International Conference on Software Maintenance — ICSM 2001

Message from the General Chair ____________________ xiii
Message from the Program Chairs ___________________ xiv
Conference Committee __________________________________ xv
Program Committee ______________________________________ xvi
Steering Committee ____________________________________ xvii
Referees ____________________________________________ xviii

Keynote
Session Chair: Giacomo Bucci
Dave Parnas, McMaster University, Canada — “Design for Maintenance and Maintaining Design”

Keynote
Session Chair: Gerardo Canfora
Dieter Rombach, Fraunhofer Institut IESE, Germany

Keynote
Session Chair: Anneliese Amschler Andrews
Ivar Jacobson, Rational, USA — “Four Macro Trends in Software Development”

Panel 1: Software Evolution: Roadmap
Chairs: K.H. Bennett, University of Durham, UK; V.T. Rajlich, Wayne State University, USA

Panel Members: D. Parnas, McMaster University, Canada; H. Sneed, Independent Consultant, Germany;
K. Beck, CSLife, Switzerland; P.J. Layzell, University of Sussex, UK

Software Evolution: A Road Map ______________________________________________________________ 4
K. Bennett and V. Rajlich

Addressing the Software Evolution Crisis Through a Service-Oriented View of Software:
A Roadmap for Software Engineering and Maintenance Research _______________________________ 5
P. Layzell

Software Evolution: A Road Map ______________________________________________________________ 6
V. Rajlich

Software Evolution: A Road Map ______________________________________________________________ 7
H. Sneed

Panel 2: Maintenance Metrics:
Who Are the Different Stakeholders?
Chair: Loredana Mancini, Getronics Consulting, Italy

Panel Members: A. Grillo, Associazione Italiana EDP Auditors — EIEA, Italy;
N. Cimitile, Magnifico Rettore Università del Sannio, Italy; R. Ehmer, Getronics, Germany;
S. Fabrizi, Banca d’Italia, Italy
S1A: Reverse Engineering
Session Chair: Mary Jean Harrold

Representing and Accessing Extracted Information
A. Cox and C. Clarke

Supporting Software Maintenance by Mining Software Update Records
J. Shirabad, T. Lethbridge, and S. Matwin

Reverse Engineering Legacy Information Systems for Internet Based Interoperation
M. Johnson and R. Rosebrugh

S1B: Program Analysis I
Session Chair: Jianjun Zhao

A Change Propagation Model and Platform for Multi-Database Applications
L. Deruelle, M. Bouneffa, N. Melab, and H. Basson

Implementation Techniques for Efficient Data-Flow Analysis of Large Programs
D. Atkinson and W. Griswold

Flow Analysis to Detect Blocked Statements
B. Malenfant, G. Antoniol, E. Merlo, and M. Dagenais

S1C: Change Driven Testing
Session Chair: Lee White

Incorporating Incremental Validation and Impact Analysis into Spreadsheet Maintenance:
An Empirical Study
V. Krishna, C. Cook, D. Keller, J. Cantrell, C. Wallace, M. Burnett, and G. Rothermel

An Implementation of and Experiment with Semantic Differencing
D. Binkley, R. Capellini, L. Raszewski, and C. Smith

Test-Suite Reduction and Prioritization for Modified Condition/Decision Coverage
J. Jones and M. Harrold

Industrial Short Papers
Session Chair: Harry Sneed

SDS Internet Banking
S. Goeschl

An Architecture for Re-engineering of Client/Server Applications
A. Furone

Extending the UML to Support Evolution Management
R. France, J. Bieman, and R. Trask

Multi-View Architecture Trend Analysis for Medical Imaging
T. Rötschke, R. Krikhaar, and D. Havenith
An Intranet-Based Application for Supporting Effective Maintenance Activities on Large Software Systems

M. Contini, S. di Vettimo, A. Botta, T. Vimercati, and D. Tagliabue

108

S2A: Metrics
Session Chair: Taz Daughtrey

Entropies as Measures of Software Information

S. Abd-El-Hafiz

110

The Role of Independent Verification and Validation in Maintaining a Safety Critical Evolutionary Software in a Complex Environment: The NASA Space Shuttle Program

M. Zelkowitz and I. Rus

118

Investigation of the Risk to Software Reliability and Maintainability of Requirements Changes

N. Schneidewind

127

S2B: Slicing
Session Chair: Jeffrey Voas

Pre/Post Conditioned Slicing

M. Harman, R. Hierons, C. Fox, S. Danicic, and J. Howroyd

138

Web Application Slicing

F. Ricca and P. Tonella

148

Incremental Slicing Based on Data-Dependences Types

A. Orso, S. Sinha, and M. Harrold

158

S2C: Impact Analysis
Session Chair: Shawn Bohner

The Impact of Software Evolution on Code Coverage Information

S. Elbaum, D. Gable, and G. Rothermel

170

Impact Analysis of Maintenance Tasks for a Distributed Object-Oriented System

H. Sneed

180

Analyzing the Impact of Changing Requirements

J. O’Neal and D. Carver

190

Demos
Session Chair: Panos Linos

Object-Oriented Repository Services

H. Sneed

198

Understanding Legacy Systems with OSK

A. Briziol, L. Chiocci, M. Loffredo, and O. Signore

199

WebFabIS: A WEB Based Information System for Microelectronics Manufacturing

L. Ferrario and C. Armolari

200
S3A: Effort Analysis
Session Chair: Fabrizio Fioravanti

Using Code Metrics to Predict Maintenance of Legacy Programs: A Case Study 202
M. Polo, M. Piattini, and F. Ruiz

Software Renewal Process Comprehension using Dynamic Effort Estimation 209
D. Caivano, F. Lanubile, and G. Visaggio

An Approach to Modelling Long-Term Growth Trends in Software Systems 219
M. Lehman, J. Ramil, and U. Sandler

S3B: Tools
Session Chair: Panos Linos

RIPPLES: Tool for Change in Legacy Software 230
K. Chen and V. Rajlich

Cost-Effective Maintenance Tools for Proprietary Languages 240
M. de Jonge and R. Monajemi

Integrating Information Sources for Visualizing Java Programs 250
J. Michaud, M. Storey, and H. Müller

S3C: Case Studies
Session Chair: Loredana Mancini

Defect Prevention through Defect Prediction: A Case Study at Infosys 260
S. Mohapatra and B. Mohanty

Modeling Clones Evolution through Time Series 273
G. Antoniol, G. Casazza, M. Di Penta, and E. Merlo

Does the Modern Code Inspection Have Value? 281
H. Siy and L. Votta

S4A: Rapid Evolution
Session Chair: Ned Chapin

An Architectural Model for Service-Based Software with Ultra Rapid Evolution 292
K. Bennett, M. Munro, N. Gold, P. Layzell, D. Badgen, and P. Brereton

Extreme Maintenance 301
C. Poole, T. Murphy, J. Huisman, and A. Higgins

S4B: Software Architectures I
Session Chair: Jean-Francois Girard

Aspects of Design and Implementation of a Multi-Channel and Multi-Modal Information System 312
V. Demesticha, J. Gergic, J. Kleindienst,
M. Mast, L. Polymenakos, H. Schulz, and L. Seredi

Describing Evolving Dependable Systems Using Co-Operative Software Architectures 320
R. de Lemos
S4C: Behavior of Concurrent Programs

Session Chair: Ira D. Baxter

Measuring Behavioral Correspondence to a Timed Concurrent Model
J. Cook, C. He, and C. Ma

Using Coordination to Restructure Sequential Source Code into a Concurrent Program
C. Everaars, F. Arbab, and B. Koren

S5A: Documentation

Session Chair: Nicholas Zvegintzov

The State of Documentation Practice within Corrective Maintenance
M. Kajko-Mattsson

CVSSearch: Searching through Source Code Using CVS Comments
A. Chen, E. Chou, J. Wong, A. Yao, Q. Zhang, S. Zhang, and A. Michail

S5B: UML

Session Chair: Norman Schneidewind

Reverse Engineering of the UML Class Diagram from C++ Code in Presence of Weakly Typed Containers
P. Tonella and A. Potrich

Multi-View Software Evolution: A UML-based Framework for Evolving Object-Oriented Software
R. France and J. Bieman

S5C: Software Architectures II

Session Chair: Filippo Lanubile

The Build-Time Software Architecture View
Q. Tu and M. Godfrey

A Graph Pattern Matching Approach to Software Architecture Recovery
K. Sartipi and K. Kontogiannis

S6A: Maintenance Process Assessment and Improvement

Session Chair: Raj Sood

An Empirical Study of Maintenance Issues within Process Improvement Programmes in the Software Industry
T. Hall, A. Rainer, N. Baddoo, and S. Beecham

Evaluating the Predelivery Phase of ISO/IEC FDIS 14764 in the Swedish Context
M. Kajko-Mattsson, A. Glassbrook, and M. Nordin

Introducing Workflow Management in Software Maintenance Processes
L. Aversano, S. Betti, A. De Lucia, and S. Stefanucci

Assessing Massive Maintenance Processes: An Empirical Study
A. De Lucia, A. Pannella, E. Pompella, and S. Stefanucci
S6B: Distributed Object Systems
Session Chair: Scott Tilley

A Customization Method for Network Management Functions without Modification of Off-the-Shelf Components
460
T. Otani and Y. Yamamoto

A Framework for Re-use and Maintenance of Quality of Service Mechanisms in Distributed Object Systems
470
K. Geihs and C. Becker

Changing Java Programs
479
S. Eisenbach and C. Sadler

Live Upgrades of CORBA Applications Using Object Replication
488
L. Tewksbury, L. Moser, and P. Melliar-Smith

S6C: Business Models
Session Chair: Alberigi Quaranta

Towards a Business Maintenance Model
500
M. Kajko-Mattsson

A Queue Theory-Based Approach to Staff Software Maintenance Centers
510
G. Antoniol, G. Casazza, G. Di Lucca, M. Di Penta, and F. Rago

K-Mediator: Towards Evolving Information Systems
520

A Client-Benefits Oriented Taxonomy of ERP Maintenance
528
C. Ng, T. Chan, and G. Gable

Dissertation Forum
Session Chair: Alessandro Fantechi

Summary of Dynamically Discovering Likely Program Invariants
540
M. Ernst

Hypothesis-Based Concept Assignment to Support Software Maintenance
545
N. Gold

A Formal Foundation for Object-Oriented Software Evolution
549
T. Mens

Perspectives on Improving Software Maintenance
553
F. Niessink

A Metric Framework for the Assessment of Object-Oriented Systems
557
F. Fioravanti

A Database Evolution Approach for Object-Oriented Databases
561
A. Rashid
Bayesian Analysis of Software Cost and Quality Models ................................................................. 565
S. Chulani

**S7C: Design Patterns**
*Session Chair: Andrea De Lucia*

A Declarative Evolution Framework for Object-Oriented Design Patterns ........................................... 570
T. Mens and T. Tourwé

OO Design Patterns, Design Structure, and Program Changes: An Industrial Case Study ......................... 580
J. Bieman, D. Jain, and H. Yang

**S8A: Dynamic and Static Analysis**
*Session Chair: Mark Harman*

Dynamic and Static Views of Software Evolution ..................................................................................... 592
S. Cook, H. Ji, and R. Harrison

Aiding Program Comprehension by Static and Dynamic Feature Analysis ............................................. 602
T. Eisenbarth, R. Koschke, and D. Simon

Form: A Framework for Creating Views of Program Executions .......................................................... 612
T. Souder, S. Mancoridis, and M. Salah

**S8B: Legacy Systems**
*Session Chair: Roberto Ciampoli*

Using Design Recovery Techniques to Transform Legacy Systems ....................................................... 622
T. Dean, J. Cordy, K. Schneider, and A. Malton

Iterative Reengineering of Legacy Functions ......................................................................................... 632
A. Bianchi, D. Caivano, V. Marengo, and G. Visaggio

A Decisional Framework for Legacy System Management ....................................................................... 642
A. De Lucia, A. Fasolino, and E. Pompella

**S8C: Short Papers**
*Session Chair: Pierfrancesco Bellini*

Automating Language Conversion: A Case Study ..................................................................................... 654
A. Terekhov

The FermaT Assembler Re-engineering Workbench ............................................................................... 659
M. Ward

Architecture-Based Semantic Evolution: A Study of Remotely Controlled Embedded Systems .................. 663
L. Chung and N. Subramanian

Software Maintenance: An Approach towards Control ........................................................................... 667
R. Kusters and F. Heemstra
**S9B: Program Analysis II**
*Session Chair: Mark Harman*

A Program Dependence Model for Concurrent Logic Programs and its Applications  
*J. Zhao, J. Cheng, and K. Ushijima*

Incremental Call Graph Reanalysis for Object-Oriented Software Maintenance  
*A. Souter and L. Pollock*

Syntax-Directed Construction of Value Dependence Graphs  
*D. Byers, M. Kamkar, and T. Pålsson*

**S10A: Testing**
*Session Chair: Maurizio Campanai*

A Graphical Class Representation for Integrated Black- and White-Box Testing  
*S. Beydeda, V. Gruhn, and M. Stachórski*

Using Component Metacontent to Support the Regression Testing of Component-Based Software  
*A. Orso, M. Harrold, D. Rosenblum, G. Rothermel, M. Soffa, and H. Do*

Managing the Maintenance of Ported, Outsourced, and Legacy Software via  
Orthogonal Defect Classification  
*K. Bassin and P. Santhanam*

**S10B: Reengineering**
*Session Chair: Harry Sneed*

Automated Support for Program Refactoring Using Invariants  
*Y. Kataoka, M. Ernst, W. Griswold, and D. Notkin*

Comparing the Decompositions Produced by Software Clustering Algorithms Using Similarity Measurements  
*B. Mitchell and S. Mancoridis*

The Method Replacement Indicator: A Metric for Analyzing Behavioral Substitution  
*R. Schauer and R. Keller*
