2011 International Symposium on Ubiquitous Virtual Reality
ISUVR 2011

Table of Contents

Message from General Chairs...................................................................................................................vii
Message from Program Chairs ................................................................................................................viii
Organizing Committee................................................................................................................................ix
Technical Program Committee...................................................................................................................x
Advisory Committee...................................................................................................................................xi
Steering Committee ...................................................................................................................................xii

Invited Papers

PhoneGuide: Adaptive Image Classification for Mobile Museum Guidance ...........................................1
    Oliver Bimber and Erich Bruns

Computer Vision for 3DTV and Augmented Reality .............................................................................5
    Hideo Saito

Mirror Worlds: Experimenting with Heterogeneous AR .........................................................................9
    Alex Hill, Evan Barba, Blair MacIntyre, Maribeth Gandy, and Brian Davidson

Session 1: Connecting REAL and VIRTUAL

Conceptualizing u-Content Ecosystem in Ubiquitous VR Environments .............................................13
    Yoonsoo Oh, Taejin Ha, Changgu Kang, and Woontack Woo

Estimation of Illuminants for Plausible Lighting in Augmented Reality .............................................17
    Seokjun Lee and Soon Ki Jung

Real Time Vertex Based Deformation in Training Simulator .................................................................21
    Irshad Ahmad and Suziah Bt Sulaiman

On Visual Artifacts of Physics Simulation in Augmented Reality Environment .......................................25
    Sinyoung Kim, Yeonjoon Kim, and Sung-Hee Lee
Session 2: Connecting PEOPLE

Collaboration between Tabletop and Mobile Device .................................................................29
  Jooyoung Lee, Ralf Doerner, Johannes Luderschmidt, HyungSeok Kim,
  and Jee-In Kim

Time-Efficient Data Congregation Protocols on Wireless Sensor Network ..................................33
  A.K.M. Muzahidul Islam, Koichi Wada, and Wei Chen

mARGraphy: Mobile AR-based Dynamic Information Visualization ........................................37
  Ahyoung Choi, Youngmin Park, Youngkyoon Jang, Changgu Kang,
  and Woontack Woo

Barcode-Assisted Planar Object Tracking Method for Mobile Augmented Reality ..........................40
  Nohyoung Park, Wonwoo Lee, and Woontack Woo

Session 3: Connecting HUMAN and COMPUTER

ARWand: Phone-Based 3D Object Manipulation in Augmented Reality Environment .........................44
  Taejin Ha and Woontack Woo

Cartoon-Like Stylization for Character Animation .......................................................................48
  Ji-yong Kwon and In-Kwon Lee

Effect of Active and Passive Haptic Sensory Information on Memory for 2D Sequential Selection Task ............................................................52
  Hojin Lee, Gabjong Han, In Lee, Sungchoon Yim, Kyungpyo Hong,
  and Seungmoon Choi

Graphical Menus Using a Mobile Phone for Wearable AR Systems ........................................55
  Hyeongmook Lee, Dongchul Kim, and Woontack Woo

Author Index .............................................................................................................................59
