AMOST/QuoMBaT: Workshop on Advances and Quality in Model-Based Testing Committee ........................................................................................................xi

Mutation: 5th International Workshop on Mutation Analysis Committee .............................................................................................................................................................xiii

SBST: 3rd International Workshop on Search-Based Software Testing Committee .....................................................................................................................xiv

TESTBEDS: Testing Techniques & Experimentation Benchmarks for Event-Driven Software Committee ............................................................................................xv

ViDaS: 1st International Workshop on Validation and Verification of Dynamic Systems Committee ..........................................................................................xvi

CSTVA: 2nd Workshop on Constraints in Software Testing, Verification, and Analysis Committee ............................................................................................xvii

MDV: 1st International Workshop on Modeling and Detection of Vulnerabilities Committee ...........................................................................................................xviii

STITC: Software Testing in the Cloud Committee ..........................................................................................................................xix

TDD: 1st International Workshop on Test-Driven Development Committee ..........................................................................................xx

AMOST/QuoMBaT Workshop

From Test Purposes to Asynchronous Test Cases ..........................................................1

Adenilso Simao and Alexandre Petrenko
Modelling Requirements to Support Testing of Product Lines ..........................................................11
Christopher Robinson-Mallett, Matthias Grochtmann, Joachim Wegener, Jens Köhnlein, and Steffen Kühn

A Measurement Framework for Assessing Model-Based Testing Quality .............................................19
Peter B. Lakey

Effort Comparison for Model-Based Testing Scenarios .............................................................................28
Baris Güldali, Michael Mlynarski, and Yavuz Sancar

Generating Minimal Fault Detecting Test Suites for Boolean Expressions ...........................................37
Gordon Fraser and Angelo Gargantini

Deriving Exhaustive Test Suits for Nondeterministic FSMs
w.r.t. Non-separability Relation .............................................................................................................46
E. Akenshina, N. Shabaldina, and N. Yevtushenko

Test Generation Based on Abstraction and Test Purposes to Complement Structural Tests ..........................54
F. Bouquet, P.-C. Bué, J. Julliand, and P.-A. Masson

A Preliminary Study on BPEL Process Testability ...............................................................................62
Sébastien Salva and Issam Rabhi

Language-Specific vs. Language-Independent Approaches: Embedding Semantics on a Metamodel for Testing and Verifying Access Control Policies ..................................................72
Yves Le Traon, Tejedinne Mouelhi, Franck Fleurey, and Benoit Baudry

Mutation Workshop

A Manifesto for Higher Order Mutation Testing ......................................................................................80
Mark Harman, Yue Jia, and William B. Langdon

An Empirical Evaluation of the First and Second Order Mutation Testing Strategies ..................................90
Mike Papadakis and Nicos Malevris

Semantic Mutation Testing ......................................................................................................................100
John A. Clark, Haitao Dan, and Robert M. Hierons

Mutation at System and Functional Levels ...........................................................................................110
Pedro Reales Mateo, Macario Polo Usoaola, and Jeff Offutt

Implementation-Oriented Mutation Testing of Statechart Models .........................................................120
Mark Trakhtenbrot

Type Sensitive Application of Mutation Operators for Dynamically Typed Programs ............................126
Leonardo Bottaci

Applying Mutation Testing to Web Applications ....................................................................................132
Upsorn Praphamontripong and Jeff Offutt

Quantitative Evaluation of Mutation Operators for WS-BPEL Compositions .........................................142
Antonia Estero-Botaro, Francisco Palomo-Lozano, and Inmaculada Medina-Bulo
Mutation Operators for Agent-Based Models ................................................................. 151
   Salem F. Adra and Phil McMinn
Mutation Operators for Actor Systems .................................................................................. 157
   Vilas Jagannath, Milos Gligoric, Steven Lauterburg, Darko Marinov, and Gul Agha

SBST Workshop

Integrating Model-Based Testing with Evolutionary Functional Testing ......................... 163
   Felix Lindlar, Andreas Windisch, and Joachim Wegener
Using Evolutionary Testing to Find Test Scenarios for Hard to Reproduce Faults .................. 173
   Arthur I. Baars, Tanja E. J. Vos, and Dimitar M. Dimitrov
Optimizing for the Number of Tests Generated in Search Based Test Data ......................... 182
   Mark Harman, Sung Gon Kim, Kiran Lakhotia, Phil McMinn, and Shin Yoo
Metamorphic Testing of Stochastic Optimisation ................................................................. 192
   Shin Yoo
Considering Signal Constraints in Search-Based Testing of Continuous Systems .................. 202
   Benjamin Wilmes and Andreas Windisch
Searching for Safety Violations Using Estimation of Distribution Algorithms ......................... 212
   Jan Staunton and John A. Clark
Empirical Study on the Efficiency of Search Based Test Generation for EFSM Models ............ 222
   Ruilian Zhao, Mark Harman, and Zheng Li
Generating Feasible Transition Paths for Testing from an Extended Finite State Machine (EFSM) with the Counter Problem ................................................................. 232
   Abdul Salam Kalaji, Robert Mark Hierons, and Stephen Swift
Generating Feasible Test Paths from an Executable Model Using a Multi-objective Approach ................................................................. 236
   Thaise Yano, Eliane Martins, and Fabiano L. de Sousa

TESTBEDS Workshop

Using Methods & Measures from Network Analysis for GUI Testing ........................................ 240
   Ethar Elsaka, Walaa Eldin Moustafa, Bao Nguyen, and Atif Memon
Performance Testing of GUI Applications ........................................................................... 247
   Milan Jovic and Matthias Hauswirth
A Framework for GUI Testing Based on Use Case Design .................................................. 252
   Cristiano Bertolini and Alexandre Mota
On Modeling of GUI Test Profile ......................................................................................... 260
   Lei Zhao and Kai-Yuan Cai
Message Broker Using Asynchronous Method Invocation in Web Service and Its Evaluation .........................................................................................................................265
  Fan Bai and Wang Tao

Rich Internet Application Testing Using Execution Trace Data .................................................................................................................................274
  Domenico Amalfitano, Anna Rita Fasolino, and Porfirio Tramontana

Test Coverage Analysis of UML State Machines .................................................................................................................................284
  Ricardo D.F. Ferreira, João P. Faria, and Ana C.R. Paiva

ViDaS Workshop

  Kristopher Welsh and Pete Sawyer

QoS-Based Model Driven Assessment of Adaptive Reactive Systems .................................................................................................................................299
  Diego Perez-Palacin, Raffaella Mirandola, José Merseguer, and Vincenzo Grassi

A Dynamic Behaviour and Reliability Evaluation Method for Applications That Are Based on Asynchronous Processing Nodes .................................................................................................................................309
  Marko Palviainen

A Demo on Using Visualization to Aid Run-Time Verification of Dynamic Service Systems .................................................................................................................................319
  Jarkko Kuusijärvi

CSTVA Workshop

Generating Distinguishing Tests Using the Minion Constraint Solver .................................................................................................................................325
  Franz Wotawa, Mihai Nica, and Bernhard K. Aichernig

Applications of Optimization to Logic Testing .................................................................................................................................331
  Garrett Kaminski and Paul Ammann

A Comparison of Constraint-Based and Sequence-Based Generation of Complex Input Data Structures .................................................................................................................................337
  Rohan Sharma, Milos Gligoric, Vilas Jagannath, and Darko Marinov

SAT Solvers for Queries over Tree Automata with Constraints .................................................................................................................................343
  Pierre-Cyrille Héam, Vincent Hugot, and Olga Kouchnarenko

Using Constraints to Verify Properties of Rule Programs .................................................................................................................................349
  Bruno Berstel and Michel Leconte

Model-Based Testing Using Symbolic Animation and Machine Learning .................................................................................................................................355
  Pierre-Christophe Bué, Frédéric Dadeau, and Pierre-Cyrille Héam

MDV Workshop

Model-Checking Driven Security Testing of Web-Based Applications .................................................................................................................................361
  Alessandro Armando, Roberto Carbone, Luca Compagna, Keqin Li, and Giancarlo Pellegrino
Taint Dependency Sequences: A Characterization of Insecure Execution Paths
Based on Input-Sensitive Cause Sequences

Dumitru Ceara, Laurent Mounier, and Marie-Laure Potet

Towards Security Vulnerability Detection by Source Code Model Checking

Keqin Li

Functional Programming Way to Interact with Software Attacks and Vulnerabilities

Violeta Damjanovic and Dragan Djuric

Practical Experience Gained from Passive Testing of Web Based Systems

Alessandra Bagnato, Fabio Raiteri, Wissam Mallouli, and Bachar Wehbi

Some Modeling Challenges When Testing Rich Internet Applications for Security

Kamara Benjamin, Gregor v. Bochmann, Guy-Vincent Jourdan, and Iosif-Viorel Onut

Honeyware: A Web-Based Low Interaction Client Honeypot

Yaser Alosefer and Omer Rana

STICTC Workshop

Software Testing as an Online Service: Observations from Practice

Leah Muthoni Riungu, Ossi Taipale, and Kari Smolander

When to Migrate Software Testing to the Cloud?

Tauhida Parveen and Scott Tilley

Large-Scale Software Testing Environment Using Cloud Computing

Toshihiro Hanawa, Takayuki Banzai, Hitoshi Koizumi, Ryo Kanbayashi, Takayuki Imada, and Mitsuhisa Sato

YETI on the Cloud

Manuel Oriol and Faheem Ullah

Migrating Autonomic Self-Testing to the Cloud

Tariq M. King and Annaji Sharma Ganti

TDD Workshop

Supporting Test-Driven Development of Graphical User Interfaces Using Agile Interaction Design

Theodore D. Hellmann, Ali Hosseini-Khayat, and Frank Maurer

Overcoming Obstacles to Test-Driven Learning on Day One

John Clements and David Janzen

Software Testing Using Test Sheets

Colin Atkinson, Florian Barth, and Daniel Brenner

LiFT: Driving Development Using a Business-Readable DSL for Web Testing

Robert Chatley, John Ayres, and Tom White
