Welcome from the General Chair ................................................................................................................................................lxxxvii
Conference Committee .................................................................................................................................................................lxxxviii
Reviewers ..........................................................................................................................................................................................xc

## Business Systems and Services

A Conversation Protocol Design between Heterogeneous Agents Using KQML .................................................................1

*Zhang Shaolong and Wang Qiang*

A Theoretical Framework of Fourth Party Payment ..................................................................................................................5

*Xu Yong and Fang Caiqian*

Analysis of SaaS-Based E-Commerce Platform .........................................................................................................................9

*Deng Zhonghua and Hai Erfeng*

Analysis of the Multasking Principal-agent Model in the Housing Management ..................................................................13

*Zhang Yufeng, Mao Jie, and Cheng Hongqun*

Application Study on Collaborative Mobile Electronic Commerce .........................................................................................18

*Wang Jing and He Peng*

Collaborative Business Informatization Service Pattern of Small and Medium-Sized

Enterprise Cluster .............................................................................................................................................................................22

*Jiwei Zhu, Jiancang Xie, Jianxun Li, and Rengui Jiang*

Effects of Interorganizational Systems: Issues Affecting Coordination Cost ...........................................................................26

*Geng Zhang*

Electronic Business Technology and its Security Problems .......................................................................................................30

*Yi Huang and Xinqiang Ma*

Enterprise Collaborative Business Systems Based on Web Services Technology .................................................................34

*Qing Chen and Yang Wang*

Federation Access Control Model Based on Web-Service ...........................................................................................................38

*Zhang Wenchao and Li Yafen*

Inter-organization Collaboration Management in Dynamic Virtual Alliances ........................................................................42

*Yuchen Wang, Jinlong Zhang, Jianci Wang, and Xiaoli Chong*
Study on the Typical Application of E-commerce .................................................................46

Wang Li

The Research on Enterprise Manufacture Integrated and Collaborative Commerce System .................................................................49

Hechao Wang and Lihua Huang

Opinions about the Development of Agricultural e-Commerce in the New Socialism Countryside Construction .................................................................55

Wu Yan, Huang Shuanggen, Chen Qi, and Peng Yuan

Spatial Integration of Urban Agglomeration Based on DEA Dynamic Clustering .................................................................58

Yaobin Liu and Ling Liu

Study on Application of Long-distance Education Resource Grid .................................................................62

Yi Xiao, Ming Yi, YanHui Li, and Ming Xiao

Human Resource Management Strategy in E-Commerce Enterprises .................................................................66

Liu Ping

Jiang Fazhu, Yang Xiufeng, and Shi Kun

A Conceptual Framework for Consumer Adoption of Mobile Advertising in China .................................................................74

Xiao Shuang

A New Framework on Website Evaluation ...........................................................................78

Shanshan Qi, Crystal Ip, Rosanna Leung, and Rob Law

An E-Commerce Trust Model Based on Web Service ...........................................................................82

Bin Liu and Renjin Zhang

An Operators’ Perspective: Study on M-commerce Competitiveness of Chinese 3G Market ...........................................................................86

Wei Huang

Application of Code Technology in Mobile Bonus Point System ...........................................................................90

Hu Zhiyong

Assessing the Effects of e-Service Quality and e-Satisfaction on Internet Banking Loyalty in China ...........................................................................93

Sun Quan

Client/Server Framework-Based Passenger Line Ticket System Using 2-D Barcode on Mobile Phone ...........................................................................97

Dong Li, Yuhao Wang, Linli Hu, Jing Li, Xuezha Guo, Jiance Lin, and Jie Liu

Comparative Study of Chinese and American Travel E-Business Models ...........................................................................101

Liao Yuhang and Huang Xiaoling

E-Service Quality Research Based on Content Analysis Method ...........................................................................105

Li Zhong and Wang Xiao

ONE-CARD System Based on the Second Generation ID Card in China ...........................................................................108

Pan Tiejun, Xiong Chunlei, Zheng Leina, Han Yufeng, and Bai Lingbin

Platform Engineering in Enterprise Application Development ...........................................................................112

Jingang Zhou, Yong Ji, Dazhe Zhao, and Jiren Liu
