Message from the IEEE ICWS 2018 Chairs ................................................................. xiii  
IEEE ICWS 2018 Organizing Committee .................................................................. xiv  
IEEE ICWS 2018 Reviewers .................................................................................. xvi

### Regular Papers

#### Session 1: Applications

DKEM: A Distributed Knowledge Based Evolution Model for Service Ecosystem ........................................... 1  
Xianghui Wang (Tianjin University), Zhiyong Feng (Tianjin University),  
Shizhan Chen (Tianjin University), and Keman Huang (Massachusetts  
Institute of Technology)

URoad: An Efficient Algorithm for Large-Scale Dynamic Ridesharing Service .......................................... 9  
Jing Fan (Zhejiang University of Technology), Jinting Xu (Zhejiang  
University of Technology), Chenyu Hou (Zhejiang University of  
Technology), Bin Cao (Zhejiang University of Technology), Tianyang  
Dong (Zhejiang University of Technology), and Shiwei Cheng (Zhejiang  
University of Technology)

CCRS: Web Service for Chinese Character Recognition ........................................................................... 17  
Hang Zhuang (University of Science and Technology of China), Changlong  
Li (University of Science and Technology of China), and Xuehai Zhou  
(University of Science and Technology of China)

#### Session 2: Quality of Service

A Hybrid Memetic Approach for Fully Automated Multi-Objective Web Service Composition ........ 26  
Alexandre Sawczuk da Silva (Victoria University of Wellington), Hui Ma  
(Victoria University of Wellington), Yi Mei (Victoria University of  
Wellington), and Mengjie Zhang (Victoria University of Wellington)

Personalized LSTM Based Matrix Factorization for Online QoS Prediction ............................................. 34  
Ruiben Xiong (Wuhan University), Jian Wang (Wuhan University),  
Zhongqiao Li (Wuhan University), Bing Li (Wuhan University), and  
Patrick C. K. Hung (University of Ontario Institute of Technology)
Session 3: Security and Privacy

Linked USDL Privacy: Describing Privacy Policies for Services .......................................................... 50
Georgia Kapitsaki (University of Cyprus), Joseph Ioannou (University of Cyprus), Jorge Cardoso (University of Coimbra and Huawei Munich Research Center), and Carlos Pedrinaci (The Open University)

Confidential Business Process Execution on Blockchain ............................................................... 58
Barbara Carminati (Università degli Studi dell'Insubria), Christian Rondanini (Università degli Studi dell'Insubria), and Elena Ferrari (Università degli Studi dell'Insubria)

X-Diag: Automated Debugging Cross-Browser Issues in Web Applications ..................................... 66
Shaopeng Xu (Institute of Software, CAS), Chenyu Zhou (Institute of Software, CAS), Zhiwei Gu (Beijing University of Civil Engineering and Architecture), Guoquan Wu (Institute of Software, CAS), Wei Chen (Institute of Software, CAS), and Jun Wei (Institute of Software, CAS)

Session 4: Service Composition

Energy-Efficient WSN Service Composition for Concurrent Applications ....................................... 74
Jiabei Xu (China University of Geosciences), Deng Zhao (TELECOM SudParis), Zhangbing Zhou (China University of Geosciences), Walid Gaaloul (TELECOM SudParis), and Yucong Duan (Hainan University)

MeCo-TSM: Multi-Entity Complex Process-Oriented Service Modeling Method .......................... 82
Ying Li (Zhejiang University), Meng Xi (Zhejiang University), Yuyu Yin (Hangzhou Dianzi University), Zhiling Luo (Zhejiang University), Honghao Gao (Shanghai University), and Jianwei Yin (Zhejiang University)

A Recommendation Algorithm Based on Dynamic User Preference and Service Quality .................. 91
Yanmei Zhang (Central University of Finance and Economics), Ya Qian (Central University of Finance and Economics), and Yan Wang (Macquarie University)

Session 5: Applications, Semantic Web Services and Web Services Composition

Jianpeng Hu (Shanghai Jiao Tong University), Linpeng Huang (Shanghai Jiao Tong University), Tianqi Sun (Shanghai University of Engineering Science), Yuchang Xu (Shanghai Jiao Tong University), and Xiaolong Gong (Shanghai Jiao Tong University)
A Service Annotation Quality Improvement Approach Based on Efficient Human Intervention ........ 107
Xuehao Sun (Tianjin University), Shizhan Chen (Tianjin University),
Zhiyong Feng (Tianjin University), Weimin Ge (Tianjin University), and
Keman Huang (Massachusetts Institute of Technology)

Factorization Machine Based Service Recommendation on Heterogeneous Information Networks .... 115
Fenfang Xie (School of Data and Computer Science, Sun Yat-sen
University), Liang Chen (School of Data and Computer Science, Sun
Yat-sen University), Yongjian Ye (School of Data and Computer Science,
Sun Yat-sen University), Zibin Zheng (School of Data and Computer
Science, National Engineering Research Center of Digital Life, Sun
Yat-sen University), and Xiaola Lin (School of Data and Computer
Science, Sun Yat-sen University)

Session 6: Data Services, Modeling and Verification, Quality of Service

GHTraffic: A Dataset for Reproducible Research in Service-Oriented Computing ...................... 123
Thilini Bhagya (Massey University), Jens Dietrich (Massey University),
Hans Guesgen (Massey University), and Steve Versteeg (CA Technologies)

Formal Verification of Stateful Services with REST APIs Using Event-B ........................................ 131
Irum Rauf (Åbo Akademi University), Inna Vistbakka (Åbo Akademi
University), and Elena Troubitsyna (KTH-Royal Institute of Technology)

QCSS: A QoE-Aware Control Plane for Adaptive Streaming Service over Mobile Edge Computing
Infrastructures ........................................................................................................................................ 139
Lingyan Zhang (Beijing University of Posts and Telecommunications),
Shangguang Wang (Beijing University of Posts and Telecommunications),
and Rong N. Chang (IBM T.J. Watson Research Center)

Session 7: Cloud and Data Services

Cloud-Based Framework for Scalable and Real-Time Multi-Robot SLAM ........................................ 147
Pengfei Zhang (National University of Defense Technology), Huaimin
Wang (National University of Defense Technology), Bo Ding (National
University of Defense Technology), and Suning Shang (National
University of Defense Technology)

Seamless Integration of Cloud and Edge with a Service-Based Approach ........................................ 155
Shouli Zhang (Tianjin University), Chen Liu (North China University of
Technology), Yanbo Han (North China University of Technology), and
Xiaohong Li (Tianjin University)

Quality Based Data Integration for Enriching User Data Sources in Service Lakes .......................... 163
Hiba Alili (Paris Dauphine University and University of Manouba),
Khalid Belhajjame (Paris Dauphine University), Rim Drira (University
of Manouba), Daniela Grigori (Paris Dauphine University), and Henda
Hajjami Ben Ghezala (University of Manouba)
Session 8: Recommender Services and Security and Privacy

FMSR: A Fairness-Aware Mobile Service Recommendation Method .................................................. 171
Qiliang Zhu (Beijing University of Posts and Telecommunications), Ao Zhou (Beijing University of Posts and Telecommunications), Qibo Sun (Beijing University of Posts and Telecommunications), Shangguang Wang (Beijing University of Posts and Telecommunications), and Fangchun Yang (Beijing University of Posts and Telecommunications)

Clothes Collocation Recommendations by Compatibility Learning .................................................. 179
Haijun Zhang (Harbin Institute of Technology), Wang Huang (Harbin Institute of Technology), Linlin Liu (Harbin Institute of Technology), and Xiaofei Xu (Harbin Institute of Technology)

IFTM - Unsupervised Anomaly Detection for Virtualized Network Function Services ........................ 187
Florian Schmidt (TU Berlin), Anton Gulenko (TU Berlin), Marcel Wallschläger (TU Berlin), Alexander Acker (TU Berlin), Vincent Hennig (TU Berlin), Feng Liu (Huawei Technologies), and Odej Kao (TU Berlin)

Workshop Papers

Session 1: Applications, Data Service and Service Architecture

Enhanced Web Application and Browsing Performance through Service-Worker Infusion Framework ................................................................. 195
Neha Pande (Samsung R&D Institute Bangalore), Aayushi Somani (Samsung R&D Institute Bangalore), Siba Prasad Samal (Samsung R&D Institute Bangalore), and Vasu Kakkirala (Samsung R&D Institute Bangalore)

Configurable Event Correlation for Process Discovery from Object-Centric Event Data ....................... 203
Guangming Li (Eindhoven University of Technology), Renata Medeiros de Carvalho (Eindhoven University of Technology), and Wil M.P. van der Aalst (RWTH Aachen University)

Functionality-Oriented Microservice Extraction Based on Execution Trace Clustering ............................ 211
Wuxia Jin (Xi’an Jiaotong University), Ting Liu (Xi’an Jiaotong University), Qinghua Zheng (Xi’an Jiaotong University), Di Cui (Xi’an Jiaotong University), and Yuanfang Cai (Drexel University)

Subscription or Pay-as-You-Go: Optimally Purchasing IaaS Instances in Public Clouds ....................... 219
Shengsong Yang (Shandong University), Li Pan (Shandong University), Qingyang Wang (Louisiana State University), Shijun Liu (Shandong University), and Shuo Zhang (Shandong University)

Session 2: Web Services Composition, Applications, Data Services

Performance Analysis of Service Clouds Serving Composite Service Application Jobs .......................... 227
Xuilin Li (Shandong University), Shijun Liu (Shandong University), Li Pan (Shandong University), Yuliang Shi (Shandong University), and Xiangxu Meng (Shandong University)
NL2API: A Framework for Bootstrapping Service Recommendation Using Natural Language Queries ......................................................... 235
Chen Lin (North Carolina State University), Anup Kalia (IBM T.J. Watson Research Center), Jin Xiao (IBM T.J. Watson Research Center), Maja Vukovic (IBM T.J. Watson Research Center), and Nikos Anerousis (IBM T.J. Watson Research Center)

A Sequential Recommendation for Mobile Apps: What Will User Click Next App? ....................... 243
Chaoyi Pu (Nanjing University of Finance and Economics), Zhiang Wu (Nanjing University of Finance and Economics), Hui Chen (Jiangsu Best Tone Information Service Co. Ltd.), Kai Xu (Jiangsu Best Tone Information Service Co. Ltd.), and Jie Cao (Nanjing University of Finance and Economics)

PFS: A Personalized Flight Recommendation Service via Cross-Domain Triadic Factorization ........ 249
Jian Cao (Shanghai Jiaotong University), Yuchang Xu (Shanghai Jiaotong University), Huisi Ou (Shanghai Jiaotong University), Yudong Tan (Ctrip Ltd Company), and Quanwu Xiao (Ctrip Ltd Company)

Hitting Three Birds with One System: A Voice-Based CAPTCHA for the Modern User ............. 257
Muhammad Shah (Carnegie Mellon University) and Khaled Harras (Carnegie Mellon University)

Session 3: Big Data Services, Cloud Services, and Quality of Service

A Web Service for Author Name Disambiguation in Scholarly Databases ............................. 265
Kunho Kim (Pennsylvania State University), Athar Sefid (Pennsylvania State University), Bruce A. Weinberg (Ohio State University), and C. Lee Giles (Pennsylvania State University)

Domino: Graph Processing Services on Energy-Efficient Hardware Accelerator ...................... 274
Chongchong Xu (University of Science and Technology of China), Chao Wang (University of Science and Technology of China), Lei Gong (University of Science and Technology of China), Lhui Jin (University of Science and Technology of China), Xi Li (University of Science and Technology of China), and Xuehai Zhou (University of Science and Technology of China)

Session 4: Security and Privacy, Recommender Systems, and Cloud Services

Semantic-Based Information Sharing in Vehicular Networks .................................................. 282
Himlun Bista (University of Texas at Dallas), I-Ling Yen (University of Texas at Dallas), Farokh Bastani (University of Texas at Dallas), Martin Mueller (Texas Instruments Corporation), and Darnell Moore (Texas Instruments Corporation)

(WIP) Correlation-Driven Service Event Routing for Predictive Industrial Maintenance .......... 290
Meiling Zhu (Tianjin University), Chen Liu (North China University of Technology), Shouli Zhang (Tianjin University), and Yanbo Han (North China University of Technology)
Work-in-Progress Papers

Session 1: Applications and Big Data and Cloud Services

A Truthful Mechanism for Scheduling and Pricing Pleasingly Parallel Jobs in a Service Cloud ... 294
Bingbing Zheng (Shandong University), Li Pan (Shandong University),
Dong Yuan (University of Sydney), and Shijun Liu (Shandong University)

CommuteShare: A Ridesharing Service for Daily Commuters Using Cross-Domain Urban Big Data ... 298
Xiaoliang Fan (Xiamen University), Chang Xu (Xiamen University), Fang Tang (Industrial Bank Co. Ltd.), Jianzhong Qi (University of Melbourne), Xiao Liu (Deakin University), Longbiao Chen (Xiamen University), and Cheng Wang (Xiamen University)

A Probabilistic Model for Service Clustering - Jointly Using Service Invocation and Service Characteristics ... 302
Dongxiao He (Tianjin University), Xue Yang (Tianjin University),
Zhiyong Feng (Tianjin University), Shizhan Chen (Tianjin University),
Keman Huang (Massachusetts Institute of Technology), Zhenzhu Wang (Tianjin University), and Françoise Fogelman-Soulié (Tianjin University)

Microservice Based Video Cloud Platform with Performance-Aware Service Path Selection ... 306
Haitao Zhang (Beijing University of Posts and Telecommunications),
Ning Yang (Beijing University of Posts and Telecommunications),
Zhengjun Xu (Beijing University of Posts and Telecommunications),
Bingchang Tang (Beijing University of Posts and Telecommunications), and Huadong Ma (Beijing University of Posts and Telecommunications)

Session 2: Data and IoT Services

Schema Slicing Methods to Reduce Development Costs of WSDL-Based Web Services ... 310
Wei Zang (Thumbtack Inc.) and Robert A. van Engelen (Florida State University and Genivia Inc.)

When to Invoke a Prediction Service? A Reinforcement Learning-Based Approach ... 315
Yuchang Xu (Shanghai Jiao Tong University), Jian Cao (Shanghai Jiao Tong University), Tao Liu (Shanghai Jiao Tong University), Yudong Tan (Ctrip Ltd. Company), and Quanwu Xiao (Ctrip Ltd. Company)

HPC2-ARS: An Architecture for Real-Time Analytic of Big Data Streams ... 319
Yingchao Cheng (Guangdong University of Technology), Zhiyong Hao (Foshan University), Ruichu Cai (Guangdong University of Technology), and Wen Wen (Guangdong University of Technology)

A Service-Based Fog Execution Environment for the IoT-Aware Business Process Applications ... 323
Yongyang Cheng (Beijing University of Posts and Telecommunications),
Shuai Zhao (Beijing University of Posts and Telecommunications),
Bo Cheng (Beijing University of Posts and Telecommunications), and
Junliang Chen (Beijing University of Posts and Telecommunications)
Session 3: Applications and Data, Recommender and Cloud Services

A Web Service to Generate Intelligent Previews of Web Links .................................................. 327
   Amit Sarkar (Samsung R&D Institute Bangalore) and Joy Bose (Samsung R&D Institute Bangalore)

Web Services for Emergencies: Multi-Transport, Multi-Cloud, Multi-Role ........................................ 331
   Derek Jacoby (QVirt Labs), Nico Preston (University of Victoria),
   Madhav Malhotra (University of Victoria), and Yvonne Coady (University of Victoria)

I Like Your Tagged Photos, But Do We Know Each Other?: Analyzing the Role of Tags in Like Networks ................................................................. 335
   Hyekyoung Park (Hanyang University), Junho Song (Hanyang University),
   Kyungsik Han (Ajou University), and Sang-Wook Kim (Hanyang University)

An Efficient Distributed-Computing Framework for Association-Rule-Based Recommendation ............... 339
   Changsheng Li (Nanjing University of Finance and Economics), Weichao Liang (Nanjing University of Science and Technology), Zhiang Wu (Nanjing University of Finance and Economics), and Jie Cao (Nanjing University of Finance and Economics)

A User-Oriented Approach toward Price Prediction for IaaS Service .............................................. 343
   Jie Zhang (Nanjing Normal University), Jian Xie (Nanjing University of Aeronautics and Astronautics), and Min Yuan (Nanjing Normal University)

Session 4: IoT Services, Recommender Services and Service Composition

Discovering Spatio-Temporal Relationships among IoT Services ...................................................... 347
   Bing Huang (University of Sydney), Athman Bouguettaya (University of Sydney), and Azadeh Ghari Neiat (University of Sydney)

Improving Service Recommendation by Alleviating the Sparsity with a Novel Ontology-Based Clustering .................................................................................. 351
   Rupasingha A. H. M. Rupasingha (University of Aizu) and Incheon Paik (University of Aizu)

Service Selection for Composition in Mobile Edge Computing Systems ........................................... 355
   Hongyue Wu (Zhejiang University), Shuiguang Deng (Zhejiang University), Wei Li (University of Sydney), Min Fu (Alibaba Group),
   Jianwei Yin (Zhejiang University), and Albert Y. Zomaya (University of Sydney)

Trust in Social-Sensor Cloud Service ................................................................................................. 359
   Tooba Aamir (RMIT University), Hai Dong (RMIT University), and Athman Bouguettaya (University of Sydney)
Session 5: Security and Privacy, Semantic Web Services and Service Architecture

Extinguishing the Backfire Effect: Using Emotions in Online Social Collaborative Argumentation for Fact Checking ................................................................................................................. 363
   Ricky Sethi (Fitchburg State University) and Raghuram Rangaraju
   (Fitchburg State University)

Adaptive Cache Replacement in Efficiently Querying Semantic Big Data ................................................................. 367
   Usman Akhtar (Kyung Hee University) and Sungyoung Lee (Kyung Hee University)

On Integrating Knowledge Graph Embedding into SPARQL Query Processing .................................................. 371
   Hyunjoong Kang (Electronics and Telecommunications Research Institute), Sanghyun Hong (University of Maryland), Kookjin Lee (University of Maryland), Noseong Park (University of North Carolina), and Soonhyun Kwon (Electronics and Telecommunications Research Institute)

High Performance Visual Inspection Service Architecture - Squeezing the Most Out of Commodity Servers ......................................................................................................................... 375
   Guoqiang Hu (IBM China Research Lab), Peng Ji (IBM China Research Lab), Jun Zhu (IBM China Development Lab), Zhe Yan (IBM China Development Lab), and Lei He (IBM China Development Lab)

Pipekit: A Deployment Tool with Advanced Scheduling and Inter-Service Communication for Multi-Tier Applications ........................................................................................................... 379
   Pablo Chico de Guzmán (IMDEA Software), Felipe Gorostiaga (IMDEA Software), and César Sánchez (IMDEA Software)

Author Index .......................................................................................................................................................... 383
