Chairs’ Welcome Message.......................................................... xxiii
Organization............................................................................. xxiv
Program Committee............................................................... xxvi
Reviewers................................................................................ xxvi

Plenary Abstracts
The Particle Swarm: Individual and Collective Intelligence........................................ xxxv
  James Kennedy

Chance Discovery: Data-Based Decision for Systems Design........................................ xxxvi
  Yukio Ohsawa

Wind-Tunnel Testing for Strategy and Market Design.................................................. xxxvii
  Edward Tsang

Modeling, Control and Filtering of Multi-time-Scale Dynamical Systems
Based on fuzzy Singularly Perturbed Models ................................................................. xxxviii
  Fuchun Sun

Intelligent System Design for Episodic Memory on Mobile Daily Life............................ xxxix
  Sung-Bae Cho

Principle and Methodology of Computer Games of Chinese Chess................................ xl
  Xinhe Xu

Coordination and Self-Organization in MultiAgent Systems........................................ xli
  Gabriel Ciobanu

Artificial Neural Networks
Research of Trustless Deflection Correcting Based on Neural Networks..................... 3
  ShunRen Hu and WeiMin Chen

Mid- and Long Term Hydrologic Forecasting for Drainage Area Based on WNN and FRM........ 7
  Huicheng Zhou, Li Wu, and Yu Guo

Design of Control Structure Schemes and Simulation Research of GPC
Based on NN for Nonlinear System............................................................................. 13
  Dongcai Qu
A New Method to Assist Small Data Set Neural Network Learning .............................................
   Rongfu Mao, Haichao Zhu, Linke Zhang, and Aizhi Chen ............................................................ 17

Uniformly Stability of Impulsive BAM Neural Networks with Delays ..........................................
   Fengjian Yang, Chaolong Zhang, Dongqing Wu, and Xiaojian Hu ................................................. 23

Rapid Training for Self-Organizing Neural Networks with Incremental Learning .......................
   Guojian Cheng, Tianshi Liu, Xiaoxiao Wang, and Quanzhou Huang ............................................. 28

Air Fuel Ratio Identification of Gasoline Engine during Transient Conditions Based on Elman Neural Networks .................................................................................................................. 32
   Zhixiang Hou, Quntai Sen, and Yihu Wu ...................................................................................... 32

Stabilization Analysis of Side-Slope Based on Self-Organizing Feature Map Neural Net............
   Ying Li, Zhihong Qie, Xinmiao Wu, and Zhiyu Zhang .................................................................. 37

Delay Time Identification and Dynamic Characteristics Study on ANN Soft Sensor...................
   Dianlin Du, Chongguang Wu, Xionglin Luo, and Xin Zuo ............................................................. 42

Cycle Slip Detection and Correction of GPS Carrier Phase Based on Wavelet Transform and Neural Network ................................................................................................................. 46
   Tinghua Yi, Hongnan Li, and Guoxin Wang ................................................................................... 46

Novel Data Classification Method Based on Radial Basis Function Networks ..........................
   Xiaorun Li, Guangzhou Zhao, and Liaoying Zhao ....................................................................... 51

Control for Roll Shape in NC Roll Grinder Based on Neural Network ........................................
   Liwen Yan and Tao Yu .................................................................................................................... 57

Modular Neural Network Task Decomposition via Entropic Clustering ....................................
   Jorge M. Santos, Luis Alexandre, and Joaquim Marques de Sá ...................................................... 62

Enlargement of Digital Images by Using Neural Network ...........................................................
   Ren DeXin, Zhao Jiufen, Zhao JiuLing, and Wang ShunHong ...................................................... 68

AAFFC: An Adaptively Automated Five-Class Fingerprint Classification Scheme Using Kohonens Feature Map ........................................................................................................... 72
   T. Srinivasan, S. Shivashankar, V. Archana, and B. Rakesh ............................................................ 72

A Time Adaptive Self-Organizing Map for Segmenting Color Images into Exactly Two Regions ................................................................................................................................. 78
   Hamed Shah-Hosseini ..................................................................................................................... 78

A Novel Neural Network Model of Hysteresis Nonlinearities .....................................................
   Tong Zhao, Sui Shulin, and Du Changhe ....................................................................................... 84
Application of the Transiently Chaotic Neural Network to Nonlinear Constraint Optimization Problems ................................................................. 90
   Xinyu Li and Dongyi Chen

ANN Observer of Permanent Magnet Synchronous Motor Based on SVPWM ......................... 95
   Xuepeng Liu and Bin Wang

Robust Adaptive Neural Network Control for a Class of Nonlinear Systems ......................... 101
   Yisha Liu, Wei Wang, and Yanjun Liu

LMI Approach for Stochastic Stability of Markovian Jumping Hopfield Neural Networks with Wiener Process ........................................................................... 107
   Xuyang Lou and Baotong Cui

Identifying of Hydraulic Turbine Generating Unit Model Based on Neural Network ......................................................................................................................... 113
   Zhihuai Xiao, Shuqing Wang, Hongtao Zeng, and Xiaohui Yuan

ART2-Based Approach to Judge the State of the Blast Furnace .............................................. 118
   Tieqiang Sun, Yixin Yin, Shengli Wu, and Xuyan Tu

Large Variable Speed Wind Turbine Control with Elman Controller ................................... 123
   Xiyun Yang, Lingfeng Xu, and Yibing Liu

Character Recognition Based on Hierarchical RBF Neural Networks ................................... 127
   Yuelong Li, Jinping Li, and Li Meng

SOC Dynamic Power Management Using Artificial Neural Network ........................................ 133
   Huaxiang Lu, Yan Lu, Zhifang Tang, and Shoujue Wang

Adaptive Neuro-control System for Superheated Steam Temperature of Power Plant over Wide Range Operation ................................................................. 138
   Jianhua Zhang, Guolian Hou, and Jinfang Zhang

Application of Neural Network Simple Adaptive Control in Multivariable Coupling System ................................................................. 142
   Baoyong Zhao and Yixin Yin

Motion Compensation of Omnidirectional Wheel Robot Using Neural Networks ................... 147
   Yonghai Wu and Zhenfu Yuan

An Improved Learning Algorithm Based on the Broyden-Fletcher-Goldfarb-Shanno (BFGS) Method for Back Propagation Neural Networks ........................................... 152
   Nazri Mohd Nawi, Meghana R. Ransing, and Rajesh S. Ransing

Improved Lagrange Nonlinear Programming Neural Networks for Inequality Constraints ........ 158
   Yuancan Huang
Support Vector Machines and Kernel Learning

A Local-Density-Ratio Based Algorithm for Setting Weight in Weighted Least Squares Support Vector Machine ................................................................. 167
  Zhuangfeng Shao, Xiaowei Yang, Wen Wen, and Zhifeng Hao

Nonlinear Noise Filtering with Support Vector Regression ................................................. 172
  Jian Zhang, Qicong Peng, Huaiqian Shao, and Tiange Shao

Soft Sensing Based on LS-SVM and Its Application to a Distillation Column ....................... 177
  Yafen Li, Qi Li, Huijuan Wang, and Ningsheng Ma

Study on Traffic Information Fusion Algorithm Based on Support Vector Machines ............... 183
  Haihong Liu, Xiaoyuan Wang, Derong Tan, and Lei Wang

Learning with Multi-kernel Growing Support Vector Classifiers ........................................ 188
  Jian-guo Zhou and Xiao-wei Wang

Investigation on Reciprocating Engine Pattern Recognition by Combining SVM and Hilbert Spectrum Entropy ........................................................................ 195
  Hongkun Li, Xiaojiang Ma, Fengtao Wang, and Quanmin Ren

Power Quality Disturbances Classification Using Wavelet and Support Vector Machines .......... 201
  Peisheng Gao and Weilin Wu

Research of Credit Grade Assessment for Suppliers Based on Multi-layer SVM Classifier ......................... 207
  Lei Wen and Junfei Li

Support Vector Regression Based on Scaling Reproducing Kernel for Black-Box System Identification ................................................................. 212
  Hong Peng and Jun Wang

Application of Least Squares Support Vector Machine on Vehicle Recognition .................. 217
  Kuihe Yang, Ganlin Shan, and Lingling Zhao

Smoothing Support Vector Machines for ϵ-Insensitive Regression .................................... 222
  Jinzhi Xiong, Tianming Hu, Jinlian Hu, Guangming Li, and Hong Peng

Fuzzy Systems

A Fuzzy Multicriteria Group Decision Making Method with Probability for Construction Safety Evaluation ........................................................................ 229
  Hongyan Liu and Feng Kong

Fuzzy Reasoning for Modeling and Simulation of the Plant Growth ..................................... 234
  Fang Xu, Jiaoliao Chen, Libin Zhang, and Tinghua Gu

Stability Analysis of Discrete-Time T-S Fuzzy Control Systems with Uncertain Grades of Membership .......................................................... 310
Yunxiang Wang and Wenzhan Dai

The Design of Smart Charger Based on Fuzzy Control Technology ........................................... 314
Peide Liu and Fang Jin

Sliding Mode Fuzzy Control with Application to Electrical Servo Drive................................. 320
Hai-Ping Pang, Cheng-Ju Liu, Wei Zhang, and Hai-Ping Pang

Helicopter Intelligence in Hover Quality Improvement of the Fuzzy Regulator ......................... 326
Dariusz Król, Michał Lower, and Boguslaw Szlachetko

Fuzzy-PID Hybrid Control for Temperature of Melted Aluminum In Atomization Furnace .......................................................... 332
Yonghui Zhang and Cheng Shao

Design Study of Adaptive Fuzzy PID Controller for LOS Stabilized System ......................... 336
Wei Ji, Qi Li, and Bo Xu

An Improved Method on Nearest-Neighbor Clustering Learning in Self-Adaptive Fuzzy Identification ........................................................................ 342
Xiaoming Yin and Xinsheng Gu

Simulation of Complex Environments: The Fuzzy Cognitive Agent ....................................... 348
D. Borrie, S. Isnandar, and C.S. Özveren

A Novel Method of Ranking Fuzzy Numbers for Decision-Making Problems ..................... 354
Zhigang Lian, Bin Jiao, and Xingsheng Gu

Probabilistic Computing

Determination of Design Ground Motion for Critical Engineering Structures Based on Probabilistic Seismic Hazard Analysis ........................................... 361
Guoxin Wang and Zhen Zhao

Applying the Semisupervised Bayesian Approach to Classifier Design............................. 366
Yiqing Kong and Shitong Wang

The Constructing of Bayesian Networks Based on Intelligent Optimization ...................... 371
Youlong Yang, Yan Wu, Sanyang Liu, and Jinxing Liu

The Improvement of Naïve Bayesian Classifier Based on the Strategy of Fuzzy Feature Selection ........................................................................ 377
Xuefeng Zhang, Peng Liu, and Jirijin Fan
Ant Colony Optimization

An Ant Colony Optimization Algorithm with Evolutionary Operator for Traveling Salesman Problem ................................................................. 385
    Jinglei Guo, Yong Wu, and Wei Liu

ACO-VRPTWRV: A New Algorithm for the Vehicle Routing Problems with Time Windows and Re-used Vehicles Based on Ant Colony Optimization ........................................... 390
    Tao Zhang, Shanshan Wang, Wenxin Tian, and Yuejie Zhang

Neural Network Based on Ant Colony Clustering Algorithm Applied to Predict the Stability of the Roof in Coal Mining ................................................................. 396
    Xiaoyue Liu, Jiping Sun, and Sumin Feng

An Ant Colony System-Based Optimization Scheme of Data Mining ............................................. 400
    Xingliang Zhu and Jianzhang Li

Finding Groups in Data: Cluster Analysis with Ants ................................................................ 404
    Urszula Boryczka

Protein 3D HP Model Folding Simulation Based on ACO .............................................................. 410
    Jie Song, Jiaxing Cheng, and Tingting Zheng

Intelligent Ant-Based Solution to the Application Service Partitioning Problem in a Grid Environment .................................................................................. 416
    Sharath Babu Musunoori and Geir Horn

Evolutionary Computation

Multi-peak Function Optimization Using a Hierarchical Clustering Based Genetic Algorithm ............................................................................................................. 425
    Shan Song and Xinjie Yu

Fitness Noise in Interactive Evolutionary Computation and the Convergence Robustness ........................................................................................................ 429
    Guo-Sheng Hao, Yong-Qing Huang, Dun-Wei Gong, Guang-Song Guo, and Yong Zhang

Automatic Selection Pressure Control in Genetic Programming ................................................. 435
    Huayang Xie, Mengjie Zhang, and Peter Andreae

Approach to Nonlinear Blind Source Separation Based on Niche Genetic Algorithm ......................... 441
    Kai Song, Qi Wang, and Mingli Ding

Augmented Naive Bayes Based on Evolutional Strategy ................................................................ 446
    Dan Zeng, Sifa Zhang, Zhihua Cai, Siwei Jiang, and Liangxiao Jiang

Evolutionary Hierarchical Time Series Clustering ........................................................................ 451
    Monica Chis and Crina Grosan
Using Accelerated Evolutionary Programming in Self-Turning Control for Uncertainty Systems ................................................................. 456
   Ping Wang, Qingjie Zhao, and Ruqing Yang

Cluster-Based Adaptive Mutation Mechanism to Improve the Performance of Genetic Algorithm ........................................................................................................ 461
   Tsung-Ying Sun, Chan-Cheng Liu, Sheng-Ta Hsieh, Chun-Ling Lin, and Kan-Yuan Lee

Genetic Algorithm Based Constrained Control Allocation for Tailless Fighter ................................................................. 467
   Yong Fan, Ji-hong Zhu, Jia-qiang Zhu, and Zeng-qi Sun

Identification of Transcription Factor Binding Sites Using GA and PSO ........................................................................ 473
   Xiao-Yu Chang, Chun-Guang Zhou, Yan-Wen Li, and Ping Hu

Rough Sets
Weighted Rough Set Model ................................................................. 481
   Tinghuai Ma and Meili Tang

Weighted Rough Graph and Its Application ........................................................................ 486
   Tong He, Yong Chen, and Kaiquan Shi

Study of a Cluster Algorithm Based on Rough Sets Theory ........................................................................ 492
   Licai Yang and Lancang Yang

Hierarchical Reduction Algorithm of Rough Sets ........................................................................ 497
   Li Yurong and Qiao Bin

A Heuristic Algorithm for Attribute Reduction of Decision-Making Problem Based on Rough Set ........................................................................ 503
   Chang-rui Yu, Hong-wei Wang, and Yan Luo

Association Rules Mining from Time Series Based on Rough Set ........................................................................ 509
   Junzhi Li, Guoping Xia, and Xiaoxia Shi

Artificial Immune Systems
Immune Memory Network-Based Fault Diagnosis ........................................................................ 517
   Lin Liang, Guanghua Xu, and Tao Sun

An Artificial Immune Recognition System-Based Approach to Software Engineering Management: With Software Metrics Selection ........................................................................ 523
   Xin Jin, Rongfang Bie, and X. Z. Gao

Application of Genetic Algorithm in Optimization of Fuzzy Control Rules ........................................................................ 529
   JingYuan Zhang and YeDe Li
Data Mining

Knowledge Discovery of Improved Apriori-Based High-Rise Structure Intelligent Form Selection ......................................................................................................................... 535
   Shihai Zhang, Shujun Liu, Dong Wang, Shihai Zhang, Jinping Ou, and Guangyuan Wang

Automatic Entity Relation Extraction Based on Maximum Entropy ................................................................. 540
   Suxiang Zhang, Juan Wen, Xiaojie Wang, and Lei Li

Association Rules Based Research on Man-Made Mistakes in Aviation Maintenance: A Case Study ........................................................................................................ 545
   Ren-qian Zhang and Jun-ling Yang

Combining Multi-knowledge for Chinese Word Segmentation Disambiguation ................................................. 551
   Ying Qin, Suxiang Zhang and Xiaojie Wang

Recognition of Noised Patterns Using Non-disruption Learning Set ........................................................................ 557
   Marcin Luckner

Bearing Capacity Modeling of Composite Pile Foundation Using Parameter-Optimized RBF Neural Networks ................................................................................................. 563
   Maosen Cao and Baosheng Su

The Application of Temporal Pattern Clustering Algorithms in DSM ........................................................................ 569
   Lei Wen

Lithology Recognition during Oil Well Drilling Based on Fuzzy-Adaptive Hamming Network ......................................................................................................................... 574
   Tiehong Gao, Junyi Cao, Minglu Zhang, and Jiangbo Qi

Short-Term Load Forecasting Model Using Fuzzy C Means Based Radial Basis Function Network ..................................................................................................................... 579
   Youchan Zhu and Yujun He

Level Set Approach to Label Character Extraction Based on Mumford-Shah Model ................................................................................................................................. 583
   Guoping Li, Changhou Lu, Xueyong Li, and Guoping Li

Mallat Fusion for Multi-source Remote Sensing Classification ................................................................................. 588
   Dongdong Cao, Qian Yin, and Ping Guo

Grey Markov Model Based on Parameter Fits and Its Application in Stock Price Prediction ..................................................................................................................... 594
   Cuifeng Li

Evaluation of Value-at-Risk for Short Term Investment by Using Cornish-Fisher Expansion ..................................................................................................................... 599
   Virgilijus Sakalauskas and Dalia Kriščiūnienė
The Research on RBF Network Structure Optimization and the Application in Transportation Prediction ................................................................. 682
  Lili Qu and Yan Chen

Study on a 3D Clustering Algorithm ................................................................................................................................. 688
  Yongmei Zhang and Bo Li

A Novel Method for Protecting Sensitive Knowledge in Association Rules Mining ............................................................. 694
  Tianding Chen

Adaptive Multiresolution and Dedicated Elastic Matching in Linear Time
Complexity for Time Series Data Mining ............................................................................................................................ 700
  Pierre-François Marteau and Gildas Ménier

Research on Forecasting Model in Short Term Traffic Flow Based on
Data Mining Technology ......................................................................................................................................................... 707
  Bin-sheng Liu, Yi-jun Li, Hai-tao Yang, Xue-sheng Sui, and Dong-feng Niu

GDCIC: A Grid-Based Density-Confidence-Interval Clustering Algorithm
for Multi-density Dataset in Large Spatial Database ........................................................................................................... 713
  Song Gao and Ying Xia

A New Method of Estimating Inputs ......................................................................................................................................... 718
  Yu-quan Cui, Li-jie Ma, and Jianmin Wang

A Hierarchical Reduction Algorithm for Concept Hierarchy ................................................................................................. 724
  Junpeng Yuan and Donghua Zhu

An Efficient and Scalable Algorithm for Multi-relational Frequent Pattern Discovery ............................................................... 730
  Wei Zhang and Bingru Yang

Correlation-based Feature Selection Strategy in Neural Classification .......................................................................................... 741
  Krzysztof Michalak and Halina Kwasnicka

The Prediction of Oil Quality Based on Least Squares Support Vector
Machines and Daubechies Wavelet and Mallat Algorithm ........................................................................................................ 747
  Fangfang Li, Yingkai Zhao, and ZhiBing Jiang

Multi-rate Multivariable Model Predictive Control for Integrating Processes ............................................................................. 752
  Jianfeng Li and Lifang Zhou

Intelligent Knowledge Management

Knowledge-Based Support for Object-Oriented Software Design and
Synthesis: A Category Theoretic Approach .............................................................................................................................. 759
  Yujun Zheng, Qimin Hu, and Jinyun Xue

Solution Method for Fuzzy Assignment Problem with Restriction of Qualification ............................................................... 765
  Long-Sheng Huang and Li-pu Zhang
