M2Vis Remarks

Non-visual communication is on the increase. Indeed, information can be presented by sound, touch, or potentially any of our senses thereby utilizing our ability to perceive information in multisensory ways. Not only are these environments useful for accessibility, but by using different modalities together the compound presentation can be more understandable (one modality reinforces the other), and the diverse modalities may enable information to be perceived in situations where visual display devices cannot be used effectively (such as when using small screens or remote operation). In addition the user may more easily perceive the information through one sense as opposed to another. Consequently, there are various terminologies for ‘the perception of information through non-visual modalities’, including perceptualization, conceptualization, sensualization and non-visual Visualisation. This is the 2nd International Symposium on Non-visual and Multimodal Visualisation. These papers cover sonification, the application of haptics for Visualisation and multimodal presentation.

Jonathan C. Roberts and Bowen Loftin, Conference Chairs

M2Vis Acknowledgments

We would like to thank the many reviewers of the papers, for their careful, considerate and timely reviewing, without which the symposium would not be possible. We also acknowledge Keith Nesbitt, Bill Kowalik and Chris Harding for their help. We also thank Ebad Bannissi and Anita D’Pour (of GraphicsLink) for their assistance in making this symposium a reality.

Jonathan C. Roberts and Bowen Loftin, Conference Chairs

M2Vis Reviewers

Jonathan C. Roberts  Davide Rocchesso
Bowen Loftin  Chris Harding
Vittorio Scarano  Ronald Van de Berg
Matt Adcock  Andy Brown
Bernard D. Adelstein  Irani Pourang
Carlo Alberto  Andrew Crossan
Antonio Bicchi  Bill Kowalik
Jan van Erp  Bridget Baird
Vincent Hayward  Andy Hunt
Joseph Kaye  Keith Nesbitt
Anatole Lecuyer  Domenico Prattichizzo
Sile O’Modhrain  Steven Wall
Roope Raisamo  Peter Kenny
