Proceedings

International Symposium on Technology and Society

6-7 July 2001

Stamford, Connecticut

Sponsored by
The IEEE Society on Social Implications of Technology (SSIT)
IEEE Computer Society

In cooperation with
ACM Special Interest Group on Computers and Society (SIGCAS)

IEEE Computer Society
Los Alamitos, California
Washington Brussels Tokyo
# Table of Contents

**International Symposium on Technology and Society (ISTAS 2001)**

## Program Committee

- xi

## Plenary Session

*Michael Loui*

## The ABET Criteria

The EDM and Bee Projects at CMU: Meeting the ABET Criteria (Panel)

*Peter Madsen et al., Carnegie Mellon University*

Teaching vs. Preaching: EC2000 and the Engineering Ethics Dilemma

*Sarah K.A. Pfatteicher, University of Wisconsin-Madison*

## Multidisciplinary Perspectives

### The Role of Discourses in Multidisciplinarity

*Y. Julliard and A. Schwab*

### Teaching Business/IT Ethics

*R. Bellaver and J. Gentry*

### Bridging the Cultural Chasm: Improving Collaboration and Cooperation between the Computer and Social Sciences

*B. Perlman and R. Varma*

### Educating Frankenstein: An Interdisciplinary Approach to Teaching Undergraduate Computing and Ethics

*P. Corey*
Curriculum Development within Computing

Curriculum Issues and Controversies in Computer Ethics Instruction .................................. 41  
  H. Tavani

“Star Wars” Revisited – A Continuing Case Study in Ethics and Safety-Critical Software .......... 51  
  K. Bowyer

Enhancing Computer Ethics by Increasing Collaboration and Peer Learning ...................... 61  
  J. Polack-Wahl

A Conceptual Framework for Teaching Internet Ethics ......................................................... 67  
  A. Bardon

The Humanities within the Curriculum

Humanities and Social Sciences in Engineering Education — Postwar to Postmodern and Beyond ................................................................................................................................. 73  
  F. Lysan

Human-Environment Interactions: An Organizing Principle for the Liberal Arts Component of Engineering Education  
  A. Sacks

Infusion of Ethics and Social Issues throughout Engineering, Scientific and Technical Curricula ....................................................................................................................... 82  
  K. Aiyadurai

An Existentialist Ethic of Technological Application and Assessment in Medicine .............. 87  
  D. Gunn
Economic Issues

Russian Technology and Highly Educated Personnel on the Modern American Market ................................................. 95
L. Bzhilianskaya

Ethical Issues with Target Marketing on the Internet .......................................................... 105
E. Sajdak

Policy Issues

Quelle Est la Clef à la Mondialisation? .................................................. 117
R. Bradley

Ethics, Law and Technology: A Case Study in Computer-Mediated Communication ............................................. 125
T. Flynn

Issues in Expert Knowledge

Formation of Knowledge Societies in the Developing World: Empowerment and Governance
V. Nath

Technical Authority in the Media: Public Debate on the Strategic Defense Initiative ............................................. 137
R. Slayton

Humble Analysis: The Practice of Joint Fact Finding
C. Andrews

Fostering Guarded Trust in Collaborative Filtering Systems
J. Oravec

Dramatic Reading of 'Mourning Becomes Electric'
R. Epstein
Keynote Address

Lee W. Saperstein, Past President, Accreditation Board for Engineering and Technology, Inc.,
Dean, School of Mines and Metallurgy, University of Missouri-Rolla

Ethics Education for Engineers

Ethics Education for Engineers: An Industry Perspective (Panel).............................................................. 149
   John Shelton, Ethics Director NE&SS Surface Systems, Moorestown,
   Kathy McCaffrey, Ethics Advisor, NE&SS Surface Systems,
   and Janet Rochester, Lead Member Engineering Staff (Moderator)

The Engineering Profession

All This and Engineering Too: History of Accreditation Requirements for
Non-technical Curriculum Content in U.S. Engineering Education 1933-2000................................................ 155
   K. Stephan

The Engineer Shall Hold Paramount the Health, Safety, and Welfare of the Public,
Unless, of Course........................................................................................................................................ 162
   P. Vesilind

Engineering Professionalism and the Imperative of Sustainable Development............................................. 168
   M. Manion

On Subjectivity in Focal Engineering.............................................................................................................. 177
   G. Moriarty and Y. Julliard

History of Technology

Early Bell System/Independents Relationships .......................................................... 187
   R. Bellaver
Safety in the Workplace of 1904 ................................................................. 192

J. Reitman

Opportunities and Challenges for the Teaching of the Humanities and Social Sciences to Engineering Students

Moderator: David Morton, IEEE History Center at Rutgers University

Standards-Based Assessment of Humanities/Social Science (H/SS) Programs in the Liberal Education Division

L. Schachterle

Re-inventing the Humanities and Social Sciences in Engineering Education under the ABET 2000 Accreditation Standards

K. Neeley

J. Herkert

The Problem of Changing Values in Managerial Development through Open Education and Distance Learning Programs for the Organizational Postmodernity .............................................. 197

J. Vargas Hernández

MEP: Towards Faculty Development ................................................................. 200

C. Carbonell

Development and Assessment of the Innovative Curriculum: Required Online Courses

S. Fredricks, G. Greenberg, and B. Dolan

Ethical and Legal Issues Related to Emerging Technologies: Reconsidering Faculty Roles and Technical Curricula in a New Environment ..................................................... 203

T. Flynn and S. Ross
Shaping the Future of American University Education: Conceiving Engineering a Liberal Art .......................................................... 213

R. Barke, E. Lane, and K. Knoespel

Engineering as Social and Ethical Practice: The Role of New Course Accreditation Requirements ............................................. 221

S. Johnston and D. Eager

Assessment Study of Communication Modes and Content Used by Engineering Students in a Special Project Course (Panel)

G. Del Cerro, J. Le Mie, E. Mar, S. Wei, C. Weiman, and A. Wortzel

Applying ABET Engineering Criteria 2000 to a German Electrical Engineering Program .................................................. 226

Y. Julliard, C. Meinecke, and A. Schwab

Social Informatics and Service-Learning as Models for Teaching Ethical and Social Issues in Science and Engineering ........... 235

W. McIver, Jr. and T. Rachell

Toward a New Era for Chemical Engineering Education: Making Environmental and Ethical Issues Fundamental ........... 244

A. Hoots

Professional Issues in Software Engineering Curricula: Case Studies on Ethical Decision Making .................................... 252

E. Georgiadou and P. Oriogun

Author Index .................................................................................. 263
