International Symposium on Electronic Commerce and Security

ISECS 2008

Table of Contents

Message from the Symposium Chairs..................................................................................................xx
Organizing Committee..........................................................................................................................xxi
Committee Members............................................................................................................................xxii

Session 1: Intelligent Computing

The Application of Genetic Algorithm in Vehicle Routing Problem ..................................................3
  Yueqin Zhang, Shiying Chen, Jinfeng Liu, and Fu Duan
The Algorithm of Obtaining Best Rules Based on Rough Set............................................................7
  Shulin Chen and Lei Wang
An Algorithm of Topic Distillation Based on Anchor Text ..................................................................11
  Jiang Kai-zhong, Lu Zhao, Wu Yuan-qiong, and Gu Jun-zhong
A High Payload Steganographic Scheme Based on (7, 4) Hamming Code for Digital Images ..............16
  Chin-Chen Chang, The Duc Kieu, and Yung-Chen Chou
A Verifiable (t, n) Multiple Secret Sharing Scheme and Its Analyses ..............................................22
  Liaojun Pang, Huixian Li, Ye Yao, and Yumin Wang
A New Web Text Clustering Algorithm Based on DFSSM ..................................................................27
  Bingru Yang, Zefeng Song, Yinglong Wang, and Wei Song
Cloud Model-based Data Attributes Reduction for Clustering .........................................................33
  Xu Ru-zhi, Nie Pei-yao, Lin Pei-guang, and Chu Dong-sheng
Construction of Learning Algorithm based on SGA Bayesian Network ..........................................37
  T.J. Jia
Improved Algorithm for Tate Pairing Computation ..........................................................................41
  Ting Wu, Min Zhang, Xiaoliang Xu, and Rongbo Wang
A Deadline and Cost Constrained Optimization Algorithm for Scheduling Applications in Grids Based on Proportional Share Systems .................................................................46
  Dazhen Wang, Kwang Mong Sim, and Benyun Shi
Session 2: Web Applications

A Scheme of Workflow Management System Based on Web Services ................................................................. 53
Nie Gang

High Efficiency Association Rules Mining Algorithm for Bank Cost Analysis ......................................................... 57
Ying Mei and Liangsheng Zhu

Dynamic Reconfiguration Method for Web Service Based on Policy .............................................................. 61
Wenli Dong

Research on Customers Demand Forecasting for E-business Web Site Based on LS-SVM ........................................ 66
Qisong Chen, Yun Wu, and Xiaowei Chen

An XML based Flexible Security E-Commerce Mode ............................................................................................. 71
Sheng Chai, Yang Cheng, Jifan Qiu, and Wei Zhou

The Design and Implementation of the Distribution Resource Planning Management System Based on WEB ........ 74
Aimin Wang and Jipeng Wang

Research on High-accuracy Position Prediction Algorithm in Online Game .......................................................... 78
Zhaoyang Qu, Hong Gao, and Yi Zhu

A Reliable Web Service Implementation Approach for Large Commercial Applications ........................................ 82
Jianbin Huang and Heli Sun

The Factors Influencing Chinese Online Shopper's Satisfaction in Web2.0 Era ..................................................... 86
Hui Chen and Zheng Li

A Novel Constructing Algorithm of E-learning Community ..................................................................................... 91
Yi Jiang, Qingling Yue, and Zhaogui Qin

Study on EAI Based on Web Services and SOA ....................................................................................................... 95
Wu Deng, Xinhua Yang, Huimin Zhao, Dan Lei, and Hua Li

Research on the Techniques for Effectively Searching and Retrieving Information from Internet ......................... 99
Hongqi Li, Zhuang Wu, and Xiaogang Ji

Session 3: Networks

Research on Grid Resource Discovery Scheme Integrated P2P Mode ................................................................. 105
Zenggang Xiong, Xuemin Zhang, and Jianxin Chen

Design Secure Contexts Detect Based on Lattice for Grid Computing Environment ................................................. 110
Shuang Xiang, Mingdi Xu, Li Wang, and Huanguo Zhang

A P2P E-commerce Related Network Security Issue: P2P Worm .......................................................................... 114
Yejiang Zhang, Zhitang Li, Zhengbing Hu, Hao Tu, and Huaiqing Lin

Reputation-based Trust Update in Network Environment ......................................................................................... 118
Shufen Peng, Jingsha He, and Yao Meng
Session 4: Information Processing

To Select the Service in Context Aware Systems Using Concept Similarity Mechanism..............................................143
Juan Yang, Yun Bai, and Yuhui Qiu

Study on a Two-Echelon Supply Chain VMI Model under Demand Uncertainty ..........................................................148
Jianhu Cai, Huanhuan Wang, and Gengui Zhou

Definitions and Analysis of Integrity in Strand Spaces Model......................................................................................153
Zhao Huawei and Zhang Wenyu

Enforcing Information Flow Constraints in RBAC Environments ..............................................................................159
Wei Zhou and Christoph Meinel

A New Steganalysis Method Using High-pass Filter for JPEG Image .........................................................................165
Han-ling Zhang and Shu-yi Wang

An Extended RBAC Model for Uniform Implementation of Role Hierarchy and Constraint .............................................169
Yi Ren, Zhiting Xiao, and Sipei Guo

A New Modeling Method for the Data Analysis Solution in Business ......................................................................175
Xiaofeng Zhang

ID-Based Forward-Secure Signature Scheme from the Bilinear Pairings .....................................................................179
Yali Liu, Xinchun Yin, and Liang Qiu

A Probabilistic Visual Secret Sharing Scheme for Grayscale Images with Voting Strategy ..............................................184
Chin-Chen Chang, Chia-Chen Lin, T. Hoang Ngan Le, and Hoai Bac Le

Approach to Missing Data Recovery ........................................................................................................................189
Xu E, Shao-Cheng Tong, Yuan Wang, Shang Xu, and Peng Li

Session 5: Machine Learning

Research on a New Effective Data Mining Method Based on Neural Networks ...........................................................195
Shanli Wang

Study on Data Enriching Algorithm Based on Rough Set in E-commerce ......................................................................199
Yang Cheng, Zhishu Li, Peng Zhou, Sheng Chai, and Wei Zhou
A Study on M-Commerce Industry Development and Market Structure in China ................................................................. 276

Xiang Yi-ming and Chen Qi

Session 7: Applied Cryptography (I)

An Anomaly Intrusion Detection Model Based on Limited Labeled Instances ................................................................. 283

Shan-Qing Guo and Zhong-Hua Zhao

Research on Implementation of Elliptic Curve Cryptosystem in E-Commerce ................................................................. 288

Guicheng Shen and Xuefeng Zheng

An Executable Code Authorization Model for Secure Operating System ................................................................. 292

Chen Zemao, Wu Xiaoping, and Tang Weimin

Applying the Fujisaki-Okamoto Conversion to Certificate-based Encryption ................................................................. 296

Yang Lu, Jiguo Li, and Junmo Xiao

An Architecture for Differentiated Security Service ................................................................. 301

Jiayong Chen, Xiaomin Wang, and Liwen He

Cryptanalysis of the LCSS RFID Authentication Protocol ................................................................. 305

Tianjie Cao, Peng Shen, and Elisa Bertino

A Key-dependent Cipher DSDP ................................................................. 310

Like Chen and Runtong Zhang

A Novel Trust Collecting Mechanism Based on Publish/Subscribe Scheme in Grid Computing ................................................................. 314

Xiangran Cheng, Xingyuan Chen, Bin Zhang, and Yan Yang

A Complete (alpha,k)-Anonymity Model for Sensitive Values Individuation Preservation ................................................................. 318

Han Jian-min, Yu Hui-qun, Yu Juan, and Cen Ting-ting

Session 8: Applied Cryptography (II)

A Multi-Dimensional K-Anonymity Model for Hierarchical Data ................................................................. 327

Xiaojun Ye, Lei Jin, and Bin Li

Efficient Fair Contract Signing Protocol from Bilinear Pairings ................................................................. 333

Qing Zhang, Qiaoyan Wen, and Gengli Chen

Research on PKI Model Based on NTRU ................................................................. 338

Shimin Wei and Zepeng Zhuo

A Distributed Electronic Authentication Scheme in E-Business System ................................................................. 343

Xinxia Song and Zhigang Chen

A New Image Encryption Algorithm Based on Multiple Chaos System ................................................................. 347

Yunpeng Zhang, Fei Zuo, Zhengjun Zhai, and Cai Xiaobin

Pattern Analysis Applied on Steganalysis for Binary Text Images ................................................................. 351

Bin Jiang, Xi-jian Ping, and Tao Zhang

Cryptanalysis and Improvement of a Remote User Authentication Scheme using Smart Cards ................................................................. 355

Debasis Giri and P.D. Srivastava

Session 10: Information Security (II)

Tamper Difficult Technique for Data Residing on Passive Storage ................................................................. 439
  Ding Yong
Metadata Management for Distributed Multimedia Storage System ................................................................. 443
  Ling Zhan, Jiguang Wan, and Peng Gu
Research on Storage Security Based on Trusted Computing Platform ............................................................... 448
  Jian He and Mingdi Xu
Information Security Game Analysis with Penalty Parameter ................................................................................. 453
  Wei Sun, Xiangwei Kong, Dequan He, and Xingang You
An Introduction to Data Capturing ......................................................................................................................... 457
  Liqiang Zhang and Huanguo Zhang
Modification and Improvement on Group Signature Scheme without Random Oracles ........................................... 462
  Wang Shaohui
Servicing Work Safety Supervision System for Electric Locomotive Based on Configuration Software .................. 467
  Jianjun Meng, Chenghui Yang, and Wenzhe Qi
JSON Based Decentralized SSO Security Architecture in E-Commerce ................................................................. 471
  Ye Jun, Li Zhishu, and Ma Yanyan
Network Intrusion Rules Extraction Based on Rough Set and Niche Genetic Algorithm ........................................ 476
  Shi Changqiong, Wang Dawei, Huang Hui, and Dafang Zhang
Two Stratum Bayesian Network Based Anomaly Detection Model for Intrusion Detection System ......................... 482
  Lu Huijuan, Chen Jianguo, and Wei Wei
Research on the Automatic Summarization Model based on Genetic Algorithm and Mathematical Regression .......... 488
  Xiaogang Ji
A Gossip-based Opinion Diffusion Model via Uninorm Aggregation Operator .......................................................... 492
  Siyuan Wu and Zhixing Huang
Message Substitute Attack on Concurrent Signatures Protocol and its Improvement ............................................... 497
  Yaling Zhang and Xiaofeng Wang
A Formal Model of Trust and Security for Task-Oriented Information System .................................................. 502
  Liu Wei-Peng and Hu Ju

Session 11: Information Security (III)

Grey Relational Evaluation on Vendor Selection Based on E-business ................................................................. 509
  Wuwei Li, Yuhong Wang, and Ao Chen
Information Intelligent System based on Web Data Mining .................................................................................... 514
  Shaobo Zhong
Using Criterion-Based Access Control for Multilevel Database Security ................................................................. 518

Leon Pan

The Simplified Inductive Approach to Verifying Security Protocols .................................................................................. 523

Wang Juan, Zhou Yajie, and Zhang Huanguo

Design and Implementation of the Airline Luggage Inspection System Base on Link Structure of QR Code .................................................................................................................. 527

Lingyan Bi, Zewei Feng, Min Liu, and Weining Wang

Probability of Attack Based on System Vulnerability Life Cycle ......................................................................................... 531

Amontip Jumratjaroenvanit and Yunyong Teng-amnuay

SOA-based Enterprise Service Bus ................................................................................................................................. 536

Jianqiang Hu, FengE Luo, Jun Li, Xin Tong, and Guiping Liao

A Novel Tree-based Authenticated Dynamic Group Key Agreement Protocol for Wireless Sensor Network ................................................................. 540

Tang Hong, Zhu Liehuang, Cao Yuanda, and Wang Dazhen

Processing Intrusion Detection Alerts in Large-scale Network .......................................................................................... 545

Dong Li, Zhitang Li, and Jie Ma

Biometrics Authentication System on Open Network and Security Analysis ........................................................................ 549

Zhenhua Wu

Information Security Problem Research Based on Game Theory .......................................................................................... 554

Wei Sun, Xiangwei Kong, Dequan He, and Xingang You

Construction of Server-assisted Forward Secure Signature Using Bellare-Miner Scheme ......................................................... 558

Jia Yu, Fanyu Kong, Rong Hao, and Dexiang Zhang

High Speed Serial Interface & Some Key Technology Research .......................................................................................... 562

Wei Cheng, Zhenhua Tan, Xiaoxing Gao, Guiran Chang, and Jia Wen

**Session 12: Risk Analysis**

E-business Enterprise Credit Risk Evaluation Based on Markov Chain ............................................................................. 569

Chong Wang, Wenkuan Chen, and Peiji Shao

The Credit Risk Analysis and Prevention of Third Party Payment Platform ........................................................................ 573

Liu Jindi and Xu Yong

Cash Management and Its Risk Control under No-Stationary Uncertain Demand ........................................................................ 577

Liu Bin, Cui Wentian, and Xin Chunlin

An Opponent's Negotiation Behavior Model to Facilitate Buyer-seller Negotiations in Supply Chain Management ....................... 582

Fang Fang, Ye Xin, Xia Yun, and Xu Haitao

Hindrances to the Development of Tourism E-Commerce in China ....................................................................................... 588

Lixia Yang, Xun Liu, and Changyong Xu
Entropy Weight Coefficient Method for Evaluating Intrusion Detection Systems
Junfeng Tian, Tao Liu, and Hongqiang Jiao

Research of C2C E-Business Trust Evaluation Model Based on Entropy Method
Limao Yang and Xuan Tang

Exploring Influencing Factors in E-Commerce Transaction Behaviors
Ranzhe Jing, Jianwei Yu, and Zuo Jiang

An Empirical Study on Predicting User Purchase Intention on the Creative Product: A Case of Apparel
Chen Pang and Xiaofen Ji

A Framework for Seamless Integration of Legacy Business Applications into Enterprise Business Intelligent System
Jun Yu and Bin Xu

Implementing Multi-party Key Exchange by Linear Combination of Elliptic Curve Points
Jun Yang and Xianze Yang

An Abstract Interpretation Frame of the Calculus of Boxed Ambients Based on the Ambient Occurrence Counting
Zhang Hong and Liu Lei

Session 13: Business Process Integration

A Research of Outsourcing Decision-making Based on Outsourcing Market Maturity
Hongju Zhang, Jiajia Liu, and Zhijun Yan

General Service Pricing Strategies Research Based on Dynamic Stochastic Wealth Model
Yongming Cai and Wei Chen

A Versatile SOA-based E-Business Platform
Lilin Diao and Yanan Ma

The Analysis of Supply Chain Procurement Strategy in E-Commerce
Guangshu Chang

Study of the Model of E-commerce Personalized Recommendation System Based on Data Mining
Yongjian Fan, Yanguang Shen, and Jianying Mai

Knowledge and Trust in E-consumers' Online Shopping Behavior
Jui-Chin Jiang, Chun-An Chen, and Chih-Chien Wang

Taxonomy for Personalized Recommendation Service
Li Yu, Ming Dong, and Rong Wang
The Research of Supplier Selection Based on Hybrid Decision-Making Index and VIKOR Method ................................................................. 661
Peide Liu and Hongtao Du
A Collaboration Model for E-government Based on Semantics and Multi-agent ............................................................. 665
Chunhua Ju and Chaohua Zhang
Research and Application of Customer Churn Analysis in Chain Retail Industry ............................................................ 670
Chunhua Ju and Feipeng Guo
Integrated Routing Wasp Algorithm and Scheduling Wasp Algorithm for Job Shop Dynamic Scheduling ......................................................... 674
Yan Cao, Yanli Yang, and Huamin Wang
Customer Satisfaction Evaluation for Mobile Commerce Based on Fuzzy Comprehensive Evaluation .......................................................... 679
Jinsong Gao, Jinhui Xu, Zibo Zhou, and Zhuojun Li

Session 14: Electronic Commerce Applications
Development of Internet-based Long-range Manufacture Quality Monitoring System ................................................................. 685
Jitao Fang, Shusong Yu, and Xiangqian Ding
Business Process-Oriented Software Architecture for Supporting Business Process Change ................................................................. 690
Qing Yao, Jing Zhang, and Haiyang Wang
Automobile Enterprise's Mixed Sale Mode Based on E-commerce Supply Chain Management .......................................................... 695
Li Xinwu
A Regression-based Coordination for Concurrent Negotiation .............................................................................................................. 699
Benyun Shi and Kwang Mong Sim
The Study on Electronic Commerce and Development of International Logistics ............................................................................. 704
Zhongquan Zou
Research on Representation of Preference of Negotiator in Negotiation Support System ...................................................................................... 708
Hongli Wang
Study on an E-Commerce System based on Multi-Agent Technology ........................................................................................................ 714
Zhiyong Sui and Lixin Huang
Research on the Security of Information and Data in the Communication .......................................................................................... 718
Xiaoming Han
Design of Customer Relationship Management Systems Based on Data Mining ...................................................................................... 722
Zhou Jianhong and Xie Yi
Assessing the Impact of Information Technology on Supply Chain Management ............................................................................................................................................................. 726
  Mehdi Fasanghari

Session 15: Electronic Payment

Analysis of Electronic Innovation of Securities Trading in China using a Hypercube Model ........................................................................................................................................................................... 733
  Zhu Haibo
The Online Third-party Payment Strategies under Price War ........................................................................................................................................................................................................... 737
  Yiqun Li and Zhaoran Xu
Key Technologies for Security Enhancing of Payment Gateway ........................................................................................................................................................................................................... 743
  Xuewang Zhang and Linlin Wang
An Approach to Separating Security Concerns in E-Commerce Systems at the Architecture Level ................................................................................................................................................................................... 749
  Chunhua Yang and Jiancheng Wan
Study on Mobile E-commerce Security Payment System ........................................................................................................................................................................................................... 754
  Hua Jiang
An ID-based Transferable Off-line E-Cash System with Revokable Anonymity ........................................................................................................................................................................................................... 758
  Changji Wang and Rongbo Lu
ECC-Based Biometric Signature: A New Approach in Electronic Banking Security ........................................................................................................................................................................................................... 763
  Shahriar Mohammadi and Sanaz Abedi
Recommender Oriented to Complicate Task in E-commerce ........................................................................................................................................................................................................... 767
  Li Yu, Xiaoping Yang, and Qian Li
Responsibility of Net-bank in Electronic Payment ........................................................................................................................................................................................................... 771
  Liu Han-xia and Li Rong-jun
A Research of Trust Based on E-Commerce ........................................................................................................................................................................................................... 776
  Lihua Ruan and Ding Tian
The Mechanism Design of Third Party Assure-Payment Platform ........................................................................................................................................................................................................... 780
  Yong Xu

Session 16: Innovative E-Business Models

Optimization of an Indicator System for Measuring E-Business: An Empirical Study by Firms ........................................................................................................................................................................................................... 787
  Min Liu
The Reconstruction, Exploration and Innovation of Logos of E-commerce ........................................................................................................................................................................................................... 792
  Li Zhongjun, He Lijuan, and Zhou Qihai
A New Co-evolutionary Genetic Algorithm for Traveling Salesman Problem ........................................................................................................................................................................................................... 796
  Zhu Qiang
Antecedents and Consequences of Process Innovation on E-Commerce ........................................................................................................................................................................................................... 800
  Wang Cheng, Lan Hailin, and Xie Hongming
The Relationships between the Antecedents of Innovativeness and Business Performance ................................................................. 805

Ching-Huai Peng

Research on the Shift of Default Risk in Supply Chain Based on the Credit Default Swap ................................................................. 810

Xianjun Qi and Hongping Yang

Test Case Reduction Technique for BPEL-based Testing ................................................................. 814

Wenli Dong

Research on a New E-voting Method based on the Cellular Phone ................................................................. 818

Yun-he Li and Shan-yu Wu

A Study on the Factors Influencing Knowledge Transfer among Organizations in Strategic Alliances ................................................................. 822

Zhihong Li

Session 17: Enterprise Integration Applications

Ownership Motivation and Corporate Performance in IT Industry under the Wave of E-Commerce: An Empirical Study based on Chinese Public Companies ................................................................. 829

Qi Yue, Hailin Lan, and Luan Jiang

Research on the Application of CSCW in Shipbuilding Industry ................................................................. 834

Qingying Zhang, Weihong Yue, and Chengfang Wang

Analysis on Features and Countermeasures of Foreign-founded Enterprises' Sole Proprietorship in China ................................................................. 838

Peizhi Wang, Xinying Liu, and Wenbo Li

Research on e-Commerce Application Architecture Based on the Integration of Workflow and Agile Service ................................................................. 843

Xing Wan and Lei Huang

Application of Streaming Media Technology in Electronic Commerce ................................................................. 850

Delin Hou and Huosong Xia

A Study of Consumer Trust Formation in Electronic Commerce ................................................................. 854

Huiwen Tu and Feng Xie

Research and Application on OLAP-based Farm Products Examination Model ................................................................. 858

Minghua Han and Chunhua Ju

Formalization and Verification of Inter-organizational Workflow Modeling for E-Commerce ................................................................. 862

Cui Jin-hong and Wang Xu

An Analysis of Knowledge Sharing Incentive Mechanism inside the Enterprise Based on Evolutionary Game ................................................................. 866

Yang Liu
The Fuzzy Evaluation of E-Commerce Customer Satisfaction Utilizing Fuzzy TOPSIS .................................................................................................................................................................................. 870

Mehdi Fasanghari, Navid Gholamy, S. Kamal Chaharsooghi, Shohre Qadami, and Mohamad Soltani Delgosha

Session 18: Information Hiding and Watermarking (I)

Content Based Image Watermarking in the Ridgelet Domain ................................................................................................................................. 877

Zhihua Xie, Shengqian Wang, Lixin Gan, Lin Zhang, and Zhenghua Shu

A Watermarking Protocol for Piracy Tracing ......................................................................................................................... 882

Yuping Hu

A Wavelet Digital Watermarking Algorithm Based on Chaotic Mapping ................................................................................................. 886

Fu Yu, Wu Xiaoping, Chen Zemao, and Ye Qing

A Zero-Watermark Algorithm with Real-Mean for 2D Engineering Graphic ......................................................................................... 890

Qiaozhuo Du and Fei Peng

A Statistics-Based Watermarking Scheme Robust to Print-and-Scan ......................................................................................... 894

Daofang Cheng, Xiaolong Li, Wenfa Qi, and Bin Yang

Robust Image Watermarking Algorithm against Shearing ......................................................................................................................... 899

Deng Minghui, Yang Fang, and Zhen Jingbo

An Adaptive Blind Watermarking Algorithm Based on DCT and Modified Watson’s Visual Model ........................................................................................................................................................................... 904

Yongzhong Li, Hua Zhu, Ruiqing Yu, Ge Yang, and Jing Xu

An Effective Fragile Document Watermarking Technique ......................................................................................................................... 908

Jiaxin Yu, Xinsheng Wang, Jianfei Li, and Xu Nan

A Numeric Watermark Method Based on Valve-Value Surface ......................................................................................................................... 912

Hu Zhihua and Niu Jiping

A Watermarking Algorithm Based on MA and DWT ................................................................................................................................. 916

Xia Sun, Ziqiang Wang, and Dexian Zhang

Session 19: Information Hiding and Watermarking (II)

Attacks on Two Buyer-Seller Watermarking Protocols and an Improvement for Revocable Anonymity ........................................................................................................................................................................... 923

Mina Deng and Bart Preneel

A Multipurpose Watermarking Scheme for Image Authentication and Copyright Protection ........................................................................................................................................................................... 930

Congxu Zhu and Yuping Hu

A Large Capacity Blind Information Hiding Algorithm ......................................................................................................................... 934

Jianquan Xie, Chunhua Yang, Dazu Huang, and Duosi Xie

A Novel Image Scrambling and Watermarking Scheme Based on Cellular Automata ........................................................................................................................................................................... 938

Ruisong Ye and Huiliang Li
Robust Algorithm of Digital Image Watermarking Based on Discrete Wavelet Transform ................................................................. 942
Na Li, Xiaoshi Zheng, Yanling Zhao, Huimin Wu, and Shifeng Li

Research on an Advanced Novel Watermarking Technology with Higher Robustness .................................................................................. 946
Gengming Zhu

Histogram Specification-based Audio Watermarking Technology against Filtering Attacks in Time Domain .................................................. 951
Xiaoming Zhang, Xiong Yin, and Zhaoyang Yu

Steganalysis of Information Hidden in Webpage Based on Higher-order Statistics ........................................................................... 957
Huajun Huang, Shaohong Zhong, and Xingming Sun

Session 20: Intelligent Systems

Research and Design on Reputation Services (RS) System .................................................................................................................... 963
Shouqiang Liu, Deyu Qi, Jun Xiang, and Baogang Chen

Using Methods of Association Rules Mining Optimization in Web-Based Mobile-Learning System .................................................................................................................. 967
Shijue Zheng, Shaojun Xiong, Yin Huang, and Shixiao Wu

Research on the Construction of Customer-centered Integrative Knowledge Push System .................................................................................................................. 971
Yong Feng, Hongyan Xu, and Song Yan

Comparative Research of Modeling Methods for Workflow Process ........................................................................................................... 976
Guoyin Jiang and Lihong Dong

A Modified Resource Limited Artificial Immune System ......................................................................................................................... 981
Tao Liu, Zhifeng Hu, Yan Zhou, and Zhijie Wang

The Research on Multi-agent Framework for Decision Support System and Its Application .................................................................................................................. 986
Yan Li

Scalable Trust in Multi-agent E-commerce System ......................................................................................................................... 990
Shuliang Zhao, Haiqin Liu, and Zhaohao Sun

Session 21: International Finance

Analysis of Business Intelligence and Its Derivative - Financial Intelligence ........................................................................................................... 997
Zhou Qihai, Huang Tao, and Wang Tao

A Modeling Framework for the Planning of Logistics Nodes in Strategic Supply Chain Based on Complex Network .............................................. 1001
Jiang-bo Zheng

Research on Entropy Model of Order Degree of Fractal Supply Chain Network .................................................................................. 1006
Wenfang Sun and Huaizhen Ye
ACEAC: A Novel Access Control Model for Cooperative Editing with Workflow ................................................................. 1010

Fei Zhu and Qiang Lv

The Classification of Urban Logistics Infrastructure: Evidence from the Yangtze River Delta Region in China .......................................................... 1015

Changbing Jiang

Management Innovation and Development of Manufacturer-Retailer Relationships for Large Electric Appliances Chain Stores in China ............................................. 1020

Chen Haiquan, Zhou Quanxiong, and Kong Xiangke

Enterprise E-Business Transformation: A Case Study in China .................................................. 1025

Luchuan Liu, Jing Lu, and Xiaohong Yang

Session 22: Other Topics

Electronic Time Stamping Safety and Efficiency Optimize Technique Research ..................................................................................................................... 1033

Hong-Jiao Ma, Yu Hua, and Wei Guo

Research on Witkey Model Based on TRIZ ....................................................................................... 1037

Qi Ming and Xie Jingxu

Context Active RBAC and its Applications ................................................................................ 1041

Yong-Zhong He, Zhen Han, and Ye Du

Study on Information Technology Capabilities based on Value Net Theory ...................................... 1045

Qiaolian Cheng, Ruijin Zhang, and Yezhuang Tian

A Novel Method for Wheel Rim Recognition ............................................................................. 1051

Guan Xu, Jian Su, Hongda Pan, and Donglin Zhang

Design of the Knowledge Management Integrated System Based on TRIZ ...................................... 1055

Ming Qi and Beilei Shangguan

Development Course for Information Platform Based on MDA .................................................. 1059

Zhong-hua Deng and Bin Su

The Application of RFID Technology in the Warehouse Management Information System .......................................................... 1063

Hui Tan

Author Index ................................................................................................................................................. 1068
