# Table of Contents

## Third International Conference on Natural Computation

*ICNC 2007*

### Volume I

- Preface .................................................................................................................. xii
- Organizing Committee .......................................................................................... xiii
- Program Committee .............................................................................................. xv
- Reviewers ............................................................................................................... xviii

### Neural Network Learning Algorithms

**An Inheritance Procedure for a Knowledge Representation Scheme Based on Fuzzy Petri Nets**
*Slobodan Ribarić and Nikola Pavešić*

**A Combined Genetic Algorithm and Orthogonal Transformation for Designing Feedforward Neural Networks**
*Jinhua Xu, Yue Lu, and Daniel W.C.Ho*

**A Comparison Study of Credit Scoring Models**
*Defu Zhang, Hongyi Huang, Qingshan Chen, and Yi Jiang*

**A Fast Learning Algorithm for One-Class Support Vector Machine**
*Jia Jiong and Zhang Hao-ran*

**A Modified Constructive Neural Networks and Its Application for Large-Scale Data Mining**
*Wenjiang Zhou, Yin Xu, Lunwen Wang, Ling Zhang, and Ying Tan*

**A New Learning Algorithm for Function Approximation by Incorporating A Priori Information Into**
*Fei Han and Qing-Hua Ling*

**A Novel Classification-Rejection Sphere SVMs for Multi-class Classification Problems**
*Qiang Wu, Chuanying Jia, and Wenying Chen*

**A Novel Recurrent Generalized Congruence Neural Network for Dynamical System Identification**
*Tianyun Yan, Hefei Ling, and Shurong Zou*

**A Novel Time-Delay Recurrent Neural Network and Application for Identifying and Controlling Nonlinear Systems**
*Hongwei Ge, Wenli Du, Feng Qian, and Yanchun Liang*

**A Robust Extraction Algorithm Based on a Specific Kurtosis Value Range**
*Yalan Ye, Zhi-Lin Zhang, Jia Chen, and Duojiao Wu*

**A Structure Optimization Method Based on Fisher Ratio**
*Donghui Liu, Aihua Li, Lijian Feng, and Xiaoyun Sun*

**A Study of a Multi-class Classification Algorithm of SVM Combined with ART**
*Anna Wang, Wenjing Yuan, Junfang Liu, Qinwan Wang, and Zhiguo Yu*

**A Study on How to Help Back-Propagation Escape Local Minimum**
*Shaobin Chai and Yong Zhou*

**An Greedy-Type Algorithm in m-term Approximation for Besov Class with Mixed Smoothness**
*Peixin Ye and Qing He*

**An ANFIS-based Transformer Insulation Fault Diagnosis Method Using Emotional Learning**
*Hongsheng Su*

Neural Network Architectures

A Biologically Motivated Chip and Its Application to the Analysis of Weight Change of Prematurely Born Babies
Tzu-Lan Lin, Yo-Hsien Lin, and Jong-Chen Chen
A Hybrid Location Algorithm Based on BP Neural Networks with Multi-layer Data Fusion
Ping Zhao, Lingyan Li, and Haoshan Shi
An Application of Dual-Fuzzy Neural-Networks to Design of Adaptive Fuzzy Controllers
Kai-jun Xu, Li Zou, Jia-jun Lai, and Yang Xu
An Approach to Syndrome Differentiation in Traditional Chinese Medicine Based on Neural Network...
Minghui Shi and Changle Zhou
Application of Pattern Recognition and Artificial Neural Network to Load Forecasting In Electric Power System
Wenjin Dai and Ping Wang
Ensemble Neural Networks Using Interval Neutrosophic Sets and Bagging
Pawalai Kraipeerapun, Chun Che Fung, and Kok Wai Wong
Exponential Bidirectional Associative Memory Based on Small-World Architecture
Min Wang and Songcan Chen
BFALCON Generalization Capability Improvement Based on PCA Initialization
Jie Xing and Deyun Xiao
Grey Neural Network and Its Application in MCMQC
Shuhai Fan, Tianyuan Xiao, Yexiang Fang, Wenping Li, and Linxuan Zhang
Hybrid Neural Network Model for Short-Term Load Forecasting
Chengqun Yin, Lifeng Kang, and Wei Sun
On Optimization Problems in Quasi-uniform Spaces
Shao-ai Chen, Wen Li, Du Zou, Shaobai Chen
Procedural Neural Network Based on Statistical Features
Juizhen Liang and Chunlan Zhu
Study of Detection Technique Simulation of High Resolution Radar Based on BP Neural Network
Xuan Hou and Mingyi He
The Mixed Hierarchical Fuzzy Evaluation System Based on Dynamic Neural Network
Xiaoping Qiu, Yang Xu, and Haiming Li
The Simulation of Nouro-humoral Network
Shuhai Fan, Tianyuan Xiao, Weihong Ni, and Linxuan Zhang
Unsupervised Alternating Projection Neural Network with Convex Constraint
Hengqing Tong, Tianzhen Liu, Yang Liu, and Qiaoling Tong
Using Three Layer Neural Networks to Compute Discrete Real Functions
Jian Wang, Yixian Yang, Nan Jiang, Zhaozhi Zhang, and Xiaomin Ma
Variable Weighted Combination Forecasting Model Based on Genetic Algorithm and Artificial Neural Network
Junfeng Li, Wenzhan Dai, Haipeng Pan, and Junfeng Li
Neuro Dynamics & Spiking Neuron

Firing Patterns and Synchronization of Neuronal Population with Excitatory and Inhibitory Connection ................................................................................................................................................ 459
  Xianfa Jiao and Rubin Wang
Global Exponential Stability of Impulsive Cellular Neural Network with Delay ................................................ 463
  Zhanji Gui, Jie Zhang, and Chunbo Xing
Stability Conditions for Discrete Delayed Hopfield Neural Networks ........................................................ 468
  Run-Nian Ma, Peng-Chu, and Sheng-Rui Zhang
Study of Noise Enhancing Sense Based on Psychophysical Method ...................................................... 473
  Jun Liu and Zhengguo Lou

Statistical Neural Network Models and Support Vector Machines

Self-Organized Criticality of Individual Companies: An Empirical Study .................................................. 481
  Bin Rao, Dong-yun Yi, and Cheng-li Zhao
A Modified PSVM and Its Application to Unbalanced Data Classification .................................................. 488
  Xiao-yan Tao, Hong-bing Ji, and Yu-xin Xie
A Novel Algorithm for Fault Diagnosis of Analog Circuit with Tolerances Using Improved Binary-Tree SVMs Based on SOMNN Clustering.......................................................... 491
  Anna Wang, Junfeng Liu, Hua Li, Feng Luan, and Wenjiong Yuan
An Improved Hyper-Sphere Support Vector Machine .............................................................................. 497
  Shuang Liu, Yongkui Liu, Bo Wang, and Xiwei Feng
A Improved Method of Face Recognition by Kernel Maximum Margin Criterion ........................................... 501
  Yong-zhi Li and Jing-yu Yang
Analytic Technique of Drillstem Failure Based on Support Vector Machine Technology and Clustering Theory .......................................................... 506
  Tie Yan, Xue-liang Bi, and Chang-jiang Wang
Autocorrelation Kernel Functions for Support Vector Machines .......................................................... 512
  Rui Kong and Bing Zhang
Automatic Audio Genre Classification Based on Support Vector Machine .............................................. 517
  Yingying Zhu, Zhong Ming, and Qiang Huang
Bearing Fault Diagnosis Based on K-L Transform and Support Vector Machine ........................................ 522
  Shuang Lu, Fujin Yu, and Jing Liu
Black-Scholes versus Artificial Neural Networks in Pricing Call Warrants: The Case of China Market .......................................................... 528
  Wei Zhou, Meiying Yang, and Liyan Han
Boosted Bayesian Kernel Classifier Method for Face Detection .......................................................... 533
  Ali Reza Bayesteh Tashk and Karim Faez
Candidate Vectors Selection for Training Support Vector Machines .................................................. 538
  Minqiang Li, Fuzan Chen, and Jisong Kou
Classification of FTIR Gastric Cancer Data Using Wavelets and SVM .................................................. 543
  Cun-gui Cheng, Lu-yao Cheng, and Run-sheng Xu
Continuous Ant Colony Optimization Algorithms in a Support Vector Regression Based Financial Forecasting Model .......................................................... 548
  Wei-Chiang Hong, Yu-Fen Chen, Peng-Wen Chen, and Yi-Hsuan Yeh
Distribution Center Location Decision-Making Based on PCA and Support Vector Machine Approach .......................................................... 553
  Dongxiao Niu, Jinchao Li, and Mian Xing
Efficiency Evaluation for University Laboratory Based on Multi-layer SVM Classifier .................................. 558
  Xiumei Wang, Yanbin Cui, and Chenguang Yang
Facial Complex Expression Recognition Based on Fuzzy Kernel Clustering and Support Vector Machines ....................................................................................................................................... 562
Hui Zhao, Zhiliang Wang, and Jihui Men

Fault Recognition with Labeled Multi-category Support Vector Machine ......................................................... 567
Xue Wang, Daowei Bi, and Sheng Wang

Hybrid Modeling for Nosikeptide Fermentation Process Based on Prior Knowledge and SVM ............. 572
Haifeng Sang, Weiqi Yuan, and Zhijia Zhang

Image Recognition Using SVM-weighted Non-negative Matrix Factorization ........................................... 577
Chen Pan, Hongjuan Gao, and Shaohua Yang

Image Recognition Using Weighted Two-Dimensional Maximum Margin Criterion ........................................... 582
Haixian Wang, Sibao Chen, and Zilan Hu

Image Steganalysis Based on Statistical Moments of Wavelet Subband Histograms in Different Frequencies and Support Vector Machine ................................................................. 587
Mohammad Ali Mehrabi, Karim Faeez, and Ali Reza Bayesteh

Laplacian Regularized Least Squares Regression and Its Dynamic Parameter Optimization for Near Infrared Spectroscopy Modeling ........................................................................................................... 591
Hui-hua Yang, Feng Qin, Yong Wang, Qiong-lin Liang, Yi-ming Wang, and Guo-an Luo

Middle-Long Electric Power Load Forecasting Based on Co-integration and Support Vector Machine ... 596
Dongxiao Niu, Jinchao Li, and Jinying Li

Neural Networks for Approximation of Real Functions with the Gaussian Functions ................................. 601
Xuli Han and Muzhou Hou

NFL-SVM: An Effective Algorithm for Solving Misclassification in SVM ......................................................... 606
Xianfei Zhang, Bicheng Li, and Panyuan

Nonlinear System Identification Using Least Squares Support Vector Machine ............................................. 610
Hua Liang, Jinya Song, and Bolin Wang

On the Application of Improved Back Propagation Neural Network in Real-Time Forecast ......................... 615
Guohui Jiang, Bing Shen, and Yuying Li

Optimized Local Kernel Machines for Fast Time Series Forecasting ................................................................. 620
Wenwu He and Zhizhong Wang

Parameter Selection for Sub-hyper-sphere Support Vector Machine ................................................................. 628
Peng Chen and Tao Wen

Rock Fracture Tracing Based on Image Processing and SVM ................................................................. 632
Weixing Wang, Haijun Liao, and Ying Huang

Safety Assessment in Power Supply Enterprise Based on Rough Set and Support Vector Machine .... 636
Wei Sun and Xing Zhang

Short-Term Traffic Flow Prediction Based on Incremental Support Vector Regression ................................. 640
Haowei Su, Ling Zhang, and Shu Yu

Simultaneous Feature Selection and Classification via Semi-supervised Models ............................................ 646
Liming Yang and Laihseng Wang

Statistical Neural Networks Based Blind Deconvolution of Spectroscopic Data ............................................ 651
Jinghe Yuan, Shengjiang Chang, and Yanxin Zhang

Support Vector Machines with PSO Algorithm for Soil Erosion Evaluation and Prediction ..................... 656
Dianhui Mao, Zhiyuan Zeng, Cheng Wang, and Weihua Lin

Support Vector Regression and Radial Basis Function Neural Networks Applied to Semi-quantitative Prediction of Rhubarbs ................................................................. 661
Zhuoyong Zhang, Xiaofang Zhang, and Peter de B. Harrington

SVM Theory and Its Application in Fault Diagnosis of HVDC System ............................................. 665
Xi-Mei Liu, Wan-Yun Wei, and Fei Yu

Synthetic Evaluation for Operating Economy of Thermal Power Plant Based on SVM and Quick Sort Algorithm ................................................................. 670
Wei Sun and Xing Zhang

Text Classification Based on Nonlinear Dimensionality Reduction Techniques and Support Vector Machines ................................................................. 674
Lukui Shi, Jun Zhang, Enhai Liu, and Pilian He

The Design of Backend Classifiers in PPRLM System for Language Identification ................................. 678
Hongbin Suo, Ming Li, Tantan Liu, Ping Lu, Yonghong Yan

The Variant of Gaussian Kernel and Its Model Selection Method ................................................................. 683
Shui-Sheng Zhou, Hong-Wei Liu, and Feng Ye
Other Topics in Neural Network Models I

A Dynamic Combination Forecast Model for Analysis Transport Volume Time Series
Lili Qu, Yan Chen, and Ming Yang

A Genetic Neural Network for Predicting Materials Mechanical Properties
Jianlin Xu

A Method for Improving the Stability of Feature Selection Algorithm
Li Zhang

A Multi-layer Quantum Neural Networks Recognition System for Handwritten Digital Recognition
Daqi Zhu and Rushi Wu

A Neural Network Approach on Analyzing and Reducing Signalized Intersection Crashes
Pei Liu

A Novel Wireless Channel Model with Multiply Feed-Forward Neural Network
Lin Lv

A Rough CP Neural Network Model Based on Rough Set
Min Dong, Hui Yu Jiang, and Xiang Peng Li

An Integrated Model and Algorithm for Facility under Uncertainty
Ming_ming Ren, Chao Yang, and Bo He

Analyzing and Improving of Neural Networks Used in Stereo Calibration
Yingjie Xing, Jing Sun, and Zhentong Chen

Application of Particle Swarm Optimization Based BP Neural Network on Engineering Project
Risk Evaluating
Chun-guang Chang, Ding-wei Wang, Ya-chen Liu, and Bao-ku Qi

Dual-Channel PCNN and Its Application in the Field of Image Fusion
Zhanbin Wang and Yide Ma

Early Software Quality Prediction Based on a Fuzzy Neural Network Model
Bo Yang, Lan Yao, and Hong-Zhong Huang

Encrypting Algorithm Based on RBF Neural Network
Kaili Zhou, Yaohong Kang, Yan Huang, and Erli Feng
