## Session 1: What Does It Cost To Make That Change?
Keynote Speaker: Peter de Jager  
Chair: Norman Schneidewind

## Session 2A: Modernizing Legacy Systems
Chair: Elliot Chikofsky

- Deriving an Object Model from Legacy Fortran Code  
  *E. Byrne, G. Subramaniam*
  
- Restructuring Sequential Fortran Code into a Parallel/Distributed Application  
  *C. Everaars, F. Arbab, F. Burger*

## Session 2B: How Much Has Software Maintenance Changed Since 1983?
Chair: Norman Schneidewind

Panelists: T. Keller, N. Chapin, T. Pigoski, N. Zvegintzov

## Session 3A: Impact Analysis of Software Changes
Chair: Norman Wilde

- Impact Analysis in the Software Change Process: A Year 2000 Perspective  
  *S. Bohner*

- Visual Impact Analysis  
  *K. Gallagher*

- Assessing the Impact of Changes at the Architectural Level: A Cast Study on Graphical Debuggers  
  *D. McCrickard, G. Abowd*

## Session 3B: Measuring Maintainability
Chair: Taghi M. Khoshgoftaar

- Detection of Fault-Prone Software Modules During a Spiral Life Cycle  
  *T. Khoshgoftaar, E. Allen, R. Halstead, G. Trio*
The Effect of Interface Complexity on Program Error Density .......................... 77
   R. Takahashi, Y. Nakamura

Maintainability as a Key Factor in Maintenance Productivity: A Case Study 87
   M. Garcia, J. Alvarez

Session 4A: Specifying and Using Tools
Chair: Tom Pigoski

Specifying Code Analysis Tools .......................................................... 95
   G. Canfora, A. Cimitile, A. De Lucia

Software Error Classification using Purify ............................................. 104
   H. Owens, B. Womack, M. Gonzalez

Omega — An Integrated Environment for C++ Program Maintenance 114
   W. Tsai, X. Chen, H. Huang, M. Poonawala,
      S. Rayadurgam, Y. Wang

Session 4B: Examining Year 2000 Data Challenges from the Maintenance Perspective
Chair: Shawn A. Bohner
Panelists: T. Backman, E. Chikofsky, P. de Jager, N. Zvegintzov

Examining Year 2000 Data Challenges from the Maintenance Perspective 125
   S. Bohner

Session 5: Software Maintenance: Myth or Magic
Keynote Speaker: Ted Keller
Chair: Norman Schneidewind

Change Costing in a Maintenance Environment ......................................... 130
   T. Keller

Session 6: Industry Track
Chair: Ted Keller

Session 7A: Understanding the Maintenance Process
Chair: Mike Schrank

The Non-Homogeneous Maintenance Periods: A Case Study of Software Modifications 134
   D. Gefen, S. Schneberger

Maintenance in a Dual-Lifecycle Software Engineering Process 142
   D. Eichmann, M. Weisskopf, C. Irving,
      C. McKay, C. Atkinson

Measurements for Managing Software Maintenance ...................................... 152
   G. Stark
Session 7B: Migrating to Object-Oriented Systems
Chair: Malcolm Slovin

A Design Environment for Migrating Relational to Object Oriented Database Systems 163
J. Jahnke, W. Schäfer, A. Zündorf

Algorithmic Analysis of the Impact of Changes to Object-Oriented Software 171
L. Li, A. Offutt

Discovering a System Modernization Decision Framework: A Case Study in Migrating to Distributed Object Technology 185
K. Wallnau, P. Clements, E. Wallace

Session 8A: Modeling Software Maintenance Practice
Chair: Walcelio L. Melo

A Study of the Effects of Software Development Practices on Software Maintenance Effort 197
S. Slaughter, R. Banker

A Formal Method for Software Maintenance 206
H. Yang, W. Chu, P. Luker

Modelling the Maintenance Process at Zurich Life Insurance 217
H. Sneed

Session 8B: Reusing Software during Maintenance
Chair: Paul Layzell

An Agent-Based Approach to Rapid Software Evolution Based on a Domain Model 228
S. Glover, K. Bennett

Analysing Large COBOL Programs: The Extraction of Reuseable Modules 238
E. Burd, M. Munro, C. Wezeman

Experiment on the Automatic Detection of Function Clones in a Software System using Metrics 244
J. Mayrand, C. Leblanc, E. Merlo

Session 9A: Reverse Engineering 1
Chair: Hausi Müller

Reverse Engineering Concurrent Programs using Formal Modelling and Analysis 255
E. Younger, Z. Luo, K. Bennett, T. Bull

Using Informal and Formal Techniques for the Reverse Engineering of C Programs 265
B. Cheng, G. Gannod

Evaluation of a Knowledge-Based Approach to Program Understanding 275
S. Abd-El-Hafiz
Session 9B: Documenting for Maintenance
Chair: Scott L. Schneberger

A Documentation Suite for Maintenance Programmers
F. Cioch, S. Lohrer, M. Palazzolo

VIFOR 2: A Tool for Browsing and Documentation
V. Rajlich, S. Adnapally

Maintenance and Abstraction of Program Data using Formal Transformations
R. Mortimer, K. Bennett

Session 10A: Reverse Engineering 2
Chair: Mariam Kamkar

Early Field Experience with the Software Reconnaissance Technique for Program Comprehension
N. Wilde, C. Casey

A Cliché-Based Environment to Support Architectural Reverse Engineering
R. Fiutem, P. Tonella, G. Antoniol, E. Merlo

Preprocessors from an Abstract Point of View
J. Favre

Session 10B: Analyzing Code
Chair: Gerardo Canfora

Binary Translation: Static, Dynamic, Retargetable?
C. Cifuentes, V. Malhotra

Regression Testing of GUI Event Interactions
L. White

Semi-Automatic Update of Applications in Response to Library Changes
D. Notkin, K. Chow

Session 10C: Software Maintenance for 2005
Chair: Keith Bennett
Panelists: M. Munro, P. Layzell, D. Griffiths, P. Brereton

Software Maintenance for 2005
K. Bennett

Index of Authors
