Message from the ISCSCT 2008 Symposium Chairs

It may be said that modern information technology rests on three technology pillars: semiconductor technology, communications technology, and information processing technology. During the past two decades there have been tremendous advances in all three pillars and their unrelenting convergence that have brought us significantly closer to the realization of the long-envisioned dream of an information society in which anyone can access the cumulative knowledge of mankind inexpensively from anywhere at any time, namely that of a ubiquitous information age. The 2008 International Symposium on Computer Science and Computational Technology will bring together researchers from academia and industry, who are interested in the emergent field of information processing. We are soliciting papers that present recent results, as well as more speculative presentations that discuss research challenges, define new applications, and propose methodologies for evaluating and the roadmap for achieving the vision of information processing.

Welcome to ISCSCT 2008. Welcome to Shanghai, China, 20-22, Dec. 2008. International Symposium on Computer Science and Computational Technology (ISCSCT 2008) is co-sponsored by Peoples’ Friendship University of Russia, Russia, Shanghai Institute of Electronics, China, Guangdong University of Business Studies, National Chung Hsing University, Taiwan, Jiaxing University, China, Hunan University, China. Much work went into preparing a program of high quality. We received 1250 papers, every paper was reviewed by 3 program committee members, 400 papers are selected as regular papers, representing a 32% acceptance rate for regular papers. And 150 papers are accepted as poster papers in the workshop of ISCSCT 2008.

The purpose of ISCSCT 2008 is to bring together researchers and practitioners from academia, industry, and government to exchange their research ideas and results and to discuss the state of the art in the areas of the symposium. In addition, the participants of the workshop will have a chance to hear from renowned keynote speakers.

We would like to thank the program chairs, organization staff, and the members of the program committees for their hard work. We hope that ISCSCT 2008 will be successful and enjoyable to all participants.

We thank Mr. Patrick Kellenberger for her wonderful editorial service to this proceeding. We wish each of you successful deliberations, stimulating discussions, new friendships and all enjoyment Shanghai, China can offer you. While this is a truly remarkable Symposium, there is more yet to come. We look forward to seeing all of you next year at the ISCSCT 2009.
