

## **Message from the Program Chair**

---

The International Workshop on Advanced Information Systems for Enterprises (IWAISE'08) is bringing together academic and industrial researchers and practitioners on information systems.

The workshop features two keynote addresses from invited speakers, two tutorials and 10 presentations. The submitted papers were evaluated for their contribution, originality, and significance to the domain of information systems. Of the 23 submitted papers, 10 were finally accepted.

I wish to thank the members of the program committee and the external reviewers for their work in evaluating and scoring the papers and their contributions to the final stage of the decision making process.

I hope that the technical program will meet your expectations and I'm looking forward to see you in Constantine for some fruitful discussions and exchanges.
