2012 15th IEEE International Symposium on Object/Component/Service-Oriented Real-Time Distributed Computing Workshops

ISORCW 2012

FORDS 2012 Session 1: Design and Analysis Methods for Real-Time Systems

STeC: A Location-Triggered Specification Language for Real-Time Systems

Yixiang Chen

Functional Safety Analysis Method for CTCS Level 3 Based on Hybrid Automata

Jintao Liu, Tao Tang, Lin Zhao, Tianhua Xu, and Wei Zheng

Low Power Consumption Data Structure Design for Embedded Applications in Real-Time Systems

Linhua Jiang, Chao Peng, Haibin Cai, Yixiang Chen, and Xiaodong Chen

Measuring Time Lag with Nested Preemptions and Resumptions

Guoqiang Li

FORDS 2012 Session 2: Cyber-Physical Systems

Review of Cyber-Physical System Architecture

Liang Hu, Nannan Xie, Zhejun Kuang, and Kuo Zhao

Extending the Four-Variable Model for Cyber-Physical Systems

Xiaohong Chen and Mingsong Chen
Component Based Design of Fault Tolerant Devices in Cyber Physical System .......................................................... 37  
   Tianhua Xu, Zhiming Liu, Tao Tang, Wei Zheng, and Lin Zhao

RESTful Management for Cyber-Physical Systems .................................................................................................................. 43  
   Yue Zhang, Haibin Cai, and Minghua Zhu

**FORDS 2012 Session 3: Pervasive Computing** 
 and Internet of Things

A Novel Self-Adaptive Fault-Tolerant Mechanism and Its Application for a Dynamic Pervasive Computing Environment .......................................................................................................................... 48  
   Haibin Cai, Chao Peng, Linhua Jiang, and Yue Zhang

Design and Implementation of an Automotive Telematics Gateway Based on Virtualization .............................................. 53  
   Zonghua Gu, Zhu Wang, Shijian Li, and Haibin Cai

ESF - An Extensive Service Foundation from Internet of Things Perspective ........................................................................ 59  
   Jianqi Shi, Xin Ye, Liangyu Chen, Pei Zhang, and Ningkang Jiang

Research of Context Situation Awareness Technology ............................................................................................................. 65  
   Dianxi Shi, Zhendong Wu, Bo Ding, and Huining Yan

**iVCE 2012 Session 1: Virtualization & Cloud Computing**

DMSS: A Dynamic Memory Scheduling System in Server Consolidation Environments .................................................. 70  
   Lanzheng Liu, Rui Chu, Yongchun Zhu, Pengfei Zhang, and Liufeng Wang

A Reality Check of Multiple Snowball Tree File Dissemination in Large Scale Cloud Cluster .................................................. 76  
   Zhang Zhaoning, Lu Xicheng, Peng Yuxing, and Li Huiba

DVCE: The Virtual Computing Environment Supported by Distributed VM Images ......................................................... 81  
   Tianyu Wo, Hanwen Wang, Chunming Hu, and Yabing Cui

**iVCE 2012 Session 2: Web Services** 
 & Concurrent Programming

Skyline Query Processing on Interval Uncertain Data ................................................................................................................. 87  
   Xiaoyong Li, Yijie Wang, Xiaoling Li, and Guangdong Wang

A Clustering-Based QoS Prediction Approach for Web Service Recommendation .......................................................... 93  
   Jieming Zhu, Yu Kang, Zibin Zheng, and Michael R. Lyu

An Extension to Computing Elements in Erlang for Actor Based Concurrent Programming ............................................. 99  
   Kang Lianghuan and Cao Donggang
RTSOAA 2012 Session 1: Real-Time Cloud Computing

Real-Time Performance Prediction for Cloud Components .............................................................. 106
  Yilei Zhang, Zibin Zheng, and Michael R. Lyu

Scalable Architectures for SaaS ........................................................................................................ 112
  Wei-Tek Tsai, Yu Huang, Xiaoying Bai, and Jerry Gao

Real-Time Fault-Tolerance in Federated Cloud Environments .................................................... 118
  Peter Garraghan, Paul Townend, and Jie Xu

Investigation of IT Security and Compliance Challenges in Security-as-a-Service
for Cloud Computing .................................................................................................................... 124
  Hussain Al-Aqrabi, Lu Liu, Jie Xu, Richard Hill, Nick Antonopoulos, and Yongzhao Zhan

RTSOAA 2012 Session 2: Real-Time Service Applications

Experimental Feasibility Analysis of ROI-Based Hough Transform for Real-Time
Line Tracking in Auto-Landing of UAV ....................................................................................... 130
  Tyan Vladimir, Dongwoon Jeon, Doo-Hyun Kim, Chun-Hyon Chang,
  and Jungguk Kim

A Framework for Improving Trust in Dynamic Service-Oriented Systems .................................... 136
  Paul Townend, Colin C. Venters, Lydia Lau, Karim Djemame, Vania Dimitrova,
  Alison Marshall, Jie Xu, Charlie Dibsdale, Nick Taylor, Jim Austin, John McAvoy,
  Martyn Fletcher, and Stephen Hobson

Overbooking-Based Resource Allocation in Virtualized Data Center .............................................. 142
  Tianyu Wo, Qian Sun, Bo Li, and Chunming Hu

Information Assurance for Real-Time Decision Support ............................................................... 150
  Liangliang Xiao, Farokh Bastani, I-Ling Yen, and Raymond Paul

SORT 2012

Knowledge Representation for Cognitive Robotic Systems ............................................................ 156
  Emil Vassev and Mike Hinchey

Adaptive Distributed Embedded and Real-Time Java Systems Based on RTSJ ............................. 164
  M. Teresa Higuera-Toledano

Self-Organized Routing ID Tree-Based Multipath Construction for Ad Hoc Networks ............... 172
  Tomoya Okazaki, Mario Takeuchi, Eitaro Kohnno, and Yoshiaki Kakuda

A Generic VHDL Template for 2D Stencil Code Applications on FPGAs ........................................ 180
  Michael Schmidt, Marc Reichenbach, and Dietmar Fey

An Aggressive Strategy for an Artificial Hormone System to Minimize the Task
Allocation Time ............................................................................................................................ 188
  Uwe Brinkschulte and Mathias Pacher
An Approach for Self-Reconfiguring and Fault-Tolerant Distributed Real-Time Systems ....................... 196
  Kay Klobedanz, Wolfgang Mueller, and Achim Rettberg

Towards a Rigorous Modeling Formalism for Systems of Systems .................................................... 204
  Tayfun Gezgin, Christoph Etzien, Stefan Henkler, and Achim Rettberg

Agent-Based Modeling and Simulation of Artificial Immune Systems ................................................. 212
  Norma Montealegre and Franz J. Rammig

Author Index ............................................................................................................................................... 180
