Message from the WNMC Chair

International Workshop on Wireless Networks and Mobile Computing Workshop

It has been our great pleasure to serve as the Chairs for the Wireless Networks and Mobile Computing Workshop (WNMC 2001). This is the second time this workshop was held in conjunction with the International Conference on Distributed and Computing Systems (ICDCS 2001). This workshop has served as a forum for engineers and scientists from around the world to present their latest research findings in this field.

Host mobility adds the newest dimension to distributed computing, which has seen massive growth in the recent past. The importance of mobile computing is rapidly increasing with the popularity of computer networking, light-weight computing devices, and wireless communication. This workshop intends to bring together researchers and practitioners working on diverse aspects of this important area in order to identify current status, fundamental issues, future problems, and applications.

This year we have accepted 14 papers from 19 submissions. Each paper was sent to three reviewers for review. In average, we received at least two reports for each paper in order to determine whether to include the paper in the workshop proceedings.

We would like to thank all Program Committee Members and referees for their precious time and help to make this workshop possible. We would also like to take this opportunity to thank those authors who contributed to the technical program. We hope you enjoy the program.
