## Session: 1A. Component Based Systems

- An Approach to Higher Reliability Using Software Components  
  *H. Jin and P. Santhanam*  
  Page 2
- A Bayesian Approach to Reliability Prediction and Assessment of Component Based Systems  
  *H. Singh, V. Cortellessa, B. Cukic, E. Gunel, and V. Bharadwaj*  
  Page 12
- Comparison of Architecture-Based Software Reliability Models  
  *K. Goševa-Popstojanova, A. Mathur, and K. Trivedi*  
  Page 22

## Session: 1B. Testing GUI Software

- Finite-State Testing and Analysis of Graphical User Interfaces  
  *F. Belli*  
  Page 34
- Incorporating Software Reliability Engineering into the Test Process for an Extensive GUI-Based Network Management System  
  *D. Donovan, C. Dislis, R. Murphy, S. Unger, C. Kenneally, J. Young, and L. Sheehan*  
  Page 44
- User-Based Testing of GUI Sequences and Their Interactions  
  *L. White, H. Almezen, and N. Alzeidi*  
  Page 54

## Session 2A. Software Fault Models and Prediction

- An Application of Zero-Inflated Poisson Regression for Software Fault Prediction  
  *T. Khoshgoflaar, K. Gao, and R. Szabo*  
  Page 66
- A Fault Model for Fault Injection Analysis of Dynamic UML Dynamic Specifications  
  *A. Ibrahim, H. Ammar, and S. Yacoub*  
  Page 74
- A Fault Model for Subtype Inheritance and Polymorphism  
  *J. Offutt, R. Alexander, Y. Wu, Q. Xiao, and C. Hutchinson*  
  Page 84

## Session 2B. Reliable Wireless and Mobile Systems

- Modeling and Analysis of Using Memory Management Unit to Improve Software Reliability  
  *S.-J. Chang and P. Kapauan*  
  Page 96
- Modeling and Verifying Strong Cache Consistency for Mobile Data Access  
  *J. Wei, S.-C. Cheung, H. Zhou, X. Wang, J. Li, and Y.-l. Feng*  
  Page 103
- Recovery Proxy for Wireless Applications  
  *B. Yao and W. Fuchs*  
  Page 112
Session 3A. Fault Tolerant Distributed Software Systems

Estimation of Software Diversity by Fault Simulation and Failure Searching ................................................................. 122
L. Chen, J. May, and G. Hughes

Fault Tolerant Distributed Information Systems .............................................................................................................. 132
J. Knight and M. Elder

Increasing the Reliability of Three-Tier Applications ........................................................................................................ 138
W. Zhao, L. Moser, and P. Melliar-Smith

Low-Cost Flexible Software Fault Tolerance for Distributed Computing ........................................................................ 148
A. Tai, K. Tso, W. Sanders, L. Alkalai, and S. Chau

Session 3B. Software Reliability Growth Modeling

A Simulation Based Trainer for Software Reliability Modeling ........................................................................................ 160
E. Jones and A. Rembert

Analysis of Hypergeometric Distribution Software Reliability Model .......................................................................... 166
T. Dohi, N. Wakana, S. Osaki, and K. Trivedi

Discrete Equations and Software Reliability Growth Models ........................................................................................ 176
D. Satoh and S. Yamada

Modelling the Fault Correction Process ......................................................................................................................... 185
N. Schneidewind

Session 4A. Testing Internet and Multimedia Systems

An Auto-Generating Tool for the MPEG-2 Formatted Test Data: ATEP .............................................................................. 192
B. Choi, S. Yeum, T. Gwak, and B. Min

Generating Test Cases for XML-Based Web Component Interactions Using Mutation Analysis ................................... 200
S. Lee and J. Offutt

Toward Generic Timing Tests for Distributed Multimedia Software Systems .......................................................... 210
S. Cheung, S. Chanson, and Z. Xu

Session 4B. Formal Approaches

Efficient Deadlock Analysis of Clients/Server Systems with Two-Way Communication ........................................... 222
J. Zhou and K.-c. Tai

Feedback Control of the Software Test Process Through Measurements of Software Reliability ............................... 232
J. Cangussu, A. Mathur, and R. DeCarlo

Tool Support for Production Use of Formal Techniques ................................................................................................. 242
J. Knight, K. Hanks, and S. Travis

Session 5A. Software Testing Experiments

P. Chevalley and P. Thévenod-Fosse

Evaluating the Software Test Strategy for the 2000 Sydney Olympics ........................................................................... 264
K. Bassin, S. Biyani, and P. Santhanam
Session 5B. Coverage and Testing Strategies

Coverage Analysis for Message Flows ................................................................. 276
  N. Aizenbud-Reshef
Revisiting Strategies for Ordering Class Integration Testing in the
  Presence of Dependency Cycles ........................................................................ 287
  L. Briand, Y. Labiche, and Y. Wang

Session 6A. Software Architecture

Automated and Portable Native Code Isolation ................................................. 298
  G. Czajkowski, L. Daynès, and M. Wolczko
Deriving Tests From Software Architectures .................................................. 308
  Z. Jin and J. Offutt
Reliability of Systems of Independently Developable End-User Assessable
  Logical (IDEAL) Programs ............................................................................. 314
  F. Bastani, I.-L. Yen, K. Sung, J. Linn, and K. Rao
Towards a ‘Safe’ Use of Design Patterns to Improve OO Software Testability ... 324
  B. Baudry, Y. Sunyé, and J.-M. Jézéquel

Session 6B. Measurement Field Data and Experience

Accounting for Realities When Estimating the Field Failure Rate of Software .......... 332
  D. Jeske, X. Zhang, and L. Pham
Defect Content Estimation for Two Reviewers ................................................. 340
  C. Wohlin, H. Petersson, M. Höst, and P. Runeson
Measurement-Based Availability of Unix Systems in a Distributed Environment ... 346
  C. Simache and M. Kaâniche
Quantitative Evaluation and Operative Usage of Interactive Systems ............... 356
  A. Pasquini, A. Rizzo, L. Save, M. Sujan

Author Index ......................................................................................................... 362
