2018 5th International Conference on Information Science and Control Engineering

ICISCE 2018

Table of Contents

Message from the ICISCE 2018 General Chairs ................................................................. xxx
Message from the ICISCE 2018 Program Chairs ................................................................. xxxi
ICISCE 2018 Organizing Committee ..................................................................................... xxxii
ICISCE 2018 Program Committee ....................................................................................... xxxiii
ICISCE 2018 Reviewers .......................................................................................................... xxxvii

Computer and Information Science

3D Waveform Oscilloscope Implemented on Coupled FPGA-GPU Embedded System ..................... 1
Nan Hu (University of Science and Technology of China), Xuehai Zhou
(University of Science and Technology of China), Xi Li (University of Science
and Technology of China), and Chao Wang (University of Science
and Technology of China)

A 2.5D Cancer Segmentation for MRI Images Based on U-Net ........................................ 6
Ke Hu (Chengdu University), Chang Liu (Chengdu University), Xi Yu
(Chengdu University), Jian Zhang (Sichuan Normal University), Yu He
(Chengdu University), and Hongchao Zhu (Chengdu University)

A Cheat-Proof Secret Sharing Scheme Based on Algebraic Codes ....................................... 11
Gang Du (Liaoning Institute Science and Technology School)

A Deep Fully Convolution Neural Network for Semantic Segmentation Based on Adaptive Feature Fusion ........... 16
Anbang Liu (Shandong University, Weihai), Yiqin Yang (Shandong
University, Weihai), Qingyu Sun (Shandong University, Weihai), and
Qingyang Xu (Shandong University, Weihai)

A Fast Image Matching Algorithm and the Application on Steel-Label Recognition ...................... 21
Fei Deng (China Academy of Engineering Physics), Linbo Wu (China
Academy of Engineering Physics), Chunlei Li (China Academy of
Engineering Physics), Feng Gao (China Academy of Engineering Physics),
and Yunqiang Yan (China Academy of Engineering Physics)

A Feasible Method of Virtual Flow Field Simulation - Part I: An Interface from Fluent to RTT ..................... 25
Qiang Li (Jilin University), Chengxuan Jiao (Jilin University),
Changhai Yang (Jilin University), Zhao Zhang (Jilin University), and
Liyan Yang (Jilin University)
A Feasible Method of Virtual Flow Field Simulation - Part II: Simulation and Visualization in RTT System .......................................................... 30
Qiang Li (Jilin University), Changhant Yang (Jilin University),
Chengxuan Jiao (Jilin University), Zhao Zhang (Jilin University), and
Liyan Yang (Jilin University)

ChenBin Du (National University of Defense Technology), MengLong Lin
(National University of Defense Technology), Xiang Cao (National
University of Defense Technology), and YiPing Yao (National University
of Defense Technology)

A Method for Building Shared Massive Heterogeneous IoT Data Environment .............................. 40
Shanshan Wu (Nanjing Research Institute of Electronics Engineering)

A Method of Underwater Acoustic Signal Classification Based on Deep Neural Network ................ 46
Zhengxian Wei (Systems Engineering Research Institute), Yang Ju
(Systems Engineering Research Institute), and Min Song (Beijing
Foreign Studies University)

A Method to Accelerate the Training of WGAN ................................................................. 51
Qi Sun (Chinese Academy of Sciences) and Wei Wang (Chinese Academy of Sciences)

A Method to Detect Stains in Digital Images of Ancient Works .................................................. 55
Haiqing Cao (Capital University of Economics and Business), An Linjie
(Capital University of Economics and Business), Cuiyou Yao (Capital
University of Economics and Business), Fangling Zuo (Capital
University of Economics and Business), and Boyi Zheng (Capital
University of Economics and Business)

A Mixed Mahalanobis Kernel for Sparse Bayesian Classification .............................................. 61
Mi Tong (Wuhan University of Technology), Wangchen Qin (Wuhan
University of Technology), Fang Liu (Wuhan University of Technology),
and Quan Qi (161 Hospital of PLA)

A Modified Round-Robin Load Balancing Algorithm Based on Content of Request .................... 66
Guoqing Liu (Fudan University) and Xingsxuan Wang (Fudan University)

A Note on the Convergence of NURBS Curves When Weights Approach Infinity ...................... 73
Mao Shi (Shaanxi Normal University)

A Novel Method of Detecting and Locating the Macula Based on Morphological Features Fitting .... 75
Xinrong Cao (Minjiang University), Jiawen Lin (Fuzhou University),
Lanyan Xue (Fuzhou University), and Lun Yu (Fuzhou University)

A Novel Stacked Regression Algorithm Based on Slice Transform for Small Sample Size Problem in
Spectroscopic Analysis ............................................................................................................. 79
Yifan Wu (Chinese Academy of Sciences), Silong Peng (Chinese Academy
of Sciences), Qiong Xie (Chinese Academy of Sciences), and Quanjie Han
(Chinese Academy of Sciences)

A Real-Time Monitoring System for Data Center Thermal Efficiency Analysis ............................ 84
Ting Liu (Inner Mongolia University of Technology), Jianxion Wan
(Inner Mongolia University of Technology), Zeeshan Rasheed (Inner
Mongolia University of Technology), Wei Xiong (Inner Mongolia
University of Technology), and Xiaodong Yiwen (Inner Mongolia
University of Technology)
A Study on Forward Problem for Surface-Hole Measurement Data of Polarization Sphere ............................. 89
Qingxin Meng (Hebei GEO University) and Xin Li (Hebei Bureau of Geological Development)

A Survey on Privacy Preserving Association Rule Mining ................................................................................. 93
Lili Zhang (National Key Laboratory of Integrated Services Networks), Danni Niu (Henan University of Science and Technology), Yuxiang Li (Henan University of Science and Technology), and Zhiyong Zhang (Henan University of Science and Technology)

A Task Scheduling Mechanism Based on Quartz of Power Consumption Information Acquisition System .... 98
Wei Yu (Jiangsu Frontier Electric Technology Co. Ltd), Fei Liu (Jiangsu Frontier Electric Technology Co. Ltd), Zheng Xiong (Jiangsu Frontier Electric Technology Co. Ltd), and Shubo Liu (Jiangsu Frontier Electric Technology Co. Ltd)

A User Interface for Fast Architectural Shape Modeling Using Leap Motion Controller ............................ 102
Hongyan Wu (Beijing Normal University) and Jing Wang (Beijing Normal University)

Accelerating Storage System Performances with NVRAM Cache by Considering Storage Access Characteristics .............................................................................................................. 107
Hyunkyoung Choi (Ewha University) and Hyokyung Bahn (Ewha University)

An Algorithm for Improving the Accuracy and Real-Time of Target Tracking ........................................... 112
Di Ren (Shanghai Institute of Technology) and Bing Xu (Shanghai Institute of Technology)

An Improved Algorithm for Intervisibility Judgment Based on RSG ................................................................. 116
Menglong Lin (National University of Defense Technology), Chenbin Du (National University of Defense Technology), Xiang Cao (National University of Defense Technology), and Yiping Yao (National University of Defense Technology)

An Improved PPVO Data Hiding Scheme ......................................................................................................... 121
Wenqiang Zhao (Xi'an High-Tech Institution), Bailong Yang (Xi'an High-Tech Institution), and Kai Kang (Xi'an High-Tech Institution)

An Information Hiding Method Based on Conditional Selection Statement Execution Paths .................... 125
Haijun Qing (Wuzhou University) and JiHong Huang (Wuzhou University)

Analysis of the Effectiveness of Generator-Network Cooperative Planning Scheme Based on Monte Carlo Simulation of Power System Refinement Scene .................................................. 131
Lei Zhou (Xi'an Jiaotong University), Qian Yang (Xi'an Jiaotong University), Jianxue Wang (Xi'an Jiaotong University), and Jietan Zhang (State Grid QingHai Electric Power Company)

Arteriosclerosis Diagnosis Based on Support Vector Machine ........................................................................ 138
Junjun Pan (Tsinghua University) and Yue Zhang (Tsinghua University)

Assessing Network Clustering Based on a Near-Realistic Model .................................................................. 143
Juan Mei (Wuxi City College of Vocational Technology) and Ji Zhao (Wuxi City College of Vocational Technology)

Automatic Extraction Method for Specific Domain Terms Based on Structural Features and Mutual Information ........................................................................................................................................... 147
Ming-Jie Tian (Yanbian University), Rong-Yi Cui (Yanbian University), and Zheng-Hao Huang (Yanbian University)
Boosted RVM Algorithm for Imbalanced and Noisy Data ................................................................. 151

Wangchen Qin (Wuhan University of Technology), Mi Tong (Wuhan University of Technology), Fang Liu (Wuhan University of Technology), and Quan Qi (161 Hospital of PLA)

Classification of Benign and Malignant Pulmonary Nodules Based on Deep Learning .......................... 156

Yuechao Zhang (Dalian University), Jianxin Zhang (Dalian University), Lasheng Zhao (Dalian University), Xiaopeng Wei (Dalian University), and Qiang Zhang (Dalian University)

Comparing Artificial Neural Network and Failure Distribution Methods for Maintenance Scheduling: A Case Study of Wooden Door Industry ................................................................. 161

Vika Fariza (Universitas Indonesia), Zulkarnain Zulkarnain (Universitas Indonesia), and Isti Surjandari (Universitas Indonesia)

Computational Investigation of Ethanol and Bi-Fuel Applied in GDI Engine ............................................ 166

Xinguang Li (Northeast Forestry University), Haibo Dong (University of Virginia Charlottesville), and Adam Michael Blake (Emerson Climate Technologies)

Construction of Machine News Production System Based on Graph Database and Natural Language Generating Technology ............................................................................................................. 171

Haiyun Han (Communication University of China) and Pengzhou Zhang (Communication University of China)

Data Masking System Based on Ink Technology ....................................................................................... 176

Fucheng You (Beijing Institute of Graphic Communication), Chenwei Zhang (Beijing Institute of Graphic Communication), Yue Cao (Beijing Institute of Graphic Communication), Hechen Gong (Beijing Institute of Graphic Communication), Chenhan Zhang (Beijing Institute of Graphic Communication), and Jianpeng Liao (Beijing Institute of Graphic Communication)

Design and Implementation of a Heterogeneous Database Synchronization Mechanism Based on the Netgap 181

Fei Xu (National University of Defense Technology), Zhaolin Wu (National University of Defense Technology), Feng Wen (National University of Defense Technology), and Jianfeng Tang (Beijing Information and Communications Technology)

Design and Implementation of Carrier Landing Runway Simulation System .................................................. 187

Mingyan Zhang (Beihang University), Wei Wang (Beihang University), Yue Meng (Beihang University), and Hao Han (Beihang University)

Detecting Abnormal Events Using Locality-Sparse Tensor Reconstruction on Covariance Descriptors .......... 191

Guanyu Quan (National Institute of Measurement and Testing Technology)

Determining Characteristics of Popular Local Songs in Indonesia's Music Market ................................. 197

Limisgy Ramadhina Febirautami (Universitas Indonesia), Isti Surjandari (Universitas Indonesia), and Enrico Laoh (Universitas Indonesia)

Effect of the Compression Ratio of Die on the Extrusion Forming of the Plastic Pipes .............................. 202

Zhong Ren (Jiangxi Science and Technology Normal University) and Xingyuan Huang (Nanchang University)

Equilibrium Decision Research on Closed-Loop Supply Chain Network Based upon Carbon Emission Rights Constraint and Risk Aversion ................................................................................ 206

Chenghua Zhang (Jiangsu University), Jing Xu (Jiangsu University), and Faxin Cheng (Jiangsu University)
Evaluation of Large Data Analysis Function of Chinese National Knowledge Infrastructure Based on Mountain Tourism Research in China ................................................................. 216
Juan Wang (Yunnan Normal University), Siyuan Lou (Henan University of Animal Husbandry and Economy), and Qingzhong Ming (Yunnan University of Finance and Economics)

Extending Personal Computer Storages for Improved Access over Web Interfaces .................................................. 221
Anuradha Wickramarachchi (University of Moratuwa, Sri Lanka) and Vijini Mallawaarachchi (University of Moratuwa, Sri Lanka)

Fault Prediction Method for Distribution Network Outage Based on Feature Selection and Ensemble Learning ................................................................. 226
Wen Zhang (China Agriculture University, Beijing, and China Electric Power Research Institute, Beijing), Wanxing Sheng (China Electric Power Research Institute, Beijing), Keyan Liu (China Electric Power Research Institute, Beijing), Songhuai Du (China Agriculture University, Beijing), Dongli Jia (China Electric Power Research Institute, Beijing), and Lijuan Hu (China Electric Power Research Institute, Beijing)

Fire Alarm for Video Surveillance Based on Convolutional Neural Network and SRU ........................................... 232
Zhikai Yang (Naval University of Engineering), Leping Bu (Naval University of Engineering), Teng Wang (Naval University of Engineering), Jineng Ouyang (Naval University of Engineering), and Peng Yuan (Naval University of Engineering)

Fpga-Based Image Storage in Flash Lidar ................................................................. 237
Guoqing Zhou ( Guilin University of Technology), Jinlong Chen ( Guilin University of Technology), Pengyun Chen ( Guilin University of Technology), Xiang Zhou ( Tianjin University and Guilin University of Technology), Wei Huang ( Guilin University of Technology), Lieping Zhang ( Guilin University of Technology), and Jiandong Wei ( Guilin University of Technology)

Graph Attention LSTM Network: A New Model for Traffic Flow Forecasting .................................................. 241
Tianlong Wu (Institute of Software Chinese Academy of Sciences & Guiyang Academy of Information Technology), Feng Chen (Institute of Software Chinese Academy of Sciences & Guiyang Academy of Information Technology), and Yun Wan (University of Houston-Victoria)

How to Measure the Performance of Automated Program Repair ................................................................. 246
Yuhua Qi (Beijing Institute of Tracking and Communication Technology), Wenhong Liu (Beijing Institute of Tracking and Communication Technology), Weixiang Zhang (Beijing Institute of Tracking and Communication Technology), and Deheng Yang (National University of Defense Technology)

Hybrid Traffic Identification Based on Sequential Pattern Mining ................................................................. 251
Fang Fang (Anhui University of Chinese Medicine) and Chunming Ye (National University of Defense Technology)

ID Authentication in PTPM and Public Key Cryptography in Cloud Environment .................................................. 256
Hui Xia (Shenyang Normal University)

Identification of Cell Pathology by Using Stacked Auto-Encoders Combination with Rotation Forest ........... 261
MengLin Liu (Zaozhuang University), Xin Yan (Zaozhuang University), and Lei Wang (Zaozhuang University)
Improved Semantic Similarity Method Based on HowNet for Text Clustering ..................................................... 266
Hongmei Nie (Zhejiang Normal University), Jiaqing Zhou (Zhejiang Normal University), Qi Guo (Zhejiang Normal University), and Zhiqi Huang (Zhejiang Normal University)

Indonesians’ Song Lyrics Topic Modelling Using Latent Dirichlet Allocation .................................................... 270
Enrico Laoh (Universitas Indonesia), Isti Surjandari (Universitas Indonesia), and Limisy Ramadhina Febirautami (Universitas Indonesia)

Influence of Complex Terrains on Electric Field under Overhead Lines .......................................................... 275
Zhenguang Liang (Shandong University), Yuze Jiang (State Grid Shandong Electric Power Research Institute), and Jinge Hong (State Grid Technology College)

Iterative Reweighted Quantile Regression Using Augmented Lagrangian Optimization for Baseline Correction ......................................................................................................................... 280
Quanjie Han (Chinese Academy of Sciences), Silong Peng (Chinese Academy of Sciences), Qiong Xie (Chinese Academy of Sciences), Yifan Wu (Chinese Academy of Sciences), and Genwei Zhang (Beijing Institute of Pharmaceutical Chemistry)

Labeled Bilingual Topic Model for Cross-Lingual Text Classification and Label Recommendation ................. 285
Ming-Jie Tian (Yanbian University), Zheng-Hao Huang (Yanbian University), and Rong-Yi Cui (Yanbian University)

Lane Keeping of Intelligent Vehicle under Crosswind Based on Visual Navigation ........................................ 290
Zeng Li (Changchun University of Technology), Shaosong Li (Changchun University of Technology), Zheng Li (Changchun University of Technology), Gaojian Cui (Changchun University of Technology), and Xiaodong Wu (Changchun University of Technology)

Locust Image Segmentation by Fusion of Multiple Colors .................................................................................. 295
Wenxia Zhang (Inner Mongolia University) and Fengshan Bai (Inner Mongolia University)

Long Term Causality Analyses of Industrial Pollutants and Meteorological Factors on PM2.5 Concentrations in Zhejiang Province ................................................................. 301
Bocheng Wang (Communication University of Zhejiang), Shengjuan Liu (Communication University of Zhejiang), Quanquan Du (Communication University of Zhejiang), and Yanqin Yan (Communication University of Zhejiang)

Low Bits: Binary Neural Network for Vad and Wakeup ....................................................................................... 306
Dandan Song (Tsinghua University), Shouyi Yin (Tsinghua University), Peng Ouyang (Beihang University), leibo liu (Tsinghua University), and Shaojun Wei (Tsinghua University)

Low Slow Small Aircraft Surveillance System Based on Computer Vision ...................................................... 312
Yifu Xu (Beihang University), Xiling Luo (Beihang University), and Feixiang Luo (Beihang University)

Mental Fatigue Detection Based on Multi-Inter-Domain Optical Flow Characteristics .................................. 316
Qiumin Ji (Guangdong University of Technology) and Ling Zhang (Guangdong University of Technology)

Mining Association Rules in Seasonal Transaction Data .................................................................................. 321
Sabrina Kusuma Ayu (Universitas Indonesia), Isti Surjandari (Universitas Indonesia), and Zulkarnain Zulkarnain (Universitas Indonesia)
Mining Information Search Pattern on Website: A Case Study of Educational Institution ................................. 326
Rahmi Azitha (Universitas Indonesia), Isti Surjandari (Universitas Indonesia), and Enrico Laoh (Universitas Indonesia)

Mining Web Log Data for News Topic Modeling Using Latent Dirichlet Allocation .............................................. 331
Isti Surjandari (Universitas Indonesia), Asma Rosyidah (Universitas Indonesia), Zulkarnain Zulkarnain (Universitas Indonesia), and Enrico Laoh (Universitas Indonesia)

Modelling and Simulation of Vascular Tissue Based on Finite Element Method ...................................................... 336
Xiaohan Liu (Xiamen University) and Junfeng Yao (Xiamen University)

Monitoring and Warning of Lawn Trampling Behavior in Surveillance Video ......................................................... 341
Jin-xiang Wang (Yanbian University) and Xu Cui (Yanbian University)

Multi-UAVs Cooperative Reconnaissance Based on Improved Harmony Search Algorithm ................................. 346
Zhang Yao-zhong (Northwestern Polytechnical University Xi’an) and Chen Lan (Northwestern Polytechnical University Xi’an)

Numerical Modeling of Nonlinear Thermomechanical Processes in a Rod of Variable Cross Section in the Presence of Heat Flow ................................................................................................................. 351
Mukaddas Arshidinova (Institute of Information and Computing Technologies CS MES RK & Al-Farabi Kazakh National University), Kalamkas Begaliyeva (Institute of Information and Computing Technologies CS MES RK & Al-Farabi Kazakh National University), Anarbay Kudaykulov (Institute of Information and Computing Technologies CS MES RK), and Azat Tashev (Institute of Information and Computing Technologies CS MES RK)

Oil Spills Identification in SAR Image Using mRMR and SVM Model ................................................................. 355
Hui Zhou (Dalian Neusoft Information University) and Chen Peng (Dalian Maritime University)

Optimization Based Mono-Visual Inertial Odometry ......................................................................................... 360
Zhengyi Hu (Jilin University) and Qingchang Tan (Jilin University)

Parallel Computing: Review and Perspective ........................................................................................................ 365
Yuxiang Li (Henan University of Science and Technology) and Zhiyong Zhang (Henan University of Science and Technology)

Parameterized Synthetic Image Data Set for Fisheye Lens ................................................................................. 370
Chen Zhen (Leuphana University Lüneburg) and Anthimos Georgiadis (Leuphana University Lüneburg)

Partially Observable Multi-Agent RL with Enhanced Deep Distributed Recurrent Q-Network ............................... 375
Longtao Fan (Henan University of Science and Technology), Yuan-yuan Liu (Henan University of Science and Technology), and Sen Zhang (Henan University of Science and Technology)

Phenotype Prediction of Pathogenic Nonsynonymous Single Nucleotide Polymorphisms in Insulin with Bioinformatics Tools .......................................................................................................... 380
Guangjian Liu (Guangzhou Medical University), Shu Zhang (Guangzhou Medical University), Xuejiao Fan (Guangzhou Medical University), Huimin Xia (Guangzhou Medical University), and Huiying Liang (Guangzhou Medical University)
Predicting Model about Next Crime of Serial Offender

Xinshe Qi (National University of Defense Technology), Guo Li (National University of Defense Technology), Xin Wang (National University of Defense Technology), Na Wang (National University of Defense Technology), and Caicui Gao (National University of Defense Technology)

Process Online Checking Model of Internetware Based on Time Petri Net

Min Song (Beijing Foreign Studies University) and Zhengxian Wei (Systems Engineering Research Institute)

Prospect of Photovoltaic System Safety Monitoring and Fault Diagnosis Technology Based on PV Cloud Data Platform

Zhongfeng Wang (Shenyang Institute of Automation), Jing Bian (Shenyang Institute of Automation), Peng Ji (State Grid Liaoning Electric Power Supply Co., Ltd), Jun Liu (State Grid Anshan Electric Power Supply Company), Yonghua Zhang (State Grid Changdu Electric Power Supply Company), and Zhikai Wang (Global Energy Interconnection Research Institute Co., Ltd)

PSO-KNN Algorithm Based on Association Mining and Its Application in Undergraduate Professional Selection Guidance

Hongyi Li (Beihang University), Wei Lin (Beihang University), and Di Zhao (Beihang University)

Pulmonary Nodule Classification and Recognition Based on Sparse Representation Algorithm

Yang Yang (Hunan University, Changsha) and Hongping Hu (Hunan University, Changsha)

Quantitative Correlation and Causality Analysis on the Cause of Haze in Henan Province

Yanqin Yan (Communication University of Zhejiang), Quanquan Du (Communication University of Zhejiang), Shengjuan Liu (Communication University of Zhejiang), and Bocheng Wang (Communication University of Zhejiang)

Recognition Effects of Deep Convolutional Neural Network on Smudged Handwritten Digits

Zhe Xu (Changzhou Institute of Technology), Yusuke Terada (University of Toyama), Dongbao Jia (Huaihai Institute of Technology), Zonghui Cai (University of Toyama), and Shangce Gao (University of Toyama)

Reliability Modeling for Complex System Based on Failure Network Digraph

Jintong Liu (Jilin University) and Yingzhi Zhang (Jilin University)

Research and Construction of Semantic Retrieval Based on Knowledge Graph

Yuantao Kou (Chinese Academy of Agricultural Sciences), Yongwen Huang (Chinese Academy of Agricultural Sciences), Jiao Li (Chinese Academy of Agricultural Sciences), and Guojian Xian (Chinese Academy of Agricultural Sciences)

Research of a Pattern Matching Algorithm Based on Statistical Eigenvalues

Yansen Zhou (University of International Relations) and Ding Guanqi (University of International Relations)

Research on 3D Reconstruction Optimization Method for High-Speed Flying Object Based on Multi-Granularity Matching

Longtao Fan (Henan University of Science and Technology), Tingting Yang (Henan University of Science and Technology), and Sen Zhang (Henan University of Science and Technology)

Research on Performance Diagnosis Method of Power User Eleco Energy Data Acquire System Based on Semi-Supervised Learning ................................................................. 486
Shubu Liu (Jiangsu Frontier Electric Technology Co. Ltd), Wei Yu
(Jiangsu Frontier Electric Technology Co. Ltd), Zheng Xiong (Jiangsu Frontier Electric Technology Co. Ltd), and Fei Liu (Jiangsu Frontier Electric Technology Co. Ltd)

Research on Simulation Method for Typical Scenes of Microgrid (Group) Access to Distribution Network...... 491
Zhijun Wu (HoHai University), Gang Hu (Hohai University), Weiguo He (China Electric Power Research Institute), Guanghui Hua (China Electric Power Research Institute), and Changchun Cai (Hohai University)

Research on Technology Application and Security Threat of Internet of Things for Smart Grid ...................... 496
Donglan Liu (State Grid Shandong Electric Power Research Institute), Xin Liu (State Grid Shandong Electric Power Research Institute), Hao Yu (State Grid Shandong Electric Power Research Institute), Wenting Wang (State Grid Shandong Electric Power Research Institute), Xiaohong Zhao (State Grid Shandong Electric Power Research Institute), Yang Zhao (State Grid Shandong Electric Power Research Institute), Hao Zhang (State Grid Shandong Electric Power Research Institute), Lei Ma (State Grid Shandong Electric Power Company), and Qiying Li (State Grid Shandong Electric Power Company)

Rotary Encoder Based Self-Positioning Method for Mobile Robot ................................................................. 500
Jin-xiang Wang (Yanbian University) and Xu Cui (Yanbian University)

Scheme Evaluation of Automobile Comprehensive Performance Based on Grey Clustering Analysis .............. 505
Zhendong Zhao (Nanjing Institute of Technology)

Sentiment Analysis for Mining Customer Opinion on Twitter: A Case Study of Ride-Hailing Service Provider ................................................................. 512
Zulkarnain Zulkarnain (Universitas Indonesia), Isti Surjandari (Universitas Indonesia), and Reggia Aldiana Wayasti (Universitas Indonesia)

Short-Term Traffic Flow Forecasting Using ARIMA-SVM Algorithm and R .................................................... 517
Zengxiao Chi (Shandong Jiaotong University) and Lin Shi (Shandong Jiaotong University)

Simulation and Modeling of Station and Shooting Model of Free Kicks ............................................................ 523
Jing-jing Guo (Naval University of Engineering), Ying-jie Liang (Naval University of Engineering), Bo-yun Liu (Naval University of Engineering), and Bei-lei Shi (Naval University of Engineering)

Study on Ride Comfort of the Articulated Dump Truck ....................................................................................... 527
Xueyan Zhang (Beijing Union University)

Studying the Bounds on Required Samples Numbers for Solving the General Approximate Common Divisors Problem ................................................................. 533
Xiaoling Yu (Nanjing University of Science & Technology and University of Tokyo), Yuntao Wang (Kyushu University), Chungen Xu (Nanjing University of Science & Technology), and Tsuyoshi Takagi (University of Tokyo)
Unmanned Working Face Remote Monitoring System Based on B/S Architecture .......................................................... 597
  Cong Liu (Shanghai Jiao Tong University), Jianguo Jiang (Shanghai Jiao Tong University), Zhongzheng Zhou (Shanghai Jiao Tong University), and Shu Ye (Shanghai Jiao Tong University)

Using Grey Wolf Hunting Mechanism to Improve Brain Storm Optimization .......................................................... 602
  Shi Wang (Taizhou University), Zonghui Cai (University of Toyama), Yang Yu (University of Toyama), Zhenyu Lei (University of Toyama), and Shangce Gao (University of Toyama)

Using Information Uncertainty for Keywords Extraction in Language System ......................................................... 607
  Rong Yan (Inner Mongolia University) and Yunfei Pan (North China Regional Air Traffic Management Bureau)

Vocational and Technological Teachers' Need for Trans-Disciplinary Teaching ...................................................... 612
  Chou Chun-Mei (National Yunlin University of Science and Technology), Chien-Hua Shen (Transworld Institute of Technology), Hsi-Chi Hsiao (Cheng Shin University), and Tsu-Chuan Shen (Feng Chia University)

Wavelet Chaotic Neural Network with Function Disturbance and Its Application ................................................ 616
  Yaoqun Xu (Harbin University of Commerce) and Jian Liu (Harbin University of Commerce)

Well-Posedness Exploration of Solutions for a Class of Coupling Partial Differential Equations .......................... 621
  Mingming Sun (Qingdao University of Technology) and Jun Yue (Qingdao University of Technology)

Automation and Control Engineering

A Low Cost Attitude and Heading Reference System .......................................................................................... 626
  Qian Zhang (Guangdong University of Education) and Yilin Wu (Guangdong University of Education)

A Novel Self-Sensing Stacking Piezoelectric Actuator Based on Structural Integration ........................................ 632
  Xin Dong (Harbin Institute of Technology), Yuancai Yang (Harbin Institute of Technology), Chong Zhang (Harbin Institute of Technology), and Xiaobiao Shan (Harbin Institute of Technology)

An Implementation Method of Interactive Operation Based on Accurate Spatial Calculation for Desktop Virtual Maintenance Training System .......................................................... 636
  Bailin Li (Huazhong University of Science and Technology), Yan Liu (Huazhong University of Science and Technology), Yi Li (Huazhong University of Science and Technology), Ziyi Xu (Huazhong University of Science and Technology), and Zhaohui Li (Huazhong University of Science and Technology)

An Indoor Wireless Positioning System Based on Ibeacon ....................................................................................... 641
  Haitao Zhang (Henan University of Science and Technology), Mengmeng Zhang (Henan University of Science and Technology), and Guifang Wu (Henan University of Science and Technology)

Anti-Interference Control of Unmanned Helicopter Based on Output Feedback ................................................... 645
  Xiaojing Li (Henan University of Science and Technology) and Jianwei Ma (Henan University of Science and Technology)
Automation of Waste Treatment on the Washer Machine Based on PLC Control System in the Manufacturing Industry  
Syahril Ardi (Politeknik Manufaktur Astra), Muhammad Imam Tommy (Politeknik Manufaktur Astra), and Afianto Afianto (Politeknik Manufaktur Astra) 649

Braking Force Distribution of Electric Vehicles Based on Fuzzy Control  
Xiaodong Wu (Changchun University of Technology), Shaosong Li (Changchun University of Technology), Zeng Li (Changchun University of Technology), Gaojian Cui (Changchun University of Technology), and Bangcheng Zhang (Changchun University of Technology) 654

Complete Model for System with Uncertain Heavy Load Disturbance and Its Application  
Bohan Lu (Control Engineering Speciality) 660

Configurable and Modular Development of Multi-Channel Motion Control Encoder Feedback System  
Bingjie Zhao (Shenyang Institute of Automation), Hualiang Zhang (Shenyang Institute of Automation), and Tao Zhang (Shenyang Institute of Automation) 665

Control System of a Wall Climbing Robot for Automatic Welding  
Liu Xiaoguang (Guangdong Institute of Intelligent Manufacturing), Yong Zhou (Guangdong Institute of Intelligent Manufacturing), Xiaoming Jiang (Guangdong Institute of Intelligent Manufacturing), and Lichao Cao (Guangdong Institute of Intelligent Manufacturing) 670

Coordinated Control System of Multi-Level Belt Conveyors for Promotion the Energy Efficiency Based on IoT-Technology  
Fei Zeng (Wuhan University of Science and Technology) and Zhe-yang Xie (Nantong University) 675

Design and Analysis of an Integrated Drilling-and-Coring Demolition and Rescue Accessory  
Chunrong Wang (Beijing University of Technology and Sanming University), Jing Zhao (Beijing University of Technology), Jiawei Wu (Beijing University of Technology), and Erdong Xia (Sanming University) 680

Design and Analysis of Speed Control System for Test Motion Mechanism  
Zhongjia Jin (Harbin Engineering University), Wenjian Yu (China Ship Scientific Research Center), Cheng Sun (China Ship Scientific Research Center), and Sheng Liu (Harbin Engineering University) 684

Design and Analysis of Subsea Manifold Piping Systems  
Qingli Ma (Jiangsu University of Science and Technology), Wanwan Liang (Jiangsu University of Science and Technology), Yongmei Zhu (Jiangsu University of Science and Technology), and Changyang Zhao (Jiangsu University of Science and Technology) 689

Design and Implementation of Multidimensional Display Power Market Configuration Graphics System  
Peng Sun (China Electric Power Research Institute), ZiJian Yan (China Electric Power Research Institute), XiaoMei Liu (China Electric Power Research Institute), GuiYing Zhu (China Electric Power Research Institute), and Yang Wang (China Electric Power Research Institute) 694

xvii
Design of a Multi-Threaded Positioning System Software Architecture for Ground Mobile Robots
Meng Zhang (State Grid Shandong Electric Power Research Institute),
Zongfeng Zhang (State Grid Shandong Rizhao Power Supply Company),
Yanjie Dai (State Grid Shandong Electric Power Research Institute),
Qing Wang (State Grid Shandong Electric Power Research Institute),
Wenchuan Sun (State Grid Shandong Electric Power Company), and
Xingwang Hu (State Grid Shandong Electric Power Company)

Design of a Position Controller for PMSM with Compensation of Nonideal Back-EMF Effect
Ruichao Tao (Harbin Institute of Technology), Jie Ma (Harbin Institute of Technology), Zhao Chen (Shanghai Electro-Mechanical Engineering Institute), and Hui Zhao (Harbin Institute of Technology)

Development of a Microcomputer Multifunctional TV Parallel Device
Tianpeng Zhang (Anyang Institute of Technology) and Yafang Zhai (Anyang Institute of Technology)

Discrete Transform Methods of Solutions of the Fractional Difference Equations
Wu-Sheng Wang (Hechi University)

Driver Evaluation and Identification Based on Driving Behavior Data
Xin Lin (Tsinghua University), Kai Zhang (Tsinghua University), Wangjing Cao (Tsinghua University), and Lin Zhang (Tsinghua-Berkeley Shenzhen Institute)

Dynamic Phasor Estimates Based on Improved Taylor Weighted Least Squares
Qingsheng Zhao (Taiyuan University of Technology), Xin Wang (Taiyuan University of Technology), Lei Cao (Taiyuan University of Technology), and Xuping Wang (Taiyuan University of Technology)

Dynamic Trajectory Tracking Control of Mobile Robot
Longtao Fan (Henan University of Science and Technology), Yuanheng Zhang (Henan University of Science and Technology), and Sen Zhang (Henan University of Science and Technology)

Economic Optimization Control of Microgrid with Electric Vehicles
Tingting Xu (Chongqing Electric Power Research Institute), Hongliang Sun (Chongqing Electric Power Research Institute), Bin Zhu (Chongqing Electric Power Research Institute), Yi Long (Chongqing Electric Power Research Institute), Hucai Wang (Chongqing Electric Power Research Institute), and Zhi Li (Chongqing Electric Power Research Institute)

Effect of Wind Gradient on the Nonlinear Dynamic Properties of Galloping of Iced Ultra-High-Voltage Long-Span Transmission Lines
Bin Zhao (China Electric Power Research Institute), Yong-feng Cheng (Power Transmission and Transformation Engineering Research Institute), Jing-chao Wang (China Electric Power Research Institute), Bin Liu (China Electric Power Research Institute), and Yu-shu Chen (Tianjin University)

Effects of Loading Process on Performance of Weight-Fixed Loading Hydraulic System with Skip
Fuqiang Yang (Xi’an University of Science and Technology) and Gee Yun (Xi’an Coal Mining Machinery Co., Ltd.)
Enhanced ICA-R Algorithm Based Steady Mixed Signals Separation ........................................... 750
Liu-yang Gao (State Key Laboratory of Complex Electromagnetic Environment Effects Electronic and Information System, National Digital Switching System Engineering and Technological R&D Center, and Luoyang Electronic Equipment Testing Center), Xiang Chen (State Key Laboratory of Complex Electromagnetic Environment Effects Electronic and Information System), Na-e Zheng (National Digital Switching System Engineering and Technological R&D Center), Jing-Zhi Zhang (National Digital Switching System Engineering and Technological R&D Center), and Ying-hua Tian (National Digital Switching System Engineering and Technological R&D Center)

Event Triggered Control for Leader Following Consensus of Nonlinear Multi Agent Systems .................... 754
Nacera Bekhadda (Beijing Institute of Technology) and Qinghe Wu (Beijing Institute of Technology)

Event-Triggered Control for Consensus of Delayed Multi-Agent Systems with Randomly Occurring Nonlinearities and Uncertainties ................................................................. 760
Liuxiao Guo (Jiangnan University Wuxi), Li Qiu (Jiangnan University Wuxi), and Yinhua Jin (Jiangnan University Wuxi)

Fuzzy CMAC Nonsingular Sliding Mode Controller Design for a Robot Manipulator System ......................... 766
Taehyong Ri (Kimchaek University of Technology), Shurong Li (Beijing University of Posts and Telecommunications), and Sungchan Kim (Kimchaek University of Technology)

Guaranteed Cost Finite-Time Control of Uncertain Discrete-Time Positive Switched Systems with Time Delay ...................................................................................................................... 771
Leipo Liu (Henan University of Science and Technology) and Yaxing Liang (Henan University of Science and Technology)

Improve Power Flow Control and Performance Analysis of MVDC Grid Connected PV System ................. 776
Faisal Mehmood Shah (North China Electric Power University Beijing) and Abdul Rehman (North China Electric Power University Beijing)

Improved FMAC Based Adaptive Neural Power System Stabilizer for a DFIG ........................................... 781
Bin Shen (North China Power Engineering Co., Ltd.), Xiao-Ming Li (Northeast Electric Power University), and Jia-Kui Shi (Northeast Electric Power University)

Improved Ramptime Current Control Strategy ............................................................................................ 786
Mingwei Gao (Harbin Institute of Technology), Yanchao Ji (Harbin Institute of Technology), and Jianze Wang (Harbin Institute of Technology)

Influence of Random Road Surface Roughness to Servo System .............................................................. 791
Yuhe Song (Nanjing University of Science and Technology), Jun Wang (Nanjing University of Science and Technology), Jietao Xie (Baicheng Ordnance Test Center of China), and Zhiming Zhao (Baicheng Ordnance Test Center of China)

Integrated Design of Structure and Control of Motor Servo System Based on Improved Gravitational Search Algorithm .................................................................................................. 796
Zimei Sun (Beijing Institute of Technology), Xuemei Ren (Beijing Institute of Technology), Luchao Wang (Beijing Institute of Technology), and Tianyi Zeng (Beijing Institute of Technology)
Intelligence Information Collection System of Garment Manufacturing Based on RFID ........................................ 801
Yaping Xu (Changshu Institute of Technology) and Jishu Zhang (Changshu Institute of Technology)

Intelligent Collision Detection with Dynamic Obstacles in 2D and 3D Space Based on Human Behavior .......... 806
Elmir Babovic (University Dzemal Bijedic), Dragica Radosav (Institute Mihajlo Pupin), Denis Music (University Dzemal Bijedic), and Jasmin Azemovic (University Dzemal Bijedic)

Intelligent Energy Scheduling Model Based on Block Chain Technology ...................................................... 811

Location and Identification Method for Low Frequency Oscillation Source Considering Control Devices of Generator ................................................................. 818

Measurement of Location and Attitude for Bookstore Management Robot in Narrow Path .......................... 828
Li-Na Tang (Ocean University of China), Lin Li (Ocean University of China), and Hao Su (Ocean University of China)

Mobile Robots Location and Mapping Based on Corner Features ............................................................. 833
Tingxing Yan (University of Jinan) and Yong Zhang (University of Jinan)

Model Predictive Control Approach on Packet Dropout Prevention of Networked Control Systems ............. 839
Zhaohong Wang (Kagoshima University), Seiji Fukushima (Kagoshima University), and Tomohiro Hachino (Kagoshima University)

Multi-Objective Optimization of a PAN-TILT System for Multirotor UAV Application ............................ 844
Xiangyang Zhou (Beihang University and Xi’an Jiaotong University), Junfeng He (Beihang University), Jun Zhu (Beihang University), and Ruijiang Yu (China Earthquake Administration)

Network-Based Synchronization of Mechanical Robot Systems ................................................................. 849
Dawen Ye (Nanjing University of Science and Technology) and Yijun Zhang (Nanjing University of Science and Technology)
Neural Network-Based AILC for Nonlinear Discrete-Time System with Iteration Varying Initial Error and Reference Trajectory ................................................................. 854
Peng Xu (China Electronic Product Reliability and Environmental Testing Research Institute) and Qing-Yuan Xu (Nanfang College of Sun Yat-Sen University)

Observer-Based Control of Bilateral Teleoperation with Time Delay ........................................ 859
Tianlin Zhu (Nanjing University of Science and Technology) and Yijun Zhang (Nanjing University of Science and Technology)

Observer-Based Output-Feedback Controller Design for Nonlinear Switched T-S Fuzzy Systems .......... 864
Yangchen Zhu (Henan University of Science and Technology) and Xiaona Song (Henan University of Science and Technology)

Online Newton Step for Portfolio Selection with Side Information ........................................... 869
Fanfan Yang (Beijing Institute of Technology), Xiangming Li (Beijing Institute of Technology), Jie Yang (Beijing Institute of Technology), and Neng Ye (Beijing Institute of Technology)

Outsourcing Resource Combinatorial Optimization of Complex Product in Cloud Manufacturing ........ 874
Yi Liu (Wuhan Donghu University), Xixing Li (Hubei University of Technology), Lei Wang (Wuhan University of Technology), and Baigang Du (Wuhan University of Technology)

Parameters Tuning of TFM and Defect Detection of CFRP Sheet Based on Ultrasonic Array Probe .......... 879
Jun Huang (Tsinghua University) and Li Cao (Tsinghua University)

Passivity Analysis for Neural Networks of Neutral Type with Markovian Jumping Parameters and Time-Varying Delay ........................................................................ 884
Tao Wu (Yunnan Minzu University), Lianglin Xiong (Yunnan Minzu University), and Jinlong Shu (Yunnan Minzu University)

Phased Array Ultrasonic Imaging Front-End T/R Hardware Circuit Design of Diving and Salvaging Helmet ... 890
ZhiYong Lv (Wuhan University of Technology), SongSong Zhang (Wuhan University of Technology), FangYu Ren (Wuhan University of Technology), Rui Chen (Wuhan University of Technology), and ChaoJie Wang (Wuhan University of Technology)

Predictive Functional Control Based on Sliding Mode Observer for Linear Motor Speed System ............. 895
Jian Lin (Nanjing Institute of Technology), Jian Lin (Jiangsu Key Laboratory of Advanced Numerical Control Technology), Qi Wan (Nanjing Institute of Technology), Mu-lan Wang (Nanjing Institute of Technology), Zhou Lei (Nanjing Institute of Technology), Zhou Lei (Jiangsu Key Laboratory of Advanced Numerical Control Technology), and Huang Jia-cai (Nanjing Institute of Technology)

Prescribed Performance Control of the Fractional-Order Chaotic Economical System .......................... 900
Ling Li (Huainan Normal University) and Yeguo Sun (Huainan Normal University)

Quadrotor Formation Control Based on Geometric Method ....................................................... 905
Qiang Lv (Fuzhou University), Jinhua Wang (Fuzhou University), Jun Wang (Fuzhou University), and Liangpin Wu (Fujian AeroTiger UAV Co., Ltd.)

Realization of Communication Security in Substation ................................................................... 910
Dedong Mei (NARI Group Corporation), Bin Zhou (NARI Group Corporation), Ji Zheng (NARI Group Corporation), Huayu Luo (NARI Group Corporation), and Yanchun Yao (NARI Group Corporation)
Research and Application of Gas Emissions Assessment System of Thermal Power Units  ........................................ 917
Shuang Wang (NARI Group Corporation (State Grid Electric Power Research Institute) Co.), Yichuan Sha (NARI Group Corporation (State Grid Electric Power Research Institute) Co.), Jing Cao, Yufeng Yang (NARI Group Corporation (State Grid Electric Power Research Institute) Co.), Wei Cheng (NARI Group Corporation (State Grid Electric Power Research Institute) Co.), and Yaoqi Chen (HoHai University)

Research of Three Axis Tracking and Pointing Platform Servo Control System ..................................................... 922
Shanzhong Liu (Henan University of Science and Technology), Pengna Han (Henan University of Science and Technology), and Yanfan Li (Henan University of Science and Technology)

Research on Control Strategy of the Side Forklift Steering Movement Stability and Its Simulation Analysis ................................................................. 927
Ping Tao (Wuhan University of Science and Technology), Xiaohong Jin (Wuhan University of Science and Technology), Hongming Wu (Wuhan University of Technology), and Ke Wu (Wuhan University of Technology)

Research on Design of Glass Wall Cleaning Robot .......................................................... 932
Guifang Wu (Henan University of Science & Technology), Liu’an Zhang (Henan University of Science & Technology), Haitao Zhang (Henan University of Science & Technology), and Bowei Zhang (Henan University of Science & Technology)

Research on Integrated Guidance and Control for Cooperative Distributed Multiple Flying Objects ..................... 936
Xiang Liu (Northwestern Polytechnical University) and Xiaogeng Liang (Luoyang Optoelectro Technology Development Center)

Yao Lu (Naval University of Engineering), Hanhong Jiang (Naval University of Engineering), Jie Wang (Naval University of Engineering), Teng Teng (Naval University of Engineering), and Chen Deng (Naval University of Engineering)

Research on Optimized Motion Control of Soccer Robot Based on Fuzzy-PID Control .............................. 952
Jinzhu Lin (Hohai University) and Tianwei Ni (Hohai University)

Research on Optimizing Technologies of Testing the Verification Equipment for AC Electrical Energy Meters .............................................................. 957
Tian Xia (State Grid Hubei Electric Power Co., Ltd.), Cencen Liu (State Grid Hubei Electric Power Co., Ltd.), Ming Lei (State Grid Hubei Electric Power Co., Ltd.), Sike Wang (State Grid Hubei Electric Power Co., Ltd.), and Xin Zheng (State Grid Hubei Electric Power Co., Ltd.)

Research on Space Pose and Hydraulic System Stability of Remote-Controlled Demolition Robot .......... 962
Ming-zheng Wang (Anhui University of Technology), Ming Luo (Giant Hydraulic Tech Co.), Yu-wan Cen (National Machine Quality Supervision and Inspection Center), and Jian-zhong Huang (Anhui University of Technology)

Research on Strip Head Telescope Control of Hot Strip Coiling Based on Orowan Uniform Compression Theory ........................................................................... 968
Dazhi Zhang (University of Science and Technology Beijing) and Ren Lianlei (University of Science and Technology Beijing)

xxii
Research on the Method of Establishing Intelligent Headlamp Model under Double-Factor Weight

Shanzhong Liu (Henan University of Science and Technology), Ke Li (Henan University of Science and Technology), and Pengna Han (Henan University of Science and Technology)

Safety Evaluation of Personal Injury and Death in Lifting Operation Based on Accident Tree Analysis

Shan Liu (Shanxi Electric Power Research Institute), Yu Zhang (Shanxi Electric Power Exploration and Design Institute Co.), and Lu Liu (China United Network Communications Corp.)

Sensing Mechanism of Magnetic Asphalt Road Materials

ZhiYong Lv (Wuhan University of Technology), FangYu Ren (Wuhan University of Technology), SongSong Zhang (Wuhan University of Technology), Rui Chen (Wuhan University of Technology), and Rong He (Wuhan University of Technology)

Simulation and Evaluation of Voltage Sag in Distribution Network with High Permeability Renewable Energy

Dongli Jia (China Electric Power Research Institute, Beijing), Keyan Liu (China Electric Power Research Institute, Beijing), Xiaoli Meng (China Electric Power Research Institute, Beijing), Yinglong Diao (China Electric Power Research Institute, Beijing), Wen Zhang (China Agriculture University, Beijing), and Lijuan Hu (China Electric Power Research Institute, Beijing)

Study on Swing-up Control of Rotary Inverted Pendulum Based on Energy Feedback

Xinrong Zhang (Chang’an University), Jie Ma (Shaanxi Polytechnic Institute), Lian Lin (Chang’an University), and Lele Wang (Chang’an University)

The Positioning and Anti-Swing for Crane Based on Smooth Trajectory

Bo Fan (Henan University of Science and Technology), Weiwei Zhang (Henan University of Science and Technology), Xiangming Wu (fanbo@haust.edu.cn), QiQi Zhang (fanbo@haust.edu.cn), and Xiaoming Song (fanbo@haust.edu.cn)

Topology and Control of Two-Stage Bidirectional AC/DC Fault Tolerant Converter

Jin Li (Zhengzhou University of Light Industry), Hengzhi Lv (Pingdingshan Industrial College of Technology), Shuyu Shang (Pingdingshan Industrial College of Technology), and Nan Jin (Zhengzhou University of Light Industry)

Two-Wheeled Robot Platform Based on PID Control

Jie Meng (Shandong University, Weihai), Anbang Liu (Shandong University, Weihai), Yiqin Yang (Shandong University, Weihai), Zhe Wu (Shandong University, Weihai), and Qingyang Xu (Shandong University, Weihai)

Electronics and Communication Technology

A Fault Propagation Model for FPGA Netlist with Un-Reconvergence Paths

Jian Wang (University of Electronic Science and Technology of China), Zhe Chen (University of Electronic Science and Technology of China), and Jinzhi Lu (KTH-Royal Institute of Technology)
A Finite Element Analysis of Internal Fixations for U-Shaped Sacral Fracture ................................. 1020
Junwei Li (Tianjin University of Technology), Chengfei Du (Tianjin University of Technology), Chenxi Yuchi (Tianjin University of Technology), and Chunqiu Zhang (Tianjin University of Technology)

A Fractional-Order Memristive System with Time-Delay and No Equilibrium Points ................................................ 1025
Jie Qiu (AnHui University), DaWei Ding (AnHui University), Yecui Weng (AnHui University), and Xin Qian (AnHui University)

A MAGDM Model with Multi-Granular Probabilistic Linguistic Power ................................................................. 1030
Juxiang Wang (Hefei University of Technology and Anhui Jianzhu University), Yezheng Liu (Hefei University of Technology), and Xiuming Chen (Fuyang Normal University)

A New Dynamic Test Method for Amplitude Frequency Response of Broadcast Transmitter ................................. 1036
Shanshan Li (Communication University of China), Jian Zhou (Communication University of China), and Xuan Wang (Communication University of China)

A Novel Method for Modal Parameters Estimate Based on RDT – ARMA with Measured Acceleration ........ 1040
Weizhen Chen (Wuhan Polytechnic University), Jinran Yao (Wuhan Polytechnic University), Yang Liu (Wuhan Polytechnic University), Longzhou (Wuhan Polytechnic University), Yi Mou (Wuhan Polytechnic University), Jue Liu (Wuhan Polytechnic University), and Xu Zhao (Wuhan Polytechnic University)

A Pilot-Aided Bit Synchronization Method for THz Communication System ............................................................ 1045
Zhijun Nie (Beijing Institute of Technology), Dekang Liu (Beijing Institute of Technology), and ShiQi Song (Beijing Institute of Technology)

A Portable 24GHz Doppler Radar System for Distant Human Vital Sign Monitoring ................................................. 1050
Po Li (Nanjing Institute of Industry Technology) and Nan Huo (Nanjing University of Posts and Telecommunications)

A Selecting and Repairing Method for Service Routing in Mobile Social Network .................................................... 1053
Danmei Niu (Henan University of Science and Technology), Lili Zhang (Henan University of Science and Technology), Yuxiang Li (Henan University of Science and Technology), and Zhiyong Zhang (Henan University of Science and Technology)

A Time-Threshold-Based Dynamic Probability Scheme for Vertical Handoff in Cellular/WLAN Interworking .......... 1058
Jialin Cai (East China Normal University)

Acoustic Analysis of the Open End Effect Using Solid Vocal Tract Models Constructed from MRI Data during Vowel Production ................................................................. 1062
Zhao Zhang (Tianjin University), Jianguo Wei (Tianjin University), Ju Zhang (Tianjin University), and Kiyoshi Honda (Tianjin University)

Actuator Fault Detection of Satellite Based on Neural Network Observer .......................................................... 1067
Lei Li (Space Engineering University), Zhihuan Wu (Space Engineering University), Yongming Gao (Space Engineering University), and Xuebo Zhang (Space Engineering University)

An Adaptive Localization Algorithm for WSN Based on Range ................................................................. 1071
Yanhui Lv (Shenyang Ligong University), Linna Wang (Shenyang Ligong University), Deyu Zhang (Shenyang Ligong University), and Xinping Fang (Shenyang Ligong University)
Fault Risk Prevention Model of Distribution Network Based on Hidden Markov
Yinglong Diao (China Electric Power Research Institute), Renle Huang (State Grid Beijing Electric Company), Cunping Wang (State Grid Beijing Electric Company), and Dongli Jia (China Electric Power Research Institute)

FPGA Implementation of High-Speed LDPC Codec for Wireless Laser Communication
Xiaoshuai Jin (Beijing Institute of Technology) and Hao Liu (Beijing Institute of Technology)

Frequency Offset Insensitive Multiple Symbol Differential Detection Scheme for IEEE 802.15.4 BPSK Receivers
Gaoyuan Zhang (Henan University of Science and Technology), Congyu Shi (Henan University of Science and Technology), Hong Wen (Henan University of Science and Technology), Hong Wen (Henan University of Science and Technology), Longye Wang (National Key Laboratory of Science and Technology on Communications), Liang Song (Henan University of Science and Technology), and Runfa Liao (National Key Laboratory of Science and Technology on Communications)

Influence of Oxide Scale on Continuous Casting Billet on Thickness Measurement by Electromagnetic Ultrasonic Transducer
Zhi-chun Wang (Inner Mongolia University of Science and Technology), Xue-dong Sun (Inner Mongolia University of Science and Technology), and Wei Yuan (Inner Mongolia University of Science and Technology)

Information Extraction in Frequency Domain Based on Entropy Theory and Genetic Algorithm in Near-Infrared Spectra
Dan Peng (Henan University of Technology), Linqing Li (Henan University of Technology), He Guo (Henan University of Technology), Yanlan Bi (Henan University of Technology), and Guolong Yang (Henan University of Technology)

Investigation on Gust Generator Experiment with Two Dimensions Hot Wire Anemometry
Bo Zhu (Facility Design and Instrumentation Institute), Qin Lin (Facility Design and Instrumentation Institute), Xiaoli Qu (Facility Design and Instrumentation Institute), and Yanan Shi (Facility Design and Instrumentation Institute)

Mixed Tensor Product of q-Bezier-Poisson Surfaces
Qing-Bo Cai (Quanzhou Normal University)

Multimodal Biometric Person Recognition by Feature Fusion
Lin Huang (Metropolitan State University of Denver), Chenxi Yu (Dianguang Equipment Institute), and Xinzhe Cao (Colorado State University)

Non-Orthogonal Multiple Access Networks with Energy Harvesting and Cooperative Communication
Weidong Guo (Qufu Normal University) and Weidong Guo (Shandong University)

Polymerization Methods of Systems-of-Systems Integration Effect Based on Choquet Integral
Hongjun Zhang (Systems Engineering Research Institute) and Zhengxian Wei (Systems Engineering Research Institute)
Pulse Eddy Current Testing Thin Metal Thickness ................................................................. 1176
Zhi-chun Wang (Inner Mongolia University of Science and Technology),
Jun-wei Lu (Inner Mongolia University of Science and Technology), and
Qing-nan Hu (Inner Mongolia University of Science and Technology)

Relay Station Planning Algorithm to Avoid Network Congestion for PLC Network ...................... 1180
Baocheng Wang (North China University of Technology), Yafei Hu (North
China University of Technology), Yu Xiao (North China University of
Technology), and Ke Xiao (North China University of Technology)

Reliability Guarantee Mechanism and Flat Communication Protocol Structure for Power System
Protection Communication Networks in Energy Internet .................................................................. 1188
Zihui Wang (China Electric Power Research Institute Co.), Yang Wang
(China Electric Power Research Institute Co.), Ling Teng (China
Electric Power Research Institute Co.), Yang Hong (State Grid
Information & Telecommunication Branch), and Fang Chen (State Grid
Information & Telecommunication Branch)

Research of Brain Network on Deception Identification Using Phase Synchrony ............................... 1193
Yijun Xiong (Wuhan Donghu University) and Junfeng Gao (University of
Electronic Science and Technology of China Chengdu)

Research on a Method of Clock Synchronization of Power Users’ Power Information Acquisition Terminal
Based on a New Timing Algorithm .................................................................................................. 1197
Ping Li (Jiangsu Frontier Electric Technology Co. Ltd), Xinjia Li
(Jiangsu Frontier Electric Technology Co. Ltd), Zheng Xiong (Jiangsu
Frontier Electric Technology Co. Ltd), Wei Yu (Jiangsu Frontier
Electric Technology Co. Ltd), Yonghui Yan (Jiangsu Frontier Electric
Technology Co. Ltd), and Fei Liu (Jiangsu Frontier Electric Technology
Co. Ltd)

Research on an Improved Algorithm for Wireless Network Maximum Throughput Based on COPE Protocol .................. 1201
Kongqiang Ma (Hunan University) and Xu He (Hunan University)

Research on Evaluation of Ground Assault System Based on Finite Synthesis Method ..................... 1207
Xi Wu (Beijing Special Vehicles Research Institute), Wang Liang
(Beijing Special Vehicles Research Institute), Wang Tie-hu (Beijing
Special Vehicles Research Institute), and Zhang Fu-xue (Academy of
Army Armored Forces)

Research on Multi-Time Scale Battery Energy Storage Modeling Technology and Power Stabilization
Strategy ............................................................................................................................................. 1213
Wei Xie (Shanghai Municipal Electric Power Company State Grid
Corporation), Pan Deng (China Agricultural University Beijing), and
Weijie Dong (China Electric Power Research Institute Beijing)

Chang Wang (China Aerospace Systems Engineering Company), Zhenhua Wang
(China Aerospace Systems Engineering Company), Ke Zhang (China
Aerospace Systems Engineering Company), Wei Wan (China Aerospace
Systems Engineering Company), and Zetao Jing (China Aerospace Systems
Engineering Company)
Research on Time Synchronization Technology for Wide-Area Measurement in the Distribution Network ..... 1225
Shijie Cui (Shenyang Institute of Automation), Peng Zeng (Shenyang Institute of Automation), Li Wang (Guangzhou Power Supply Bureau Co., Ltd.), Peng Li (Electric Power Research Institute), Xiaotong Huang (Guangzhou Power Supply Bureau Co., Ltd.), and Quan Xu (Electric Power Research Institute)

Min Lu (Nanjing Power Supply Company), Hong Zhu (Nanjing Power Supply Company), Yangling Chen (Nanjing Power Supply Company), and Peng Lin (Beijing Vectinfo Technologies Co.)

Risk Balancing Routing Assignment Mechanism Based on Service Importance ........................................... 1236
Ning Fu (Beijing Guodianlong Network Technology Co., Ltd), ZhiQiang Wang (State Grid Shaanxi Electric Power Company Xi’an), Sirui Pang (State Grid JiBei Electric Power Company), Jun Ma (State Grid JiBei Electric Power Company), Yuxiang Liu (State Grid JiBei Electric Power Company), Baoquan Liao (State Grid JiBei Electric Power Company), and Biyao Li (Beijing University of Posts and Telecommunications)

Sequential CI Fusion Steady-State Suboptimal Kalman Filter for Multiple Time-Delay Systems with Correlated Noises ................................................................................................................................. 1243
Tianmeng Shang (Heilongjiang University, Harbin, China), Qi Liu (Heilongjiang University, Harbin, China), Yuan Gao (Heilongjiang University, Harbin, China), and Yinlong Huo (Harbin Environmental Monitoring Center Station)

Simulation Design of Air Defense Forces Operation Action Supported by Space Information ...................... 1249
Han-feng Zhang (Land Army Artillery and Air Defense Forces Academy, Zhengzhou), Xian-min Liu (Land Army Artillery and Air Defense Forces Academy, Zhengzhou), Qiang Liu (Land Army Artillery and Air Defense Forces Academy, Zhengzhou), and Zhong-wang Wu (Spaceflight Engineering College, Beijing)

Simulation of the Influence of Ground Screen Parameters on Antenna Radiation Performance in VHF Band... 1253
Xiaowei Yuan (Yunnan Observations Chinese Academy of Sciences), Liang Dong (Yunnan Observations Chinese Academy of Sciences), Min Wang (Yunnan Observations Chinese Academy of Sciences), Shaojie Guo (Yunnan Observations Chinese Academy of Sciences), Shuangyuan Chen (Yunnan Observations Chinese Academy of Sciences), Shunmei Duan (Kunming Innovation Fund for Technology Based Firms Administration Center), and Daiyong Yang (Kunming Innovation Fund For Technology Based Firms Administration Center)

System Design and Experimental Research of Lower Esophageal Sphincter Manometry Based on Balloon Catheter ................................................................................................................................................. 1259
ChuanQing Zhu (Southeast University, Nanjing), WanJun Tao (Southeast University, Nanjing), XinChen Sun (Southeast University, Nanjing), LiLi Zhao (Nanjing Medical University), Min Wang (Nanjing Medical University), ZhiNing Fan (Nanjing Medical University), XiaoYing Liu (Southeast University, Nanjing), and ZhiGong Wang (Southeast University, Nanjing)

The Application of Deep Neural Network in Speech Enhancement Processing ............................................ 1263
Jianming Chen (Army Academy of Armored Forces) and Zhicheng Liang (Army Academy of Armored Forces)
The Design and Implementation of Scenario Demonstration Software System for Intelligent Satellite Artificial System ................................................................. 1267
Chi Zhang (National University of Defense Technology) and Jun Yang
(National University of Defense Technology)

The Design and Realization of Emergency Visual Command and Dispatch Communication Platform .......... 1272
Yang Lei (People’s Public Security University of China) and Fanliang Bu (People’s Public Security University of China)

The Design of Automatic Testing Platform on Electric Vehicle Off-Board Charger Interoperability .......... 1276
Bin Zhu (Chongqing Electric Power Research Institute), Hongliang Sun (Chongqing Electric Power Research Institute), Yi Long (Chongqing Electric Power Research Institute), Zhewei Yang (Chongqing Electric Power Research Institute), Junyi Fu (Chongqing Electric Power Company), Fangjia Long (Chongqing Electric Power Company), and Lizheng Yi (Chongqing Electric Power Company)

The Improved CESSC Algorithm Based on Meanshift Sparse Subspace Clustering for Hyperspectral Images . 1280
ChengZhi Wang (Anhui University), Yun Ding (Anhui University), JiPan Yang (Anhui University), - YanQing (Anhui University), and DeXiang Zhang (Anhui University)

The Influence of Operating Conditions on Discharge Characteristics for Traction Battery .......................... 1286
Huicai Wang (State Grid Chongqing Electric Power Co.), Hongliang Sun (State Grid Chongqing Electric Power Co.), Wenli Chen (State Grid Chongqing Electric Power Co.), and Bing Zhang (State Grid Chongqing Electric Power Co.)

Thread-Level Speculation: Review and Perspectives ................................................................. 1291
Yuxiang Li (Henan University of Science and Technology), Zhiyong Zhang (Henan University of Science and Technology), Lili Zhang (Henan University of Science and Technology), and Danmei Niu (Henan University of Science and Technology)

XScope: Memory Introspection Based Malicious Application Detection ............................................ 1296
Lei Cui (Chinese Academy of Sciences), Zheng Song (Key Laboratory of Information Network Security), Yongnan Li (People’s Public Security University of China), and Zhiyu Hao (Chinese Academy of Sciences)

Author Index ................................................................. 1301
