Message from the General Chair

On behalf of the Organizing Committee, I would like to welcome all of you who came to Cuernavaca to participate in the 2016 IEEE International Conference on Mechatronics, Electronics and Automotive Engineering. The conference will provide a stimulating forum for scientists, engineers, educators and students from all Latin America to disseminate their new research findings and exchange information on emerging areas of research.

Our conference is organized by the IEEE Student Branches of Instituto de Ingenieros Electronicos y Electricos de Morelos and Universidad Autonoma del Estado de Morelos. This is an exemplary collaboration between the two leading branches on Mexico Council. We are very proud to present an excellent program with 30 papers in oral sessions, which represent the best up-to-date results in their respective research areas.

The organization of ICMEAE is based on very strong volunteer involvement, and it is supported by the skillful professional help of IEEE Computer Society. Our work has been supported by the Technical Committee, who played a key role in coordinating the reviews, formulating the acceptance/rejection decisions, and completing other programmatic tasks. Out of the 60 submissions, 50 have been finally accepted to the conference program, giving an acceptance rate of 50%.

I highly appreciate the time and energy spent by our volunteers who helped us to make ICMEAE a great success. At the fundamental level, I would like to emphasize the significance of the work of the Technical Committee. Thank you very much for the days, and often nights, spent on producing the quality reviews. The members of the Organizing Committee worked diligently in various areas of activity towards the common goal.

Cuernavaca provides an excellent environment for our conference at the Universidad Autonoma del Estado de Morelos. I wish you a productive and enjoyable time during your stay in Cuernavaca.

Leoncio Aguilar Negrete
General Chair
