Proceedings of the

1999 International Conference on Software Engineering

May 16-22, 1999
Los Angeles, California, USA

Sponsored by
The IEEE Computer Society Technical Council on Software Engineering
The Association for Computing Machinery (ACM SIGSOFT)
In cooperation with ACM SIGAda and ACM SIGPLAN
Table of Contents

Foreword.................................................................xii
Organizing Committees ..........................................xiv

TECHNICAL PAPERS

ARCHITECTURES: COMPOSITION TECHNIQUES
Using Off-The-Shelf Middleware to Implement Connectors in Distributed Software Architectures .................3
Eric M. Dashofy, Nenad Medvidovic, Richard N. Taylor
Exploiting ADLs to Specify Architectural Styles Induced by Middleware Infrastructures .........................13
Elisabetta Di Nitto, David Rosenblum
A Flexible Approach to Alliances of Complex Applications ..........................................................23
David J. Kastik, Conrad E. Kimball, Jimmie L. Felt, Kenneth B. Frazier

ARCHITECTURES: DEVELOPMENT TECHNIQUES
A Systematic Approach to Derive the Scope of Software Product Lines .....................................................34
Jean-Marc DeBaud, Klaus Schmid
A Language and Environment for Architecture-Based Software Development and Evolution ....................44
Nenad Medvidovic, David S. Rosenblum, Richard N. Taylor
Experience with Performing Architecture Tradeoff Analysis ......................................................................54
Rick Kazman, Mario Barbacci, Mark Klein, S. Jeromy Carrière, Steven G. Woods

WIDESCALE COMPUTING
Exploiting Smalltalk Modules In A Customizable Programming Environment .............................................65
Mark Woodman, Rob Griffiths, Malcolm Macgregor, Simon Holland, Hugh Robinson
Software Engineering Issues for Ubiquitous Computing ............................................................................75
Gregory D. Abowd
Splitting the Organization and Integrating the Code: Conway's Law Revisited .........................................85
James D. Herbsleb, Rebecca E. Grinter

PROGRAM COMPOSITION
Avoiding Packaging Mismatch with Flexible Packaging ................................................................................97
Robert DeLine
N Degrees of Separation: Multi-Dimensional Separation of Concerns .......................................................107
Peri Tarr, Harold Ossher, William Harrison, Stanley M. Sutton, Jr.
An Initial Assessment of Aspect-oriented Programming ..............................................................................120
Robert J. Walker, Elisa L.A. Baniassad, Gail C. Murphy

MODEL CHECKING
Using the ASTRAL Model Checker to Analyze Mobile IP ...........................................................................132
Zhe Dang, Richard A. Kemmerer
Decoupling Synchronization from Local Control for Efficient Symbolic Model Checking of Statecharts ..................142
Analysis of a Scheduler for a CAD Framework ..................................................................................152
David S. Keyes, Laura K. Dillon, Moon Jung Chung
Technical Papers

DISTRIBUTED SYSTEMS
Dynamic Layout of Distributed Applications in FarGo .................................................. 163
   Ophir Holder, Israel Ben-Shaul, Hovav Gazit
A Cooperative Approach to Support Software Deployment Using the Software Dock .................. 174
   Richard S. Hall, Dennis Heimbigner, Alexander L. Wolf
Information Survivability Control Systems ................................................................. 184
   Kevin Sullivan, John Knight, Xing Du, Steve Geist

EVOLUTION
Lightweight Extraction of Object Models from Bytecode .................................................. 194
   Daniel Jackson, Allison Waingold
Highly Reliable Upgrading of Components .................................................................. 203
   Jonathan E. Cook, Jeffrey A. Dage
Dynamically Discovering Likely Program Invariants to Support Program Evolution ................. 213
   Michael Ernst, Jake Cockrell, William G. Griswold, David Notkin

REVERSE ENGINEERING
Pattern-Based Reverse-Engineering of Design Components ............................................. 226
   Rudolf K. Keller, Reinhard Schauer, Sébastien Robitaille, Patrick Pagé
Automatic Method Refactoring Using Weighted Dependence Graphs ............................... 236
   Katsuhisa Maruyama, Ken-ichi Shima
Identifying Objects using Cluster and Concept Analysis .................................................. 246
   Arie van Deursen, Tobias Kuipers

TESTING
Using a Goal-driven Approach to Generate Test Cases for GUIs ........................................ 257
   Atif M. Memon, Martha E. Pollack, Mary Lou Soffa
Lutess: a Specification-driven Testing Environment for Synchronous Software .................... 267
   L. du Bousquet, F. Ouabdesselam, J.-L. Richier, N. Zuanon
Residual Test Coverage Monitoring ............................................................................... 277
   Christina Pavlopoulou, Michal Young
Model-Based Testing in Practice .................................................................................... 285

METRICS: COST ESTIMATION
Software architecture classification for estimating the cost of COTS integration .................... 296
   Daniil Yakimovich, James M. Bieman, Victor R. Basili
Explaining the Cost of European Space and Military Projects ......................................... 303
   Lionel C. Briand, Khalid El Emam, Isabella Wieczorek
An Assessment and Comparison of Common Software Cost Estimation Modeling Techniques .... 313
   Lionel C. Briand, Khalid El Emam, Dagmar Surmann, Isabella Wieczorek, Katrina D. Maxwell

METRICS: TOOLS & DESIGN
Using Version Control Data to Evaluate the Impact of Software Tools ............................... 324
   David Atkins, Thomas Ball, Todd Graves, Audris Mockus
Polymorphism Measures for Early Risk Prediction ......................................................... 334
   Salda Benlarbi, Walcelio L. Melo
Investigating Quality Factors in Object-Oriented Designs: an Industrial Case Study ............ 345
   Lionel Briand, Jurgen Wüst, Stefan Ikonomovski, Hakim Lounis

AGENTS, MOBILITY & INTEROPERABILITY
Agent System Development Method Based on Agent Patterns ............................................ 356
   Yasuyuki Tahara, Akihiko Ohsuga, Shinichi Honiden
Technical Papers
Case Studies

LIME: Linda Meets Mobility .................................................................368
Gian Pietro Picco, Amy L. Murphy, Gruia-Catalin Roman

Adding more "DL" to IDL: towards more knowledgeable component inter-operability ........................................378
Alex Borgida, Prem Devanbu

SPECIFICATION & VERIFICATION
A Specification Matching Based Approach to Reverse Engineering .................................389
Gerald C. Gannod, Betty H.C. Cheng

Data Flow Analysis for Checking Properties of Concurrent Java Programs .........................399
Gleb Naumovich, George S. Avrunin, Lori A. Clarke

Patterns in Property Specifications for Finite-State Verification ........................................411
Matthew B. Dwyer, George S. Avrunin, James C. Corbett

PROGRAM ANALYSIS
Call-Mark Slicing: An Efficient and Economical Way of Reducing Slice ..........................422
Akira Nishimatsu, Minoru Jihira, Shinji Kusumoto, Katsuro Inoue

System-Dependence-Graph-Based Slicing of Programs With Arbitrary Interprocedural Control Flow 432
Saurabh Sinha, Mary Jean Harrold, Gregg Rothermel

An Incremental Flow- and Context-sensitive Pointer Aliasing Analysis ..............................442
Jyh-shiarm Yur, Barbara G. Ryder, William A. Landi

REUSE & BROWSING
Reusing Single System Requirements from Application Family Requirements ..................453
Mike Mannion, Barry Keepence, Hermann Kaindl, Joe Wheadon

Assessing Software Libraries by Browsing Similar Classes, Functions and Relationships 463
Amir Michail, David Notkin

CHIME: Customizable Hyperlink Insertion and Maintenance Engine for Software Engineering 473
Environments ...........................................
P. Devanbu, Y-F. Chen, E. Gansner, H. Müller, J. Martin

INSPECTIONS, DEBUGGING, & PROTOTYPING
Prototyping Real-Time Vision Systems: An Experiment in DSL Design ............................484
Alastair Reid, John Peterson, Greg Hager, Paul Hudak

Generalizing Perspective-based Inspection to handle Object-Oriented Development Artifacts 494
Oliver Laitenberger, Colin Atkinson

Coca: An automated Debugger for C ..................................................................................504
Mireille Ducassé

CASE STUDIES

CASE STUDIES I
Haemo Dialysis Software Architecture Design Experiences ............................................516
PerOlof Bengtsson, Jan Bosch

Architectural Framework Modeling in Telecommunication Domain ..................................526
Giulio Fregonese, Alessandro Zorer, Giovanni Cortese

Baseball Seasons and Dog Years .........................................................................................535
David R. Barstow

CASE STUDIES II
Product-Line Architectures in Industry: A Case Study ......................................................544
Jan Bosch
Industry Presentations
Formal Research Demonstrations
Tutorial Summaries

Software and System Safety ................................................................. 617
Jack Janelle, David MacKenzie, Art Pyster
Designing Safe Software for Medical Devices ............................... 618
David M. MacKenzie

Software/System Definition and Architecting .................................. 619
Peter Hantos, Eberhardt Rechtin, Anthony Finkelstein
A Systems Engineering View of Requirements Management for Software-intensive Systems ........................... 620
Peter Hantos
The Extension Of Systems Architecting To The Architecting Of Organizations ........................................ 622
Eberhardt Rechtin

Rapid Application Development ....................................................... 623
Charles Leinbach, Arnold Pittler, Joyce Fitzpatrick
Successfully Deliver Internet Applications Using Rapid Software Techniques .................................................. 624
Charles Leinbach

COTS Integration ............................................................................. 626
Dorothy McKinney, Marie Silverthorn, Tricia Oberndorf
Impact of Commercial Off-The-Shelf (COTS) Software on the Interface Between Systems and Software Engineering ....................................... 627
Dorothy McKinney

FORMAL RESEARCH DEMONSTRATIONS

Insight – Reverse Engineer Case Tool ............................................... 630
Norman Rajala, Djenana Campara, Nikolai Mansurov

Behavioral Analysis of Software Architectures using LTSA .................. 634
Jeff Magee

OU LearningWorks: A Customized Programming Environment for Smalltalk Modules ........................................ 638
Mark Woodman, Rob Griffiths, Malcolm Macgregor, Simon Holland

Software Process Support over the Internet ....................................... 642
F. Maurer, G. Succi, H. Holz, B. Koting, S. Goldmann, B. Dellen

WinWin: a System for Negotiating Requirements ............................ 646
Ellis Horowitz, Joo H. Lee, June Sup Lee

MoHCA-Java: A Tool for C++ to Java Conversion Support ............... 650
Scott Malabarba, Premkumar Devanbu, Aaron Stearns

Leap: A “Personal Information Environment” for Software Engineers ......................................................... 654
Philip M. Johnson

FarGo: A System for Mobile Component-Based Application Development ............................................. 658
Israel Ben-Shaul, Hovay Gazit, Yoaid Gidon, Ophir Holder, Boris Lavva

The RMT (Recursive Multi-Threaded) Tool: A Computer Aided Software Engineering Tool for Monitoring and Predicting Software Development Progress .............................................. 660
Arturo I. Concepcion, Sunny Lin, Scott J. Simon

TUTORIAL SUMMARIES

Distributed Objects ........................................................................... 665
Wolfgang Emmerich, Neil Roodyn

Practical Software Measurement ...................................................... 667
Joyce Statz
Tutorial Summaries

Personal Software Engineering Project Management Process .............................................................669
A. Windsor Brown

Defining Families – Commonality Analysis .................................................................671
Mark A. Ardis, David A. Cuka

Verification and Validation of Requirements for Mission Critical Systems ..............................673
Steve Easterbrook

Software Interoperability: Principles and Practice .................................................................675
Jack C. Wileden, Alan Kaplan

Managing by the Numbers: A tutorial on quantitative measurement and control of software projects ..........................677
Richard E. Fairley

Risk Management in Software Development: A Technology Overview and the Riskit Method ..............679
Jyrki Kontio

Failure and Success Factors in Reuse Programs: a Synthesis of Industrial Experiences .................681
Michel Ezran, Maurizio Morisio, Colin Tully

Round-Trip Engineering with Design Patterns, UML, Java and C++ ..........................................683
Wilhelm Schäfer, Albert Zündorf

Adaptable Components ...........................................................................................................685
Grady H. Campbell, Jr.

Using Subject-Oriented Programming to Overcome Common Problems in Object-Oriented Software Development/Evolution ..............................................................687
Harold Ossher, Peri Tarr

Tutorial: A Quick Introduction to Software Reliability Modeling ..............................................689
Jarrett Rosenberg

Modeling and Analyzing Software Architectures ........................................................................690
Robert T. Monroe

WORKSHOP SUMMARIES

Web Engineering .....................................................................................................................693
San Murugesan, Yogesh Deshpande

Software Change and Evolution (SCE'99) ..............................................................................695
Václav Rajlich

Software Engineering over the Internet ..................................................................................696
Frank Maurer

Testing Distributed Component-Based Systems .........................................................................698
Andreas Ulrich, Peter Zimmerer

First Workshop on Economics-Driven Software Engineering Research (EDSER-1) ....................699
Kevin J. Sullivan, David Notkin, Alfonso Fuggetta, John Favaro

Software Transformation Systems (STS'99) ...........................................................................701
Marcelo Sant’Anna, Julio Leite, Ira Baxter, Dave Wile, Ted Biggerstaff, Don Batory, Prem Devanbu, Liz Burd

Software Engineering for Parallel and Distributed Systems (PDSE’99) ..................................703
Peter R. Croll, Hesham El-Rezini

Engineering Distributed Objects (EDO 99) ...........................................................................705
Wolfgang Emmerich, Volker Grahn

Constructing Software Engineering Tools (CoSET’99) ..............................................................707
Jonathan Gray, Anna Liu, Louise Scott, Jennifer Harvey

Empirical Studies of Software Development and Evolution ...................................................709
Rachel Harrison
Workshop Summaries
Doctoral Symposium
Author Index

Science and Engineering for Software Development: A Recognition of Harlan D. Mills’ Legacy.................710
  Victor Basili, Tom DeMarco, Ali Mili
Ensuring Successful COTS Development ..............................................................712
  John Dean
Component-Based Software Engineering .............................................................714
  Alan W. Brown, Kurt C. Wallnau

DOCTORAL SYMPOSIUM

Automatic Verification of Real-Time Designs .......................................................716
  Victor A. Braberman, Miguel Felder
Research summary for dynamic detection of program invariants .......................718
  Michael Ernst
Development of object oriented frameworks for spatio-temporal information systems ........720
  Anita Jacob
The Internet As A Medium For Software Engineering Experiments .......................722
  Alex Kotov
Specification, Analysis, and Prototyping of Mobile Systems ............................724
  Cecilia Mascolo
Project LEAP: Personal Process Improvement for the Differently Disciplined ........726
  Carleton A. Moore
Algorithm Development in the Mobile Environment ...........................................728
  Amy L. Murphy
A Flexible Approach to Decentralized Software Evolution ..................................730
  Peyman Oreizy
Configurable Software Architecture in Support of Configuration Management and Software Deployment ........732
  André van der Hoek
Contextual Programming ....................................................................................734
  Robert J. Walker
Toward Precise Measurements Using Software Normalization .............................736
  Pu-Lin Yeh, Jin-Cherng Lin

AUTHOR INDEX .................................................................................................738
