Panel: Everything You Wanted to Know About Software Reliability Engineering But Didn’t Know Who to Ask

Chair: John Musa

Abstract

This is an opportunity for you to ask questions on software reliability engineering that may help you solve problems on your development projects, in your research studies, or in teaching. There will be no presentations, all time being devoted to your questions. The questions may be on anything, ranging from theory to details of application. The panelists are highly experienced in the field and represent differing perspectives.

Panelists

Bill Everett, consultant, Software Process and Reliability Engineering
John D. Musa, consultant
Prof. Mitsuru Ohba, Hiroshima University
Prof. Mladen Vouk, North Carolina State University
