Conference Information.................................................................................................................................vii

Seventh International Conference on Web-Based Learning - ICWL 2008

Research on Learning Resource Design under the Environment of Network ........................................3
   Min He, Yi Zhang, and Wenfang Yu
Mechanism of Pricing Dynamically for Web Services ..............................................................................9
   Jianbin Wu
Modeling and Analysis for Educational Software Quality Hierarchy Triangle ......................................14
   Haiguang Fang
The Design of Web-learning Navigator Based on Artificial Psychology ..............................................19
   Yong-jian Lou, Peng Wang, and Li-bo Wang
Design and Implement of a Web Examination System Using Struts and EJB ....................................25
   Meiyu Fang
The Research of Mobile Support Synergistic Learning .......................................................................29
   Zhuying Lin, Yi Jin, and Hongwei Lin
Research on Mobile Learning Based on 3G Technology ......................................................................33
   Yunzhi Chen and Yongmei Gao
Research of Ubiquitous Learning Application Environment ................................................................37
   Song Xu and Zong Hu
RAE: A Framework and Modeling Method for Distributed Learning System ....................................41
   Qingchao Ke and Xiufang Ma
Learning with a QQ-Based Collaborative e-Learning System ..........................................................47
   Xiang Xu
Online Class Based on Environment Ontology ..........................................................................................50
   Ronghua Ye and Xiafen Yang
The e-Learning System Model Based on Affective Computing ............................................................54
   Xirong Ma, Rong Wang, and Jinglian Liang
A Harmonious Emotion Interaction Model for Distance Education .............................................................57
Huazhi Sun, Jinglian Liang, and Rong Wang

Construction of Collaborative Learning System Based on Multi-Agent Technology ..............................................60
Xiaoming Zhao, Wenping Guo, and Ying Chen

Research and Development of an Auto-Producing System for Course Website ..................................................65
Weifeng Ma, Xiaoyong Sun, and Yunfa Lei

A Quantitative Approach to eMM ..........................................................................................................................69
Yong Zhou and Jiping Zhang

A Study of Construction and Share Digital Resources in an Higher Education District in China ................................73
Qinian Zhou, Wei Li, and Jihui Yang

Application of E-Portfolio in the Distance Chinese Language Visualization Teaching Platform ...........................................76
Yi Zhang, Qiang Lu, Ni Zhang, Kuixuan Zhang, Pinghong Zhou, and Shuling Wei

Research and Implementation on Technologies of Constructing Network Virtual Lab ..................................................82
Chunyu Miao and Lina Chen

About e-Learning Application in Communication Teaching ................................................................................87
Lina Chen

To Analyze Assessment Using SPC Table ..........................................................................................................93
Wen-Chih Chang, Hsuan-Che Yang, and Tsung-Pu Lee

Organization of Documents for Multiple Document Summarization ...................................................................98
Fu Lee Wang, Tak-Lam Wong, and Aston Nai Hong Mak

Author Index .......................................................................................................................................................105
