</tbody>
</table>
Modelling and Simulation Wayfinding in Unfamiliar Campus Environment .........................................................48

Cao Han, Shi Jun, and Lu Junling

Multi-Agent Oriented Tactical Plan Recognition Method with Uncertainty ..........................................................54

Weisheng Li and Weixing Wang

Non-Native Speaker Identity Verification Based on Speech .................................................................................59

Hong Wei and Jian Yang

On the Trust Decision in Virtual Society: Using the Least Point Principle in Dempster-Shafer Theory of Belief Functions ..................................................63

Huabei Wu, Jizhou Sun, and Guangquan Xu

Psychological and Physiological Characteristics and Their Contributing Factors in 505 Postpartum Women in Jining City ........................................................................67

Ben-Fu Yang, Hong-Mei Song, Shu-Ling Wang, Xiu-Hui Liu, and Bin Zhuang

Research of Brain-Computer Interface Technology Based on LabVIEW ..........................................................72

Li Zhao, Hui Shen, Shigang Cui, Chuo Li, Yan Bian, Longteng Xiao, and Ziman Liu

Effect of Different Spatial Reference Frames and Visual Fields in Computer Interface on Visual Spatial Attentional Processing ..................................................81

Zhang Xue-Min, Zhou Yibin, and Yang Bin

Study on Cognition of Product Material Texture Based on Users' Requirement ........................................86

Ying Wang and Jialin Li

The Building of Chinese Emotion Thesaurus Using HowNet Based on the Main Sememe .........................................91

Bin Liu, Fuji Ren, and Cong Wang

Using Aesthetic Measurement Application (AMA) to Measure Aesthetics of Web Page Interfaces ........................................................................96

Jasni Mohamad Zain, Mengkar Tey, and Goh Ying Soon

Word Sense Disambiguation Based on Vicarious Words ....................................................................................101

Zhimao Lu, DongMei Fan, and Rubo Zhang

Selective Attention

Second Language Proficiency and Attentional Network: Evidence from the Multi-Source Interference Task (MSIT) ........................................................................109

Huili Wang, Wenyu Liu, Hongjun Chen, Yan Wang, Danni Sui, and Yiyuan Tang

The Application of A Novel Target Region Extraction Model Based on Object-Accumulated Visual Attention Mechanism ..................................................116

Jie Xiao, Chao Cai, Mingyue Ding, and Chengping Zhou

Vision and Auditory Models

A New Region Gaussian Background Model for Video Surveillance .........................................................................123

Xun Cai, Long Jiang, Xing-wei Hao, and Xiang-xu Meng

A Visual Attention Model for Dynamic Scenes Based on Two-Pathway Processing in Brain ................................128

Jiawei Chen, Changle Zhou, Kunhui Lin, and Yanyun Qu
# Other Topics in Cognitive Science

A Conceptual Network Based Modeling Framework for Semantic Representation of Chinese News ............................................................ 221
   Yiqiang Zhao, Junfang Zeng, Yiping Yang, and Lin Chen

A Novel Approach for Describing Goals with DLs in Intelligent Agents ............................................................ 226
   Xiuguo Wu, Guangzhou Zeng, and Gongping Yang

A Novel Measurement of Sequence Dissimilarity and Its Application to Phylogeny ............................................................ 231
   Xiaohui Niu, Nana Li, Feng Shi, and Xueyan Li

A Quantitative Measurement Approach for Metric Information of Maps Based on Spatial Cognition ............................................................ 235
   Shaoyi Wang, Qingyun Du, and Zhao Wang

An Intrinsic Subsequence Decomposition Algorithm for Network Intrusion Detection ............................................................ 240
   Yingying Zhu, Mao Ye, Naiqi Liu, Xin Zhao, and Xue Li

Cognitive Computational Intelligence in Medical Pattern Semantic Understanding ............................................................ 245
   Lidia Ogiela

Feature Extraction Algorithm for Distributed Spacecraft System Based-on Dynamically Structured Element ............................................................ 248
   Kezhao Li, Jinhai Jia, Zengzhang Guo, and Jianping Yuan

Fuzzy Soft Set and Soft Fuzzy Set ............................................................ 252
   Bing-xue Yao, Jin-liang Liu, and Rui-xia Yan

Solution for the Complex Correspondences in Line Stereo Matching ............................................................ 256
   Jiyang Wang, Gongjian Wen, and Deren Li

Value Ordering for Solving CSP Based on Preprocessing ............................................................ 261
   Bo Li, Xingjun Zhu, Changsheng Zhang, and Xinhua Wang

# Evolutionary Programming

An Improved Estimation of Distribution Algorithm in Dynamic Environments ............................................................ 269
   Xiaoxiong Liu, Yan Wu, and Jimin Ye

Application of Gene Expression Programming to Real Parameter Optimization ............................................................ 273
   Kaikuo Xu, Changjie Tang, Rong Tang, Yintian Liu, Jie Zuo, and Jun Zhu

Automatic Synthesis of Combinational Logic Circuit with Gene Expression-Based Clonal Selection Algorithm ............................................................ 278
   Zhaohui Gan, Tao Shang, Gang Shi, and Chao Chen

GEP-NFM: Nested Function Mining Based on Gene Expression Programming ............................................................ 283
   Taiyong Li, Changjie Tang, Jiang Wu, Xuzhong Wei, Chuan Li, Shucheng Dai, and Jun Zhu
Mining Projection Transformation Based on Gene Expression Programming of Multi-Variable Niches ................................................................. 288
   Yue Jiang, Changjie Tang, Haichun Zheng, Jiaoling Zheng, Chuan Li, Qian Luo, and Jun Zhu

Study on Fuzzy Programming Methods Based on Synthesizing Effect .............................................. 293
   Fa-Chao Li, Qing Dong, and Chen-Xia Jin

**Genetic Programming**

An Improved Mutative Scale Chaos Optimization Quantum Genetic Algorithm ........................................ 301
   Hao Teng, Baohua Zhao, and Bingru Yang

Genetic Programming with Rough Sets Theory for Modeling Short-term Load Forecasting ......................................... 306
   Wen-chuan Wang, Chun-tian Cheng, and Lin Qiu

Model of Water Production Function with Genetic Programming ....................................................... 311
   Xiao-nan Chen, Hai-tao Chen, Lin Qiu, and Chun-qing Duan

Research on Bayesian Network Adaptive Knowledge Construction and Inference Based on Genetic Algorithm .................................................. 315
   Wangyu Chen and Qin Liao

Research on the Coordination Optimization Method between Traffic Control and Traffic Guidance Based on Genetic Algorithm .................................. 320
   Qing Guan, Zhaosheng Yang, Yuan Wang, Jianmeng Hu, and Jian Qin

Rutting Prediction Model Developed by Genetic Programming Method Through Full Scale Accelerated Pavement Testing ...................................... 326
   Jia-Ruey Chang, Shun-Hsing Chen, Dar-Hao Chen, and Yao-Bin Liu

**Evolutionary Agents**

A Kind of Transferring Computing Strategy Based on Agent Supporting Nomadic Services ......................................................... 333
   Degan Zhang, Hongyun Ning, Fayu Wang, and Yanbing Xue

Analysis of Sequence Flight Delay and Propagation Based on the Bayesian Networks .................................................. 338
   Weidong Cao, Jianli Ding, and Hong Wang

Cascading Dynamics on Weighted Evolutionary Networks ................................................................. 344
   Yang Zhao

Clustered Sorting R-Tree: An Index for Multi-Dimensional Spatial Objects ........................................ 348
   Zhenwen He, Chonglong Wu, and Cheng Wang

Exploring A More Realistic Cellular Automata Model For On-Ramp System ........................................ 353
   Xin-Gang Li and Bin Jia

Improved Image Fusion Algorithm Based on Wavelet Packet Analysis in Intelligent Transport System ......................................................... 358
   Zengmin Wang, Zhaoxuan Yang, Yuting Su, Yang Chen, Jiapeng Wu, and Xuexwen Ding
Modeling and Composition of Web Application Components using Extended FSM

Tao He and Huaikou Miao

Optimization Modeling of Facility Location Problem in Crisis Management Based on Network Risk Bottleneck and Location Risk

Min Zhang and Weiwei Yan

Other Topics in Evolutionary Theory and Methodology

A 2-Approximation Algorithm for Weighted Directed Hypergraph Embedding in a Cycle

Qi Wang, Xiuheheng Zhao, Xiaowei Zheng, and Xiaoshan Liu

A Survey and Future Trend of Study on Multi-Objective Scheduling

Xiao-Juan Wang, Chao-Yong Zhang, Liang Gao, and Pei-Gen Li

Component Content Soft-Sensor in Rare-Earth Extraction Based on PSO and LS-SVM

Zhengrong Xiang and Songqing Liu

Evolving Gene Regulatory Networks for Virtual Creatures

Wengao Huang

Self-Tuning PID Controller Based on Quantum Swarm Evolution Algorithm

Yourui Huang, Liguo Qu, and Yiming Tian

Multi-Objective Optimization

A Greedy Particle Swarm Optimization Algorithm for Workplace Planning in Migrating Workflow

Jie Cheng and Guangzhou Zeng

A Hybrid Heuristic Neighborhood Algorithm for the Job Shop Scheduling Problem

Jianshuang Cui and Tieke Li

A Multiobjective Evolutionary Algorithm with Node-Depth Encoding for Energy Restoration

Augusto Cesar dos Santos, Alexandre C. B. Delbem, and Newton Geraldo Bretas

A Multiobjective Optimization Model for Urban Renewal Projects Selection with Uncertainty Considerations

Wann-Ming Wey

A Network Convective Distribution Model Based on E-Commerce

Zi-xia Chen

A New Algorithm for Quadratic Programming with Interval-Valued Bound Constraints

Liang Fang, Li Sun, Guoping He, and Fangying Zheng

A New Islanding Boundary Searching Approach Based on Slow Coherency and Graph Theoretic

Ziguan Zhou, Xiaomin Bai, ShanShan Zhao, Wei Zhao, Zaihua Li, Jing Xu, and Xiaojun Li
A Nonlinear Kalman Filtering Algorithm For On-line Estimation With Reasonable Computing Burdens .................................................................443
  Bin Liu, Xiaochuan Ma, and Chaohuan Hou

A Novel Differential Evolution Algorithm for a Single Batch-Processing Machine with Non-Identical Job Sizes ..................................................447
  Wen-Gong Zhang, Hua-Ping Chen, Di Lu, and Hao Shao

A Novel Parallel Hybrid Algorithms for Job Shop Problem ........................................................452
  Xiaoyu Song, Chunguang Chang, and Feng Zhang

An Approach to Solve Assignment Problems with Linguistic Assessment Information Based on Two-Tuple Linguistic Representation Model ...........................................................457
  Wang Xin-rong

An Efficient Method for Maintaining Diversity in Evolutionary Multi-objective Optimization ...........................................................462
  Jinhua Zheng and Miqing Li

An Information Fusion Algorithm for Multiple GPS Track Data ..........................................................468
  Dewang Chen, Baigen Cai, and Tao Tang

Applications of Fuzzy Critical Chain Method in Project Scheduling ...............................................473
  Zhen-Yu Zhao, Wei-Yang You, and Qian-Lei Lv

Classification of Listed Companies Based on Kernel Principal Component Analysis and Improved Grid-based Algorithm ...................................................478
  Hui-xian Ren and Mei-lin Zhu

Design and Application of GIS Software Platform Integrating with DSS Oriented to E-Government ...........................................................483
  Liang Wang and Bin Li

Finding Roots of Complex Chemistry Equations Based on Evolution Strategies ...........................................488
  Yongquan Zhou and Delong Guo

Formation Problem of Multi-Agent Systems with Switching Topologies and Time Delays in Flocking ..........................................................493
  Yang Gao, Xiaowu Mu, and Wei Zhao

Game-Based Incentive Mechanisms for Cooperation in P2P Networks ................................................498
  Fu Xie, Feng-Ming Liu, Rong-Rong Yang, and Ran Lu

Gray Correlation Analysis Method and Its Application in Drill Stem Failure in Oil and Gas Engineering ..............................................................502
  Xueliang Bi, Tie Yan, Lei Chang, and Chang-jiang Wang

Improvements to the Strong Planning Algorithm .................................................................506
  Zhonghua Wen, Qiwei Yang, Jinhua Zheng, and Jiang Zhu

Minimizing Makespan for a Single Batch Processing Machine with Non-Identical Job Sizes Using Neural Nets Approach ........................................511
  Hao Shao, Hua-Ping Chen, Rui Xu, and Wen-Gong Zhang

Multi-Objective Optimization Approach to Ill-Posed Inverse Problem ........................................515
  Dai Weihui, Zhang Liu, and Liang Shuyi

Multiobjective Optimization Using Clustering Based Two Phase PSO ................................................520
  Haichang Gao and Weizhou Zhong
