Message from the General Chair  
ICRTCCM 2017

The hallmark of an ideal educational institution is to impart quality education. It should consist of a series of enhancements each raising the individual to a higher level of awareness, understanding and kinship leading to the wholesome development of an individual and thereby contributing to the productive development of the state and the country.

I am delighted to know that the Department of Computer Science and Engineering, University College of Engineering Tindivanam, Tindivanam is organizing the Second International Conference on Recent Trends and Challenges in Computational Models (ICRTCCM'17) during 3rd to 4th February, 2017.

The first international conference conducted by Department of Computer Science and Engineering saw greater heights and had set a new benchmark standard for conducting conferences of this caliber in Tamilnadu. In line with this, their plan to conduct the second international conference demands great appreciation. To ensure the complete reach of the benefits of the revolution in the computing field to the researchers, these International Conferences are organized.

An international conference constantly helps to open up diverse avenues, perspectives with a broad ended vision and horizons. I think this will be an ideal platform for a constructive exchange of ideas on the theoretical concepts and practical ideas with the esteemed international keynote speakers and world renowned Computer Science and Information Technology experts.

I hope that this conference provides an opportunity for the students, academicians and researchers to gain more information on the current trends and Challenges in Computational Models.

I wish this Second International Conference on Recent Trends and Challenges in Computational Models (ICRTCCM'17) a grand success.

S. Ganesan, Registrar, Anna University  
ICRTCCM 2017 General Chair
