Preface - Volume 2....................................................................................................................................xiv
Committees - Volume 2.............................................................................................................................xv

Special Session on New Technologies and Their Applications in Image Engineering 1

A Novel Digital Watermarking Method for New Viewpoint Video Based
on Depth Map ...........................................................................................................................................3

Ning Zhu, Guiguang Ding, and Jianmin Wang

A Novel Algorithm for Object Tracking with Particle Filtering and GVF-Snake ........................................8

Dong Chun-li and Dong Yu-ning

Anomaly Detection in Computer Networks Using Dissimilarity-Based One-Class Classifiers ..............................14

Jun Ma and GuanZhong Dai

Robust Image Watermarking Using Mean Quantization in DTCWT Domain ....................................................19

Baolong Guo, Leida Li, Jeng-Shyang Pan, Liu Yang, and Xiaoyue Wu

Design and Simulation of a Sliding Mode Controller for Reducing Radial Vibration of an Eccentric Rotor Equipped with an Automatic Dynamic Balancer .........................................................23

Chun-Lung Huang
An Embedded Fuzzy Type-2 Controller Based Sensor Behavior for Mobile Robot ..........................................................29
  Siti Nurmaini and Siti Zaiton Mohd Hashim
Pattern Optimization and the Application in Question Answering ..........................................................35
  Yongping Du and Ming He
Automatic Learning of Semantic Region Models for Event Recognition ....................................................40
  Lei Gao, Chao Li, Yi Guo, and Zhang Xiong
Predicting Protein-Protein Recognition Using Feature Vector ..........................................................45
  Huang-Cheng Kuo, Ping-Lin Ong, Jia-Jie Li, and Jen-Peng Huang
PCA-Based Face Verification and Passport Code Recognition Using Improved FKCN Algorithm ..................51
  Kwang-Baek Kim, Am-suk Oh, and Young-Woon Woo

Software Agent Technology and Applications
An Efficient Forward and Backward Fault-Tolerant Mobile Agent System ..................................................61
  Jong-Shin Chen, Hong-Da Shi, Ching-Mu Chen, Zeng-Wen Hong, and Pei-Lin Zhong
Design of an IDML-Based Interactive Agent Drama Authoring Tool ..................................................67
  Tai-Hong Chen, Jim-Min Lin, Kai-Yi Chin, and Zeng-Wei Hong
The Study of Backup Mechanism for Web Services Based on MAS and Topic Maps ........................................73
  Feng-Chao Yang, Jin-Ling Liao, and Cheng-Li Chang
Applying Agent Composition for Development of Service-Oriented Program Language ................................79
  Jong Yih Kuo, Frank Hsieh, and Ho Chin Lin
Students’ Attention in Learning Process as a Research Domain: Software Agent Promotes Human-Robot-Computer Interaction ..........................................................85
  Sheng-Hui Hsu and Yueh-Min Huang
Application of Polynomial Neural Networks to Exchange Rate Forecasting .................................................90
  R. Ghazali, A. J. Hussain, and M. N. Mohd. Salleh
A Cyclic Coding Based Perceptual Hashing Algorithm .................................................................................96
  Hui Zhang, Yanan Wang, and Xiamu Niu
Multi-user Signals Combined with Quadratic Residue Code for Monitoring System ....................................100
  Chien-Jung Ho, Wen-Hao Hsieh, and Gwo-Jia Jong
Data Mining of Geographical Accessibility for Tourism in Regional Area .................................................104
  Koji Okuhara, Kuang-Yih Yeh, Hao-Ching Hsia, and Hiroaki Ishii
Some Software Engineering and Knowledge Representation Principles for the Design and Construction of Ontology-Based Linguistic Resources ...................................................110
  Francisco Alvarez, Antonio Vaquero, and Fernando Saenz
Intelligent Multimedia Retrieval and Watermarking

Robust Image Hashing for Image Authentication Based on DCT-DWT
Composite Domain ..................................................................................................................................................119

Rui-Xin Zhan, K. Y. Chau, Zhe-Ming Lu, Bei-Bei Liu, and W. H. Ip

Comments on "A Semi-blind Digital Watermarking Scheme Based on Singular Value Decomposition"
........................................................................................................................................................................123

Ting-Xian Zhang, Wei-Min Zheng, Zhe-Ming Lu, and Bei-Bei Liu

A Novel Image Authentication and Recovery Method for Applications of Image Sharing
........................................................................................................................................................................127

Chiang-Lung Liu

Population Control for Multi-agent Based Topical Crawlers ..............................................................................133

Alban Mouton and Pierre-François Marteau

H-Index Analysis of Enron Corpus ....................................................................................................................138

Václav Snášel, Jiří Dvorský, Anton Timofieiev, and Jaroslav Pokorný

Enhance Term Weighting Algorithm as Feature Selection Technique for Illicit Web Content Classification
........................................................................................................................................................................145

Zhi-Sam Lee, Mohd Aizaini Maarof, Ali Selamat, and Siti Mariyam Shamsuddin

Multi-scale Entropy Based Traffic Analysis and Anomaly Detection .................................................................151

Yan Ruo-Yu and Zheng Qing-Hua

Adaptive Knowledge Retrieving on Mobile Grid ................................................................................................158

Yue-Shan Chang, Pei-Chun Shih, and Yu-Cheng Luo

Fuzzy Crashing Problem on Project Management Based on Confidence-Interval Estimates
........................................................................................................................................................................164

Feng-Tse Lin

On Genetic Algorithms for Boolean Matrix Factorization .................................................................................170

Václav Snášel, Jan Platoš, and Pavel Krömer

Novel Computation on Networking and Multimedia Communication

A Scanning Method for Dotted Data Matrix ........................................................................................................179

Yuan-Fei Cheng

The Development of Enhanced Hash Mechanism for Improving Performance of IEEE 802.15.4
........................................................................................................................................................................184

Bih-Yaw Shih and Jyun-Ying Tseng

The Image Watermarking Technique Using Visual Secret Sharing Strategy .......................................................190

Shu-Chien Huang and Chu-Fu Wang

Efficient Deployment Algorithms for Prolonging Network Lifetime and Ensuring Coverage in Wireless Sensor Networks ........................................................................................................................................196

Chu-Fu Wang and Shu-Chien Huang
Unknown Malicious Executable Defection .................................................................202
Yingxu Lai

A Distributed Algorithm for 0-1 Knapsack Problem Based on Mobile Agent ..................208
Shanping Qiao, Shixian Wang, Yongzheng Lin, and Ling Zhao

A Novel Algorithm for Weighted-Fair Rate Control in Wireless Sensor Network ..................213
Lufeng Mo and Yuyun Shen

Verification of Mobile SMS Application with Model Checking Agent ..............................217
Siti Dianah Abdul Bujang and Ali Selamat

A Sort-Based DBA Algorithm for EPON System ..........................................................220
Wen-Ping Chen, Shiwei Kau, Bin-Yih Liao, Wen-Shyang Hwang,
and Wen-Tsung Hu

The Reform Schema and Usability of TD-SCDMA Smart Antenna .................................229
Fu Haiyang, Qu Xiaochun, and Han Youcai

Special Session on New Technologies and Their Applications in Image Engineering 2

Image Registration Using Rotation Normalized Feature Points .........................................237
Yang Zhan-long and Guo Bao-long

Efficient Intra Refresh Using Motion Affected Region Tracking for Surveillance
Video over Error Prone Networks .........................................................................................242
Jie Jiang, Baolong Guo, and Wei Mo

Convergence Analysis of PSO Inspired by r- and K-Selection ........................................247
Yunyi Yan and Baolong Guo

Inertia-Adaptive Particle Swarm Optimizer for Improved Global Search .........................253
Kaushik Suresh, Sayan Ghosh, Debarati Kundu, Abhirup Sen, Swagatam Das,
and Ajith Abraham

Fuzzy Logic Controllers for a Seismic Isolation System with Variable Friction
Damper ......................................................................................................................................259
Ging Long Lin and Lyan Ywan Lu

Blind Image Deconvolution via Particle Swarm Optimization with Entropy
Evaluation ................................................................................................................................265
Tsung-Ying Sun, Chan-Cheng Liu, Yu-Peng Jheng, Jyun-Hong Jheng,
Shang-Jeng Tsai, and Sheng-Ta Hsieh

A Hybrid Feature Selection Mechanism ............................................................................271
Hui-Huang Hsu, Cheng-Wei Hsieh, and Ming-Da Lu

A Face Image Database for Evaluating Out-of-Focus Blur ..............................................277
Qi Han, Meihui Zhang, Chen Song, Zhifang Wang, and Xiamu Niu

Wavelet-Based Image Fusion by Adaptive Decomposition ..............................................283
Yao-Hong Tsai and Yen-Han Lee

DNA Computing and Its Applications ............................................................................288
Junzo Watada and Rohani binti abu Bakar
Applications of Artificial Intelligence and Soft-Computing 1

Unsupervised Clustering by Means of Hierarchical Differential Evolution
Algorithm .................................................................................................................................297
   Chih-Chin Lai, Pei-Fen Lee, and Pei-Yun Hsieh

Support Vector Regression for GDOP ..........................................................................................302
   Wei-Han Su and Chih-Hung Wu

2D/3D Face Recognition Using Neural Networks Based on Hybrid Taguchi-Particle Swarm Optimization ..................................................................................................................307
   Cheng-Jian Lin, Chen-Hsiang Chu, Chi-Yung Lee, and Ya-Tzu Huang

Design of Self-Learning Fuzzy System by GA Approach ...............................................................313
   Shian-Tang Tzeng

Ant System Algorithm with Negative Pheromone for Course Scheduling Problem .................................................................319
   Djasli Djamarus and Ku Ruhana Ku-Mahamud

Compute the Term Contributed Frequency .................................................................................325
   Chunqing Huang and Xiafu Peng

Output-Feedback PID Controllers for Robot Manipulators with Jacobian Uncertainty .........................329

Intelligent Control for Principal Axis of Variable Vector Propeller of Submersible Vehicle .................................................................335
   Liu Sheng and Xu Dong-hao

A Novel Template Protection Algorithm for Iris Recognition .......................................................340
   Zhifang Wang, Qi Han, Xiamu Niu, and Christoph Busch

Implementation of Wiki-Based Knowledge Management Systems for Small Research Groups ................................................................................................................346
   Chia-Han Yang, Ming-Ying Wu, Chien-Min Lin, and Don-Lin Yang

Computational Intelligence and Security 1

A Stressed Syllable Labeling Approach Using Fractal Dimensions ..................................................353
   Qingcai Chen, Dandan Wang, and Xiaolong Wang

A High Efficiency Protocol for Reporting Integrity Measurements ................................................358
   Chang Chaowen, He Rongyu, Xie Hui, and Xu Guoyu

Chinese Unknown Word Recognition Using Improved Conditional Random Fields .................................................................363
   Yisu Xu, Xuan Wang, Buzhou Tang, and Xiaolong Wang

A Modified Cluster-Based Routing Protocol with Cloud Model ..................................................368
   Yong Zhang, Yan-jun Yang, Jian-peng Xu, and He Wang

Immune Network for Classifying Heterogeneous Data ....................................................................373
   Mazidah Puteh, Khairuddin Omar, Abdul Razak Hamdan, and Azuraliza Abu Bakar

Intelligent System Design and Applications for Digital Home Users

A Novel Fitness Function in Genetic Algorithms to Optimize Neural Networks for Imbalanced Data Sets

Kuan-Chieh Huang, Yau-Hwang Kuo, and I-Cheng Yeh

An Efficient Data Retrieval Indexing Structure for Wireless Broadcasting System

Lien-Fa Lin and Chao-Chun Chen

An Intelligent Monitoring System for Local-Area Network Traffic

Ming-Han Wan and Mong-Fong Horng

Mobile Robot Path Planning Base on the Hybrid Genetic Algorithm in Unknown Environment

Yong Zhang, Lin Zhang, and Xiaohua Zhang

Constructing Intelligent Living Space Controlling System with Bluetooth and Speech-Recognition Microprocessor

Chun-Liang Hsu and Sheng-Yuan Yang

Research on the Architecture of Policy-Based Satellite Network Management

Wen-bo Zhang, Ye Xu, and Yue-qiu Jiang

Knowledge Management on Concept Structure Analysis with Weighted Polytomous Ordering Theory and Cluster Analysis

Yuan-Horng Lin, Shin-Yu Chang, and Sen-Chi Yu

State Estimation of ALV Integrated Navigation System Based on BP Neural Network

Meiling Wang and Yongwei Fu

Classifier Fusion Based on Weighted Voting - Analytical and Experimental Results

Michal Wozniak

A Fuzzy Neural Network Based on Particle Swarm Optimization Applied in the Speech Recognition System

Xueying Zhang, Ying Sun, Xiaomei Zhang, and Peng Wang

Author Index - Volume 2
