Session A11: Information Security & Privacy I

Detecting and Resolving Inconsistencies in Firewalls ........................................... 1
Du Zhang, Lavanya Jujjavarapu and Meiiliu Lu
California State University, Sacramento, USA

Stream Computing for Large-Scale, Multi-Channel Cyber Threat Analytics ........ 8
Douglas Schales (1), Mihai Christodorescu (2), Xin Hu (1), Jiyong Jang (1), Josyula Rao (1), Reiner
Sailer (1), Marc Stoecklin (1), Wietse Venema (1) and Ting Wang (1)
(1) IBM Research, USA
(2) Qualcomm Research, USA

Clinton Dsouza, Gail-Joon Ahn and Marthony Taguinod  
*Arizona State University, USA*

**Deploying Malware Detection Software for Smart Phones** ............................................................... 24  
Bhavani Thuraisingham, Nathan McDaniel and Latifur Khan  
*The University of Texas at Dallas, USA*

**Session A12: Software Design, Testing and Reuse**

**Test Logic Reuse Through Unit Test Patterns: A Test Automation Framework for Software Product Lines** .................................................................................................................. 28  
Glauco Silva Neves and Patricia Vilain  
*Universidade Federal de Santa Catarina, Florianópolis, SC, Brazil*

**From Requirements to Software Design: An Automated Solution for Packaging Software Classes** ..... 36  
Yasaman Amannejad, Mohammad Moshipour, Behrouz H. Far and Reda Alhajj  
*University of Calgary, Canada*

**Ontology-based User Requirements Decomposition for Component Selection for Highly Available Systems** ............................................................................................................................ 44  
Mahin Abbasipour (1), Margarete Sackmann (1), Ferhat Khendek (1) and Maria Toeroe (2)  
(1) *Concordia University, Montreal, Canada*  
(2) *Ericsson Inc., Montreal, Canada*

**Specification-Based Testing with Buchi Automata: Transition Coverage Criteria and Property Refinement** ............................................................................................................................. 52  
Li Tan and Bolong Zeng  
*Washington State University, USA*

**Session A13W: First Workshop on Social Network Security (SocialSec 2014)**

**Consumer-Centric Protection for Online Social Networks** ................................................................. 62  
Raja Naeem Akram, Ryan K. L. Ko, and Tsz Fung Law  
*University of Waikato, Hamilton, New Zealand*

**A Study of ClickJacking Worm Propagation in Online Social Networks** ........................................... 68  
Mohammad Reza Faghani and Uyen Trang Nguyen  
*York University, Toronto, Canada*

**Detecting Unintentional Information Leakage in Social Media News Comments** ............................... 74  
Inbal Yahav, David Schwartz and Gahl Silverman  
*Bar-Ilan University, Israel*

**Session A14W: WICSOC 2014: Social Media, Crowdsourcing, and Public Health**

**A Framework for Comparing Early Warning Systems across Domains: A Step Toward a Data-Integrated Public Health EWS** .................................................................................. 80  
Henry Kim (1), Marek Laskowski (1), Seyed Moghadas (1), Amirehsan Sajad (1) and Maaz Asif (2)  
(1) *York University, Toronto, Canada*  
(2) *Queen’s University, Toronto, Canada*

**Much more to it: The relation between Facebook usage and self-esteem** ........................................... 87  
Montather Faraon and Mauri Kaipainen
Text Classification for Automatic Detection of Alcohol Use-Related Tweets: A Feasibility Study ....................................................... 93
Yin Aphinyanaphongs, Bisakha Ray, Alexander Statnikov and Paul Krebs
NYU Langone Medical Center, USA

Towards Chronic Emergency Response Communities for Anaphylaxis .................................................................................. 98
David Schwartz (1), Abdelouahab Bellou (2), Luis Garcia-Castrillo (3), Antonella Muraro (4) and Nikolaos Papadopoulos (5)
(1) Bar-Ilan University, Israel
(2) University Rennes 1, Rennes, France
(3) Hospital Universitario Marques de Valdecilla, Cantabria, Spain
(4) Padua General University Hospital, Padua, Italy
(5) The University of Manchester, United Kingdom

Leveraging Online Social Media for Capturing Observations of Daily Living and Ecological Momentary Assessment ......................................................................................................................... 104
Mohd Anwar
North Carolina A&T State University, USA

Session A21: Information Security & Privacy II

Detect Phishing by Checking Content Consistency .................................................................................................................. 109
Yi-Shin Chen (1), Huei-Xin Liu (1), Yi-Hsuan Yu (1) and Pang-Chieh Wang (2)
(1) National Tsing Hua University, Taiwan
(2) Industrial Technology Research Institute, Taiwan

DiCoTraM: A Distributed and Coordinated DDoS flooding attack tailored Traffic Monitoring .................................................. 120
Saman Taghavi Zargar, James Joshi and David Tipper
University of Pittsburgh, USA

Access Control Reinforcement over Searchable Encryption ................................................................................................... 130
Abdellah Kaci and Thouraya Bouabana-Tebibel
Ecole nationale Supérieure d'Informatique, Alger, Algeria

LEAF: A Social Network-based Intervention Tool for IPV Survivors ......................................................................................... 138
Balaji Palanisamy, Sheldon Sensenig, James Joshi and Rose Constantino
University of Pittsburgh, USA

Session A22: Big Data/Networks & Cloud Computing

Uncertainty reasoning for the "Big Data" Semantic Web ......................................................................................................... 147
Loukia Karanikola (1), Isambo Karali (1) and Sally McClean (2)
(1) University of Athens, Greece
(2) University of Ulster, UK

Semantics Management for Big Networks .............................................................................................................................. 155
Bassem Mokhtar (1) and Mohamed Eltoweissy (2)
(1) Alexandria University, Egypt
(2) Virginia Military Institute, USA

Cloud-based monitoring and analysis of yield efficiency in precision farming ...................................................................... 163
Li Tan and Riley Wortman
Washington State University, USA
SMOPD-C: An Autonomous Vertical Partitioning Technique for Distributed Databases on Cluster Computers
Liangzhe Li and Le Gruenwald
University of Oklahoma, USA

Session A23: Information Reuse & Extraction

Argumentation Schemes for the Reuse of Argumentation Information in Collaborative Risk Management
Ruan C. B. Pozzebon (1), Luis A. L. Silva (1), Lisandra M. Fontoura (1) and John A. Campbell (2)
(1) Universidade Federal de Santa Maria, Brazil
(2) University College London, UK

SOA-GovMM: A Meta Model for a Comprehensive SOA Governance Repository
Jan Königsberger, Stefan Silcher and Bernhard Mitschang
University of Stuttgart, Germany

Towards Facilities to Introduce Solutions for MDE in Development Environments with Reusable Assets
Fabio P. Basso and Claudia M. L. Werner and Toacy C. Oliveira
Federal University of Rio de Janeiro, Brazil

Extracting control-flow from text
Pol Schumacher and Mirjam Minor
D-60325 Frankfurt am Main, Germany

Session A32: Social Networks, Crowdsourcing & Multiagent Systems

Towards Model Driven Crowdsourcing: First Experiments, Methodology and Transformation
Samyr Vale
Federal University of Maranhão, Brazil

Toward Inferring the Age of Twitter Users with their Use of Nonstandard Abbreviations and Lexicon
Nathaniel Moseley (1), Cecilia Ovesdotter Alm (1) and Manjeet Rege (2)
(1) Rochester Institute of Technology, USA
(2) University of St. Thomas, USA

Extracting Top-k Most Influential Nodes by Activity Analysis
Myungcheol Doo (1) and Ling Liu (2)
(1) Applied Research Center, Arris, USA
(2) Georgia Institute of Technology, USA

Detection of Implied Scenarios in Multiagent Systems with Clustering Agents’ Communications
Fatemeh Hendijani Fard and Behrouz H. Far
University of Calgary, Canada

Session A33: Data Analysis, Management & Integration

A value-oriented specification for weak sequencing validation
Thouraya Bouabana-Tebibel (1) and Stuart H. Rubin (2)
(1) Ecole nationale Supérieure d’Informatique, Algiers, Algeria
(2) SPAWAR Systems Center Pacific, San Diego, USA
Optimizing Online Spatial Data Analysis with Sequential Query Patterns .................................................. 253
  Chunqiu Zeng, Hongtai Li, Huibo Wang, Yudong Guang, Chang Liu, Tao Li, Shu-Ching Chen
  and Naphtali Rishe
  Florida International University, USA

Extending Automated Intelligence Systems via Graph Database: A Case Study of the “Meth Hunter” ................................................................. 261
  Mark Blair (1), Yunkai Liu (1) and Theresa Vitolo (2)
  (1) DAGIR Co., USA
  (2) Gannon University, USA

Mapping Specifications for Ranked Hierarchical Trees in Data Integration Systems ...................................... 269
  Sarfaraz Soomro, Andrea Matsunaga and José Fortes
  University of Florida, USA

Session A34W: Information Reuse and Integration in Health Informatics (IRI-HI)

How Ranker and Learner Choice Affects Classification Performance on Noisy Bioinformatics Data .................... 277
  Ahmad Abu Shanab, Taghi Khoshgoftaar, Randall Wald and Amri Napolitano
  Florida Atlantic University, USA

On the analysis of Alzheimer's disease Gene Expression Dataset using Clustering and Association Rule Mining .............................................................. 283
  Benoît Le Quéau, Omair Shafiq and Reda Alhajj
  University of Calgary, Canada

Towards a Technology Roadmap for Big Data Applications in the Healthcare Domain .................................. 291
  Sonja Zillner (1,4), Heiner Oberkampf (1), Claudia Bretschneider (1), Amrapali Zaveri (3),
  Werner Faix (4), Sabrina Neururer (2,5)
  (1) Siemens AG, Munich, Germany
  (2) Innsbruck Medical University, Austria
  (3) University Leipzig, Germany
  (4) Steinbeis University, Berlin, Germany
  (5) University of Innsbruck, Austria

The Effect of Noise Level and Distribution on Classification of Easy Gene Microarray Data ......................... 297
  Randall Wald, Taghi Khoshgoftaar and Ahmad Abu Shanab
  Florida Atlantic University, USA

Session B11: Data Mining and Knowledge Discovery I

Improving the Random Forest Algorithm by Randomly Varying the Size of the Bootstrap Samples .................. 303
  Md Nasim Adnan
  Charles Sturt University, Australia

Stability of Filter- and Wrapper-based Software Metric Selection Techniques ....................................................... 309
  Huanjing Wang (1), Taghi M. Khoshgoftaar (2) and Amri Napolitano (2)
  (1) Western Kentucky University, USA
  (2) Florida Atlantic University, USA

Classification Performance of Three Approaches for Combining Data Sampling and Gene Selection on Bioinformatics Data ........................................ 315
Session B12: AI & Decision Support Systems

Any-Time Knowledge Revision ................................................................. 330
Eric Gregoire
Université d’Artois, France

A method for text-line segmentation for unconstrained Arabic and Persian handwritten text image ............................................................ 338
Reza Shakoori
University of Mumbai, India

Particle Swarm Optimization Protocol for Clustering in Wireless Sensor Networks: A Realistic Approach ......................................................... 345
Riham Elhabyan and Mustapha Yagoub
University of Ottawa, Canada

SEM² Suite - towards a Tool Suite for Supporting Knowledge Management in Situation Awareness Systems ......................................................... 351
Andrea Salfinger(1), Daniel Neidhart(1), Werner Retschitzegger(1), Wieland Schwinger(1) and Stefan Mitsch(2)
(1) Johannes Kepler University Linz, Austria
(2) Carnegie Mellon University, USA

Session B13W: Workshop on Formal Methods Integration (FMi)

Age semantics based State Space Computation of Time Petri Nets ................................................................. 361
Abdelkrim Abdelli
USTHB University, Algeria

Proving that your Dart will Hit the Mark: An Introduction to Dart Contracts ......................................................... 369
Patrice Chalin
Kansas State University, USA

Towards Ray Optics Formalization of Optical Imaging Systems ................................................................. 378
Umair Siddique and Sofiene Tahar
Concordia University, Montreal, Canada

Time properties Verification of UML/MARTE Real-Time Systems ................................................................. 386
Aymen Louati(1,2), Kamel Barkaoui(2) and Chadlia Jerad(1)
(1) Tunis El Manar, Tunisie
(2) Saint-Martin, Paris, France

Advancing WSN Physical Security Adopting TPM-based Architectures ................................................................. 394
Ermanno Battista (1), Mario Barbareschi (1), Antonino Mazzeo (1) and Sridhar Venkatesan (2)

(1) University of Naples Federico II, Italy
(2) George Mason University, USA

A Hardware Accelerator for Data Classification within the Sensing Infrastructure

Mario Barbareschi (1), Ermanno Battista (1), Nicola Mazzocca (1) and Sridhar Venkatesan (2)

(1) University of Naples Federico II, Italy
(2) George Mason University, USA

Investigating the Feasibility of LEAP+ in ZigBee Specification

Mohammad Rezaeirad (1), Sahar Mazloom (1), Muhammad Aamir Iqbal (2), Dmitri Perkins (2) and Magdy Bayoumi (2)

(1) George Mason University, USA
(2) University of Louisiana at Lafayette, USA

A Cluster-based Key Management Framework for Resource Constraint Networks

Mohammad Rezaeirad (1), Sahar Mazloom (1), Mahdi Orooji (2), Dmitri Perkins (3) and Magdy Bayoumi (3)

(1) George Mason University, USA
(2) Case Western Reserve University, USA
(3) University of Louisiana at Lafayette, USA

Session B21: Data Mining and Knowledge Discovery II

Using Incremental Clustering Technique in Collaborative Filtering Data Update

Xiwei Wang and Jun Zhang
University of Kentucky, USA

Improving Software Quality Estimation by Combining Feature Selection Strategies with Sampled Ensemble Learning

Taghi Khoshgoftaar (1), Kehan Gao (2) and Amri Napolitano (1)

(1) Florida Atlantic University, USA
(2) Eastern Connecticut State University, USA

Evaluating Distance Measures and Times Series Clustering for Temporal Patterns Retrieval

Sidahmed Benabderrahmane (1), René Quiniou (1) and Thomas Guyet (2)

(1) INRIA, Rennes, France
(2) IRISA, Rennes, France

Analyzing Immediate Correlations between Baby Names and Pop Culture in North America in the 21st Century

Abra Gurnett, Robin Besson, Omair Shafiq, Reda Alhajj
University of Calgary, Canada

Session B22: Information Security & Privacy III

A Unification of Access Control and Data Services

David Ferraiolo (1), Serban Gavrila (1) and Wayne Jansen (2)

(1) National Institute of Standards and Technology, USA
(2) Bayview Behavioral Consulting, USA

Real-time Anomaly Detection Over VMware Performance Data Using Storm

Mohiuddin Solaimani, Latifur Khan and Bhavani Thuraisingham
A Secure two-party Password-authenticated Key Exchange protocol
Maryam Saeed (1), Hadi Shahriar Shahhoseini (1), Ali Mackvandi (2), Mohammad Reza Rezaeinezhad (2), Mansour Naddafiun (2) and Mohammad Zare Bidoki (2)
(1) Iran University of Science and Technology, Iran
(2) R&D Department of Pishgaman Kavir Yazd Cooperative, Iran

Session B23W: Workshop on Formal Methods Integration (FMI)

Reachability in Hierarchical Machines
Omer Nguena Timo (1), Alexandre Petrenko (1), Arnaud Dury (1) and S Ramesh (2)
(1) Computer Research Institute of Montreal, Canada
(2) GM Global R&D, USA

Formalization and analysis of Timed BPEL
Imed Eddine Chama, Nabil Belala and Djamel Eddine Saïdouni
University Constantine II, Algeria

A Paradigm integration in a specification course
Manuel A. Martins (1), Alexandre Madeira (2), Luis Barbosa (2) and Renato Neves (2)
(1) Univ. Aveiro, Portugal
(2) Univ. Minho, Portugal

A CEGAR Approach for the Reachability Analysis of Hybrid Sequential Function Charts
Johanna Nellen and Erika Abraham
RWTH Aachen University, Germany

Next-Generation Technologies for Preventing Accidental Death of Children Trapped in Parked Vehicles
Vittoria Ai elio (1), Parnian Najafi Borazjani (2), Ermanno Battista (3) and Massimiliano Albanese (2)
(1) R2M Innovations, USA
(2) George Mason University, USA
(3) University of Naples Federico II, Italy

Automatic Evaluation of Medical Doctors' Performances while Using a Cricothyrotomy Simulator
Daniela D' Aurora and Fabio Persia
University of Naples “Federico II”, Italy

A Peer-to-Peer Network Architecture for Emerging Applications
Khondkar Islam
George Mason University, USA

Caruso: Interactive Headphones for a Dynamic 3D Audio Application in the Cultural Heritage Context
Daniela D'Auria, Dario Di Mauro, Davide Maria Calandra and Francesco Cutugno
University of Naples “Federico II”, Italy

Session C11: Data Mining and Knowledge Discovery III
Finding the Most Evident Co-Clusters on Weblog Dataset Using Frequent Super-Sequence Mining
Xinran Yu and Turgay Korkmaz
The University of Texas at San Antonio, USA

Data Integration and Clustering for Real Time Crash Prediction
Elahe Paikari, Mohammad Moshirpour, Reda Alhajj and Behrouz Far
University of Calgary, Canada

Leveraging the Web for Automating Tag Expansion for Low-Content Items
Ayush Singhal and Jaideep Srivastava
University of Minnesota, USA

iSRD: Spam Review Detection with Imbalanced Data Distributions
Hamzah Al Najada and Xingquan Zhu
Florida Atlantic University, USA

Utilizing Concept Correlations for Effective Imbalanced Data Classification
Yilin Yan (1), Yang Liu (1), Mei-Ling Shyu (1) and Min Chen (2)
(1) University of Miami, USA
(2) University of Washington Bothell, USA

Session C12: Knowledge Discovery & Disaster Management

Towards a Refactoring Catalogue for Knowledge Discovery Metamodel
Rafael S. Durelli (1), Daniel San Martin (2), Marcio Eduardo Delamaro (1) and Valter Camargo (2)
(1) Universidade de S~ao Paulo, Brazil
(2) Universidade Federal de S~ao Carlos, Brazil

A Mapping Study on Architecture-Driven Modernization
Rafael S. Durelli (2,3), Daniel San Martin (1), Bruno Marinho (1), Raphael Honda (1),
Marcio Eduardo Delamaro (3), Nicolas Anquetil (2) and Valter Camargo (1)
(1) Universidade Federal de S~ao Carlos, Brazil
(2) INRIA, France
(3) Universidade de S~ao Paulo, Brazil

Generating Textual Storyline to Improve Situation Awareness in Disaster Management
Wubai Zhou, Chao Shen, Tao Li, Shu-Ching Chen and Ning Xie
Florida International University, USA

A Bipartite-Graph Based Approach for Disaster Susceptibility Comparisons among Cities
Wubai Zhou, Chao Shen, Tao Li, Shu-Ching Chen, Ning Xie and Jinpeng Wei
Florida International University, USA

Word Segmentation Refinement by Wikipedia for Textual Entailment
Chuan-Jie Lin and Yu-Cheng Tu
National Taiwan Ocean University, Taiwan

Analysis of Identifying Linguistic Phenomena for Recognizing Inference in Text
Min-Yuh Day and Ya-Jung Wang
Tamkang University, Taiwan
Sense Decomposition from E-HowNet for Word Similarity Measurement ............................................. 613
Cheng-Wei Shih, Yu-Lun Hsieh and Wen-Lian Hsu
Academia Sinica, Taiwan

Peer Review in Online Forums: Classifying Feedback-Sentiment ....................................................... 619
Greg Harris, Anand Panangadan and Viktor Prasanna
University of Southern California, USA

Mining the User Clusters on Facebook Fan Pages Based on Topic and Sentiment Analysis ............... 627
Kuan-Cheng Lin (1), Shih-Hung Wu (1), Liang-Pu Chen (2), Tsun Ku (3), and Gwo-Dong Chen (3)
(1) Chaoyang University of Technology, Taiwan
(2) Institute for Information Industry, Taiwan
(3) National Central University, Taiwan

Sniper: A Framework for Detecting Attack Attempts to Open Source Web Applications at the Run Time .......................................................................................................................... 633
Abdullah Almurayh
University of Colorado at Colorado Springs, USA

CyPhyMASC: Evolutionary Monitoring, Analysis, Sharing and Control Platform for SmartGrid Defense ................................................................................................................................. 639
Mohamed Azab (2,3) and Mohamed Eltoweissy (1,3)
(1) Virginia Military Institute, USA
(2) Alexandria, Egypt
(3) Virginia Tech, USA

THE EVOLUTION OF NETWORK BASED CYBERSECURITY NORMS: An Analytical Narrative ........................................................................................................................................ 646
Atin Basuchoudhary (1) and Nazli Choucri (2)
(1) Virginia Military Institute, USA
(2) Massachusetts Institute of Technology, USA

Session C21: Data Mining and Knowledge Discovery IV

Language Independent Analysis and Classification of Discussion Threads in Coursera MOOC Forums .............................................................................................................................................. 654
Lorenzo A. Rossi (1) and Omprakash Gnawali (2)
(1) University of Southern California, USA
(2) University of Houston, USA

Automatically Predicting the Helpfulness of Online Reviews ...................................................................... 662
Yadong Zhang and Du Zhang
California State University, Sacramento, USA

Aaron Fleming, Luke McDowell and Zane Markel
U.S. Naval Academy, USA

Session C22: Geo/Medical Informatics and Multimedia Systems

Interpreting Medical Tables as Linked Data to Generate Meta-Analysis Reports
Varish Mulwad, Tim Finin and Anupam Joshi
University of Maryland, Baltimore County, USA

Understanding Implicit and Explicit Interface Tools to Perform Visual Analytics Tasks
Dong Hyun Jeong (1), Soo-Yeon Ji (2), Tera Greensmith (3), Byunggu Yu (1) and Remco Chan (4)
(1) University of the District of Columbia, USA
(2) Bowie State University, USA
(3) Simon Fraser University, Canada
(4) Tufts University, USA

The Power of Fear: Facial Emotion Analysis of CEOs to Forecast Firm Performance
Yanjia Sun, Ali Akansu and James Cicon
New Jersey Institute of Technology, USA

Designing a Two-Level Monitoring Method to Detect Network Abnormal Behaviors
Soo-Yeon Ji (1), Seonho Choi (1) and Dong Hyun Jeong (2)
(1) Bowie State University, USA
(2) University of the District of Columbia, USA

Session C23W: The 3rd IEEE International Workshop on Data Integration and Mining (DIM 2014)

A Proximity Measure for Link Prediction in Social User-Item Networks
Chun-Hao Fu, Cheng-Shang Chang and Duan-Shin Lee
National Tsing Hua University, Taiwan

Outlier Detection based on k-Neighborhood MST
Qingsheng Zhu, Xiaogang Fan and Ji Feng
Chongqing University, China

An Ensemble Classification Approach for Handling Spatio-Temporal Drifts in Partially Labeled Data Streams
Tegjyot Singh Sethi, Mehmed Kantardzic, Elaheh Arabmaki and Hanquing Hu
University of Louisville, USA

Understanding Co-evolution in Large Multi-relational Social Networks
Ayush Singhal, Atanu Roy and Jaideep Srivastava
University of Minnesota - Twin Cities, USA

A Sketch-based Conceptual Level Data Integration Methodology
Loredana Caruccio, Vincenzo Deufemia and Giuseppe Polese
University of Salerno, Italy

DataGopher: A context based search engine for research datasets
Ayush Singhal, Ravindra Kasturi and Jaideep Srivastava
University of Minnesota, USA

Session C31: Data Mining and Knowledge Discovery V

Rolling Window Time Series Prediction using MapReduce
Lei Li, Farzad Noorian, Duncan J.M. Moss, Philip H.W. Leong
The University of Sydney, Australia
Correlation-based Re-ranking for Semantic Concept Detection ................................................. 765
Hsin-Yu Ha (1), Fausto C. Fleites (1), Shu-Ching Chen (1) and Min Chen (2)
(1) Florida International University, USA
(2) University of Washington Bothell, USA

Timed Sequential Pattern Mining Based on Confidence in Accumulated Intervals ............. 771
Chichang Jou, Huan-Jyh Shyur and Chih-Yu Yen
Tamkang University, Taiwan

RLS-A Reduced Labeled Samples Approach for Streaming Imbalanced Data with Concept Drift .. 779
Elaheh Arabmakki, Mehmed Kantardzic and Tegjyot Singh Sethi
University of Louisville, USA

Session C32: Fuzzy Systems & Heuristic Optimization

UFOM: Unified Fuzzy Ontology Matching ................................................................. 787
Yinuo Zhang, Anand Panangadan and Viktor Prasanna
University of Southern California, USA

Applying Pareto ant colony optimization to solve bi-objective forest transportation planning problems ................................................................. 795
Pengpeng Lin, Jun Zhang and Marco A Contreras
University of Kentucky, USA

Extending Modern SAT Solvers for Models Enumeration ................................... 803
Said Jabbour, Jerry Lonlac, Lakhdar Sais and Yakoub Salhi
University of Artois, Lens, France

Detecting Geo-spatial Weather Clusters using Dynamic Heuristic Subspaces .......... 811
Suman Deb Roy and Gilad Lotan
Betaworks Studio, USA

Session SP: Poster Session

Bayesian Updating for Time Series Missing Data Discovery and Uncertainty Estimation (TSMDDUE) ................................................................. 819
Sara Aghakhani, Reda Alhajj and Philip Chang
University of Calgary, Canada

UML Activity Diagram To Event-B: A Model Transformation Approach Based on the Institution Theory ................................................................. 823
Amine Achouri and Jemni Ben Ayed Leila
University of Tunis, Tunisia

A Semantic Multi-Modal Information Retrieval Approach based on Linked Data to Multimedia Convergent Environments ........................................ 830
Natasha Correia Queiroz Lino, Claurton Siebra and Manoel De Albuquerque Lira Amaro
Federal University of Paraiba, Joao Pessoa, Brazil

Rotation Invariant Face Recognition Survey .................................................. 835
Gabriel Castañeda, Taghi Khoshgoftaar and Randall Wald
Florida Atlantic University, USA

Using Document Space For Relational Search ................................................. 841
An Extension to the Data-driven Ontology Evaluation ............................... 845
Hlomani Hlomani and Deborah Stacey
University of Guelph, Canada

Using Feature Selection and Classification to Build Effective and Efficient Firewalls ...................... 850
Randall Wald (1), Flavio Villanustre (2), Taghi Khoshgoftaar (1), Richard Zuech (1),
Jarvis Robinson (2) and Edin Muharemagic (2)
(1) Florida Atlantic University, USA
(2) LexisNexis Business Information Solutions, USA

Tire-Road Friction Estimation Utilizing Smartphones ........................................ 855
Michael Jaynes and Ram Dantu
University of North Texas, USA

Who Wrote This Paper? Learning for Authorship De-identification Using Stylometric Features ...... 859
Jose Hurtado, Napat Taweewitchakreeya and Xingquan Zhu
Florida Atlantic University, USA

Automatically Classifying and Interpreting Polar Datasets with Apache Tika ................................. 863
Ann Burgess (1) and Chris Mattmann (2)
(1) University of Southern California, USA
(2) California Institute of Technology, USA

Kalman-Filter Algorithm and PMUs for State Estimation of Distribution Networks ...................... 868
Faridoon Shabani, Mohammad Vaziri, Mahdi Amini, Mahyar Zarghami and Suresh Vadhva
California State University, Sacramento, USA

Reuse and Integration of Healthcare Information for Subjects in a Clinical Trial for Treatment of
Recurrent Respiratory Papillomatosis ................................................................. 874
Anatoly Goldstein
Massachusetts General Hospital Center for Laryngeal Surgery and Voice Rehabilitation, USA

Author Index ........................................................................................................ 881
