<tr>
<td></td>
<td>Reliability Modeling of a 1-Out-of-2 System: Research with Diverse</td>
<td>Peter Bishop, Ilir Gashi, Bev Littlewood, and David Wright</td>
</tr>
<tr>
<td></td>
<td>Off-the-Shelf SQL Database Servers</td>
<td></td>
</tr>
</tbody>
</table>
Session 3: Verification & Validation

Corroborating User Assessments of Software Behavior to Facilitate Operational Testing .............................................
    Vinay Augustine and Andy Podgurski

Requirement Error Abstraction and Classification: A Control Group Replicated Study................................................
    Gursimran S. Walia, Jeffrey C. Carver, and Thomas Philip

Prioritization of Regression Tests Using Singular Value Decomposition with Empirical Change Records .................
    Mark Sherriff, Mike Lake, and Laurie Williams

Session 4: Security Testing and Analysis

Testing Security Policies: Going Beyond Functional Testing ........................................................................................
    Yves Le Traon, Tejeddie Mouelhi, and Benoit Baudry

Integrated Software Vulnerability and Security Functionality Assessment.................................................................
    Xiangrong Wang, Hang Shi, Tze-Yau William Huang, and Frank C. Lin

A Comparison between Internal and External Malicious Traffic ..................................................................................
    Michel Cukier and Susmit Panjwani

Session 5: Test Automation

Automated Oracle Comparators for Testing Web Applications ......................................................................................
    Sara Sprenkle, Lori Pollock, Holly Esquivel, Barbara Hazelwood, and Stacey Ecott

On the Impact of Injection Triggers for OS Robustness Evaluation ............................................................................
    Andréas Johansson, Neeraj Suri, and Brendan Murphy

Using Machine Learning to Support Debugging with Tarantula............................................................................
    Lionel C. Briand, Yvan Labiche, and Xuetao Liu

Session 6: Software Security

Statistical Inference of Computer Virus Propagation Using Non-Homogeneous Poisson Processes.........................
    Hiroyuki Okamura, Kazuya Tateishi, and Tadashi Dohi

Applying Software Reliability Models on Security Incidents .....................................................................................
    Edward Condon, Michel Cukier, and Tao He
Session 7: Testing Techniques

Generating Trace-Sets for Model-Based Testing .................................................................
  Birgitta Lindström, Paul Pettersson, and Jeff A. Offutt

Improving Constraint-Based Testing with Dynamic Linear Relaxations-MISSING .........................
  Tristan Denmat, Arnaud Gotlieb and Mireille Ducasse

Intra-Class Testing of Abstract Class Features ........................................................................
  Peter J. Clarke, Djuradj Babich, Tariq M. King, and James F. Power

Session 8: Metrics and Measurements

Correlations between Internal Software Metrics and Software Dependability in a Large Population of Small C/C++ Programs ..............................................................
  Meine J.P. van der Meulen and Miguel A. Revilla

Using In-Process Testing Metrics to Estimate Post-Release Field Quality ................................
  Nachiappan Nagappan, Laurie Williams, Mladen Vouk, and Jason Osborne

Data Mining Techniques for Building Fault-proneness Models in Telecom Java Software ..............
  Erik Arisholm, Lionel C. Briand, and Magnus Fuglerud

Session 9: Software Quality Prediction

Predicting Subsystem Defects Using Dependency Graph Complexities ........................................
  Thomas Zimmermann and Nachiappan Nagappan

Fault Prediction Using Early Lifecycle Data ..............................................................................
  Yue Jiang, Bojan Cukic, and Tim Menzies

Non-parametric Predictive Inference of Preventive Rejuvenation Schedule in Operational Software Systems ........
  Koichiro Rinsaka and Tadashi Dohi

Author Index..................................................................................................................................
