</table>
Fast Variants of the Backward-Oracle-Marching Algorithm ..........................................................56

Hongbo Fan, Nianmin Yao, and Haifeng Ma

An Efficient Mesh Simplification Algorithm ..............................................................................60

Hailing Wang, Guisheng Yin, Jing Zhang, Decai Wang, and Jian Wang

The New Development of PRISM for Probabilistic Model Checking ..............................................64

Mingyu Ji, Shaobin Huang, Hongtao Huang, and Tao Zhang

Data Model, Image Processing, and Graphics

Face Recognition Based on Modified Modular Principal Component Analysis ..............................67

Xingfu Zhang

Access Model of Web Users Based on Multi-chains Hidden Markov Models ...............................73

Kangfeng Zheng, Yixian Yang, Xiujuan Wang, and Shize Guo

Cross-Media Retrieval Method Based on Temporal-spatial Clustering and Multimodal Fusion ........78

Yang Liu, Fengbin Zheng, Kun Cai, and Baoqing Jiang

CasAB: Building Precise Bitmap Indices via Cascaded Bloom Filters ........................................85

Zhuo Wang

Track Association and Fusion Based on Information Demand Analysis .......................................93

Li Xu, Peijun Ma, and Xiaohong Su

Chromatic Statistical Landscape Features for Retrieval of Color Textured Images .......................98

Cun Lu Xu and Xian Tong Zhen

Effects of Spectral Radius on Echo-State-Network’s Training .......................................................102

Yuanbiao Wang, Jun Ni, and Zhiping Xu

Intelligent Image Identification to Human Cells ...........................................................................109

Duan Jun, Zhao Yang, and Jun Ni

General Tendencies in Segmentation of Medical Ultrasound Images ........................................113

Changming Zhu, Jun Ni, Yanbo Li, and Guochang Gu

Design and Routing Algorithm of PPCAN ..................................................................................118

Wei Gao, Guoyin Zhang, and Yanmei Li

Speckle Noise Suppression Techniques for Ultrasound Images ..................................................122

Changming Zhu, Jun Ni, Yanbo Li, and Guochang Gu

A R-tree-based Fine Directional Query Filtering ..........................................................................126

Ze-bao Zhang, Jian-pei Zhang, Ruo-yu Li, and Jing Yang

A High-Level Fuzzy Timed Petri-Net-Based Approach ..............................................................131

Xin Liu, Gui-Sheng Yin, and Zi-Ying Zhang

Apply SOM to Video Artificial Text Area Detection .....................................................................137

Jia Yu and Yan Wang

An Adaptive Traffic Sampling Method for Anomaly Detection ....................................................142

Xiaobing He, Wu Yang, and Qing Wang

Spatial Ontology Instantiation for Text-to-Scene Conversion System .........................................147

Hanjing Li, Xiaoping Xue, Sheng Li, and Tiejun Zhao

An Efficient Mining Algorithm for Top-k Strongly Correlated Item Pairs ..................................152

Qiang Li and Yongshi Zhang

SVMs' Cooperative Learning Strategy Based on MAS to Data Streams Mining .........................156

Yong-shi Zhang, Jian-pei Zhang, Jing Yang, and Zhi-Wei Yin

Low Power Behavioral Synthesis ..................................................................................................160

Guan-Jun Wang and Ying Zhao
Survey on Formal Verification Methods for Digital IC .......................................................... 164
    Jianhua Wang, Jingbo Shao, Yingmei Li, and Jinfeng Ding

Networking, Security, and Wireless

Topology Awareness on Network Damage Assessment and Control Strategies Generation .......................................................... 169
    Hui He, Hongli Zhang, Lihua Yin, and Yongtan Liu

A New Energy-Efficient Routing Algorithm Based on Ant Colony System for Wireless Sensor Networks .......................................................... 176
    Songzhu Xia, Su Wu, and Jun Ni

Privacy Preserving Clustering by Random Response Method of Geometric Transformation .......................................................... 181
    Jie Liu and Yifeng Xu

Spatio-temporal Similarity Measure for Trajectories on Road Networks .......................................................... 189
    Hongbin Zhao, Qilong Han, Haiwei Pan, and Guisheng Yin

A Content-Based Self-Feedback E-government Network Security Model .......................................................... 194
    Songzhu Xia, Jianpei Zhang, Jing Yang, and Jun Ni

A Trust-Driven Online Evolution Model for Internetware .......................................................... 199
    Zhiqiang Ma and Guisheng Yin

A Service Search Method Based on Referral Network .......................................................... 205
    Xiaojin Xie, Chaochen Song, Zhiqiang Zhang, and Yu Long

GPRS Based Guard Robot Alarm System Design .......................................................... 211
    Maohai Li, Lining Sun, Qingcheng Huang, Zesu Cai, and Songhao Piao

Dynamic Damage Evaluation of Network Availability Adjusted by Index Correlation .......................................................... 217
    Xing Wang, Hui He, Hong-li Zhang, Hong-mei Ma, and Jing Liu

Research on Betweenness: The Model of Scale-Free Networks .......................................................... 223
    Yuhua Liu, Yongwei Meng, Kaihua Xu, and Yuling Li

A New Key Management Scheme in Clustering Wireless Sensor Networks .......................................................... 227
    Nianmin Yao, Baoying Ma, and Shuping Fan

Ontology Security Strategy of Security Data Integrity .......................................................... 231
    Yulong Meng, Guisheng Yin, and Ke Geng

Data Cache Strategy Based on Colony Algorithm in Mobile Computing Environment .......................................................... 235
    Yan Chu, Jianpei Zhang, and Chunhui Zhao

Entropy Weight Method for Evaluation of Invulnerability in Instant Messaging Network .......................................................... 239
    Songtao Yang and Zongli Zhang

Internet and Distributed Computing

A Localization Method for Spatial Information Grid in Underwater Environments .......................................................... 244
    Zhe Zhang, Min Song, Daxin Liu, and Hongbin Wang

Publish/Subscribe Driven Matching Algorithm .......................................................... 249
    Min Song, Zhe Zhang, Guisheng Yin, Hongbin Wang, and Jun Ni

The Improvement of XML Filtering Based on DFA .......................................................... 255
    Guisheng Yin, Jie Shen, and Xianghui Wang

A Clustering Algorithm Based on Grid Partition of Space-Filling Curve .......................................................... 260
    Hong-bo Xu, Zhong-xiao Hao, and Qi-long Han

Architecture-Centric Eagent Division and Self-Adaptive Process Design Driven by “D-Role” .......................................................... 266
    Xiaona Xia, Baoxiang Cao, and Jiguo Yu
