support of Problem Solving and Knowledge Construction ................................................. 207
   Bian Wu and Minhong Wang

Dynamic Adaptation in OPENET4LD ................................................. 210
   Juan C. Vidal, Manuel Lama, Beatriz Fernández-Gallego, and Alberto Bugarín

Dynamic Adaptive Mechanism in Learning Management System Based on Learning Styles ................................................. 215
   Samar Alkhuraiji, Barry Cheetham, and Omaima Bamasak

Dynamic User Modeling and Adaptation Based on Learning Styles for Supporting Semi-Automatic Generation of IMS Learning Design ................................................. 218
   Silvia Baldiris, Sabine Graf, and Ramón Fabregat

Educational Massively Multiplayer Online Role Playing Game for Teaching Youth Finance ................................................. 221
   David A. Jones and Maiga Chang

Educational Robotics and Inquiry Learning: A Pilot Study in a Web-Based Learning Environment ................................................. 224
   Heilo Altin, Margus Pedaste, and Alvo Aabloo

Effectiveness of “Learning by Doing” Methodology in Training Programs - An Evaluation of a Teacher Training Program for Information Technology Education ................................................. 227
   Surya Kiran Reddy Karri and Sandhya Kode

Effects of Applying STR for Group Learning Activities on Learning Performance in a Synchronous Cyber Classroom ................................................. 232
   Tony C.T. Kuo, Rustam Shadiev, Wu-Yuin Hwang, and Nian-Shing Chen

e-Learning Using iPads - An e-learning Scenario Using Mobile Devices and Sensors for Measurements ................................................. 237
   Manfred Lohr
Enhanced Understand of Biological Systems Using Structure-Behavior-Function Models .................................................................239
   Michael Helms, Svaroop Vattam, Ashok K. Goel, and Jeannette Yen

Enhancing English Reading Comprehension by Integrating Direct Access to Digital Materials and Scaffolded Questionings in Paper Prints .................................................244
   Daniel Chia-En Teng, Nian-Shing Chen, and Cheng-Han Lee

Enhancing Learning Paths with Concept Clustering and Rule-Based Optimization ...................................................249
   S.T. Fung, Vincent Tam, and Edmund Y. Lam

Evaluation of Personalization Strategies Based on Fuzzy Logic .........................................................................................254
   Fathi Essalmi, Leila Jemni Ben Ayed, Mohamed Jemni, Kinshuk, and Sabine Graf

Evolution of an Integrated Technology for Supporting Learning about Complex Systems .............................................257
   David A. Joyner, Ashok K. Goel, Spencer Rugaber, Cindy Hmelo-Silver, and Rebecca Jordan

Examining the Effects of Technology-Based Learning on Children with Autism: A Case Study .............................................260
   Rayshun Dorsey and Ayanna M. Howard

Expanding the Concept of Learner Control in Higher Education: Consequences for Intervention Design ........................................262
   Sebastian H.D. Fiedler and Terje Väljataga

Experiences in Visualizing the Analysis of Blended-Learning Interactions to Support Teachers .................................................265
   Maite Martín, Ainhoa Álvarez, Isabel Fernández-Castro, David Reina, and Maite Urretavizcaya

Exploring a Standards-based Approach to the Design and Delivery of Adaptable Learning Content: A Case Study .............................................................................267
   Voula Gkatzidou and Elaine Pearson

Facilitating Informal Learning in a Mobile Application for a Group of Type 2 Diabetics ..........................................................272
   Salys Sultan and Permanand Mohan

Flexible Learning Support in an Inflexible Society ......................................................................................................................274
   Lee Griffiths

From Behavioral Indicators to Contextualized Competence Assessment ..........................................................................277
   Michael Bedek, Sobah Abbas Petersen, and Tuija Heikura

From Collections of Exercises to Educational Games: A Process Model and a Case Study .....................................................282
   Daniel Rodríguez-Cerezo, Mercedes Gómez-Albarrán, and José-Luis Sierra

From Learning Objects Repositories to Learning Design Repositories: The COSMOS Learning Design Repository ..........................285
   Demetrios G. Sampson, Panagiotis Zervas, and Sofoklis Sotiriou
Gathering Practice Sharing and Problem Solving on a Single Platform for Teacher Training: A Collaborative Platform Model for Teacher Professional Development ..................................................290
  Thierry Condamines

Hoodies and Barrels: Using a Hide-and-seek Ubiquitous Game to Teach Mathematics .................................................................295
  Ivon Arroyo, Imran A. Zualkernan, and Beverly P. Woolf

How Can Psychology Inform the Design of Learning Experiences? ........................................................................................................300
  Milos Kravcik, Ralf Klamma, and Zinayda Petrushyna

How Students Use Contextual Cues in Finding Information in Paper and Electronic Textbooks ........................................................................................................302
  Sheng-Jie Yang, Gwo-Dong Chen, and Liang-Yi Li

How to Learn Chinese through Online Tools? From the Perspective of Informal Learning to Culture Immersion ..............................................................................................................305
  Mei-Jen Audrey Shih and Jie-Chi Yang

Identification of Learning Goals in Forum-based Communities ................................................................................................................307
  Julian Krenge, Zinayida Petrushyna, Milos Kravcik, and Ralf Klamma

Implementation of an Intelligent Framework for Utilization within an InfoStation-based mLearning Environment .....................................................................................310
  Zhanlin Ji, Damien Meere, Ivan Ganchev, and Máirtín O’Droma

Implementing a Classroom Oral Reading Platform for Primary EFL Students’ Oral Reading Rate ....................................................................................................................312
  Kuo-Ping Liu, Cheng-Chung Liu, Kuo-Chun Hung, Chih-Hsin Huang, and Chia-Jung Chang

Improving Students’ Satisfaction in a Massive Online Academic Writing Course ..............................................................................................314
  Jorge Villalon and Carolina Heiremans

Incorporating the Prisoners’ Dilemma in Peer-Assessment: An Experimental Study .................................................................317
  Hend S. Al-Khalifa, Henda Chorfi, Afnan A. Al-Subaihin, Amal Al-Ibrahim, and Maha Al-Yahya

Influences of AR-Supported Simulation on Learning Effectiveness in Face-to-face Collaborative Learning for Physics ........................................................................................................320
  Nai Li, Yuan Xin Gu, Leanne Chang, and Henry Been-Lirn Duh

Instructional Expertise for Phrase Singing and its Application for a Chorus Learning Support System ...............................................................................................................323
  Mizue Kayama, Kazunori Itoh, Kazushi Asanuma, Masami Hashimoto, and Makoto Otani

Integrating Trust and Competency Management to Improve Learning .............................................................................................326
  Nicola Capuano, Matteo Gaeta, Giuseppina Rita Mangione, Francesco Orciuoli, and Pierluigi Ritrovato

Interactions between Inquiry Processes in a Web-Based Learning Environment ..................................................................................331
  Mario Mäeots, Margus Pedaste, and Tago Sarapuu

Interactive Storytelling for Elementary School Nature Science Education .........................................................................................336
  Jui-Feng Weng, Hsiu-Lien Kuo, and Shian-Shyong Tseng
Interpreter for the Deployment of Intelligent Tutoring Systems in Mobile Devices ..................................................339
   Ramón Zatarain Cabada, María Lucia Barrón Estrada, L. Edgar Parra,
   and Carlos Alberto Reyes García

Introducing Accessibility Features in an Educational Game Authoring Tool: The <e-Adventure> Experience ..................................................341
   Javier Torrente, José Ángel Vallejo-Pinto, Pablo Moreno-Ger, and Baltasar Fernández-Manjón

Investigating the Role and Potentials of Using Web2.0 in Music Education from Student Perspective ..........................................................344
   Chi-Ting Wei and Shelley S.C. Young

Investigations of Using Interactive Whiteboards with and without an Additional Screen ..................................................347
   Ting-Wen Chang, Kinshuk, Pao-Ta Yu, and Jenq-Muh Hsu

Knowledge Sharing in the Classroom: A Social Network Approach for Diagnostic Assessment and Learning Together ..................................................350
   Johannes Konert, Stefan Göbel, Kristina Richter, and Regina Bruder

Learning Functional Models of Biological Systems for Biologically Inspired Design ..................................................355
   Bryan Wiltgen, Swaroop Vattam, Michael Helms, Ashok K. Goel, and Jeannette Yen

Learning Object Repositories for Science Education: The Case of the OpenScienceResources Repository ..................................................358
   Demetrios G. Sampson, Panagiotis Zervas, and Sofoklis Sotiriou

LEXI: A Semantic Tool to Enrich Lexical Competence of Language Learners ..................................................360
   Maha Al-Yahya, Hend S. Al-Khalifa, Alia Bahanshal, and Iman Aloudah

Live Programming Learning Objects on Cloud ..................................................362
   Bin Wu, Kai Qian, Prabir Bhattacharya, Minzhe Guo, and Wanjun Hu

Load Forecasting Mechanism for e-Learning Infrastructures Using Exponential Smoothing ..................................................364
   Agustín C. Caminero, Salvador Ros, Roberto Hernández, Antonio Robles-Gómez, and Rafael Pastor

Mapping Business Simulation Games to a Component Architecture ..................................................366
   Alexander Neef, Dennis Maciuszek, and Alke Martens

Matching and Mismatching in Web-based Learning: A Human Centered Approach ..................................................369
   Pei-Ren Huang, Li-Ping Chang, Yu-Cheng Shih, Yung-Chi Hsu, and Sherry Y. Chen

Mixed Reality for Learning Standard Mechanical Elements ..................................................372
   Jorge Martín-Gutiérrez and Manuel Contero

Model-based Tagging: Promoting Access to Online Texts on Complex Systems for Interdisciplinary Learning ..................................................375
   Swaroop Vattam and Ashok K. Goel

Modeling Mobile Learning System Using ANFIS ..................................................378
   Ahmed Al-Hmouz, Jun Shen, Jun Yan, and Rami Al-Hmouz
Modelling the Aggregation of Multimedia Data to Connect the Inputs and Outcomes of a Variety of Tools ..........................................................381

Emilio Julio Lorenzo and Maria Felisa Verdejo

MuistiKoti - Towards Better Awareness of the Technological Solutions Designed for People with Alzheimer’s Disease ..........................................................384

Ilkka Niskanen, Jyri Toivonen, and Julia Kantorovitch

No Evidence of Correlation among Felder-Silverman’s Learning Styles, Visual Memory and Visualization Styles ..........................................................386

Carlo Giovannella

Ontologies and Knowledge Aggregation in the Active Semantic Learning System ..........................................................388

Ioan Szilagyi, Radu Balog-Crisan, Ana Roxin, and Ioan Roxin

OntoQue: A Question Generation Engine for Educational Assessment Based on Domain Ontologies ..........................................................393

Maha Al-Yahya

Operationalization of Learning Scenarios on Open and Distance Learning Platforms: The Case of the Moodle Platform ..........................................................396

Aynen Abedmouleh, Lahcen Oubahssi, Pierre L'farcade, and Christophe Choquet

Optimizing the Performance of Educational Web Services ..........................................................399

Mark Floryan and Beverly Park Woolf

Paleoclimate Clues: Problem-Based Learning Digital Media for Climate Science ..........................................................401

Anna Mansour, Chris Sumsky, and Brian Magerko

Pedagogy in Computer-Based Sport Training ..........................................................403

Yulita Hanum P. Iskandar, Lester Gilbert, and Gary B. Wills

PeerSpace - An Online Collaborative Learning Environment for Computer Science Students ..........................................................409

Cen Li, Zhijiang Dong, Roland Untch, Michael Chasteen, and Nathan Reale

Personalized Forecasting Student Performance ..........................................................412

Nguyen Thai-Nghe, Tomáš Horváth, and Lars Schmidt-Thieme

Petri Nets and Ontologies: Tools for the “Learning Player” Assessment in Serious Games ..........................................................415

Pradeepa Thomas, Amel Yessad, and Jean-Marc Labat

Pictures, Audio and Movies - Positioned around Me (PAM-PAM) ..........................................................420

Darren Mundy and Linda Hockley

Min Kyu Kim

Programming Turing Machines as a Game for Technology Sense-Making ..........................................................428

Andrea Valente and Emanuela Marchetti
Propelling Standards-based Sharing and Reuse in Instructional Modeling Communities: The Open Graphical Learning Modeler (OpenGLM) .......................................................... 431
Michael Derntl, Susanne Neumann, and Petra Oberhuemer

Rashi Game: Towards an Effective Educational 3D Gaming Experience ........................................... 436
Mark Floryan and Beverly Woolf

Recommending Teachers for Collaborative Authoring Tools .......................................................... 438
Bakhtiyor Bahritidinov, Eduardo Sánchez, and Manuel Lama

Representation of a Course Structure Focused on Activities Using Information Visualization Techniques ........................................................................................................... 443
David García-Solórzano, Germán Cobo, Eugènia Santamaría, Jose Antonio Morán, and Javier Melencón

Research in Classroom Interaction: Insight from Cognitive Process .................................................. 446
Xuefeng Wei, Li Li, and Guangzuo Cui

Reusing Educational Contents in M-learning .................................................................................. 448
Ana María Fermoso García and Alberto Pedreo Esteban

Reveling the Evolution of Semantic Content through Visual Analysis ........................................... 450
D.A. Gómez-Aguilar, M.Á. Conde-González, R. Therón, and F.J. García-Peñalvo

Seeking Reusability of Computer Games Designs for Informal Learning ..................................... 455
Telmo Zarraonandia, Paloma Díaz, Ignacio Aedo, and Mario Rafael Ruiz

Semantic Linking of a Learning Object Repository to DBpedia ..................................................... 460
Manuel Lama, Juan C. Vidal, Estefanía Otero García, Alberto Bugarín, and Senén Barro

Sequencing Learning Objects: Space-time, Semiotic and Pedagogical Constraints .......................... 465
Herli J. de Menezes, Sean W.M. Siqueira, and Leila C.V. de Andrade

Sociality of Mobile Collaborative AR: Augmenting a Dual-Problem Space for Social Interaction in Collaborative Social Learning ................................................................. 467
Nai Li, Yuan Xin Gu, Leanne Chang, and Henry Been-Lirn Duh

Standards for Learning, Education and Training: A Proposal for an Improved Process .................. 470
Tore Hoel and Paul A. Hollins

Students that Benefit from Educational 3D Games ........................................................................... 473
Mark Floryan and Beverly Park Woolf

Success Chances Estimation of University Curricula Based on Educational History, Self-Estimated Intellectual Traits and Vocational Ambitions ......................................................... 476
Yoshitaka Sakurai, Setsuo Tsuruta, and Rainer Knauf

Supporting Mathematics Teachers’ Online Discussion with the Use of Animated Classroom Stories as Reference Point .......................................................................................................................... 479
Vu-Minh Chieu and Patricio G. Herbst

System- and Information-Related Success Drivers of Virtual Learning Environments .................. 482
Daniel Mueller, Melanie Heintz, and Stefan Strohmeier
A System for Adaptation of Educational Contents to Learners and their Mobile Device ........................................484

Antonio García, Eva García, Luis De-Marcos, José-Ramón Hilera, José-Antonio Gutiérrez,
José-Maria Gutiérrez, Salvador Otón, Roberto Barchino, and José-Javier Martínez

Tailoring Serious Games with Adaptive Pedagogical Scenarios: A Serious Game
for Persons with Cognitive Disabilities .................................................................486

Aarij Mahmood Hussaan, Karim Sehaba, and Alain Mille

Teaching Web Security Using Portable Virtual Labs ..................................................491

Li-Chiou Chen and Lixin Tao

Technology-enhanced Learning for Students with Learning Disabilities ..................496

Onintra Poobrasert, Piyada Sabayjai, and Namnueng Mitsamarn

The Definition of a Tunneling Strategy between Adaptive Learning
and Reputation-based Group Activities .................................................................498

M. De Marsico, A. Sterbini, and M. Temperini

The Design and Implementation of an Enculturated Web-Based Intelligent Tutoring
System for Computer Science Education .............................................................501

Phaedra Mohammed and Permanand Mohan

The Impact of Animated Pedagogical Agents on Girls’ and Boys’ Emotions, Attitudes,
Behaviors and Learning .........................................................................................506

Ivon Arroyo, Beverly P. Woolf, David G. Cooper, Winslow Burleson, and Kasia Muldner

The Influence of a Motion-sensing and Game-based Mobile Learning System
on Learning Achievement and Learning Retention ...............................................511

Kuo-Liang Ou, WernHuar Tarng, Yu-Chung Yao, and Gwo-Dong Chen

The Interaction Analysis of Web Collaborative Exploration Learning in Two
Scenarios: Shared-Computer and One-to-One Computer ......................................516

Chia-Jung Chang, Cheng-Chung Liu, and Kuo-Ping Liu

The Practice of Rationale Sharing in Virtual Group Learning Activities: An Empirical
Study .......................................................................................................................521

Lu Xiao

The Relationships of Social Economic Status and Learners’ Motivation
and Performance in Learning from a Game-Design Project ..................................524

Li-Chun Wang and Ming-Puu Chen

The Role of Affordances and Motives in Explaining How and Why Students Use
Computer-based Scaffolds ....................................................................................529

Brian R. Belland, Joel Drake, and Zhijing Liu

The Structure and Substance of Student Asynchronous Communication in Hybrid
STEM Courses .........................................................................................................532

Zhongxiao Li, Kairui Chen, and Xin Xu

Tools for Context-Aware Learning Design and Mobile Delivery .............................534

Working WITH vs. Working ON Audiovisual Educational Content

Mari Luz Guenaga, Andoni Eguíluz, and Iker Jamardo

Learning Technologies for the Developing World (LT4D) – Issues, Constraints and Solutions Workshop

Purposeful Learning is Transformative: How Experience with Media Production Tools at a Digital Agricultural Extension in India Suggests an Approach for Deepening the Impact of Educational ICT4D Project

Boris Kizelshteyn and John Bosco Lourdusamy

A Recommender System that Allows Reasoning and Interoperability over Educational Content Metadata

Tiago Thompsen Primo and Rosa Maria Vicari

Cross-Cultural Learning Design: Past the Head and the Hands to the HEART of the Matter

Adam Blake, Claire Donald, Ashwini Datt, and Bai Xiaoyan

Information and Communication Technology (ICT) Development in Indian Schools: A Case Study

Swarandeep Singh, Esha Goel, Aman Goyal, Anupriya Chauhan, and Manu Sheel Gupta

Self-Regulated Learning in Responsive Open Learning Environments Workshop

Supporting Self-Regulated Learning within a Personal Learning Environment: The OpenLearn Case Study

Alexander Mikroyannidis

Learning Analytics for Communities of Lifelong Learners: A Forum Case

Zinayda Petrushyna, Milos Kravcik, and Ralf Klamma

Competence Development of Pre-Service Teachers with the Support of LeContract

Terje Väljataga, Kairit Tammets, and Hans Põldoja

Supporting Self-Regulated Learning in Technical Domains with Repositories of Learning Objects and Recommender Systems

Daniel Rodríguez-Cerezo, Mercedes Gómez-Albarrán, and José-Luis Sierra

Integrating Collaborative Learning Into the Self-regulated Learning Process Model

Marcel Berthold, Alexander Nussbaumer, and Dietrich Albert

Social Network and Augmented/Virtual Reality Technologies Enhanced Learning Workshop

A Study on Trends of Virtual Reality from Year 2001 to 2010 in Taiwan

Kuei-Shu Hsu and Yueh-Min Huang

Adapting and Sharing Open Educational Resources: A Social Networking Approach

Alexander Mikroyannidis, Alexandra Okada, and Teresa Connolly

Assessment of Implementing a Digital Game-based Learning System over Facebook

Hong-Ren Chen, Jan-Pan Hwang, Ting-Ting Wu, Yueh-Min Huang, and Hui-Ting Hsueh
OpenSim Virtual Worlds as a Platform for Enhanced Learning Concepts .................................................................623
   Walter Ridgewell, Vive Kumar, Oscar Lin, and Kinshuk

Traces of Writing Competency - Surfing the Classroom, Social, and Virtual Worlds ...........................................625
   Clayton Clemens, Maiga Chang, Dunwei Wen, Vive Kumar, Oscar Lin, and Kinshuk

Exploring the Future of Technology Enhanced Education: Visions, Practical Implementations and Impact of Localities (DULP@ICALT2011) Workshop
A Motivation for “Ubuntu” to Enhance e-Learning Social Network Services in South Africa .................................................................627
   M. Halse and B.J. Mallinson

As We May Remix: REFF Book and the Augmented Press Experience .................................................................629
   Luca Simeone, Salvatore Iaconesi, and Federico Monaco

Foreseeing the Transformative Role of IT in Lectures ..............................................................................................634
