<tr>
<td>H. Yamamoto, Y. Guo, K. Suzuki and T. Watanabe</td>
<td></td>
</tr>
<tr>
<td>DTP: A Workflow Template to Target the Design of Autonomous Mobile Agents</td>
<td>18</td>
</tr>
<tr>
<td>W. Li, M. Zhang</td>
<td></td>
</tr>
<tr>
<td>A Framework for Agent-Oriented Workflow in Agriculture</td>
<td>18</td>
</tr>
<tr>
<td>M. Ivanovic and Z. Budimac</td>
<td></td>
</tr>
<tr>
<td><strong>Artificial Neural Networks</strong></td>
<td></td>
</tr>
<tr>
<td>ANN Parallelization on a Token-Based Simulated Parallel System</td>
<td>24</td>
</tr>
<tr>
<td>A. Ioana Cristea and T. Okamoto</td>
<td></td>
</tr>
<tr>
<td>Architecture Design of Artificial Neural Networks Based on Box &amp; Jenkins Models for Time Series Prediction</td>
<td>29</td>
</tr>
<tr>
<td>H. Diniz, L. de Andrade, A. de Carvalho and M. de Andrade</td>
<td></td>
</tr>
</tbody>
</table>
A Comparison between Features for a Residential Security Prototype Based on Speaker Identification with a Model of Artificial Neural Network .......................................................... 35
A. Adami, G. Lazzarotto, E. Foppa and D. Barone

Cost Estimation of High Performance Concrete (HPC) High-Rise Commercial Buildings by Neural Networks
C. Fang and T. Froese

Credit Assessment Using Constructive Neural Networks................................................................................ 40
H. de Sousa and A. de Carvalho

Determining the Influence of Input Parameters on BP Neural Network Output
Error Using Sensitivity Analysis.......................................................................................................................... 45
F. Frost and V. Karri

A Marketing Decision Problem Solved by Application of Neural Networks
S. Barile, L. Magna, M. Marsella and S. Miranda

Object-Oriented Cold Rolling Process Modeling Using Neural Networks and Sensitivity Factors
L. Zarate, J. Galvez and H. Helman

Optimum Back Propagation Network Conditions with Respect to Computation
Time and Output Accuracy................................................................................................................................. 50
V. Karri and F. Frost

RBF Neural Network for Thrust and Torque Predictions in Drilling Operations............................................ 55
V. Karri

Self-Organization Neurons Blocks Networks.................................................................................................... 60
M. Valença and T. Ludermir

Using Kohonen Map for the Placement of Regular VLSI Designs ............................................................... 65
M. Zamani and F. Mehdipur

Using Neural Network Method Computes Quadratic Optimization Problems................................. 70
A. Wu and P. Tam

Evolutionary Algorithms

Formulation of an Encryption Algorithm on the Basis of Molecular Genetics and Image Patterns ............................................................ 76
M. Prashant, R. Siddharth and R. Kumar

A Genetic Algorithm for the Cryptanalysis of Chor-Rivest Knapsack
Public Key Cryptosystem (PKC).................................................................................................................... 81
I. Yaseen and H. Sahzarabuddhe

Genetic Algorithms in Optical Thin Film Optimization Design ............................................................. 86
D. Li and A. Watson

A Genetic Approach to Qualitative Temporal Reasoning with Constraints............................................. 91
A. Fin

Object Oriented Toolkit for Multi-Objective Genetic Optimization ....................................................... 96
R. Kumar, N. Kumar and I. Nagrath
Evolutionary Artificial Neural Networks
Evolutionary Training of a Neurofuzzy Network for Detection of P Wave
of the ECG
V. Pilla, Jr. and H. Lopes
Modular Rough Fuzzy MLP: Evolutionary Design
P. Mitra, S. Mitra and S. Pal
On Generalization of Machine Learning with Neural-Evolutionary Computations
R. Kumar
Prototype Search for a Nearest Neighbor Classifier by a Genetic Algorithm
J. Kangas
A Survey on Supervised Learning by Evolving Multi-Layer Perceptrons
A. Ribert, E. Stocker, Y. Lecourtier and A. Ennaji
Hybrid Systems
Application of Genetic and Fuzzy Modeling in Time Series Analysis
K. Kumar and B. Wu
Combining CBR and GA for Designing FPGAs
D. Job, V. Shankararaman and J. Miller
Credit Analysis Using Radial Basis Function Networks
E. de Lacerda and A. de Carvalho
Emergency Power Distribution Scheduling Using Multi-Attribute Fuzzy
Decision Making
S. Khanmohammadi, R. Mathur and K. Patil
A Formal Model for Software Evolution
M. Harn, V. Berzins, Luqi and B. Shultes
A Fuzzy Expert System for Diagnosis of Lung Diseases
N. Ortega, M. Burattini, P. Silveira and E. Massad
Hierarchically Organized Neural Net Agents for Distributed Web
Information Retrieval
Y. Choi and S. Yoo
Intelligent Hybrid System for a Training and Teaching Environment
J. Pugliesi and S. Rezende
Modeling an Interactive ITS Using a MAS Approach: from Design to
Pedagogical Evaluation
L. Giraffa, M. Mora and R. Viccari
Potential of Artificial Intelligence Based Feature Selection Methods in
Regression Models
P. Pudil, K. Fuka, K. Beránek and P. Dvořák
State Generalization Method Based on Uncertainty Minimization of Behavior
Outcomes for Reactive Agents ........................................................................................................ 164
T. Yairi, K. Hori and S. Nakasuka
Structured Neuro-Fuzzy Classifier for Medical Decision Support
M. Gorzalczany and P. Grahki
Using Machine Learning Techniques for Automatic Evaluation of Web Sites ................................ 169
M. Zorman, V. Podgorelec, P. Kokol and Š. Babič
Visual Recognition of Vocal Phonemes: Localization and Extraction of Features, and Recognition using a Fuzzy Relational Network
M. Guadalupe and M. Barrera

Image & Signal Processing
An Automated Method for Inspection of IC Bonds .......................................................................... 176
H. Lee and S. Yoo
A Content-Based Video Query Agent Using Feature-Based Image Search Engine ......................... 181
K. Fushikida, Y. Hiwatari and H. Waki
An Image Understanding System for Various Images Based on Multi-Agent Architecture ................ 186
K. Yanai
Inferring Solid Objects with Cylindrical Surfaces from Orthographic Views .................................. 191
Y. Chao, T. Watanabe and K. Minemura
A Two-Stage Approach to 3D Scene Structural Analysis from a Single Two-Dimensional Image .... 196
Y. Liu and M. Rodrigues
Vision-Based Traffic Surveillance System on the Internet .................................................................. 201
S. Park, K. Jung, J. Hea and H. Kim
Vision System with Depth Obtaining Capabilities ............................................................................ 206
M. Las Heras and J. Amat

Rough Sets/Logic Synthesis
Discovery of Rules for Medical Expert Systems: Rough Set Approach ......................................... 212
S. Tsumoto
Functional Decomposition for FPGA Based Designs: A Weighted Graph Approach for Encoding of Compatible Classes
H. Selvaraj, M. Venkatesan, B. Bignall and B. Verma
Logical Calculi of Rough-Set Granules in Problems of Approximate Synthesis in Distributed Systems ............................................................. 223
L. Polkowski and A. Skowron
Rough Consistency and Consequence
M. Chakraborty and M. Banerjee
Knowledge-Based Engineering
Doctor's Behavior Understanding with Visual and Audio Processing for Real-Time Support of Diagnosis and Treatment
I. Eguchi, T. Sato and T. Mori
Horizontal Cooperation under Uncertainties in Distributed Expert Systems............................................. 230
C. Zhang and Y. Li
Modeling the Decision Making Behaviors Within Human Conflict Negotiation........................................... 235
J. Graffagnini, S. Shiva and D. Patel
Schema - Independent Mediators Using Content Semantics to Access Data Resources..................................... 240
M. Flecha and J. Braga

Memory, Storage and Retrieval
Codebook Generation in Vector Quantization Used for Image Retrieval
S. Teng and G. Lu
Content Based Image Retrieval Using Mobile Agents................................................................................... 248
C. Arora, P. Nirankari, H. Ghosh and S. Chaudhary
Content Based Video Compression for High Perceptual Quality
Videoconferencing Using Wavelet Transform............................................................................................. 253
J. Karlelar and U. Desai
Hybrid Video System Supporting Content-Based Retrieval......................................................................... 258
M. Hee, Y. Ik and K. Kim
In-Clip Search Algorithm for Content-Based Audio Retrieval..................................................................... 263
P. Piamsa-nga, N. Alexandridis and S. Subramanya
An Index Structure for Content-Based Retrieval from a Video Database..................................................... 268
Y. Hiwatari, K. Fushikida and H. Waki
An Intelligent On-Line System for Content Based Image Retrieval.............................................................. 273
B. Verma, P. Sharma, S. Kulkarni and H. Selvaraj
QBM — An Image Quering Method for Efficient Image Retrieval
S. Cho and S. You
Use of Transforms for Indexing in Audio Databases.................................................................................... 278
S. Subramanya, A. Yousef, B. Narahari and R. Simha
Visual Image Retrieval on Compressed Domain with Q-Distance................................................................... 285
H. Yu

Pattern Recognition
Human Shape Recognition from Snakes Using Neural Networks............................................................... 292
K. Tobh, S. George, R. Adams and N. Davey
Logico-Algebraic Structures of Partially Defined Objects and of Partially Denoting Attributes.......................... 297
P. Pagliani
Regular Feature Extraction for Recognition of Braille ................................................................. 302
  C. Ng, V. Ng and Y. Lau
A Training Scheme for Pattern Classification Using Multi-Layer
  Feed-Forward Neural Networks ............................................................................................... 307
  K. Keeni, K. Nakayama and H. Shimodaira

Formal Models for Multimedia
An Approach to Graph Layout to Assist in Web Navigation ..................................................... 314
  W. Lai and M. Danaher
OOHyTime from the Time-Based Point of View: The Case of Synchronization
Specification in Multimedia Documents ..................................................................................... 319
  L. Scott and M. Pimentel
Specifying Aspects of Multimedia in LOTOS ............................................................................. 326
  R. Sinnott
Specifying Multimedia Configurations in Z ................................................................................. 331
  R. Sinnott

Multimedia and Telecommunications
End-to-End Simulation of VBR Traffic over ATM Networks Using CIPP
  Network Traffic Model ............................................................................................................. 338
  R. Manivasakan, U. Desai and A. Karandikar
Predictive QoS Schemes for Real-Time Multimedia Applications in
  Communications ...................................................................................................................... 343
  S. Shamala, A. Ramani and M. Yazid
QoS Tradeoffs Using an Application-Oriented Transport Protocol (AOTP)
  for Multimedia Applications over IP .................................................................................... 348
  S. Wei, V. Tsaoussidis and V. Venkatakrishnan

Multimedia and Virtual Reality
Development of Virtual Interfaces Using Configurable Templates ............................................. 354
  J. Silva
Framework for CSCW Applications by Using Virtual Reality .................................................. 359
  M. Kubo, F. Deriggi, Jr., A. Sementille, J. Brega, D. Marques and C. Kirner

Multimedia Systems
A Guidance Metric for Developing Hypermedia Educational Designs ...................................... 366
  V. Ng, S. Chan, J. Lee and C. Ng
Html & Multimedia Web Gis ..................................................................................................... 371
  T. Soomro, K. Zheng and Y. Pan
Multimedia Education — Several-Angles View ........................................................................ 383
  M. Lomic and Z. Putnik
Network Service Selection for Distributed Multimedia Applications .......................................................... 388
R. Simon, A. Sood and P. Mundur

An Object-Oriented Model for HyTime Using UML .................................................................................... 393
L. Scott and M. Pimentel

On Speed Optimization of MPEG-4 Decoder for Real-Time Multimedia Applications .......................................................... 399
G. Hovden and N. Ling

A Pruning Based Fast Rate Control Algorithm for MPEG Coding .................................................................. 403
T. Venkatesh and S. Srinivasan

A Segmental Time-Alignment Technique for Text-Speech Synchronization ....................................................... 408
F. Vignoli and F. Lavagetto

Temporal Hypermedia for Multimedia Applications in the World Wide Web ....................................................... 413
N. Braun, R. Dörner

Miscellaneous

Cache Transparency in VOD Systems: Taking Advantage of Viewer’s Flexibility ............................................... 420
B. Sonah and M. Ito

Hybrid Shear-Warp Rendering ......................................................................................................................... 426
M. Zakaria

Multi-Criteria Capital Budgeting Using FLIP ......................................................................................................... 426
C. Kahraman and Z. Ulukan

A Simulated Annealing Approach for the Capacitated Minimum Spanning Tree Problem ...................................... 432
J. Torres-Jiménez, R. Pinto-Elias and A. García-Romero

Supporting Cooperative Work with Viceroy ......................................................................................................... 437
X. Dong and K. Subramanian

Vibratory Tactile Display: A Fractal Brownian Approach .................................................................................. 442
M. Agarwal, K. Arvind, R. Kumar, L. Behera and I. Nagrath

Poster

An Efficient Evolutionary Algorithm for (Near-) Optimal Steiner Trees Calculation: an Approach to Routing of Multipoint Connections ........................................................................................................ 448
M. Saltourós, M. Theologou, M. Angelopoulos, C. Ričiūdis

Enhancing the Beauty of Fractals ......................................................................................................................... 454
A. Bisoi and J. Mishra

Fuzzy Approach to Recognize Handwritten Tamil Characters ............................................................................ 459
R. Suresh, S. Arasumugam and L. Ganesan

Genetic Algorithms with Adaptive Probabilities of Operators Selection ............................................................ 464
J. Stancznik, J. Mulawka and B. Verma

Holographic Technology Applied to Face Location and Identification ............................................................ 469
L. Peniche-Ruiz, P. Mendoza E. and R. Pinto-Elias
Improvement of Artificial Odor Discrimination System Using
Fuzzy-LVQ Neural Network .................................................. 474
B. Kusumopuro, M. Widyanto, M. Fanany and H. Budiarto

An Information Model for the Phylogenesis of Birds
F. Torrens

Integrating Qualitative and Quantitative Temporal Information Using
Fuzzy Logic
A. Pani

Learn@net: An Integrated Multimedia System for Distance Learning ........................................... 479
S. Ng, C. Ng, H. Tsang and L. Hung

Multimedia Environment Support by WWW in a Computer Assisted Learning System ........................................ 484
J. Galvão, J. Lopes and M. Gomes

A New Supervised Training Algorithm for Generalized Learning .............................................. 489
A. Bhaumik, S. Banerjee and J. Sil

On the Filtering of Imperfect Multimedia Information by Means of Representation-Based Queries ........................................ 494
P. Bosc, L. Duval and O. Pivert

The Role of Multimedia and ISDN in Telemedicine Applications
M. Hmeed, A. Al-Kassab, D. Lu and Y. Pan

Author Index ........................................................................... 499
