**2008 International Symposium on Computer Science and Computational Technology**  
**ISCSCT 2008**  
**Table of Contents**  
**Volume - 2**

**Message from the Symposium Chairs - Volume 2** ..........................................................xvi  
**Organizing Committee - Volume 2** ..................................................................................xvii  
**Committee Members - Volume 2** ....................................................................................xviii  

**ISCSCT 2008 Paper Session - Volume 2**

- Normative Modeling for Personalized Clinical Pathway Using Organizational Semiotics Methods.............................................................3  
  - Weizi Li, Kecheng Liu, Shuzhang Li, and Hongqiao Yang  
- Computer Aided Analysis of Bifurcation of a Spatial Dynamical System .............................................................8  
  - Wang Lin and Zhongyue Li  
- A New Method for Modulation Classification Based on Bootstrap Technique .................................................................11  
  - Feng Wang and Bing-bing Li  
- A Secure Web Services Model Based on the Combination of SOAP Registration Info and Token Proxy .........................................................15  
  - Youxiang Duan, Yongtang Bao, Lijiang Pan, Beibei Yan, Jiuyun Xun, and Nianyun Shi  
- Normalization for Removing Code Variations in Modular Programs .........................................................................................21  
  - Tiantian Wang, Xiaohong Su, and Peijun Ma  
- The Classification Diagram of Character Identification in Several Different and Similar Structures of Time Series ................................................................25  
  - Junhai Ma, Peiling Xiao, and Zhiqiang Wang  
- Touched Human Object Segmentation Based on Mean Shift Algorithm ...................................................................................29  
  - Guo Sen, Liu Wei, and Wang JingHua  
- R-Binder: Application of Using Service Binder in R-OSGi .................................................................................................34  
  - ZhiYu Feng and LinPeng Huang  
- A Simple and Efficient Edge Detection Algorithm .............................................................................................................40  
  - Guangyu Luan and Rensheng Che
Detection of Non-iris Region in the Iris Recognition .................................................................45
   Zhongliang Luo and Tusheng Lin
Barrier Coverage of Wireless Sensor Networks Based on Clifford Algebra ..........................49
   Wenming Cao and Tiancheng He
A P2P Traffic Classification Method Based on SVM .................................................................53
   Zhou Xusheng
Research of Graph-Based Workflow Access Control ...............................................................58
   Yonghe Wei and Chunjing Shi
Study on Integrated Intelligent Control with Hierarchical Structure .......................................63
   Wang Wu and Wang Hong-ling
A Data Mining Application in Stellar Spectra .............................................................................66
   Bin Jiang, Jing Chang Pan, Zhen Ping Yi, and Qiang Guo
Influence Law of Pedestrian WAD in Vehicle/Pedestrian Collisions .......................................70
   Yanhui Fan and Hongguo Xu
Analysis and Improvement of Scheduling Algorithms Based on (m, k)-Firm Constraint ..........74
   Lanying Li and Yu Tan
Research on Face Detection Classifier Using an Improved Adboost Algorithm ......................78
   Liuxia lisu
An Adaptive Development Framework for Web-Based Enterprise Information System ............82
   Liu Xudong, Xu XiaoFei, Zhan Dechen, and Qiao Limin
A Simpler Framework Based on the Applied Pi Calculus and Its Application to Electronic Cash Protocol ..................................................................................................................................................87
   Xiaojuan Cai and Yuxin Deng
Seamless LBS Based on the Integration of WSN and GPS ..........................................................91
   Dejun Zou, Zhongliang Deng, Lianming Xu, and Weizheng Ren
Multi-agent Based Distributed Video Surveillance System over IP ..........................................97
   Wu Chao and Xin Ming Jun
A Bitmap Compression Algorithm for Vertical Association Rules Mining ...............................101
   Liu Yang and Mei Qiao
An Optimized Parallel FFT Algorithm on Multiprocessors with Cache Technology in Linux ..................................................................................................................................................................................105
   Jun Tan, Xingshu Chen, and Long Xiao
Extending Sliding-Window Semantics over Data Streams .........................................................110
   Leisong Chen and Guoping Lin
Research on a Behavior-Based Software Test Process Model ...............................................114
   Yongzhong Lu, Sinmeng Da, Jun Yang, Junli Song, and Songlin Nie
Development of a Computerized Method to Inspect Empty Glass Bottle ...............................118
   Huan-jun Liu and Yao-nan Wang
Applying Data Fusion in Collaborative Alerts Correlation ......................................................124
   Xin Zhuang, Debao Xiao, Xuejiao Liu, and Yugang Zhang
Application and Research of Numerical Integration in Cloth Simulation ...............................128
   Yan Jiang and Zhengdong Liu
A New Approach of Extended Chirp Scaling Algorithm for High Squint Missile-Borne SAR Data Processing ............................133
Zhou Qiang, Qu Chang-wen, Su Feng, and Wang Ying
A CT/MRI Image Fusion Algorithm Combined Non-separable Wavelet Transform and Regional Priority .............................137
Ge Wen, Gao Li-qun, and Ge Wen
Superresolution Reconstruction of Multiframe Images Using Regularization with a Quadratic Form Observation Model ..................141
Yajuan Wu, Minghui Wang, Xiaofeng Liu, and Yi Zhan
Single-View’s 3D Explanation Based on Prior Knowledge and Constraint Satisfaction .................................................................146
Wei Zhang and Hui Wei
Research on Information Fusion on Evaluation of Driver Fatigue ..................................................151
Zhang Jun, Zhu Zhong-xiang, Song Zheng-he, and Mao En-rong
Sensor Scheduling for Target Tracking in a Wireless Sensor Network Using Modified Particle Swarm Optimization .....................156
Feng Mingyue, Yi Xianqing, Li Guohui, Du Zhanshuai, and Wang Xiangneng
Hiding Information in Java Class File ..................................................................................160
Daofu Gong, Fenlin Liu, Bin Lu, Ping Wang, and Lan Ding
Modeling Object-Oriented Framework with Z ........................................................................165
Tiange Zhang, Xiaochun Xiao, and Leqiu Qian
Model of Network Traffic Based on Network Applications and Network Users ..........................................................171
Peng Liu, Fang Liu, and Zhenming Lei
Hierarchical Fuzzy Trust Management for Customer-to-Customer in Peer-to-Peer eCommerce ..................................................175
Huaiqing Lin, Zhitang Li, Yejiang Zhang, and Chuiwei Lu
Analysis and Representation on Workshop-Oriented Domain Ontology ........................................180
Chunjing Shi, YongXian Liu, and YongPing Hao
Research and Simulation Analysis of Improved Dual-clocking Algorithm in EPON ................................................186
Aihan Yin and Peizhou Zhang
The Design of a Low-Power Asynchronous DES Coprocessor for Sensor Network Encryption ..................................................190
Yijun Liu, Pinghua Chen, Guobo Xie, Zhusong Liu, and Zhenkun Li
Chinese Sign Language Recognition for a Vision-Based Multi-features Classifier ..................................................194
Yang Quan and Peng Jinye
Partial Relevance Feedback for 3D Model Retrieval .........................................................................198
Hu Baokun, Liu Yusheng, Gao Shuming, and Hu Jing
A New Algorithm for Solving the Complex Nonlinear Ecosystem ........................................202
Yezhi Lin and Weiming Wang
A Color Correction Algorithm of Multi-view Video Based on Depth Segmentation ..........................206
Yue Fei, Mei Yu, Feng Shao, and Gangyi Jiang
Specification of Agent in Complex Adaptive System ...................................................................210
Ren Chuanjun, Huang Hongbing, and Jin Shiyao
A Text Digital Watermarking for Chinese Word Document ......................................................... 217  
Liu Jin’An, He Lu, Fang DingYi, and Gui XiaoLin

SIM-Array: A Flexible Storage System Simulator ................................................................. 221  
Zhang Xiao, Zhao Xiao-Nan, and Chen Jian-Quan

The Platform of Quick Development of Mobile 3D Game .................................................. 226  
Zhao Jieyi, Tang Min, Tong Ruofeng, and Dong Jinxiang

3D Surface Texture Synthesis Based on Wavelet Transform ............................................. 230  
Muwei Jian, Shuan Liu, and Junyu Dong

A Novel Fingerprint Bifurcation Extraction Algorithm Based on Neural Network  
Template Matching .............................................................................................................. 234  
Jianwei Leng, Jiantun Ni, and Jing Luo

Combined Application of EMTDC and Simulink for Hybrid Simulation of IPS ................. 238  
Feng Ji, Lijun Fu, and Hongwei Zhu

A New Controlled Commutation Strategies for Matrix Converter ................................... 242  
Lv Hao, Nie Ziling, and Zhihao Ye

A Genetic Algorithm for Solving RCPSP .............................................................................. 246  
Hua Zhang, Hao Xu, and Wuliang Peng

An ACO for Solving RCPSP ................................................................................................ 250  
Li Zhou, Dong Wang, and Wuliang Peng

A New Approach to Fast Multiple Reference Frame Motion Estimation for H.264 ............ 254  
Shufang Zhang, Yanling Wang, Jinhua Kang, and Hua Li

Research and Development of MFNS Software Based on Software Engineering ............... 259  
D.D. You, W.F. Li, and M. Shao

Face Recognition Based on Local Feature Analysis .......................................................... 264  
Zhi-ming Qian, Peng-yu Su, and Dan Xu

Research and Implementation of Signal Control Simulation for a Single Intersection  
Based on 3DS MAX ............................................................................................................. 268  
Wen-bo Wang

Simulation of FlexRay Communication Using C Language ................................................. 272  
Chuanxuan Xu and Yong Zhang

Research on Handover in Hierarchical Mobile IPv6 Based on the Fast DAD  
Mechanism in Visual Domain .............................................................................................. 277  
Zheming Li, Ling Li, and Yulan Huang

The Dimensionality Reduction of Feature Vectors by Generalized Cross Product ............ 281  
Wei Jinwen, Chen Yanling, and Guo Junjie

Research on Organizational-Level Software Process Improvement Model and Its  
Implementation .................................................................................................................. 285  
Yan Xiaoguang, Wang Xiaogang, Luo Linpin, and Chen Zhuoning

A Simple Global Calibration Method Based on 1D Target for Multi-binocular Vision  
Sensor .................................................................................................................................. 290  
Hong Lei, Zhenzhong Wei, and Guangjun Zhang
Study on Subcarrier and Power Allocation Algorithm for Downlink Transmission in Multiuser OFDM System ......................................................................................................................... 295
   Li Suo-ping, Tian Xiu-feng, and Li Min
Boundary Extraction of Tube-Type Bottle Based on Wavelet Restoration and Mathematical Morphology .................................................................................................................. 299
   Changhua Lu, Xiaokang Deng, Neng Fu, and Chun Liu
Granularity-Wise Separations in Covering Approximation Spaces with Some Approximation Operators ..................................................................................................................... 303
   Xun Ge
Stabilization Control of Networked Control Systems with Long Time Delay .......................................................... 307
   Qixin Zhu, Hongli Liu, Juan Jiang, and Yanping Wang
Research and Implementation of a Reverse Engineering Method for Software Reuse .............................................. 311
   Lan Wang and Anquan Jie
Scene Text Extraction Based on HSL .......................................................................................................................... 315
   Jin-liang Yao, Yi-bo Gao, Liang-jun Ma, and Yi-ping Yang
NGOSS-centric Framework of Telecommunication Electronic Commerce .......................................................... 320
   Tung-Hsiang Chou and Yu-Min Lee
Visualization Study of fKdV Equation Simulation with Matlab .................................................................................. 324
   Zhengren Wu, Mei Liu, Songling Wang, and Youliang Cheng
Infrared Facial Expression Recognition Using Wavelet Transform ............................................................................ 327
   Shangfei Wang, Siliang Lv, and Xufa Wang
Fuzzy Conceptual Information Modeling in UML Data Model .................................................................................... 331
   Z.M. Ma
Shifting from a Computer Game to a Physical Game: A Case Study of ePet .............................................................. 335
   Weihua Tan, Wenjun Li, Xiaocong Zhou, and Xiao-bin Zhang
Red Blood Cell Classification through Depth Map and Surface Feature ........................................................................ 339
   Ruihu Wang and Brendan McCane
An Integrated Approach for DiffServ Multicasting .................................................................................................... 343
   Qian Gao
Novel Text Watermarking Algorithm Based on Chinese Characters Structure ............................................................. 348
   Qing-Cheng Li and Zhen-Hua Dong
Research on E-HUB-Based Manufacturing Resources Integration for SMEs .......................................................... 352
   Bin Wang, Defang Liu, Ning Zhou, and Linzhen Zhou
Research on Product Configuration Model and Expression of Constraints .................................................................. 356
   Zou Jiehui, Du Qingui, and Huang Bingkang
A Web Geographical Information System Applied to Radio Station Information Management ........................................ 360
   Su Li, Zhongming Han, Wenzheng Li, and Runhe Shi
M-commerce Security Solution Based on the 3rd Generation Mobile Communication ............................................. 364
   Pan Tiejun, Zheng Leina, Fang Chengbin, Huang Wenji, and Fang Leilei
Some Characterizations of Wavelets with Composite Dilations .................................................................................. 368
   Guochang Wu and Yadong Zhang

Slot Time Synchronization for TDMA-Based Ad Hoc Networks .............................................................................. 544
Fuqiang Wang, Peng Zeng, and Haibin Yu

Conditional Markov Network Hybrid Classifiers Using on Client Credit Scoring .......................................................... 549
Shuangcheng Wang, Cuiping Leng, and Piqiang Zhang

A 3D Reconstruction System of Indoor Scenes with Rotating Platform .................................................................................. 554
Feng Zhang, Limin Shi, Zhenhui Xu, and Zhanyi Hu

Large Scale Scenes Reconstruction from Multiple Views .................................................................................. 559
Shi Limin, Zhang Feng, Xu Zhenhui, and Hu Zhanyi

Optimization Processing in Quadrilateral Meshes Generation Based on Cloud Data .................................................................................. 564
Wu Lijuan

A Study on the One-Time Pad Scheme Based Stern-Brocot Tree .................................................................................. 568
Jiao Hongqiang, Tian Junfeng, and Wang Baomin

Cracking Cancelable Fingerprint Template of Ratha .............................................................................. 572
Feng Quan, Su Fei, Cai Anni, and Zhao Feifei

The Research and Implementation Research of Mobile Agent Technology in Commercial Data Query System .......................................................... 576
Youqun Shi and Zhongwei Rong

Image Rectification Using Affine Epipolar Geometric Constraint .................................................................................. 582
Sui Liansheng, Zhang Jiulong, and Cui Duwu

Data Stream Grouping Aggregate Algorithms Based on Compound Sliding Window .................................................................................. 589
Yingli Zhong, Jinbao Li, Longjiang Guo, and Yan Yang

Identification of Severe Precipitation Radar Echo Reflectivity with Back-Propagation ANN .............................................................................. 594
Jing Wang, Yuchun Gao, Yi Xiong, Minghu Cheng, and Shuai Zhu

SAR Image Segmentation Method Using DP Mixture Models .................................................................................. 598
Sun Li, Zhang Yanning, Tian Guangjian, and Ma Miao

Multi-view Object Segmentation Based on Epipolar Plane Image Analysis .................................................................................. 602
Liangzhong Fan, Xin Yu, Zhenyu Shu, and Qiaowen Zhang
A Storage Algorithm of Code Parameters in Embedded System Based on Dynamic Programming .......................................................... 606
  Xu Na, Zhang Xiaotong, Zhang Yan, Yuan Lingling, Zhang Lei, and Hu Guolin
Training Samples Selection Method in Intrusion Detection System .......................................................... 610
  Cao Shuyan and Zhang Li
Global Mild Solution for a Chemotaxis-Haptotaxis Model of Tumor Invasion .......................................................... 613
  Mingjun Wang and Minghao Li
Image Auto Coregistration and Interferogram Estimation Using Matrix Fitting .......................................................... 617
  Sen Zhang, Jin-Song Tang, and San-wen Zhu
A Unified Scheme for Fast EZW Coding Algorithm .......................................................... 622
  Huang Minghe and Zhong Cuixiang
A Novel Method for Qualitative Modeling and Simulation Based on XML .......................................................... 627
  Chenxi Shao, Pengfei Chen, Lizhong Wang, and Fangfang Liu
Active Authorization Rules for Enforcing RBAC with Spatial Characteristics .......................................................... 632
  Zhu Tang, Shiguang Ju, and Weihe Chen
A New Dynamic Network Monitoring Based on IA .......................................................... 637
  Wu Fang, Zhao Zhijin, and Ye Xueyi
A Novel Timing Synchronization Method for SC-FDE Systems .......................................................... 641
  Li-xun Huang and Li-jun Sun
An Optimized Chord Algorithm for Accelerating the Query of Hot Resources .......................................................... 644
  Jiajing Li and Xudong Yang
An Algorithm of Offsetting Complex Region Based on AutoCAD .......................................................... 648
  Fei Gao
Promoting Adaptation of Semantic Web Service Composition Using Context Information .......................................................... 652
  Lirong Qiu, Yongcun Cao, Xiaobing Zhao, and Guosheng Yang
A New Face Tracking Algorithm Based on Local Binary Pattern and Skin Color Information .......................................................... 657
  Wang Chuan-xu and Li Zuo-yong
A New Kind of Super-Resolution Reconstruction Algorithm Based on the ICM and the B-spline Interpolation .......................................................... 661
  Xiang-guang Zhang
An Improved Algorithm of Human Skin Detection in Video Image Based on Linear Combination of 2-order Markov and Wiener Predictor .......................................................... 665
  Liu Yun and Wang Chuan-xu
A Layered Service Registry Model in Government Information Resource Governance and Interchange .......................................................... 669
  Jun Liu, Jianzhong Qiao, Shukuan Lin, and Su Ge
AHP Methodology for Partner Selection in Collaborative Design .......................................................... 674
  Junming Hou, Chong Su, and Wanshan Wang
Eucommia Bark Quality Assessment Based on Rough Sets and Perceptron .......................................................... 678
  Tie Wang, Zhiguang Chen, Gaonan Wang, and Jianyang Lin
Energy Analysis Method of Computational Complexity ................................................. 682
Wang Peng
A Mini Arc Recognition Algorithm Based on the Topological Inference ......................... 686
Xiaoyu Song, Bin He, and Yonghui Wang
Stereo Matching Based on Local Invariant Region Identification ..................................... 690
Qian Hu and Zhengqiu Yang
The Research and Design of Log Management System Based on Struts Frame ................ 694
Yue Tian, Xiaobin Li, and Zhengqiu Yang
The Experimental Research on the Method of Integrating AHP with GIS ........................... 698
Ji-ping Liu, Na Zhou, and Yong Wang
Memory Leak Detection in Sun Solaris OS ................................................................. 703
Qinqin Ni, Weizhen Sun, and Sen Ma
Research on Edge Detection and Description of Packaged Grain Image ......................... 708
Ying Lin, Xing-lin Fang, Yue-heng Sun, and Yan-hong Sun
Study for Packaged Granary Grain Quantity Intelligent Reckoning ................................. 712
Ying Lin, Yong Liu, Yueheng Sun, and Yueheng Sun
Adaptive Filter by Using Segment Proportionate Extended Correlation LMS Algorithm in the Double-Talk Condition ................................................................. 716
Rui Chen, Zhifeng E, Jiawen Hu, and Mohammad Reza Asharif
A Dynamic Clustering-Based Algorithm for Wireless Sensor Networks ............................ 720
Limin Meng, Kai Zhou, Jingyu Hua, and Zhijiang Xu
A Reliable Distributed Process Management System ...................................................... 724
Lei Zhang, Xingshu Chen, and Bo Xu
Chinese Partial Parsing with Modal Finite-State Approach ............................................ 729
Yiqiang Zhao, Junfang Zeng, and Yiping Yang
Resemblance Object-Class Relationships in Fuzzy Object-Oriented Databases .................. 734
Z.M. Ma
Towards a Framework of Aspect-Oriented Modeling with UML ..................................... 738
Xiao-cong Zhou, Chang Liu, Yan-tao Niu, and Tai-zong Lai
Research and Implementation of Screen Printing System Based on Hybrid CMP ............... 742
Qing Cheng Li, Liu Yang, Zheng Xuan Bai, and Hai Jun Hu
Research on ASP-Based Information Security System ................................................... 746
Linzhen Zhou, Defang Liu, and Bin Wang
A Formal Description Method for Aspect-Oriented Statechart Based on CSP .................... 750
Bin Wang, Chunhua Zhu, and Jinfang Sheng
Research on Key Technique of Weed Locating Based on Binocular Vision System ............. 754
Zhu Wei-xing, Xia Li-bing, and Xiong Feng
Hand's Skin Detection Based on Ellipse Clustering ...................................................... 758
Hao-kui Tang and Zhi-quan Feng
Research on Features Extraction from Frame Image Sequences ....................................... 762
Zhiquan Feng, Peilin Du, Xiaona Song, Zhengxiang Chen, Ting Xu, and Deliang Zhu
Molecular Dynamics Study of Streptavidin Binding to Surface-Immobilized Biotin ............... 767
Qingbin Li, Sergey Gusarov, and Andriy Kovalenko
Deviation Problem and its Solving .............................................................................................................................771
    Xin Wang, Hui-tong Jia, Yu-lian Ma, and Yu-dong Wang

Using Data Recovery Models for Multi-shift Scheduling in Wireless Sensor Networks ........................................777
    Xu Xu, Yu-Hen Hu, Wei Liu, and Jingping Bi

An Octree Ray Casting Algorithm Based on Multi-core CPUs .................................................................................783
    Gu Jing and Wei Song

Study on a Real-Time Image Object Tracking System .............................................................................................788
    Qiang Wang and Zhanhong Gao

The Evaluation of B2C E-Commerce Web Sites Based on Fuzzy AHP ....................................................................792
    Jun Fei and Lihua Yu

Design and Implementation of a Power System Sensor Network for Wide-Area Measurement ........................................796
    Qi Huang, Shi Jing, Chang-hua Zhang, and Yong Chen

Application of Mobile Agent and Trusted Third Party on Digital Copyright Protecting in E-commerce .........................800
