Welcome Message from the International Workshop Organizers

WAIS 2014

It is our great pleasure to welcome you for the 8th International Workshop on Advances in Information Security (WAIS 2014). The workshop is held in conjunction with the 8th International Conference on Innovative Mobile and Internet Services in Ubiquitous Computing (IMIS 2014) from July 2 to July 4, 2013 at Birmingham City University, Birmingham, UK.

As computing systems have begun to pervade every aspect of daily life, people need to be able to trust them — so much of their lives depend on them. Today, many of these systems are far too vulnerable to cyber attacks that can inhibit their operation, corrupt valuable data, or expose private information. Future systems will include sensors and computers everywhere, exacerbating the attainment of security and privacy. Current security practices largely address current and known threats, but there is a need for research to take account of future threats too.

The goal of WAIS 2014 is to bring together computer scientists, industrial engineers and researchers to discuss and exchange experimental or theoretical results, novel designs, work-in-progress, experience, case studies, and trend-setting ideas in the area of Information Security.

We would like to thank all authors for submitting their research works to the workshop and the PC Members for checking the papers carefully.

We look forward to meeting all of you in Birmingham, UK.

WAIS 2014 Workshop Co-Chairs
Leonard Barolli, Fukuoka Institute of Technology (FIT), Japan
Arjan Durresi, Indiana University – Purdue University at Indianapolis (IUPUI), USA
Hiroaki Kikuchi, Meiji University, Japan

WAIS 2014 Workshop PC-Chair
Tesuya Izu, Fujitsu Laboratories of Europe, UK
