**Workshop Committees** .................................................. xv

**International Program Committee** ................................. xvi

**Reviewers** .................................................................. xvii

## Artificial Reality

- Kinematic Inbetweening along Implicit Curves for Motion Animations ................................. 1
  
  *Han-Yin Xu, Dan Li, and Shaomin Tang*

- Interpolatory Ternary Subdivision for Triangular Meshes with Arbitrary Topology ................. 5
  
  *Ruotian Ling, Xiaonan Luo, Ren Chen, and Wanmin Huang*

- A Virtual Cybermarketing System Using Web3D and JSR-184 ........................................ 11
  
  *Tao Zhang, Jun-feng Yao, and Xian-yong Yang*

- Modeling and Application of Virtual Machine Tool ........................................................... 16
  
  *Weiqing Lin and Jianzhong Fu*

- The Construction of Evaluation Framework for Virtual Geographic Environment .............. 20
  
  *Gang Wang, Jun Gao, and Yingzhen Liu*

- A Point-Based Rendering Approach for Mobile Devices .................................................... 26
  
  *Zhiying He and Xiaohui Liang*

- A New IBR Approach Based on View Synthesis for Virtual Environment Rendering ........... 31
  
  *Zhi-ping Hu, Yuan-jun He, and Zong-ying Ou*

- An Efficient Method for Very Large Scale Out-of-Core Terrain Visualization .................. 36
  
  *Huijie Zhang, Jigui Sun, Haihong Yu, and Changsong Qi*

- An Efficient Mechanism for 3D Model Retrieval ................................................................. 42
  
  *Liang Ji, Gangshan Wu, and Wenjun Dai*

- Virtual Human Animation in Networked Physical Running Fitness System ....................... 47
  
  *Xian Chen, Nailiang Zhao, Gaoqi He, Lin Zhang, and Zhigeng Pan*

- Computing Geographical Reality with Animated Map Language ....................................... 52
  
  *Hong Shu, Cuihong Qi, and Geoffrey Edwards*
Anthropomorphic Intelligent Robotics
An Emotion Affected Action Selection Mechanism for Multiple Virtual Agents...........57
   Carlos Delgado-Mata and Jesus Ibanez-Martinez
Road Extracting Based on Texture Analysis.................................................................64
   Gu Hui, Lou Jilin, and Lu Yaya
Rule-Based Control of Collaborative Robots.................................................................68
   Ge Li, Kuo-chi Lin, and Zheng Xia
A Simplification to Support Vector Machine for the Second Training.......................73
   Jinglong Fang, Shuo Chen, Zhigeng Pan, and Yigang Wang
Automatic Recognition of Noisy Code-39 Barcode ....................................................79
   Xianyong Fang, Fuli Wu, Bin Luo, Haifeng Zhao, and Peng Wang
The Cooperation Behaviors of Multiple Intelligent Virtual Agents
Based on the Situation Calculus ................................................................................83
   Yisong Liu, Gang Wang, Lili Dong, and Yamin Sun
Design and Application of Intelligent Virtual Reality System .....................................89
   Li Jiang and Xiang-Long Feng

Augmented Reality / Mixed Reality
A Proposal of Celestial Attitude Conscious Driving: Vehicle Macroscopic Planetarium Guidance for Edutainment .................................................................93
   Masato Takahashi
Modelling Nonrigid Object from Video Sequence Based on Power Factorization..........98
   Guanghui Wang, Guoqiang Sun, Xingtang Li, and Shewei Wang
3D Reconstruction Based on Pseudo-Linearization and Errors-in-Variables Model........104
   Tingtbo Hou, Junwen Wang, Feng Zhu, and Zelin Shi
Cellular Automata to Simulate Rock Failure................................................................110
   Mingtian Li, Zhongliang Ru, and Junlian He
The Development of Multi-Depth Pepper’s Ghost Display for Mixed Reality System ....115
   Ronald Sidharta, Hiyama Atsushi, Tomohiro Tanikawa, and Michitaka Hirose
An Improved Real-Time Natural Feature Tracking Algorithm for AR Application .........119
   Jing Chen, Yongtian Wang, Yu Li, Wenze Hu, and Xiaojun Zang

Distributed and Collaborative VR Systems
Multi-Projector Seamless Display System Based on PC-Cluster .................................125
   Lingyun Yu, Cui Yu, and Yigang Wang
MOPCVE: A New CVE Prototype Running on Mobile Phone ....................................131
   Wenhang Li, Jianhua Gong, Daojun Wang, and Mingxiang Huang
Real-Time Continuous Collision Detection Based on Swept Volume
and Depth Texture .........................................................................................................137
   Ji Wang, Zhengjun Zhai, and Xiaobin Cai
Research on the Collaborative Virtual Products Development Based on Web
and X3D .....................................................................................................................141
   Li Haiqing, Yin Guofu, and Fu Jie
Product Model Data Exchange Technology of Heterogeneous Systems in Collaborative Design Environment ................................................................. 145
Xiao Zhou, Hong Jia, Yanlin Lu, and Weilong Ding

Research on Parallel Visualization in Large-Scale Scientific Computing ..................... 149
Jiaquan Gao and Duanyang Zhao

Remote Awareness of Complicated Pattern Group in Ubiquitous Collaborative Graphics Editing Systems ................................................................. 153
Bo Jiang and Guozheng Wang

Haptic Interface
Tangible Cubes as Programming Objects ........................................................................ 157
Andrew C. Smith

A Proposal of a High Definition Haptic Rendering for Stability and Fidelity..................... 162
Katsuhito Akahane, Shoichi Hasegawa, Yasuharu Koike, and Makoto Sato

The Usability of Multimedia Interface Based on User’s Mental Models ................................ 168
Tian Lei, Ying Yang, and Yanhe Zhang

Experiments for a Collaborative Haptic Virtual Reality ................................................. 174
Mee Young Sung, Yonghee Yoo, Kyungkoo Jun, Nam-Joong Kim, and Jinseok Chae

Innovative Applications of VR
Improvement Design of the Auto-Body Oriented to the Virtual Reconstruction Results of the Traffic Accident ................................................................. 180
Xiaoyun Zhang, Xianlong Jin, and Lei Guo

A Hybrid User and Item-Based Collaborative Filtering with Smoothing on Sparse Data ......................................................................................... 184
Rong Hu and Yansheng Lu

Improved Approach for Snake Model Based on GHough and Dynamic Programming ...... 190
Xiaofei Feng

Mining Consumers’ Most Adaptive Products by Efficient Clustering Algorithm .............. 195
Qingzhang Chen, Jianghong Han, Yuqing Chu, and Xiaodong Ying

An Improved Algorithm Based on Sub-Structures for Creating Virtual Plant ............... 200
Wei-long Ding, Wei-tong Zhang, and Xiao Zhou

Virtual Performance Experiment of a Centrifugal Pump ............................................... 205
Shujia Zhang, Baolin Zhu, Qingbo Hu, and Xianhua Li

Predicate Elimination Technique in Binary Translation for IA-64 Architecture .............. 209
Zong-Yu Song and Ming Su

Modeling of Artificial Life Based Virtual Fish Behavior .............................................. 213
Xiaolin Quan, Shaochun Zhong, Wenyong Wang, Qian Xu, Ying Liang, and Qingrong Zhang

Visualization Model of Virtual Plant Growth and its Application .................................. 217
Qingrong Zhang, Wenyong Wang, Shaochun Zhong, Ying Liang, Qian Xu, and Xiaolin Quan
Interactive Art and Entertainment

Artistic Concept for Negative-Style Interaction Robotics .................................................. 240
  Mariko Fujita, Kiyoshi Kotani, and Yoichiro Kawaguchi
Using a Game Engine Technique to Produce 3D Entertainment Contents .......................... 246
  Seung Seok Noh, Sung Dea Hong, and Jin Wan Park
A Model for Massively Multiplayer Role-Playing Games System Performance .................. 252
  Jiyi Wu, Xiangguo Gong, and Jiwen Zheng
Computer Model of Geological Faults in 3D and the Application in Beijing
Olympic Green District ....................................................................................................... 256
  Liangfeng Zhu
Efficient Metamorphosis of Point-Sampled Geometry ..................................................... 260
  Haishan Tian, Yuanjun He, Hongming Cai, and Lirong Feng
Fluidic Shadow Dance Using Interactive Fluid Animation ............................................. 264
  Jeongjin Lee, Moon Koo Kang, and Yeong Gil Shin
The Social Context Model for Research Activities in a Cyberspace ................................ 270
  Fang Sheng, Zhang Min, Huang Ling, and Wei Yongshan
Interactive Skeleton Extraction Using Geodesic Distance ............................................. 275
  Takuya Oda, Yuichi Itoh, Wataru Nakai, Katsuhiro Nomura, Yoshifumi Kitamura, and Fumio Kishino
The Algebraic Computing Structure of Four DNA Bases ................................................. 282
  Ping Zhu, Xuqing Tang, Zhenyuan Xu, and Weihong Guan
MPEG-4 Based Virtual Scenes on Embedded System .................................................... 286
  Hui Xu, Jianren Lou, and Yu Ren

Motion Tracking

A Deep-Space Trail Forecast Method based on the Enlargement of Field of View ............ 290
  Qiulei Han, Zhijun Yao, and Ming Zhu
Development of Multi-Object Tracking System Based on Omni-Directional Vision Sensor ............................................................................................................. 294
  Tang Yiping, Ye Yongjie, and Jin Haimin
Multirate Interacting Multiple Model Algorithm Combined with Particle Filter for Nonlinear/Non-Gaussian Target Tracking ................................................................. 298
Guixi Liu, Enke Gao, and Chunyu Fan

A Novel Algorithm for Estimating the Center of Rotation and Motion Parameters Using Stereo Sequence Images and the Virtual Simulation Validation Based on Three-COMERO ....................................................................................... 302
Wanpeng Cao, Rensheng Che, and Ye Dong

Adaptive Image Segmentation Based on Fast Thresholding and Image Merging .......... 308
Ye Zhang, Hongsong Qu, and Yanjie Wang

Real Time Computer Simulation

Modeling of Pinus Massoniana Based Morphological Architecture .......................... 312
Liyu Tang, Chongcheng Chen, Qinmin Wang, and Jingjing Sun

Research on Simulation of Soft Tissue Deformation in Virtual Orthodontics .......... 318
Ji Feng
Hybrid Realtime Simulation of the Space Docking Process ........................................... 323
Hao Yan, Junwei Han, Zhizhong Tong, and Hongren Li

Skeleton-Based Surface Reconstruction for Visualizing Plant Roots ...................... 328
Xuhong Tian, Guoqiang Han, Maozi Chen, and Zhiyuan Situ

Development of the ATC Simulators ......................................................................... 333
Shi-feng Mo, Hui Li, Xian-jiang He, and Zhi-sheng You

Fast Visualization Algorithm for Implicit Surfaces .................................................... 339
Yi Zhang, Xin Wang, and Xiao Jun Wu

Improved Compression Algorithm Based on Region of Interest of Face .................. 345
Herong Zheng, Yanlin Lu, and Xiaofei Feng

A Hybrid Adaptive Normal Map Texture Compression Algorithm .......................... 349
Bailin Yang and Zhigen Pan

Subdivision Interpolating Polygonization of Implicit Surfaces with Normal Meshes ...... 355
Mingyong Pang, Zhiyeng Pan, Jie Tang, and Fuyan Zhang

A Multi-Directions Algorithm for Edge Detection Based on Fuzzy Mathematical Morphology ................................................................. 361
Dong Hu and Xianzhong Tian

Circular Arc Path Method: A New 2-D Polygon Blending Algorithm ....................... 365
Baogang Bai, Zhongyue Li, and Zhigeng Pan

Research of Component-Based Hybrid Design Pattern for Real-Time Microkernel .... 369
Xuesen Ma, Jianghong Han, Yang Lu, and Zhenchun Wei

Surface Reconstruction with Least Square Reproducing Kernel and Partition of Unity ............................................................................................. 375
Jun Yang, Changqian Zhu, and Hua Zhang

A Compound and Robust Algorithm for Ellipse Detection ........................................ 381
Mao Jianfei, Xiong Rong, and Ding Weilong

Face Recognition Based on Polynomial Fuzzy Matching ......................................... 387
Cui-xiang Liu, Yi-cai Sun, Ming Yu, Yan Zhang, and Cun-da Yuan

Research on Real Time Computer Simulation System of Urban Logistics Distribution Vehicle Routing Optimization Based on GIS ......................................................... 391
Teleconference/Telexistence/Telepresences

LED-Glove Based Interactions in Multi-Modal Displays for Teleconferencing ....................... 395
Jun Park and Yeo-Lip Yoon

Teleoperation of Robot Based on Virtual Reality ..................................................................... 400
Xiaoling Lv, Minglu Zhang, Feng Cui, and Xiaoli Zhang

Improving Remote Accessibility of Spatial Data ................................................................. 404
Mingyuan Yu

Formal Properties of Cognitive Distance in Geographical Space ......................................... 408
Cuihong Qi, Hong Shu, and Aiping Xu

Tools and Technique for modeling VR systems

Vignetting and Illumination Compensation for Omni-Directional Image Generation
on Spherical Coordinate ......................................................................................................... 413
Yu-Na Kim and Dong-Gyu Sim

Two Improved Single Pattern Matching Algorithms .............................................................. 419
Chuanhan Liu, Yongcheng Wang, Derong Liu, and Danglin Li

A Fuzzy Control System for Capturing Target of Intelligence Spraying ................................. 423
Zhang Fajun and Chai Cangxiu

Stereo Matching Using 2-D Hopfield Network with Multiple Constraints ............................. 427
Hai-feng Hu and Ping Zhang

User-Assisted Parameterization of Polygonal Grids ............................................................... 432
Xianli Xu and Tianding Chen

A New Iris Locating Algorithm ............................................................................................... 438
Yong-zeng Shen, Min-jie Zhang, Jie-wei Yue, and Hong-min Ye

Virtual Reality and Simulation of the Earthquake-Induced Urban Hazard
Based on Artificial Neural Network and COMGIS Technique .............................................. 442
Hao Tang and Guo-Xin Chen

Design and Implementation of Geo-Objects Simulation and Interactive
Visual Editing Tools ................................................................................................................. 447
Song Shi, Chongchen Chen, Qingmin Wang, and JieYun Yan

The Research on Individual Clothing Pattern Automatic Making Technology ...................... 453
Zi-tian Yang, Wei-yuan Zhang, Wen-bin Zhang, and Ming Xia

A Real-Time Virtual Environment Rendering System ............................................................ 458
Hongbin Deng, Yihua Xu, and Li Wang

A Novel Pre-Process Method of Raw Point Data for Real-Time Complex
Scenes Rendering ..................................................................................................................... 464
Lei Zhao, Duanqing Xu, Yi Li, and Yimin Yu

Numerical Simulation of Fire Smoke Flow Properties in Large Space .................................. 470
Xiangyun Liu and Xiaoyin Zhang

Two-Dimension Maximum Entropy Image Segmentation Approach
Based on Chaotic Optimization ............................................................................................... 474
Xue-Feng Zhang, Jiu-Lun Fan, and Feng Zhao
Pose-Dependent Level of Detail Model for Animated Grids ...........................................479
Tianding Chen and Xianli Xu

VR-Orientated 3D Modeling and Visualization of Pseudo-Classic Building Complex ........485
Zhiqiang Du, Dongbo Zhou, and Lihua Zhang

A NURBS Facial Model Based on MPEG-4 .................................................................491
Boxiang Xiao, Qiang Zhang, and Xiaopeng Wei

Physically Based Animation of Tongue of Fire in a Periodic Domain .........................496
Peiyu Qin, Chuanbo Chen, Zehua Lv, and Hui Xia

Algorithm of Scattered Data Reduction for Surface Reconstruction Using Radial Basis Function .................................................................501
Xinping Ji, Xiaojun Wu, and Michael Yu Wang

One Mesh Model Simplification Method Based on Shape Transform of Triangles ........507
Jia-xin Chen and Hai-he Hu

An Improved Geometric Deformable Model for Color Image Segmentation ...............513
Shiguo Huang, Mingquan Zhou, and Guohua Geng

Ubiquitous Computing
An Intelligent Error Detection Model for Reliable QoS Constraints Running on Pervasive Computing .................................................................518
Eung Nam Ko and Kee Chun Bang

Enterprise Healthcare for Mobile Device and Interoperation of Patient Information........522
Dong-Chun Lee, Kee-Hyun Choi, and Dong-Ryeol Shin

An Application Program and Error Sharing Agent Running on Ubiquitous Networks ....526
Eung Nam Ko and Kee Chun Bang

Adaptive Garbage Collection Mechanism for N-Log Block Flash Memory Storage Systems .................................................................................................532
Yehua Du, Ming Cai, and Jinxiang Dong

The Design and Implementation of the Cicada Wireless Sensor Network Indoor Localization System .........................................................................................536
Wenfeng Jiang, Yu Chen, Yuanchun Shi, and Yunfeng Sun

Observer-Based Constrained Model Predictive Control of Substrate in Fed-batch Bioreactor .........................................................................................542
Xu Zhe, Mingtao Kang, Hak Kyeong Kim, and Sang Bong Kim

A Theoretical Framework of Rational and Emotional Agent for Ubiquitous Computing .................................................................................................546
Xianwei Lai and Shanli Hu

A Context Awareness Architecture for Mobile Learning Based on Fuzzy Petri Nets ........................................................................................................552
Jian Pan, Zhongdong Huang, Guohong Mao, and Jinxiang Dong

Ubiquitous Water Recycle Management Service Proposal in Ubiquitous City ...............558
Sung-Je Park, Soon-Young Bae, Jae-Hoon Jin, Jong-hwan Suh, and Sang-Chan Park

View-Dependent Rendering of Virtual Plane Models ..................................................562
Bin Sheng and Enhua Wu
