Message from the IITSI 2009
Symposium Chairs

The 2009 International Symposium on Intelligent Information Technology and Security Informatics (IITSI 2009) is the second in an annual series. The first was in Adelaide, Australia, in January 2008.

In today’s globally competitive environment, advanced effective intelligent information technologies have allowed new opportunities for users to be intensely connected. They interweave tightly with our private and public communications, interactions, and transactions, and they inadvertently form an intricate infrastructure for critical social and institutional functions such as commerce, banking and finance, utilities, national defense, education, entertainment, and many more useful applications.

Welcome to IITSI 2009 and to Moscow, Russia. This symposium is cosponsored by Peoples’ Friendship University of Russia, Russia; Guangdong University of Business Studies, China; National Chung Hsing University, Taiwan; Shanghai Institute of Electronics, China; Jiaxing University, China; and Hunan University, China. Much work went into preparing a program of high quality. We received 120 submissions, every paper was reviewed by two program committee members or three reviewers, and 40 papers are selected as regular papers, representing a 40% acceptance rate.

The purpose of IITSI 2009 is to bring together researchers and practitioners from academia, industry, and government to exchange their research ideas and results and to discuss the state of the art in the areas of the symposium. In addition, as the workshop of the International Symposium on Information Science and Engineering 2008 (ISISE 2008), participants in the main conference will hear from renowned keynote speakers IEEE and IET Fellow Prof. Chin-Chen Chang from National Chung Hsing University, Taiwan; IEEE Fellow Prof. Jiebo Luo, Kodak Research Laboratories, USA; and Chair of the IEEE Shanghai Section Prof. Junfa Mao from Shanghai Jiao Tong University, China.

We would like to thank the program chairs, organization staff, and the members of the program committees for their hard work. We hope that IITSI 2009 will be successful and enjoyable to all participants. We also thank Mr. Randall Bilof for his wonderful editorial services on this proceedings.

We wish each of you successful deliberations, stimulating discussions, new friendships and all of the enjoyment Moscow, Russia, can offer you. While this is a truly remarkable symposium, there is more yet to come. We look forward to seeing all of you next year at IITSI 2010.

Fei Yu, Guangxue Yue
