## Volume I

### Session 1-1: Opening Session

**Welcoming Addresses**

Keynote Speech:  
"Image Processing of Forensic Documents" ................................................................. 1  
Peter E. Baier — *University of Mannheim, Germany*

### Session 1.2-A: Word Recognition I

Name and Address Block Reader System for Tax Form Processing ............................... 5  
*S.N. Srihari, Y-C. Shin, V. Ramanaprasad, and D-S. Lee*  
Cursive Script Recognition Applied to the Processing of Bank Cheques ....................... 11  
*D. Guillevic and C.Y. Suen*  
Symbolic/Neural Recognition of Cursive Amounts on Bank Cheques ............................ 15  
*J-P. Dodel and R. Shinghal*  
Recognition of Handwritten Words Using Stochastic Models ........................................... 19  
*C. Olivier, T. Paquet, M. Avila, and Y. Lecourtier*  
Handwritten Word Recognition for Real-Time Applications ........................................... 24  
*G. Kim and V. Govindaraju*

### Session 1.2-B: Neural Networks

Multi-Lingual, Multi-Font and Multi-Size Large-Set Character Recognition Using  
Self-Organizing Neural Network ........................................................................................................... 28  
*S-W. Lee and J-S. Kim*

Off-Line Recognition of Korean Scripts Using Distance Matching and Neural  
Network Classifiers ................................................................................................................................. 34  
*S.H. Kim and J-I. Doh*

A New Type of Recurrent Neural Network for Handwritten Character Recognition .......... 38  
*S-W. Lee and Y-J. Kim*

A Theory of Classifier Combination: The Neural Network Approach ............................... 42  
*D-S. Lee and S.N. Srihari*

Hierarchical Neural Network for Recognizing Hand-Written Characters in  
Engineering Drawings ............................................................................................................................. 46  
*H. Su, W. Wang, X. Li, and S. Xia*
Session 1.2-C: On-Line Recognition I

A Hidden Markov Model Extension of a Neural Predictive System for On-Line Character Recognition
S. Garcia-Salicetti, B. Dorizzi, P. Gallinari, A. Mellouk, and D. Fanchon ................................. 50

On-Line Recognition of Run-On Korean Characters
P.K. Kim and H.J. Kim ................................................................. 54

Pattern Recognition and Beautification for a Pen Based Interface
L. Julia and C. Faure ...................................................................... 58

Zoning Invariant Wholistic Recognizer for Hybrid Recognition of Handwriting
R.K. Powalka, N. Sherkat, and R.J. Whitrow .................................. 64

Recognizer Characterisation for Combining Handwriting Recognition Results
at Word Level ........................................................................... 68
R.K. Powalka, N. Sherkat, and R.J. Whitrow

Session 1.2-D: Application Systems

A New System for Reading Handwritten Zip Codes
N.W. Strathy and C.Y. Suen .......................................................... 74

A Two-Stage Multi-Network OCR System with a Soft Pre-Classifier and a Network Selector
J. Mao, K. Mohiuddin, and T. Fujisaki .......................................... 78

Reading Handwritten US Census Forms ................................... 82
S. Madhvanath, V. Govindaraju, V. Ramanaprasad, D.S. Lee, and S.N. Srinath

A System for Reading USA Census '90 Hand-Written Fields ......... 86
L. Simoncini and Z.M. Kovacs

An Automatic Reading System for Handwritten Numeral Amounts on French Checks .......... 92
E. Lethelier, M. Leroux, and M. Gilloux

Session 1.3-A: Handwritten Character Recognition

Character Recognition Performance Improvement Using Personal Handwriting Characteristics
T. Kawatani .................................................................................. 98

Evaluation of Codes and Primitives: Recognition of Unconstrained Handwritten Numerals
N. Ferray, D. de Brucq, K. Romeo-Pakker, and T. Paquet ................. 104

Fusion of Classifiers with Fuzzy Integrals ................................. 108
J. Cao, M. Shridhar, and M. Ahmadi

A Combined Method on the Handwritten Character Recognition
M.J. Joe and H.J. Lee ................................................................. 112

Invariant Handwritten Chinese Character Recognition Using Weighted Ring-Data Matrix
H-P. Chiu, D-C. Tseng, and J-C. Cheng ......................................... 116
Session 1.3–B: Segmentation I

Segmentation and Recognition of Hand Written Characters Using Subspace Method ........................................120
   Y. Ariki and Y. Motegi
Gap Metrics for Word Separation in Handwritten Lines ..............................................................................124
   U. Mahadevan and R.C. Nagabushnam
Block Selection: A Method for Segmenting Page Image of Various Editing Styles .....................................128
   S-Y. Wang and T. Yagasaki
Column Segmentation by White Space Pattern Matching .............................................................................134
   M. Ozaki
A Background Based Adaptive Page Segmentation Algorithm .................................................................138
   N. Normand and C. Viard-Gaudin

Session 1.3–C: Image Processing Techniques

Fuzzy Multilinkage Thesaurus Builder in Multimedia Information Systems ..................................................142
   Y.J. Gao, J.J. Lim, and A.D. Narasimhalu
Locating Text in Complex Color Images .......................................................................................................146
   Y. Zhong, K. Karu, and A.K. Jain
Optimal Sampling Intervals for Gabor Features and Printed Japanese Character Recognition .....................150
   K. Yamada
Agent-Based Parallel Recognition Method of Contour Lines .......................................................................154
   S. Shimada, K. Maruyama, A. Matsumoto, and K. Hiraki
Research on the Technique of Color Landmark Recognition ......................................................................158
   Q. Huang, B. Feng, T. Zhang, and W. Gao

Session 1.3–D: Database and Document Retrieval

False Hits of Tri-Syllabic Queries in a Chinese Signature File .................................................................159
   T. Liang, S-Y. Lee, and W-P. Yang
An Automated Generation of Electronic Library Based on Document Image Understanding ....................163
   S. Satoh, A. Takasu, and E. Katsura
A Document Retrieval System for Assisting Creative Research .............................................................167
   M. Sugimoto, K. Hori, and S. Ohsuga
Clustering OCR-ed Texts for Browsing Document Image Database ...........................................................171
   K. Tsuda, S. Sendai, M. Minoh, and K. Ikeda
A Flexible Image Retrieval Using Explicit Visual Instruction ....................................................................175
   F. Kanehara, S. Satoh, and T. Hamada

Session 1.4–A: Signature Verification

Stroke-Based Time Warping for Signature Verification ..............................................................................179
   B. Wirtz
Parameter Reduction and Personalized Parameter Selection for Automatic Signature Verification ...............183
   F. Bauer and B. Wirtz
Signature Identification via Local Association of Features ................................................................. 187
K. Han and I.K. Sethi

Off-Line Signature Verification, Without a priori Knowledge of Class \( \omega_2 \)
A New Approach ....................................................................................................................................... 191
N.A. Murshed, F. Bortolozzi, and R. Sabourin

An Extended-Shadow-Code Based Approach for Off-Line Signature Verification:
Part-II-Evaluation of Several Multi-Classifier Combination Strategies ............................................ 197
R. Sabourin and G. Genest

A Hierarchical On-Line Chinese Signature Verification System .......................................................... 202
X-H. Xiao and R-W. Dai

Session 1.4-B: Model-Based Document Analysis

Construction of Generic Models of Document Structures Using Inference of
Tree Grammars ................................................................................................................................. 206
O.T. Akindele and A. Belaid

A Formal Model for Document Processing of Business Forms ......................................................... 210
M. Cheriet, J.N. Said, and C.Y. Suen

Model-Based Analysis of Printed Tables ............................................................................................. 214
E. Green and M. Krishnamoorthy

Robust Table-Form Structure Analysis Based on Box-Driven Reasoning .......................................... 218
O. Hori and D.S. Doermann

Classification and Postprocessing of Documents Using an Error-Correcting Parser .......................... 222
H. Bunke and R. Liviero

Session 1.4-C: Image Processing

A Line Sweep Thinning Algorithm ....................................................................................................... 227
F. Chang, Y-P. Cheng, T. Pavlidis, and T-Y. Shuai

A Noise Attribute Thresholding Method for Document Image Binarization ...................................... 231
H-S. Don

Nonlinear Shape Restoration of Distorted Images with Coons Transformation .................................. 235
S-W. Lee, E-S. Kim, and Y.Y. Tang

A Rule Learning Method for Academic Document Image Processing .............................................. 239
A. Takasu, S. Satoh, and E. Katsura

A High-Quality Vectorization Combining Local Quality Measures and
Global Constraints ......................................................................................................................... 243
M. Röösli and G. Monagan

Session 1.4-D: Map Interpretation

Characters String Recognition on Maps: A Method for High Level Reconstruction .......................... 249
M. Pierrot-Desseilligny, H. Le Men, and G. Stamon

Conversion of High Level Information from Scanned Maps into Geographic
Information Systems .......................................................................................................................... 253
G. Maderlechner and H. Mayer

Directional Mathematical Morphology Approach for Line Thinning and Extraction of
Character Strings from Maps and Line Drawings ................................................................................. 257
H. Luo, G. Agam, and I. Dinstein
An Object-Oriented Model for Drawing Understanding and Its Ability of Noise Absorption .................................................. W. Wu, W. Lu, and M. Sakauchi 261
An Efficient Method for Hierarchically and Dynamically Extracting Text Strings from Mixed Text/Graphics Images .................................................. S. He, N. Abe, and C.L. Tan 265

Session 2.1-A: Classification Methods
Relaxation Optimizing Processes in Extended Probabilistic Space .................................................. T. Horiuchi, K. Toraichi, K. Yamamoto, and H. Yamada 266
The Design of a Nearest-Neighbor Classifier and Its Use for Japanese Character Recognition .................................................. T. Hong, S.W. Lam, J.J. Hull, and S.N. Srihari 270
Japanese Document Recognition Based on Interpolated n-gram Model of Character .................................................. H. Mori, H. Aso, and S. Makino 274
Random Decision Forests .................................................. T.K. Ho 278
A Fast Algorithm for the Minimum Distance Classifier and Its Application to Kanji Character Recognition .................................................. S. Senda, M. Minoh, and K. Ikeda 283

Session 2.1-B: Document Understanding
Model Matching Based on Association Graph for Form Image Understanding .................................................. Y. Ishitani 287
Model Matching in Intelligent Document Understanding .................................................. G.S.D. Farrow, C.S. Xydeas, and J.P. Oakley 293
Interactive Acquisition of Thematic Information of Chinese Verbs for Judicial Verdict Document Understanding Using Templates, Syntactic Clues, and Heuristics .................................................. K.H.C. Lin, R-L. Liu, and V-W. Soo 297
A Syntactic Business Form Classifier .................................................. A. Ting, M.K. Leung, S-C. Hui, and K-Y. Chan 301
Extracting Characters and Character Lines in Multi-Agent Scheme .................................................. K. Gyohten, T. Sumiya, N. Babaguchi, K. Kakusho, and T. Kitahashi 305

Session 2.1-C: Feature Extraction
Spatial Sampling Effects in Optical Character Recognition .................................................. D. Lopresti, J. Zhou, G. Nagy, and P. Sarkar 309
The Evaluation of Feature Extraction Criteria Applied to Neural Network Classifiers .................................................. W. Utschick, P. Nachbar, C. Knobloch, A. Schuler, and J.A. Nossek 315
Prediction of OCR Accuracy Using Simple Image Features .................................................. L.R. Blando, J. Kanai, and T.A. Nartker 319
Telugu Script Recognition — A Feature-Based Approach .................................................. P.V.S. Rao and T.M. Ajitha 323
Document Image Analysis Using Integrated Image and Neural Processing .................................................. D.X. Le, G.R. Thoma, and H. Wechsler 327
Session 2.1-D: Reconstruction and Interpretation

A Step Towards Reconstruction of 3-D CAD Models from Engineering Drawings ........................................ 331
C. Ah-Soon and K. Tombre

A Scheme for 3D Object Reconstruction from Dimensioned Orthographic Views ........................................ 335
M. Weiss and D. Dori

Recovering Decorative Patterns of Ceramic Objects from a Monocular Image Using a Genetic Algorithm ........ 339
H. Tanahashi, K. Sakaue, and K. Yamamoto

Interpretation of 3-View Engineering Drawings as Central Quadric Surface Mechanical Parts ...................... 343
R.E. Marston and M.H. Kuo

Recognition of Dimension Sets and Integration with Vectorized Engineering Drawings ............................ 347
A.K. Das and N.A. Langrana

Session 2.2-A: Word Recognition II

A Word Recognition Algorithm for Machine-Printed Word Images of Multiple Fonts and Varying Qualities ........ 351
S.X. Zhao and S.N. Srihari

Segmentation-Free Word Recognition with Application to Arabic .............................................................. 355
B. Al-Badr and R.M. Haralick

A Hypothesis Testing Approach to Word Recognition Using an A* Search Algorithm .................................. 360
C. Fang and J.J. Hull

Experimental Results on Improved Handwritten Word Recognition Using the Levenshtein Metric ............... 364
P. Gentric

A Probabilistic Approach to Automatic Handwritten Address Reading ..................................................... 368
J-M. Bertille and M. Gilloux

Session 2.2-B: Document Analysis

How Can Document Analysis Help in Capturing Five Million Pages? ............................................................ 372
P. Suda, G. Maderlechner, H. Bock, and H.P. Klünder

Automatic Script Identification from Images Using Cluster-Based Templates ............................................. 378
J. Hochberg, L. Kerns, P. Kelly, and T. Thomas

Estimating the Baseline for Written Material ................................................................................................ 382
T. Caesar, J.M. Gloger, and E. Mandler

An Axiomatic Approach to Clustering Line-Segments .................................................................................... 386
A. Jonk and A.W.M. Smeulders

Line Extraction and Stroke Ordering of Text Pages ....................................................................................... 390
I.S.I. Abuhaiba, S. Datta, and M.J.J. Holt

Session 2.2-C: Neural Networks and Systems

A Hybrid Radial Basis Function Network/Hidden Markov Model Handwritten Word Recognition System .......... 394
M. Gilloux, B. Lemarié, and M. Leroux
A Comparison of Discrete and Continuous Hidden Markov Models for Phrase Spotting in Text Images .............................................................. 398
  F.R. Chen, L.D. Wilcox, and D.S. Bloomberg

NPen++: A Writer Independent, Large Vocabulary On-Line Cursive Handwriting Recognition System ......................................................... 403
  S. Manke, M. Finke, and A. Waibel

Hidden Markov Mesh Random Field: Theory and Its Application to Handwritten Character Recognition ......................................................... 409
  H-S. Park and S-W. Lee

Integrated Segmentation and Recognition of Connected Handwritten Characters with Recurrent Neural Network ........................................... 413
  S-W. Lee and E-J. Lee

**Session 2.2-D: Symbol Recognition**

Mathematics Recognition Using Graph Rewriting .................................................. 417
  A. Grbavec and D. Blostein

Computer Processing on the Identification of a Chinese Seal Image ..................... 422
  Y-S. Chen

Parallelism in Dynamic Time Warping for Automatic Signature Verification .......... 426
  Y.J. Bae and M.C. Fairhurst

Structure Analysis and Recognition of Mathematical Expressions ...................... 430
  H.M. Twaakyondo and M. Okamoto

Extracting Individual Features from Moments for Chinese Writer Identification .... 438
  C-L. Liu, R-W. Dai, and Y-J. Liu

**Session 2.3-A: Postprocessing**

Visual Inter-Word Relations and Their Use in OCR Postprocessing .................... 442
  T. Hong and J.J. Hull

Error Detection in Character Recognition Using Pseudosyllable Analysis ............ 446
  R. García García, Y.A. Dimitriadis, F. Merino Pastor, and J. López Coronado

A Language Model Based on Semantically Clustered Words in a Chinese Character Recognition System ...................................................... 450
  H-J. Lee and C-H. Tung

Design of a Linguistic Postprocessor Using Variable Memory Length Markov Models 454
  I. Guyon and F. Pereira

(Chem)DeTeX Automatic Generation of a Markup Language Description of (Chemical) Documents from Bitmap Images .......................... 458
  A. Simon, J-C. Pret, and A.P. Johnson

**Session 2.3-B: Document Structure and Analysis**

Near-Wordless Document Structure Classification .......................................... 462
  K. Summers

A Knowledge-Based Approach to the Layout Analysis ...................................... 466
  F. Esposito, D. Malerba, and G. Semeraro

Knowledge-Based Derivation of Document Logical Structure .......................... 472
  D. Niyogi and S.N. Srihari
Experiments on Extracting Structural Information from Paper Documents Using Syntactic Pattern Analysis
T.A. Bayer and H. Walischewski
ODIL: An SGML Description Language of the Layout Structure of Documents
P. Lefèvre and F. Reynaud

Session 2.3-C: Modeling Methods
A Set of Handwriting Families: Style Recognition
J-P. Crettez
The Delta LogNormal Theory for the Generation and Modeling of Cursive Characters
W. Guerfali and R. Plamondon
A New Modeling Method for On-Line Handwriting Recognition
G. Menier, G. Lorette, and P. Gentic
Modelling Polyfont Printed Characters with HMMs and a Shift Invariant Hamming Distance
A.J. Elms and J. Illingworth
Stochastic Trajectory Modeling for Recognition of Unconstrained Handwritten Words
G. Saon, A. Belaïd, and Y. Gong

Session 2.3-D: Drawing and Map Recognition
A Drawing Recognition System with Rule Acquisition Ability
W. Lu, W. Wu, and M. Sakauchi
Automatic Recognition of Facility Drawings and Street Maps Utilizing the Facility Management Database
C. Nakajima and T. Yazawa
A Proposal of Efficient Interactive Recognition System for Understanding of Map Drawings
W. Lu, T. Okuhashi, and M. Sakauchi
A New Methodology for Gray-Scale Character Segmentation and Recognition
D.-J. Lee and S-W. Lee
Segmentation and Recognition of Dimension Texts in Engineering Drawings
J. Gao, L. Tang, W. Liu, and Z. Tang

Session 2.4-P: Poster Papers I
Bibliography References Validation Using Emergent Architecture
F. Parmentier and A. Belaïd
A Framework for Validating Recognized Results in Understanding Table-Form Document Images
T. Watanabe and T. Fukumura
Recursive Logical Document Structure Description Using Textons: A Generic Object-Process Analysis
D. Dori, I. Phillips, and R.M. Haralick
Zone Classification in a Document Using the Method of Feature Vector Generation
R. Sivaramakrishnan, I.T. Phillips, J. Ha, S. Subramanium, and R.M. Haralick

Improved Binarization Algorithm for Document Image by Histogram and Edge Detection .............................................................................................................................................. 636
M-S. Chang, S-M. Kang, W-S. Rho, H-G. Kim, and D-J. Kim

Preprocessing Raw Binary Images by Means of Contours ........................................................................................................................................................................... 640
A. Braun, T. Caesar, J.M. Gloger, and E. Mandler

Character Detection Based on Multi-Scale Measurement ........................................................................................................................................................................... 644
H. Hontani and S. Shimotsuji

Gray Scale Filtering for Line and Word Segmentation ........................................................................................................................................................................... 648
Y. Lu and A.C. Tisler

Drawing Capturing System Using Image Enhancement ................................................................................................................................................................. 652
N. Nakamura, K. Hosaka, and M. Nagura

Observation Method for Mathematical Graphology ........................................................................................................................................................................... 656
K. Toraichi, T. Horiuchi, and R. Haruki

A System for Automatic Chinese Seal Imprint Verification ....................................................................................................................................................... 660
W. Gao, S. Dong, and X. Chen

Extraction of Signature and Seal Imprint from Bankchecks by Using Color Information ........................................................................................................................................... 665
K. Ueda

Color Quantization by RWM-Cut ........................................................................................................................................................................... 669
C-Y. Yang and J-C. Lin

Circular Histogram Thresholding for Color Image Segmentation ....................................................................................................................................................... 673
D-C. Tseng, Y-F. Li, and C-T. Tung

Faxed Image Restoration Using Kalman Filtering ........................................................................................................................................................................... 677
M-Y. Yoon, S-W. Lee, and J-S. Kim

A Shape Band-Pass Filter for Character Recognition and Texture Segmentation ....................................................................................................................................................... 681
D. Wang, V. Haese-Coat, and J. Ronsin

A Structural Model of Continuous Transformation of Handwritten Characters ....................................................................................................................................................... 685
H. Nishida

The Field Transform and Its Application to Personal Handwritten Chinese Character Recognition ........................................................................................................................................................................... 689
M-J. Li and R-W. Dai

The Character Recognition Approach Using Novel Decision Tree Based on the Backpropagation Network ........................................................................................................................................................................... 693
G. Bai and Q-R. Wang

Towards a Genetic Based Prototyper for Character Shapes ........................................................................................................................................................................... 694
B. Bontempi and A. Marcelli

A Clustering Method and Radius Tuning by End Users ........................................................................................................................................................................... 698
H. Takahashi and K.M. Mohiuddin

Automatic Hypertext Link Generation Based on Conceptual Graphs ........................................................................................................................................................................... 702
G-C. Yang and K-S. Choi

Evaluation of an Interactive Tool for Handwritten Form Description ........................................................................................................................................................................... 706
G. Leedham and D. Monger

A Visual Programming Toolkit Demonstrator for Offline Handwritten Forms Recognition ........................................................................................................................................................................... 707
A.C. Downton, S.J. Hanlon, and A. Amiri

Data Structures and Tools for Document Database Generation: An Experimental System ........................................................................................................................................................................... 711
R. Bippus and V. Mürgner
Parallel Hardware Implementation of Handwritten Character Recognition System on Wavefront Array Processor Architecture
Y-J. Kim, S-W. Lee, and M-W. Kim

Session 3.1-A: Shape Models

Comparison of Normalization Methods for Character Recognition
G. Srikantan, D-S. Lee, and J.T. Favata

An OCR Based on Character Shape Codes and Lexical Information
A.L. Spitz

Matching Graph Embeddings for Shape Analysis
T. Pavlidis, W.J. Sakoda, and H. Shi

Power Functions and Their Use in Selecting Distance Functions for Document Degradation Model Validation
T. Kanungo, R.M. Haralick, and H.S. Baird

A Study of Document Image Degradation Effects on Font Recognition
A. Zramdini and R. Ingold

Session 3.1-B: Item Extraction

Item Searching in Forms: Application to French Tax Form
Y. Belaid, A. Belaid, and E. Turolla

Detection of Courtesy Amount Block on Bank Checks
A. Agarwal, L. Granowetter, K. Hussein, A. Gupta, and P.S.P. Wang

Four Directional Adjacency Graphs (FDAG) and Their Application in Locating Fields in Forms
J. Yuan, Y.Y. Tang, and C.Y. Suen

Location of Name and Address on Fax Cover Pages
J. Lii and S.N. Sripati

A Robust Method of Extracting Rectangle Blocks for Form Reading
X. Li and J. Hong

Session 3.1-C: Document Segmentation

Simultaneous Word Segmentation from Document Images Using Recursive Morphological Closing Transform
S. Chen, R.M. Haralick, and I.T. Phillips

Kalman Filter Contributions Towards Document Segmentation
I. Leplumey, J. Camillerapp, and C. Queguiner

Segmentation of Complex Documents Multilevel Images: A Robust and Fast Text Bodies-Headers Detection and Extraction Scheme
O. Déforges and D. Barba

A Hough Based Algorithm for Extracting Text Lines in Handwritten Documents
L. Likforman-Sulem, A. Hanimyan, and C. Faure

Adaptive Image Restoration of Text Images that Contain Touching or Broken Characters
P. Stubberud, J. Kanai, and V. Kalluri
Session 3.1-D: Diagram/Drawing Understanding

Efficient Analysis of Complex Diagrams Using Constraint-Based Parsing ............................................. 782
R.P. Futrelle and N. Nikolakis

A System for Recognizing a Large Class of Engineering Drawings .................................................. 791
Y. Yu, A. Samal, and S.C. Seth

Efficient Techniques for Telephone Company Line Drawing Interpretation ........................................ 795
J.F. Arias, R. Kasturi, and A. Chhabra

The Role of Taxonomy in Drawing Interpretation .............................................................................. 799
B. Pasternak

Automatic Understanding of Symbol-Connected Diagrams ............................................................... 803
B. Yu

Session 3.2-P: Poster Papers II

A Comparative Study of the k Nearest Neighbour, Threshold and Neural Network
Classifiers for Handwritten Signature Verification Using an Enhanced Directional PDF ................ 807
J-P. Drouhard, R. Sabourin, and M. Godbout

A System for Machine-Written and Hand-Written Character Distinction .............................................. 811
K. Kuhnke, L. Simoncini, and Z.M. Kovács

Off-Line Recognition of Handwritten Korean and Alphanumeric Characters
Using Hidden Markov Models ........................................................................................................... 815
C. Oh and W.S. Kim

Recognition of Handprinted Chinese Characters Using Gabor Features ................................................. 819
Y. Hamamoto, S. Uchimura, K. Masamizu, and S. Tomita

Hierarchical Flexible Matching for Recognition of Chinese Characters ............................................. 824
F. Chang, Y-P. Cheng, and Y-S. Huang

A Personal Handwritten Chinese Character Recognition Algorithm Based on the
Generalized Hough Transform ........................................................................................................... 828
M-J. Li and R-W. Dai

A High Accuracy Printed Traditional and Simplified Chinese Character Document
Recognition System .......................................................................................................................... 832
X. Zhang, L. Shen, X. Liu, Y. Li, and C.D. Yan

A Method of Jia Gu Wen Recognition Based on a Two-Level Classification ........................................ 833
X-L. Zhou, X-C. Hua, and F. Li

Incremental Character Recognition with Feature Attribution ............................................................... 837
R. Audouin and L. Shastri

Extracting Meaningful Handwriting Features with Fuzzy Aggregation Method ...................................... 841
A. Malaviya and L. Peters

Graph-Based Handwritten Digit String Recognition ............................................................................. 845
A. Filatov, A. Gitis, and I. Kil

A Multi-Layer Classifier for Recognition of Unconstrained Handwritten Numerals .......................... 849
G-E. Wang and J-F. Wang

A Structural Method with Local Refining for Handwritten Character Recognition ........................... 853
G. Congedo, G. Dimauro, S. Impedovo, and G. Pirlo

Lexical Postprocessing by Heuristic Search and Automatic Determination of the
Edit Costs ........................................................................................................................................ 857
A. Weigel, S. Baumann, and J. Rohrschneider
Strokes Recovering from Static Handwriting .................................................. 861
  W. Huang, G. Rong, and Z. Bian

A Robust Approach for Arabic Printed Character Segmentation .................. 865
  B.A. Najoua and E. Noureddine

Persian Cursive Script Recognition .......................................................... 869
  M.R. Hashemi, O. Fatemi, and R. Safavi

A New Approach for Latin/Arabic Character Segmentation ......................... 874
  K. Romeo-Pakker, H. Miled, and Y. Lecourtier

Numeral Characters and Capital Letters Segmentation Recognition in Mixed
  Handwriting Context .............................................................................. 878
  H. Wehbi, H. Oulhadj, J. Lemoine, and E. Petit

Applying Personalized Weights to a Feature Set for On-Line Signature Verification
  .............................................................................................................. 882
  S.H. Kim, M.S. Park, and J. Kim

On-Line Cursive Script Recognition Using an Island-Driven Search Technique .... 886

The Analysis of Error in an On-Line Recognition System of Arabic Handwritten
  Characters ............................................................................................ 890
  A.M. Alimi and O.A. Ghorbel

Off-Line Cursive Handwriting Segmentation ............................................. 894
  K. Han and I.K. Sethi

Building a Perception Based Model for Reading Cursive Script .................. 898
  M. Côté, E. Lecolinet, M. Cheriet, and C.Y. Suen

Base Line Correction for Handwritten Word Recognition ......................... 902
  S. Tsuruoka, N. Watanabe, N. Minamide, F. Kimura, Y. Miyake, and M. Shridhar

Handwritten Zip Code Recognition Using Lexicon Free Word Recognition Algorithm
  ............................................................................................................. 906
  F. Kimura, Y. Miyake, and M. Shridhar

Serial Classifier Combination for Handwritten Word Recognition ............ 911
  S. Madhvath and V. Govindaraju

Using Lexical Knowledge for the Recognition of Poorly Written Words .......... 915
  T. Caesar, J.M. Gloger, and E. Mandler

Lexicon-Driven Word Recognition ............................................................ 919
  C-H. Chen

Data Capture from Maps Based on Gray Scale Topographic Analysis ............ 923
  Ø.D. Trier, T. Taxt, and A.K. Jain

Tools for Interactive Map Conversion and Vectorization ......................... 927
  L. Eikvil, K. Aas, and H. Koren

Recursive Morphological Sieve Method for Searching Pictorial Point Symbols on Maps
  ............................................................................................................. 931
  J.S. Shieh

Extraction of Slant Character Candidates from Maps Using Circular Templates
  ............................................................................................................. 936
  O. Shiku, A. Nakamura, M. Anegawa, H. Takahira, and H. Kuroda

A System for Recognizing Numeric Strings from Topographical Maps .......... 940
  M. Anegawa, O. Shiku, A. Nakamura, T. Ohyama, and H. Kuroda

Rotation-Invariant Recognition of Character Strings for Korean Cadastral
  Map Digitizing ..................................................................................... 944
  P.K. Rhee, J.S. Park, and Y.G. Kang

Separation of Chinese Characters from Graphics ..................................... 948
Recursive X-Y Cut Using Bounding Boxes of Connected Components ........................................ 952
J. Ha, R.M. Haralick, and I.T. Phillips

Understanding Mathematical Expressions from Document Images ........................................ 956
J. Ha, R.M. Haralick, and I.T. Phillips

Interpretation of Conceptual Diagrams from Line Segments and Strings .................................. 960
K. Kise, N. Yoneda, S. Takamatsu, and K. Fukunaga

Semi-Automatic Delineation of Regions in Floor Plans .............................................................. 964
K. Ryall, J. Marks, S. Shieber, and M. Mazer

Recognition of Objects in Images of Paper Based Line Drawings ........................................... 970
V.M. Kiyko

An Intelligent Chinese Official Document Processing System .................................................... 974

Realization of a High-Performance Bilingual Chinese-English OCR System .............................. 978
H. Guo, X. Ding, Z. Zhang, F. Guo, and Y. Wu

A Microprocessor-Based Optical Character Recognition Check Reader .................................... 982
F. Chin and F. Wu

Two-Stage Recognition of Freight Train ID Number under Outdoor Environment ....................... 986

A System Prototype for ECG Paper Record Conversion ............................................................ 991

A Map Acquisition, Storage, Indexing, and Retrieval System .................................................. 992
H. Samet and A. Soffer

A Markovian Random Field Approach to Information Retrieval ............................................. 997
D. Bouchaffra and J.G. Meunier

Session 3.3-A: Word and Character Recognition

A System for Segmenting and Recognising Totally Unconstrained Handwritten Numeral Strings 1003
T.M. Ha, D. Niggeler, and H. Bunke

Multiresolution Recognition of Handwritten Numerals with Wavelet Transform and Multilayer Cluster Neural Network ................................................................. 1010
S-W. Lee and Y-J. Kim

Optimal Techniques in OCR Error Correction for Japanese Texts ............................................ 1014
T. Hisamitsu, K. Marukawa, Y. Shima, H. Fujisawa, and Y. Nitta

Reading Encrypted Postal Indicia ............................................................................................... 1018
M. Cullen, L. Pintsov, and B. Romansky

Conjoined Location and Recognition of Street Names Within a Postal Address Delivery Line ........................................................................................................ 1024
A. El Yacoubi, J-M. Bertille, and M. Gilloux

Session 3.3-B: Segmentation II

Strategies in Character Segmentation: A Survey ........................................................................ 1028
R.G. Casey and E. Lecolinet

A Correspondence Based Approach to Segmentation of Cursive Words .................................... 1034
A. Negi, K.S. Swaroop, and A. Agarwal
Segmentation of Numeric Strings .......................................................... 1038
  G. Congedo, G. Dimauro, S. Impedovo, and G. Pirlo
Segmentation of Interference Marks Using Morphological Approach .......... 1042
  S. Liang, M. Ahmadi, and M. Shridhar
A System for Scanning and Segmenting Cursively Handwritten Words into
  Basic Strokes .................................................................................. 1047
  C.M. Privitera and R. Plamondon

Session 3.3–C: On-Line Recognition II
  On-Line Cursive Korean Character Recognition by Using Curvature Models ... 1051
    B.H. Jun, M.Y. Kim, C.S. Kim, W.S. Kim, and J. Kim
  Neural Approaches for Human Signature Verification ................................. 1055
    L.L. Lee
  On-Line Cursive Kanji Character Recognition as Stroke Correspondence Problem 1059
    T. Wakahara, A. Suzuki, N. Nakajima, S. Miyahara, and K. Odaka
  Intelligent Document Assistant Processor for Pen-Based Computing Systems 1065
    P.K. Rhee and T. Fujisaki
  A Grammatical Inference Approach to On-Line Handwriting Modeling and Recognition: 1069
    A Pilot Study .................................................................. 1069
    D-Y. Yeung

Session 3.3–D: Theoretical Approach and Music Recognition
  Head and Stem Extraction from Printed Music Scores Using a Neural Network Approach 1074
    H. Miyao and Y. Nakano
  A Simplified Attributed Graph Grammar for High-Level Music Recognition 1080
    S. Baumann
  Design of a Mathematical Expression Recognition System ............................ 1084
    H-J. Lee and J-S. Wang
  The Iterated Complete Path Algorithm ..................................................... 1088
    A.C. Kam and G.E. Kopec
  A Way to Separate Knowledge from Program in Structured Document Analysis: 1092
    Application to Optical Music Recognition
    B. Coisasnon and J. Camillerapp

Session 3.4–A: Learning
  Recognition of Hand Printed Latin Characters Using Machine Learning .......... 1098
    D. Ziino, A. Amin, and C. Sammut
  An Experimental Study of Learning Curves for Statistical Pattern Classifiers 1103
    T. Matsunaga and H. Kida
  Automatic Construction of Structural Models for Unconstrained Handwritten Characters 1107
    H. Nishida
  A Self-Organizing Neural Tree for Large-Set Pattern Classification ............... 1111
    H-H. Song and S-W. Lee
Session 3.4-B: Layout Analysis

Document Page Decomposition by the Bounding-Box Projection Technique ........................................ 1119
   J. Ha, R.M. Haralick, and I.T. Phillips

A Language for Document Generic Layout Description and Its Use for Segmentation into Regions ........ 1123
   A. Azokly and R. Ingold

Page Segmentation and Classification Using Fast Feature Extraction and Connectivity Analysis ........ 1127
   J. Sauvola and M. Pietikäinen

Representation and Classification of Complex-Shaped Printed Regions Using White Tiles .................. 1132
   A. Antonacopoulos and R.T. Ritchings

A System for Data Extraction from Forms of Known Class .............................................................. 1136
   F. Cesarini, M. Gori, S. Marinai, and G. Soda

Session 3.4-C: Skew Detection and Processing

Cooperation of Multi-Layer Perceptrons for the Estimation of Skew Angle in Text Document Images ...... 1141
   N. Rondel and G. Burel

A Simple and Efficient Skew Detection Algorithm via Text Row Accumulation ................................ 1145
   R. Smith

Document Skew Detection Based on the Fractal and Least Squares Method ...................................... 1149
   C.L. Yu, Y.Y. Tang, and C.Y. Suen

Automatic Text Skew Estimation in Document Images ......................................................................... 1153
   S. Chen, R.M. Haralick, and I.T. Phillips

Processing of Text Documents: Straight Line Approximation and Lost Loop Recovery ................. 1157
   I.S.I. Abuhaiba, S. Datta, and M.J.J. Holt

Session 3.4-D: Storage and Retrieval

Document Registration Using Projective Geometry .............................................................................. 1161
   R. Safari, N. Narasimhamurthi, M. Shridhar, and M. Ahmadi

Automatic Indexing and Content-Based Retrieval of Captioned Photographs .................................. 1165
   R.K. Srihari

TheSys — A Comprehensive Thesaurus System for Intelligent Document Analysis and Text Retrieval .... 1169
   C. Lu, K.H. Lee, and H.Y. Chen

Iconic Paper ....................................................................................................................................... 1174
   M. Peairs

Hyperdocument Generation Using OCR and Icon Detection ............................................................. 1180
   M. Worring, R. van den Boomgaard, and A.W.M. Smeulders

Additional Paper ................................................................................................................................... 1184

Author Index .......................................................................................................................................... A1
