Message from International Programme Committee Chair.................................................................................................................................viii
Local Organizing Committee.................................................................................................................................................................................ix
International Programme Committee......................................................................................................................................................................x
Keynotes ..............................................................................................................................................................................................................xii
Discussion Panels....................................................................................................................................................................................................xviii

Session 1: Cloud Computing for Smart Nation
Towards a Private Fall Injury Warning Service for Smartphone-Distracted Pedestrian .................................................................................................................................1
Jianxiong Yin, Yonggang Wen, and Jianxin Wu
Data-as-a-Service: A Cloud-Based Federated Platform to Facilitate Discovery of Private Sector Datasets ..............................................................................................................9
Haojie Zhuang and Hing-Yan Lee

Session 2: Cloud Security I
Certifying SaaS in the MTCS Framework .................................................................................................................................................................15
Yao-Sing Tao and Hing-Yan Lee
Updates on Sorting of Fully Homomorphic Encrypted Data .................................................................................................................................19
Nitesh Emmadi, Praveen Gauravaram, Harika Narumanchi, and Habeeb Syed

Session 3: Cloud Storage
Efficient Persistence of Financial Transactions in NVM-based Cloud Data Centers .................................................................................................................................25
Sergio Ruocco and Duy-Khanh Le
Flexible Yet Secure De-duplication Service for Enterprise Data on Cloud Storage .................................................................37
Wen Bing Chuan, Shu Qin Ren, Sye Loong Keoh, and Khin Mi Mi Aung

Improving Performance of Database Appliances on Distributed Object Storage ..........................................................45
Mohd Bazli Ab Karim, Luke Jing Yuan, Wong Ming-Tat, and Hong Ong

Session 4: Resource Management
Evolutionary Neural Network Based Energy Consumption Forecast for Cloud Computing .................................................................53
Yong Wee Foo, Cindy Goh, Hong Chee Lim, Zhi-Hui Zhan, and Yun Li

Handling Uncertainty and Diversity in Cloud Bandwidth Demands for Revenue Maximization ................................................65
Tram Truong-Huu and Mohan Gurusamy

Session 5: SDN Clouds
Next Generation Clouds, the Chameleon Cloud Testbed, and Software Defined Networking (SDN) ........................................................73
Joe Mambretti, Jim Chen, and Fei Yeh

SDN Controlled Local Re-routing to Reduce Congestion in Cloud Data Center .................................................................80
Renuga Kanagevlu and Khin Mi Mi Aung

An Empirical Study of SDN-accelerated HPC Infrastructure for Scientific Research ..........................................................89
Susumu Date, Hirotake Abe, Dashdavaa Khureltulga, Keichi Takahashi, Yoshiyuki Kido, Yasuhiro Watashiba, Pongsakorn U-Chupala, Kohei Ichikawa, Hiroaki Yamanaka, Eiji Kawai, and Shinji Shimojo

Session 6: Cloud Security II
StealthyCRM: A Secure Cloud CRM System Application that Supports Fully Homomorphic Database Encryption ........................................................97
Miguel Rodel Felipe, Khin Mi Mi Aung, Xia Ye, and Wen Yonggang

Secure Email Attachment as a Service (SeaS) ..........................................................106
Kheng Kok Mar and Chee Yong Law

Session 7: Cloud Scheduling
Deadline Constrained Cloud Computing Resources Scheduling through an Ant Colony System Approach ........................................................112
Zong-Gan Chen, Zhi-Hui Zhan, Hai-Hao Li, Ke-Jing Du, Jing-Hui Zhong, Yong Wee Foo, Yun Li, and Jun Zhang
Hadoop Job Scheduling with Dynamic Task Splitting ......................................................... 120
Yongliang Xu and Wentong Cai

Session 8: Cloud Applications
Performance of Hadoop Application on Hybrid Cloud .................................................... 130
Hayata Ohnaga, Kento Aida, and Omar Abdul-Rahman

The Role of Cloud Computing in Addressing SME Challenges in South Africa .................. 139
Nkosi Kumalo and John Andrew van der Poll

Building a Robust and Efficient Middleware for Geo-replicated Storage
Systems .................................................................................................................................... 148
Quanqing Xu, Wilson Yonghong Wang, Khai Leong Yong, and Khin Mi Mi Aung

Session 9: Cloud Architecture
An Integrated Cloud Platform for Rapid Interface Generation, Job Scheduling,
Monitoring, Plotting, and Case Management of Scientific Applications ............................ 156
Wesley Brewer, William Scott, and John Sanford

A GPU Query Accelerator for Geospatial Coordinates Computation ................................. 166
Keh Kok Yong, Wing Kent Ho, Meng Wei Chua, and Simon See

Secure Voting in the Cloud Using Homomorphic Encryption and Mobile Agents ................ 173
Mark A. Will, Brandon Nicholson, Marc Tiehuis, and Ryan K.L. Ko

Author Index .............................................................................................................................. 185
