Preface

Welcome to the 2010 Second International Conference on Computer Modeling and Simulation (ICCMS 2010). Firstly, we are very glad to see the progress of this conference, both in terms of quality and quantity. Based on the success of ICCMS 2009, the number of the submissions has largely increased this year and many more scholars, leading researchers, engineers and scientists deeply involved in this domain of interest from around the world have begun to participate actively and have begun to enjoy this conference. As we know, the 2009 conference in Macau was held successfully, we deeply trust that we will ascend to a higher step during our 2010 conference in Sanya.

As a global academic symposium on Computer Modeling and Simulation, the aim of ICCMS 2010 is to facilitate the communication of academe between domestic and foreign, to construct international communication platform, and to exhibit the new fruits of new advances in computer modeling and simulation.

At this moment, our sincere thanks go to the ICCMS 2010 organizers and the program committee who greatly contributed to the success of this year’s conference by organizing a technical track for the ICCMS 2009. Special thanks are also greatly due to the authors who contributed to this conference.

We hope and believe that everyone will have an enjoyable academic experience during the ICCMS 2010 conference in Sanya, China.

The ICCMS 2010 Organizing Committee
