# Table of Contents

The 17th IEEE International Symposium on Software Reliability Engineering

**ISSRE 2006**

---

## Welcome from the General Chair and Program Committee Chairs

---

## Organizing Committee

---

## Program Committee

---

## Primary Reviewers

---

## Secondary Reviewers

---

## Keynotes

**Disaster Hardening for Software Systems**

*C.V. Ramamoorthy, University of California, Berkeley*

---

**A Perspective on Software Consumability**

*Carl Kessler, IBM Software Group*

---

**Software Security: Building Security In**

*Gary McGraw, Cigital, Inc.*

---

## Panel Summaries

**Panel I: Anything You Want to Ask About Software Reliability Engineering**

---

**Panel II: The Relevance of Software Modeling to the Software Industry**

---

## Testing I

**Scaling a Dataflow Testing Methodology to the Multiparadigm World of Commercial Spreadsheets**

*Marc Fisher, Gregg Rothermel, Tyler Creelan, and Margaret Burnett*

---

**Memoized Forward Computation of Dynamic Slices**

*Wes Masri, Nagi Nahas, and Andy Podgurski*

---

**Call Stack Coverage for GUI Test-Suite Reduction**

*Scott McMaster and Atif Memon*
# Metrics

Stabilization Time — A Quality Metric for Software Products .................................................45  
*Vibhu Saujanya Sharma and Pankaj Jalote*

Metrics-Based Software Reliability Models Using Non-Homogeneous  
Poisson Processes .............................................................................................................52  
*Kazuya Shibata, Koichiro Rinsaka, and Tadashi Dohi*

Using Historical In-Process and Product Metrics for Early Estimation  
of Software Failures ........................................................................................................62  
*Nachiappan Nagappan, Thomas Ball, and Brendan Murphy*

# Testing II

BPEL4WS Unit Testing: Test Case Generation Using a Concurrent Path  
Analysis Approach ...........................................................................................................75  
*Jun Yan, Zhongjie Li, Yuan Yuan, Wei Sun, and Jian Zhang*

Metamodel-based Test Generation for Model Transformations: An Algorithm  
and a Tool .........................................................................................................................85  
*Erwan Brottier, Franck Fleurey, Jim Steel, Benoît Baudry, and Yves Le Traon*

A Systematic Approach to Generate Inputs to Test UML Design Models .....................95  
*Trung T. Dinh-Trong, Sudipto Ghosh, and Robert B. France*

Using CLP to Automatically Generate Test Sequences for Synchronous Programs  
with Numeric Inputs and Outputs ....................................................................................105  
*Besnik Seljimi and Ioannis Parissis*

# Security

Evaluating the Reliability of Credential Hardening through Keystroke Dynamics ..........117  
*Nick Bartlow and Bojan Cukic*

A Novel SOAP Attachment-Oriented Security Model .......................................................127  
*Xiaoling Cui, Lei Li, and Jun Wei*

An Attack Simulator for Systematically Testing Program-based  
Security Mechanisms ......................................................................................................136  
*Ben Breech, Mike Tegtmeyer, and Lori Pollock*

Monitoring the Security Health of Software Systems .....................................................146  
*Ashish Aggarwal and Pankaj Jalote*

# Testing III

Studying the Characteristics of a “Good” GUI Test Suite .....................................................159  
*Qing Xie and Atif M. Memon*

A Candidate Fault Model for AspectJ Pointcuts ..................................................................169  
*Jon S. Bækken and Roger T. Alexander*

Detecting Redundant Unit Tests for AspectJ Programs .....................................................179  
*Tao Xie, Jianjun Zhao, Darko Marinov, and David Notkin*
Experience Reports I

“Tail-Splitting” to Predict Failing Software Modules — With a Case Study on an Operating Systems Product
Ram Chillarege and P. Santhanam
Adequacy, Accuracy, Scalability, and Uncertainty of Architecture-based Software Reliability: Lessons Learned from Large Empirical Case Studies
Katerina Goševa-Popstojanova, Margaret Hamill, and Xuan Wang
Assessing the Relationship between Software Assertions and Faults: An Empirical Investigation
Gunnar Kudrjavets, Nachiappan Nagappan, and Thomas Ball

Experience Reports II

Tool-Supported Verification of Contingency Software Design in Evolving, Autonomous Systems
Robyn Lutz, Ann Patterson-Hine, and Anupa Bajwa
Testing During Refactoring: Adding Aspects to Legacy Systems
Michael Mortensen, Sudipto Ghosh, and James M. Bieman
Model Simulation for Test Execution Capacity Estimation
Eduardo Aranha, Paulo Borba, and José Lima
Modeling the Performance of Border Inspections with Electronic Travel Documents
Paola Bracchi, Bojan Cukic, and Vittorio Cortellessa

Testing IV

On the Effect of Fault Removal in Software Testing — Bayesian Reliability Estimation Approach
Hiroyuki Okamura, Hitoshi Furumura, and Tadashi Dohi
A State Exploration-Based Approach to Testing Java Monitors
Yu Lei, Richard Carver, David Kung, Vidur Gupta, and Monica Hernandez
Web Application Testing with Customized Test Requirements — An Experimental Comparison Study
Sreedevi Sampath, Sara Sprenkle, Emily Gibson, and Lori Pollock

Modeling I

Combining Replication with Transaction Processing for Enhanced Reliability in J2EE
Lin Zuo, Shaohua Liu, and Jun Wei
Building Phase-Type Software Reliability Models
Hiroyuki Okamura and Tadashi Dohi
Reliability and Performance of Component Based Software Systems with Restarts, Retries, Reboots and Repairs
Vibhu Saujanya Sharma and Kishor S. Trivedi
Static and Dynamic Analysis

Mining Interface Specifications for Generating Checkable Robustness Properties .......... 311
  Mithun Acharya, Tao Xie, and Jun Xu

Effectively Combining Software Verification Strategies: Understanding Different Assumptions .................................................................................................................. 321
  David Owen, Dejan Desovski, and Bojan Cukic

Probe Distribution Techniques to Profile Events in Deployed Software .......................... 331
  Madeline Diep, Myra Cohen, and Sebastian Elbaum

Modeling II

Measuring and Enhancing Prediction Capabilities of Vulnerability Discovery Models for Apache and IIS HTTP Servers ................................................................. 343
  Omar H. Alhazmi and Yashwant K. Malaiya

Queuing Models for Field Defect Resolution Process ..................................................... 353
  Swapna S. Gokhale and Robert E. Mullen

Softgoal Traceability Patterns ......................................................................................... 363
  Jesse Fletcher and Jane Cleland-Huang

Tools

DevCOP: A Software Certificate Management System for Eclipse .................................. 375
  Mark Sherriff and Laurie Williams

CAA-DRIP: A Framework for Implementing Coordinated Atomic Actions ....................... 385
  Alfredo Capozucca, N. Guelfi, P. Pelliccione, A. Romanovsky, and A. Zorzo

Author Index .................................................................................................................. 395
