Message from the Tutorial Chairs

ICGSEW 2013

The 8th IEEE International Conference on Global Software Engineering (ICGSE) in Bari, Italy hosts two half-day tutorials on global software engineering research and practice. The tutorials provide a forum for students, researchers and practitioners to learn new things together and discuss. The tutorials are:

1. "Social Network Analysis for Global Software Engineering: Exploring relationships from a fine-grained level" presented by: Nicole Novielli, University of Bari, Italy and Sabrina Marczak, PUCRS University, Brazil
2. "Success with Distributed Engineering Teams – Lessons from Industry" presented by Christof Ebert, Vector, Germany

We would like to thank the presenters of both tutorials. We are certain that the tutorials will provoke new thoughts and illuminating discussions.

Welcome to the tutorials of ICGSE 2013 in Bari!

Maria Paasivaara and Xin Peng
